No. 320 Clay St., (up Stairs) Below Battery,

SAN FRANCISCO.

TERMS OF SUBSCRIPTION:

$2. FOUR ONE YEAR, $4; FOR SIX MONTHS, will be sent gratis. For Five New Subscribers, a Sixth copy $1 additional per year. When payments are delayed six months, for every year delay will be charged, and $1 each year also, City Subscribers delayed thereafter.

papers for subscribers, delivered through the Post Office. All from this office are sent free of postage.

REMITTING MONEY.

Our Subscribers can always send Money BY MAIL safely. Register at the Post Office and the money will come direct and sure and AT OUR RISK.

LIST OF AGENTS:

WELLS, FARGO & CO., at all their Offices in this State.
POSTMASTERS in all places, are requested to act for us.
WHITE & BAUER, Washington Street, San Francisco.
WAITE, BURNNELL & CO, Seedmen, High Holborn, London.
FREDERIC CONNER, Esq., News Agency, Paris.
BRYDON & CO., Brisbane, Australia.
DAVID CLARKE, Chemist, Warwick, Queensland.

TERMS OF PAYMENT.

☞ Advertisements and Subscriptions are all payable in Advance.

☞ Our full ADVERTISING RATES will be found on the SEVENTH PAGE.

All Letters on Editorial Matters to be addressed to COL. WARREN, Editor.

☞ All Letters on Business connected with the Office should be addressed to

EUROPEAN.

From our Special Correspondent.

PARIS, January 2d, 1878.

THE CROPS GENERALLY—PHYLLOXERA—GOVERNMENT AID.

The only two crops that have left nothing to desire in the way of yield during 1878, are forage and hemp. Tobacco, in point of abundance, was good, but the quality is inferior; the wine crop is on the contrary excellent in quality, but deficient in quantity; respecting the latter, the phylloxera must be taken into account, and which has now destroyed or attacked, one-fourth of the vineyards of France. The wet season has told on wheat, not so much on barley and rye; oats, maize, and buckwheat are a good ordinary, but in no case was the harvesting effected under sound conditions. The beet and potato crops have proved very unsatisfactory, and that of hops and flax, leave much to desire; the same observation applies to olives and silk. Prospects are at present very bright, however, for French farmers, in the sense, that the new government is actually occupied in deepening rivers, widening and uniting canals, making numerous local railways, and adopting measures to diminish inundations, and to regulate the distribution of water for irrigating purposes. The government has organized an effective sanitary police, to guard against the introduction of diseased stock from foreign countries, and it has done all in its power, legislatively, to avert the progress of the scourge, phylloxera, but not with much success.

THE CATTLE PLAGUE.

The reappearance of the cattle plague in Germany, has at once been met by the usual self-protecting measures on the part of France, over whose eastern frontier, only pigs, and slaughtered meat from Austria, are allowed to cross.

VALUE OF FERTILIZERS.

Respecting the important display of fertilizing matters at the Exhibition, what most struck the visitor was the absence of all show to attract clients. Manufacturers remained content to demonstrate, that the preparation of artificial manures was not behind any chemical or mechanical industry; that the raw materials of these manures, were sought for with intelligence, transformed and combined in a rational manner, with no secrets to conceal, and sold following analysis, and at prices proportioned to intrinsic value. The proofs were conclusive, of the great development in the extraction in France of mineral fossils, in Belgium, of the refinement of chalk phosphates; of the general preference for dissolved and pulverized guano, in place of that fertilizer in its crude state. Serious progress was shown to have been made in the torrification of animal refuse. However, the treatment of night soil, its rational utilization, leaves very much to be desired. It cannot but have also struck the observer, how much commerce stood in need of a common chemical language, for the various preparations which restore to the soil, azote, phosphoric acid, and potash—these three terms are in use on the Continent to express the value of a fertilizer, while England, ammonia, phosphates, and the salts of potash, are the expressions employed.

MANUFACTURE OF FERTILIZERS.

It is only since 1840, when Liebig laid down the imperious law of restitution, that a veritable revolution ensued in the trade and manufacture of commercial manures. In France alone three milliards of francs represent the annual sum employed in the fabrication, etc., of fertilizers. France is also the richest country in the world in fossil phosphate of lime, that employed in agriculture being chiefly derived from the tertiary formation in the form of phosphorite, and as nodules, in the secondary strata; the latter are found in the neighborhood of Lille, Mans, and in the departments of the Meuse and Ardennes, the former are chiefly obtained in Areyron, the Lot, Herault, Farm and Garonne, Beziers, etc. One firm, Desailly, commenced in 1850 to extract nodules in the Ardennes; since then its operations have extended to other parts of France, so that at present it employs 1,000 workmen, and produces 20,000 tuns of phosphate of lime yearly, of which one-third is exported. Some of the phosphates contain from 28 to 33 per cent. of phosphoric acid, and are largely employed in the preparation of superphosphates. The value of the mineral phosphates depends on their mechanical fineness, or pulverization; for the assimilation of a fertilizing matter is more rapid, as the points of contact are more numerous with the dissolving agents of the soil—water, carbonic acid, and organic matter. But there is a limit to the economic action of minerals in the shape of impalpable powder. Thus a tun of triturated feldspar rock, containing 10 per cent. of potash, and costing 66 francs, will be infinitely inferior to the salt easily obtainable in a cheaper and more concentrated state.

[TO BE CONTINUED.]

Foreign Correspondence.

CAIRO, EGYPT, Dec. 6, 1878.

EDITOR CALIFORNIA FARMER—*Dear Sir:*

Before I left California in the fall of 1877, I promised a Southern California fruit grower that I would make the necessary enquiry, at Smyrna, if I would visit that place respecting the method of curing the fig by which the hardness that characterizes the fruit as preserved in California may be prevented.

I took much pains to inform myself as to the climate, soil and the cultivation of the fig and visited the district where the fig orchards are, in order to test the reliablity of the information given me at Smyrna. The first fig orchard I saw was fifty miles from Smyrna near the ancient city of Ephesus. This was on rich alluvial ground near the sea level and beyond this for many miles in a narrow valley the trees extend. The Niles on either hand are of limestone. The climate there is similar to that of San Bernardino with about the same amount of rainfall. There is no rain from April to November and this year there was no rainfall up to the 1st of December. The trees are planted about forty feet apart, although two trees are planted together. The reason given for this was that in case one should fail to grow or should die the other would ensure a tree. These are all female or pistilate trees. The natives regard the staminate trees as wild figs and are only suffered to grow around stone walls and waste places. No irrigation is used. Only the fruit grown in the months of July, August and September are preserved. The first crop are used as fresh figs or allowed to go to waste as not being sweet enough to preserve. About the first of July children gather the green figs from the staminate or wild trees and two or three are fastened to each end of a string about three feet long and three or four of these strings are thrown into each tree where they lodge in the branches, without this they say, the fruit will not come to perfection but drop immature.

GROWING FIGS IN SMYRNA.

The fig is allowed to hang upon the tree until it falls spontaneously, it is then gathered from the ground and laid in the sun until it has the doughy feel which distinguishes the fruit when packed, it is then placed in boxes and sent to Smyrna where it is sorted into grades and packed in boxes. In packing the packer has near him a dish of sea water with which he keeps his fingers wet. These are the practical facts. It is well known to botanists that the flowers of the fig tree are in a drupe (that becomes the fig), that the staminate flowers and the pistilate ones are on different trees, that the fertilization is affected by insects flying from one to the other and entering at the small opening at the top of this drupe carrying the pollen of the one to the pistils of the other. This may be affected by planting a few of the staminate trees among the others though they will not bear fruit their vicinity is necessary to enable the others to do so. The Smyrna fig is a large greenish, yellow fruit, and when suffered to remain on the tree until it falls spontaneously very sweet. If it ripens too early, before the sun has become sufficiently powerful, it dries hard and tough like the figs usually seen in California. I have seen the blue fig grown and cured on one of the Islands of the Grecian Archipelago as soft and sweet as those of Smyrna. If the development of sugar is sufficient, the fig will dry hard except it be exposed too long to a hot sun. If they are removed too soon before the water has been sufficiently evaporated they will turn sooner. I have no doubt that some section of the interior valleys of California will be found to be adapted to the growth of the fig in as great perfection as that of Smyrna and its proper cure would add greatly to the permanent worth of California.

I have sent home to be distributed among the melon growers, the seeds of the Cassabar melon of Smyrna. It may be no new thing there though I have never seen it. It is a large and luscious melon and has the merit of keeping late in the autumn and winter.

I send also a few seeds of a large melon grown in the greatest perfection on the Ionian Island, of Cephalonia. They are larger though inferior in flavor to the *Cassabar*, the rhind of both is corrugated longitudinally.

Yours,
J. D. B. STILLMAN.

NOTES FROM SAN DIEGO COUNTY.

SAN DIEGO, January 1, 1879.

COL. WARREN—*Dear Sir:*

The magical onward course of time, at this writing, confronts us with figures, 1879.

The old year has to our country at least closed on scenes of peace, and I might say on one of great prosperity to our country at large.

The main spring of our vitality in production—namely, the farmers of the United States have in conjunction with Nature produced a bountiful crop—this of course affects the money arteries of our financial body and sends the coin circulating through our money marts with energy, in order to pay for and move the same to the most desirable markets. A country based on the corner stone of agriculture for sustenance and prosperity can not possibly financially go down—but I must return to matters pertaining to the heading of this letter—namely, "Notes from San Diego County."

FIRST RAIN OF THE SEASON

Commenced on Christmas eve, and right merrily it was greeted by old and young (for be it known) in this county especially, it is our only bonanza—having no very great mines, railroads, or canals to aid us in developing our resources—but give us say 8 to 10 inches of rain, and this county of Southern California with about 16,000 inhabitants can make a very respectable showing in exports, as the following table will show.

Exports of San Diego County for the year 1878, compiled from reliable sources.

Wheat	1,467,466	pounds.
Corn	41,230	"
Barley	21,149	"
Buckwheat	50,000	"
Pop Corn	1,500	"
Beans	20,138	"
Peas	2,215	"
Potatoes	600,250	"
Honey in Comb	959,575	pounds
" Strained	540,700	"
Total Honey	1,499,275	"
Beeswax	24,700	"
Wool	691,503	"
Hides, Salt and Dry	111,500	"
Skins and Pelts	40,550	"
Manufactured Leather	3,560	"
Tallow	23,000	"
Salt	91,475	"
Dried Fish	283,600	"
Dried Abalone Meat	90,600	"
Abalone Shells	146,983	"
Whalebone	850	"
Guano	43,000	"
Sumac	5,063	"
Whale Oil	17,895	gallons.
Fur Seal Skins	$12,000	
Saddle Mats	7	bales.
Oranges	13	boxes.
Limes	11	"
Olives	3	"
Grapes	6	"
Guavas	1	box.

In addition to our wheat exported, we have yet here in store about same quantity, giving a total total of about 1,600 tons for export.

The total amount of our wool crop is about a million and a third pounds.

HONEY—HONEY—HONEY.

To think that this county alone has exported over 787 tons, seems marvellous, and plainly shows the adaptability of our section for the production of the choicest honey produced in the world, of this large amount forwarded to Eastern and European markets, the well-known mercantile house of Steiner, Klauber & Co., San Diego City, have purchased direct from the producers, for cash, about 300 tons of this amount.

PROSPECTS FOR THE NEW YEAR.

The glorious rains now descending gives promise that our showing of production for 1879, will be at least one-third larger in all articles of export than during the past year.

PERMANENT IMPROVEMENTS

To a considerable amount in dollars have been made during 1878 in San Diego City. The erection of several brick buildings on our main business street. Several fine private residences, with costly work done on our wharf by the Pacific Coast Steamship Company, have all been done under the promise of stability for our future trade and prosperity.

OUR DAILY NEWSPAPERS.

The San Diego *News* and *Union*, the former edited by Mr. J. M. Julian and Mrs. Katie M. Baker; the *Union* by Douglas Gunn, Esq., are really deserving of patronage at home and abroad for their painstaking efforts in closely guarding the interests of our county in all matters pertaining to its advancement.

Wishing a bright year in patronage for the FARMER, with the best of health for the Editor. I must close.

JOHN C. DALY.

A New and Wonderful Grass.

The West India Green Valley Grass yields from 12 to 14 tons hay per acre, and from 3,000 to 5,000 bushels of roots. The grass is preferred by stock to any other, and the roots make the best of feed for all kinds of stock, hogs in particular.

This grass is raised and sold by R. F. Rix & Co., of Hamburg, Iowa. The growers offers good references as to the nature, character and value of this new grass.

We have received a photograph of a bunch of this grass and its roots, also the seed, which can be seen at the FARMER Office.

Parties intending to plant any trees the coming spring should read the advertisement headed "Evergreens & Forest Trees" published in another column, by George Pinney.

THE ARIZONA TRADE.

A few short months ago, and Arizona stood as the great unknown region, over whose trackless deserts and timberless mountains the foot of the traveler had seldom traversed, but where the Indian and renegade Mexican held undisputed sway.

To-day, behold Arizon within our grasp, at our very feet, stretching out her arms, inviting to the feast, and bidding us revel and make merry with her abundant riches and valuable resources. Rejoice California, to-day, that it is our great privilege to control all the great advantages, the future promises, for this vast Territory. The value to our State is incalculable. Its mineral and agricultural resources are fast becoming known to us, and the most sanguine enthusiast has not over estimated them. What were, heretofore, known as trackless wastes, become fertile, producing vallies; timberless mountains, on closer inspection, reveal verdure and vast forests; whilst the rocks and fissures show minerals and traces of nearly every know precious metal. Gold, silver, iron and coal are found in abundance, and the brightest prospect for a high civilization shows itself from one end of the Territory to the other.

Arizona, as a mining country, is now known the world over; but, agriculturally it has been but little considered, the soil has been tested and has spoken and let the fact go forth, that not only will Arizona rank first as a mineral producing country, but the time is not far distant when other States will have to look to their laurels when compared to it, in the production of fruits and cereals.

The question then arises, who shall control this great trade? By right it belongs to California. Shall the San Francisco merchants allow this great treasure to be wrested from them? Let them arise to the emergency, make a final and determined stand against Eastern invasion, for there your enemies are resting on their arms. It rests in your hands to-day to protect yourselves, for if this trade is lost, you alone are to blame.

This apathy which has prevailed amongst our business men must vanish at once, and now life, seasoned with the old time energy must take its place, and the war cry of dull times will be buried in oblivion.

The eye of Eastern capital is directed toward this very land, all your movements and every action is watched and commented upon. At this very moment Eastern capitalists and merchants are studying a way by which the trade of Arizona and Mexico, (for these interests are identical), can be controlled, and whilst the merchants of this Pacific Coast, and especially of San Francisco, are looking indifferently upon this matter, the East is supplanting us foot by foot.

Everything has been done to facilitate and bring these things into your hands, and without a dollar of cost to you, you have been placed within hand shaking distance of this valuable Territory, and now look to it.

The all seeing eye of that gigantic power, our Railroad Builders, grasped the situation at a glance, saw Arizona as it is and without weighing the cost, plunged boldly into, what then appeared, an insurmountable project, and lo, after crossing rough and rugged mountains, pierced with tunnels, and expensive engineering work, and traversing sandy deserts, to vegetation unknown, they are at Arizona's door, knocking to be admitted; a few months more, and on, half across the Territory. All accomplished by the indomitable will, untiring energy, and cool calculating, perseverance of the men, of whom California should be proud to-day to claim as citizens, men whose great aim has been to build up California and make it an empire known and honored world wide.

No fawning and begging before Congressional lobbies, no never to be fulfilled promises, no threats of rival cities, but work, solid, substantial work, with their own brains, their own money, building a road through a country, miles and miles of which can never return them the slightest value. Have they not the welfare of the coast at heart, and are not all their interests centered here? And you, merchants of San Francisco, have you no word of praise? And you, the people of the Pacific, what have you to say?

This road is for you, for the benefit of the coming generation, for California now, and in the future, and yet you sit idly looking on, hurling curses and insinuations, whilst the benefits these Railroad Builders have thrown in your laps are falling to the ground. True, the coast will be benefitted in spite of your whining and fault-finding, but how much quicker and better with your hearty co-operation. Arizona and Mexico will seek a market, and wherever that market may be, will extend and exchange products for products. Let the Pacific States, and California particularly, be that market; and, however, many sacrifices we may now make to control the Arizona trade, they will all be forgotten in the grand commercial reaction that will be sure to follow.

In conclusion, it becomes our duty to look this matter square in the face, there is not a merchant, farmer, or mechanic, who can afford to sacrifice what will be of lasting benefit to this coast, and any lack of duty or neglect of business tact to secure the undivided trade of Arizona, would cause a loss to us all which would be incalculable. We are now on the eve of a great commercial upheaval, a tidal wave of prosperity is soon to sweep through the land, and California must reach the pinnacle of her glory, when this event transpires.

AJAX.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have GRAIN to sell and to keep.

THE GREAT HARVEST YEAR.

EDWARD EVERETT HALE.

[The harvest of the year 1878 is the largest harvest which ripened in America. The exports of food are much greater than ever before.]

The night the century ebbed out, all worn with work and silo,
The night a twentieth century, all fresh with with hope, came in,
The children watched, the evening long, the midnight clock to see,
nd to wish one another "A Happy Century!
ay climbed upon my knee, and they tumbled on the floor,
And Bob and Nell came begging me for stories of the war.

But I told Nell that I could tell no tales but tales of peace—
God grant that for a hundred years the tales of war might cease!
told them I would tell them of the blessed Harvest Store,
Of the year in which God fed men as they ne'er were fed before;
For, till that year of matchless cheer, since suns or worlds were made,
Never sent to other lands such gifts of Daily Bread!

The war was done, and men began to live in peaceful ways,
For thirteen years of hopes and fears, dark nights, and joyful days.
If wealth would slip, if wit would trip, and neither would avail,
"No! the seed-time and the harvest," saith the Lord, "shall never fail."

And to all changes of ups and downs, to every hope and fear.
To men's amaze came round the days of the Great Harvest Year,
When God's command bade all the land join heart and soul and mind,
And health and wealth, and hand and land, for feeding half mankind.

So hot the noons of ripe July, that men took day for sleep,
And when the night shone clear and bright, they took their time to reap;
Nor can the men cut all the grain when hungry worlds are fed,
So the ready Ruths and Orpahs are gleaning in their stead.
All through the heated summer day the Kansas maidens slept,
All through the night, with laughter light, their moonlight vigil kept;
From set of sun the kindly moon until the break of day
Watched o'er their lithsome harvest-work, and cheered them on their way,
They drove their handsome horses down, they drove them up again,
While "click, click, click," the rattling knives cut off the heavy grain:
Before it falls, around the straw the winding wires wind,
And the well-ordered sheaves are left in still array behind.
So laughing girls the harvest reap, all chattering the while
While "click, click, click," the shears keep their chorus, mile by mile;
And lazy morning blushes when she sees the harvest stands
In ordered files, those miles on miles, to feed the hungry lands.

Far in the South from day to day a living tide swept forth,
As, wave on wave, the herds of kine flowed slowly to the North.
Great broad-horned oxen, tender-eyed, and such as Juno loved,
In troops no man could number, across the prairie moved;
Behind, along the wavy line, the brown rancheros rode,
From east to west, from west to east, as North the column flowed,
To keep the host compact and close from morn to setting sun,
Nor on the way leave one estray, as the great tide poured on.
A fair-haired Saxon boy beside commanded the array,
And as it flowed along the road, I heard the stripling say,
"'Tis God's command these beeves shall stand upon the Cheviot Hills,
The land to feed where rippling Tweed the lowland dews distills."
So the great herd flows Northward, as the All-Father wills.

—*Harper's Magazine for January.*

HORSE BREEDING.

THE QUEEN'S PLATE.

The returns which were published at the close of last month with regard to the running for the Queen's Plates this year show that notwithstanding the alteration in the rules, commenced by the late Lord Ailesbury, and continued by the present Master of the Horse, the popularity which they enjoyed about fifty years ago has almost died out. For the fourteen prizes offered in England this season only thirty-nine horses competed, and three were carried off by a walk over; and in Ireland only forty-nine horses competed for the seventeen prizes, two being carried off by a walk over. The fact of the matter seems to be that so much money is now-a-days added to races run over short courses that owners of horses do not think it worth while to compete for the Queen's Plates, which, with only one exception, are not worth above two hundred guineas.

Under such circumstances it may fairly be concluded that the money offered for these Plates is almost thrown away, as little or no advantge accrues either to breeder or racer, and if no better application of the fund can be found it would be as well in her Majesty's pocket.

It has been proposed that with regard to the money which is now devoted to Queen's Plates that it should be used, not for the purpose of racing, but more directly to that of breeding, and that the Master of the Horse should divide it into prises for sires and mares, which should be offered at the annual meeting of such associations as the Royal Agricultural, the Royal Irish, and the Highland Agricultural.

Such an arrangement could be very easily carried out in detail, and would meet high approval, and we believe would work well; but if it were possible we should prefer to see the more ambitious proposal carried out in the formation of stallion depots, such as those which have been so successful in France. It has been erroneously supposed by many people that the French Government attempt to breed horses in their depots; such is not the case, as they merely collect a certain number of sires in each district and place them at the disposal of breeders with a guarantee of their soundness and general suitability.

Such a plan would, doubtless, find much opposition in the United Kingdom, as hitherto horse breeding has been left entirely in the hands of private enterprise, yet we are sure in the long run it would be of immense advantage to breeders and farmers, especially in Ireland, where really good sound sires are difficult to procure.

Undoubtedly horse breeding pays extremely well, especially at the present high prices obtainable for anything decent, and we shall hail with pleasure any measure or proposal tending to make this branch of farming more popular.

BROOD MARES.

What is wanted is a better class of mares and also of stallions. The former can be secured in two ways—first, by discouraging and even prohibiting export of mares, except under a heavy duty; secondly, by utilising mares more largely for cavalry remounts, so as to keep them in the country, and then turning them to breeding purposes in their later years. It has been suggested by the Earl of Charlemont, in his evidence before the Select Committee of the House of Lords which reported upon the supply of horses in Great Britain in 1873, that if the Government would buy their remounts (at all events mares) at three years old instead of at four, they would anticipate foreign buyers, and so keep animals of this class in the country. Foreigners do not buy till horses are four years old. It has been replied that the keep of each remount, from three to four years old—by which time they would be sufficiently mature to stand work—would exceed the saving on the average purchase price. So it would, slightly, but a far better class of animal would be secured, and *per contra*, the supply being cut off to foreigners, hostile cavalry would not be so well mounted, and our own would be not only positively but also relatively improved as compared to their enemy's; thus we should in the long run gain back our money's worth in the relative quality of our country as compared to continental rivals. Lord Charlemont and other large breeders in Ireland relate that after all Government buys a large number of three-year-olds as four-year-olds (at four-year-old prices), being deceived as to their age by the practice of drawing the pair of nipper teeth on each side of the central nippers; the latter having already become permanent, superseding the milk teeth in the same place; the former, after the third year, are in the process of absorption by the permanent teeth. By drawing them, the permanent teeth are made to come more easily, and the horse appears as if he had advanced to the age at which the teeth in question are naturally shed. This deceit is too often practised; an experienced eye may discover it, from a want of proper appearance of wear and growth in the other teeth; but it not unfrequently passes undetected. The loss of Government buyers in paying four-year-old prices for such three-year-olds would at least be saved if Lord Charlemont's suggestions were adopted; and this additional saving would have to be set against the outlay in a year's longer keep before use.

QUALITY OF SIRES.

But there is the quality of the sire, as well as of the dam, to be considered; and here again we have a valuable suggestion from the same authority. This is that sound stallions should be "certificated" by Government, and that such certificated sires should be subsidised by Government, on condition of farmers being allowed to breed from them at a greatly reduced fee. This would make the chance of production of a good foal greater to the farmer and at a less cost than if he bred from some unsound sire at a higher fee. In return, it is suggested that Government should have the option of all stock of such certificated sires (where the farmer has paid the reduced fee) at a fixed price at a certain age. If the farmer did not think it would be worth his while to engage beforehand to sell his stock at this fixed price if called upon, he would only have to decline the benefit of the reduced fee and to pay full price.

VALUE OF SOUND STOCK.

Horse breeding from sound mares and sires can be made highly remunerative. It is the absence of good mares and use of sires bearing inherent defects which cause stock to be so inferior as not to recoup the farmer for his outlay. If these difficulties can be got over in some such manner as suggested by Lord Charlemont, Ireland may yet regain her former position in horse breeding, and the nations generally be benefited by her regeneration in this respect. Lord Charlemont does not speak from bare theory, but from practice, coupled with success. At his stud farm at Roxborough he keeps some 30 to 35 brood mares. These are selected carefully for their shape and constitution, it being his maxim that all constitutional merits and demerits are inherited from the dam, while courage and action come from the sire. We believe it is a fact that in five years past only three foals of all his large produce have been destroyed for malformation; we have known many a stud in which the percentage of malformations has been four and five times as much per cent. A Yorkshire breeder and judge of horses recently asked him—"What do you do with all your bad ones? They do not appear in the sale list nor in the pasture." The answer was—"There are next to no bad ones, in consequence of the care bestowed on the selections of sire and dam." What is now wanted is some action on the part of Government which will secure the retention of the best mares in that country and discourage the use of inferior sires; and the remedy lies in the suggestions here stated. If they can be adopted we may yet see a new phase of "justice to Ireland" in the revival of horse-breeding in that country, a step which would benefit our national military resources, while improving at the same time the fortunes of the sister isle.—*The Farm.*

Butter was first manufactured by the Scythians and Thracians, and was then used as an ointment and as a medicine.

New York owns nearly sixteen per cent. in value of all the milch cows in the country.

MILL BUILDING IN MINNEAPOLIS.

The *Pioneer Press* has the following in regard to the present and prospective additions to the milling capacity of the city of Minneapolis. This will put Minneapolis so far ahead of any of its competitors as the first milling point in the United States that no other place will lay claim to the honor.

There have been or are being constructed the present year the following flouring mills, most of which are running or about ready for business:—

	Run of Stone.
Washburne "B"	30
Pettit & Robinson	30
Anchor	12
Morrison	20
Humboldt	15
Pillsbury's additions	6
Total	123

In the most of these the Hungarian process is being introduced in whole or in part, which adds to the expense, so that an estimate of $7,000 cost for each run of burrs may be a safe one. This will bring the investment in flouring mills at that point alone for the present year up to the enormous amount of $686,000. There are to be built the coming year, at the falls, the following flouring mills:

	Run of Stone.
Washburn "A"	60
Morrison & White	25
Hardenburg	15
Warner	15
Fletcher	20
Total	135

Work on all but the Warner mill is already under way, and for this building arrangements have already been made in the wall of the big Washburn elevator, which it joins on the east. Nor are these all the mills to be constructed here. There are three entirely new enterprises which have never been mentioned in print, which are almost certain to go forward, and which will very largely add to the milling capacity of the city; but laying these aside, and figuring on those sure to be built, and we have at $7,000 per run, an expenditure in flouring mills alone, for next year, of $945,000, or almost a round million.

A New Source of Wealth.

We have mentioned the vegetable *ramie* in these pages before. Now it is beginning to attract public attention. The *Herald* says: "Soon after the close of the late civil war the attention of certain planters in the South, especially Louisiana, was directed to a new fiber known as *ramie*, which it was alleged would, in its production to the acre, be more profitable than cotton, and in its use as a textile supply the place of jute, hemp, flax, and other similar materials. Experiments were made, and still continue in various portions of the South, and the results generally are described as favorable. Thus far, however, it appears that our inventors have not been successful in making machinery whereby the various productions of the fiber—as, for instance, in the construction of paper, coarse cloth, carpet and bagging—can be economically utilized. The concurrent testimony is to the effect that *ramie* is a hardy, easily grown plant, and under certain conditions easily manipulated; that its most important uses are in the germ, and are only awaiting the developments of experience, art, and science, to be made available among the larger industrial resources of the United States. If it be true that from twenty-eight to thirty millions of dollars are annually expended by us for foreign fibers, and that we have within our grasp an equivalent of these materials, surely the country that produced the cotton-gin will not be long in finding the way to add value to a new product, and make for it a market."

The Profits of Wheat Raising.

J. H. Drake & Co, of Chicago, furnish the following information to the *Chicago Tribune*: "In time past, good wheat at 45s in England, $1 20 in New York, and $1 here, were considered safe prices. By reason of cheapened transportation, the marvelous increase in production, and the wonderful inventions in labor-saving machinery, the profit to the spring wheat producer, who has gathered 15 to 25 bushels of wheat from lands costing $3 to $5 per acre, has been an industry so lucrative that it has attracted capital and immigration. It is the fate of commerce in any highly lucrative industry that it attracts capital and labor until supply has overborne demand, and wheat raising, it appears to us, is approaching that period of over-supply, in common with other productions, so that we must lower our estimate of safe values, and barring crop disasters, the figures we have named above can no longer be considered as in years past."

Lucern or Alfalfa in Canada.

"S.," in Ontario, adds his own experience to what we have already given. He says: "In the spring of 1876, a friend in California, sent me a pound of seed, which I sowed on about 1.10th acre, in drills, 10 to 12 inches apart. It came up nicely, was kept clean that season and hoed once in the spring of 1877, since which, no cleaning has been needed. In 1877, it was cut twice (a portion three times), both crops being very good. It was manured in fall of 1877, and this year (1878), there have been four good cuttings, one very heavy, and the rest each apparently equal to a good crop of clover. I can not give weight of crop, as it was all fed green to working-horses, which thrived well upon it, and appeared to like it better than anything else. I had no hope that it would succeed on my land, which is stiff clay with a northern exposure. It has, so far, stood the winter well. My little bit of experience is decidedly favorable, and if I were farming, I would try it more extensively. It is quite possible that, as suggested by Mr. Chapman, one, and the chief causes of success, is the use of *California Seed*, as European seed has been tried in this neighborhood without any encouraging results."

[A Correspondent in the *American Agriculturist* writing from Ontario, on the Canada shore, thus shows the value of the *Alfalfa* there, and how well it stands the cold, this should be noted.—Ed. F.]

Good deeds never perish, they are like perennial flowers, they blossom at every ray of sunshine in the soul.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $18; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

SCAB AND TICKS

IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

MARKET GARDENING.

[*Landreth's Rural Register* for 1879 comes to us freighted as it always has been with most excellent counsel and advice for the cultivators of the soil.

This excellent Annual a "Rural Gift" was first issued in 1847 and has now been over thirty years annually welcomed by hundreds of its friends and readers, David Landreth, senior, began the Seed business with but a few acres—now Landreth & Sons cultivate 1574 acres in the growing of Seeds, their grounds and building are very extensive, as shown in their Plate Number of the Annual, their seed grounds require the use of seventy head of working animals to till the soil and hundreds of working men and women to gather and clean the seed, their buildings are very extensive and require five steam engines to carry the machinery used in cleaning and the other work necessary to prepare their seed for shipment to all the various States in the Union and also abroad.

The House of Landreth & Sons are known the world over—Burnett Landreth, Esq., was at the head of the Agricultural Department of the Great Centennial Exposition, and there won many friends by the great energy he displayed and the good he accomplished for our Country.

Gladly we hail the success of such men in all their labors, the following article on *Market Gardening* and seeds, we clip from their book as worthy a special notice of our readers at this time of SEED PLANTING.—ED. F.]

With the great increase in population, and in the number of towns of large size, gardening for market has wonderfully extended, and some practice it with marked success—for the simple reason they understand their business—supply each season as it comes with the vegetables peculiar to it, or perhaps in some cases anticipate outdoor productions by under glass culture. To inexperienced men, embarking in this business, we say, "be sure you are right, then go ahead." If your opportunities for observation have been limited, move cautiously—make progress slowly—do not attempt too much—a little well done will surely afford profit—much imperfectly performed will as surely end in loss.

VITALITY OF SEEDS.

Seeds properly ripened are, with a few exceptions, as good the second year as the first—indeed, many are so well protected by natural envelopes that they germinate freely after many years. The vitality or germinating power of Seeds is not, however, the most important question to the gardener, for if Seeds fail to sprout the first cost is the principal loss. The quality of the vegetables seeds may produce, is the all important question, and that can only be determined when, perhaps, it is too late in the season to remedy an imposition. Absolute security can be alone found in rejecting seeds peddled through the country, and sold on commission.

SEED RAISING.

In olden times, indeed quite within the recollection of living men, the Seed Trade in the United States was a small interest compared with that of the present day. When our predecessors, the elder Landreths, conducted their business on a few acres, they then supplied the demand, but then the Union embraced but thirteen sparsely populated States, now we number in round numbers forty, and each makes yearly requirements on our firm. These remarks are intended as preliminary to a simple question which we feel intitled to ask the reader: Is not an establishment, such as we represent, in a position to supply Seeds of first quality adapted to all climates, and are not such seeds entitled to greater consideration than those peddled through the country and deposited on sale at every village store?

"Penny wise, pound Foolish," is an adage so old that the most diligent might seek in vain for the period when it originated. It has probably been incorporated into every language, and is in common use by the people of every nation. We hear it quoted almost daily and no one can be found who does not, theoretically, tacitly recognize its force. But how many do we see who in practice totally ignore its teachings. In our own especial business the cases are oft repeated where people, who, to save a penny in the purchase of seed, will risk a dollar. "*Cheap Seeds*" sold on commission at the village grocery are the dearest in the end. Time, labor, hope of profit, are all risked by sowing such.

Frost and Fruit.

But little definite information has yet been received regarding the effects of our late excessively cold weather upon the next fruit crop. The general impression is that the peach buds in all this section of country are killed. Those who have examined them are positive that this is the case. Many claim that the trees are also killed. The mild dry weather of last fall it would seem should have made the wood of the trees unusually tough and hardy, and the dry weather thus far in the winter has been favorable to the preservation of the wood and bark, so we have hopes that a large proportion of the trees will survive.

Mr. S. Johnson, president of the State Horticultural Society, gives it as his opinion that most of the blackberries, raspberries and grapes are killed. We hope he may be mistaken.

Our postal card correspondents will please give us information on the effects of the cold weather on their vines and trees.—*Indiana Farmer.*

SPLENDID

WEEPING TREES.

It may not be known generally that by the aid of science, all the finest kinds of our DECIDUOUS TREES, used for Ornamenting Grounds can now be had grown in the beautiful pendant form, graceful as the Weeping Willow.

The following, of very extra size and form, can now be had for planting this Autumn.

The WEEPING BEECH, MAPLE, BIRCH, ASH, ELM, POPLAR and LINDEN these are the most beautiful Ornamental Trees known, adding grace and beauty to the surroundings of every home and increasing the value of every estate where they are planted.

The plates and drawing, showing these trees in their growing condition, can be seen and these trees secured on applying to

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, JAN. 30, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms, Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,
PUBLISHERS CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair.

Our Present Number.

With this Number as we have said we enter anew upon a New Year, a New Volume and a New Quarter Century labor—and for our great work we ask our patrons and subscribers at home and abroad to remember us and send promptly their dues to us—we do hope our long devotion to our work will need no other reminder, our Register records their names and deeds.

Home.—We give on our Home page "The Bestest Christmas," a pleasing story of a generous little girl, who was made happy by the right use of her little purse of *twenty-five cents*—if this little child could make so many happy with her little store—how much happiness could be made by the wealthy people of our City by relieving the thousands now in distress, by reason of the general suffering over our City and State—may the example of this noble little girl make others go and do likewise, and thus secure happiness to themselves as well as others.

"Warm Sleeping Rooms," "A Boy's Leisure Hours," "The Power of Love," "Setting the Fashion" on Home Page will pay well for the reading.

Our Poets' Columns we know will interest our many lovers of poetry.

Horticulture.—"Market Gardening" should be read by all who cultivate the soil, and every reader should become acquainted with the excellent Firm of Landreth & Sons, of whom we speak, and send to them for their Seeds and *Register*.

Miscellany.—Great truths told in the Poem on this Page, "When you are Down," is practiced too often in our land now, where all worship the *Golden Calf*, the brief items on this Page will pay to read—the *Argonaut* is sharp.

Agriculture.—A splendid Poem on this Page will be read with interest and pleasure, "Our Great Harvest of 1878" is finely pictured, "Horse Breeding" from the *Irish Farm* presents very important truths, and we hope this Essay will be very carefully noted by the "Horsemen" of our State.

The "Mills of Minneapolis" will astonish our millers by their magnitude, they show how much it costs to prepare "Our Breadstuffs."

"A new Source of Wealth," "Profits of Wheat Raising," "Alfalfa in Canada," this last paragraph shows that Alfalfa is not so tender a clover as many suppose.

Our Front Page.—We call special attention to the valuable Letters upon our Front Page this week, our Paris Letter of much interest, our special Letter from our kind friend, J. B. D. Stillman, Esq., from Cairo, Egypt, with his excellent history of the Fig and the manner of its cure, is a boon to our Fruit growers here—here is the secret for the preparation of our Figs for market—we are highly gratified and grateful to our friend for his valuable Letter and we know our Fig growers will appreciate his information for them.

The Letter of *Ajax* upon the wealth of *Arizona*, is worthy special reading—all that he has said or can say in praise of those who have labored in the Rail Road advancement is well deserved—we pity those short-sighted mortals who rail against Rail Roads and the great good they do.

Records of the Past.—We shall commence a series of the "Records of the Past" in our next. We have a large mass of valuable Letters and history of the early mining and business days of '49 and onward, which are like strange tales of the olden world, we are sure they will interest many that now live that will recall those wondrous times and scenes, tho' sad to think so many have "passed away."

OUR NEW VOLUME.

Think we, or think we not, Time hurries on
With a resistless, unremitting stream;
Yet treads more soft than e'er did midnight thief
That slides his hand under the miser's pillow
And carries off his prize.

Twenty-five years ago January 4, 1854, we issued the first Number of the California Farmer, then the *first* and *only pleader* for the Cause of Agriculture—at that date our people imported nearly all the produce needed in the State, we had *commenced* cultivation, but on a comparative small scale to our present truly extensive operations, and at that date the agricultural interest was esteemed of little moment, as the *Mining Interest* absorbed the attention of our merchants in this City and the Country generally.

The contrast of the years of 1854 and 1879, a period of twenty-five years has wrought a miraculous change, instead of importing our Flour and the principal part of our Breadstuffs, we are sending out our Clipper ships, hundreds annually, to feed the world with our Breadstuffs. the records of our productions seem fabulous to strangers.

Our Grain, 40,000,000 bushels.
Our Wool Clip, 40,000,000 lbs.
Our Wine Harvest, 8,000,000 gallons.
Our Hops, 4,000,000 lbs.
Our Honey, 1,000 tuns.
Our Oranges and Limes, 6,000,000.
Our Raisins, 100,000 boxes.
Our Nut Crop, 50,000 bags.

Our whole agricultural products approximates the grand sum of One Hundred Million of Dollars Annually.

With such a glorious contrast our people should be rich and happy, and would be, had not the greater amount of the wealth of our State been diverted from agriculture, manufactures and the mechanics' arts, to the wild Mining schemes and speculations, which has greatly retarded the true prosperity of our State.

We briefly state the above facts now as contrasting the past and the present, our purpose is simply to say a few words for our own work and for ourselves.

Twenty-five years' labor in the Cause of Agriculture we think has proved our love and devotion to it, and while we sail under the proudest title that can be given to any Journal on this Coast—the California Farmer—being combined with the proud name of our State and also the noblest employment to which man was ever called—a farmer, we shall still labor to make *our Journal* deserve and win that title which has been given to it by the wise and good everywhere, both at home and abroad.

The California Farmer we claim has ever been the true and firm friend of California and California interests, and we shall never fail to labor for the promotion of the great Industrial Interest of our State, while life and strength and being lasts.

We have never sought to win favor or applause from the crowd, by truckling to creed, sect or party.

We have never bowed the knee, "where thrift doth follow, fawning," we have aimed earnestly and faithfully to work out, to develop and to encourage all and every enterprise that would raise, build up and make the State of our adoption stand high and honorable before the world, and thus place our State high on the roll of our sister States, honored, known and esteemed of all men.

Such has been our aim for the Twenty Five Years we have labored, and we now, as we enter upon our *second* "Quarter Century" appeal to our friends and patrons to give us goodly words of cheer and that cheerful co-operation in our work that such a long life labor deserves.

With these few words in our own behalf we tender to our many patrons and friends, many that have been with us the whole twenty-five years, our most grateful thanks for their good will and to our Cotemporaries who have been kind, the same grateful thanks for all their favors, and wishing all God speed, our watchword is, Onward.

A CALIFORNIA WINTER.

We think we are correct when we say the present month of January and adding the last of December, has been by far the coldest weather and of the longest duration that our people have ever experienced; and well can we say with *Goldsmith*,

"And Winter lingering, chills the lap of Spring."

Our climate seems changing, and is more like some of our raw Eastern autumns, than the usual bright and balmy weather we have always had at this season.

The long continued cold weather has been a great check to farming and planting operations, for till very recently it has been not only cold and freezing weather, but a dry spell also, and unusually so—the cold and frost, however, was a certain precursor and inducer to the glorious rains that have now come to gladden and benefit our whole State, and start again the active work so long delayed.

While we state that the weather in California has been unusually cold and of long duration, it willbe remembered that the present winter has been an unusual cold one all over our own country, even to the balmy vales of Florida, and never before have our Eastern States suffered more with cold than the present year, and this severe weather has also been felt in "Sunny France," and "Bonnie England," where they have had snow and ice to their heart's content.

As we stated in our last issue, we look for some good results to flow from this cold snap, as we feel sure that our orchards and vineyards by their longer rest will escape all late frosts and thus produce larger, better and more perfected fruit—than if we had mild and warm weather in January, so as to bring our fruit trees into bloom as is often the case in January and February—these will now be so delayed and kept back as to come forward with greater vigor and health of growth when the season fully opens. And thus our orchardists may draw comfort and cheer out of what seems at first an untimely check to their hopes.

Ohio has twenty-three linseed-oil establishments.

FROST AMONG THE ORANGE TREES.

There has been a very great anxiety among our Orchardists since the late cold spell, in regard to the effect of the frost and cold upon the Orange and Lemon trees and other *Semi-tropical* fruits.

Although California has had a rough touch of cold with frost and ice, we do not think we need fear much as to the grand results of years to come in the culture of Oranges, Lemons and other Semi-Tropical Fruits, for even famed Florida has had the Orange and Lemon trees cut down—even just now the reports come of excessive cold weather and the injury to the Orange Groves of that sunny place.

We have seen the effect of the frost at Santa Clara and at San Jose, where as we reported in our last, Oranges and Lemons were handled severely, we do not think the trees will be very seriously injured—some will lose their last year's growth and will require to be headed back and carefully nursed a little, and this hardening may prove for their good eventually.

We have just received a Letter from our esteemed friend, Prof. A. Cichi, S. J., of Santa Clara College, of whom we made inquiries as to the effect of the frost upon the full Orange and Lemon trees in the Gardens of the College.

Prof. Cichi gives us the result of the cold there. and says:

"The effect of the protracted spell of frost told dreadfully on small Orange and Lemon trees all through the Valley, I think that *two-thirds* of those on open plain lands will die, as for the College I may tell you that of about forty Orange and Lemon trees in our Villa not one suffered from the frost, even the Acacia speciosa which every year is more or less frost bitten, this year did not experience any frost bite."

We are glad to know the very fine Orange and Lemon trees in the Villa Garden escaped, for they are fine trees, being 10x12 feet high and in fine fruiting condition, it would have been hard to have lost them.

We hope however as a general result, the great mass of trees thus frost bitten will recover and renew their life.

We have also a Letter from Dr. J. Strentzel of the Alhambra Gardens, Martinez, who says:

"Water froze ¼ inch thick, thermometer from 28 down to 24, the old Orange trees around my house hardly nipped in their tender buds, young trees very little, no bark splitting—all those standing within the influence of Eucalyptus wood breaks perfectly fresh."—Dr. S. is an experienced Orange Grower, and his Essays we published some time since were the best teachings ever yet given to the Press, these we shall republish.

MADAME JAFFA, PIANIST.

This truly distinguished Pianist and most amiable Lady teacher of Music, having been absent in Europe for about one year has recently returned to our City.

The numerous friends of this Lady have most urgently desired to show their just appreciation of a most excellent artist and superior teacher, have requested her to announce a "Grand Concert of Music" to be given in this City on the evening of February 20th.

It need only to announce this fact to secure such an appreciative full concert as is rarely seen in our City.

We know that our community is continually called upon and invited to concerts of all kinds—but in the present case this is one of those rare opportunities that seldom occurs, when one so worthy and gifted is called before the public by the spontaneous wish of those who truly desire to pay an honorable tribute to great merit.

This Concert will be announced at early day with full particulars.

The Nevada Nursery.

We ask attention of all who are now planting "Fruit Trees," "Nut Trees," "Strawberry Vines," etc., to the new advertisement of Felix Gillet, of Nevada City, one of our very progressive nurserymen, ever developing new and valuable species of Fruits, Nuts, etc. We have received his excellent catalogue and also a parcel of his new Walnuts bearing the name "Pinepartarian," and said to be the finest grown.

The new Strawberries by Mr. G. are very extra variety of French origin, and wonderful in size and splendid in quality.

Our Salmon Fisheries.—We have received a valuable letter upon "Our King Fish," from a valued friend, in reply to our editorial on the "Salmon Trade," published December 26, 1878, we are glad to have the letter for publication, as it has accomplished our great aim to call out just the information needed to show the value to the world of dissemination of Fishes Spawn—the Letter, a long one, will be given in our next.

☞SEND THE FARMER ABROAD.☜

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, if they send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a Journal as the California Farmer. We know our Journal is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the home circle everywhere, as a Journal free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, special premiums of seeds are donated with the paper, to benefit our State.

Maine has more oxen and sheep than either of the other New England States.

Vermont raises more potatoes to the acre than any other New England State.

SAN FRANCISCO PRODUCE EXCHANGE.

Report of Flour and Grain in the State of California, on January 1st, 1879, as taken by the

W. H. WALKER, Secretary.

	Flour Bbls.	Wheat Ctls.	Barley Ctls.	Oats Ctls.	Corn Ctls.	Rye Ctls.

Salinas and Pajaro Valley		53,400	153,300	12,250		
Southern Coast	2,452	57,100	307,000	2,600		
Totals	76,190	5,781,108	2,207,142	137,042	52,579	18,884

We have been kindly furnished with the grain report which appears in our columns, by the courtesy of the Secretary, to whom we tender thanks.

Changing flour into wheat, and with other grain, this shows 8,597,326 centals, equal to 4,298 tons and a fraction of grain on hand, and we may safely say a full half million tons on hand.

MESSRS. NEVILLE & CO.

The Great Bag Establishment.

Californians never do things by halves—this is clearly proved by the energetic Firm named above, who as Proprietors of the Pioneer Bag Manufactory of our State and Coast have recently shown by their new Warehouse 31x33 California street, one of the finest and most complete buildings, and one of the best locations for trade in our City; this whole Establishment is complete in all its arrangements, conspicuously situated, fronting on California and Davis streets, the great thoroughfares of the Grain and Flour trade and near to Rail Road and Wharf landings, it gives them a very commanding access to business.

The Firm of Neville & Co., as we have said are the Pioneer House in this trade, the senior partner, Mr. Neville, commencing that business as far back as "'52" in Benecia, and ten years afterward the Firm of Lewis & Neville was established in this City on Clay street, which by the death of Mr. Lewis was changed to that of Neville & Co., the new partner, G. H. Bryant, being the present member of the Firm of Neville & Co.

Their new Warehouse is one of the most spacious and complete for this trade of any on this Coast, it is 30x137½ and with an immense basement, makes a splendid Warehouse of four stories high, the *basement* for their heavy stock, the *first floor* for counting rooms and general business and delivery—the *second floor* for Bag making, where is a world of machinery and busy life—and the *third* for Tent making, Awning cloths and Wagon covers, of which they do the principal trade.

A portion of this story is devoted to a fine Printing and Electrotyping department by which they print the bags with names and designs, thus sending out the handsomest Flour bags made and stamped ready for use, with names of the *Flouring Mills*, or if desired, names of the *Grain Growers*, when they so wish.

When we go back to early years and remember the cumbersome 200 lbs. sacks of chili flour used here in 1849 to '53, and compare them with the neat 50 or 100 lb. sacks from the factories of Neville & Co., we certainly see the mark of progress.

This Warehouse is worthy a special visit to note this progress, and also to examine the neat and excellent illustrations of their business painted upon their building on the Davis street front, it is in better taste and shows more skill than many of what are called *paintings* now sold at "Picture Stores" we gladly note the progress of this Firm and hail their success with pleasure.

THE MONEY POWER.

The Office and Power of Money.

It will be remembered by our readers that in the months of October and November last we published a series (three Essays) on the Power, Office and Influence of Money, its uses, etc., these Essays were published in the *Boston Post* and were widely republished and commented upon and as highly approved by Bankers and Financiers over our Country, who were the advocates of a sound and honest currency.

These papers were in such demand that the author of them was called upon to issue them in pamphlet form, which is now being prepared in Boston, soon to be widely disseminated, we have just received an advance copy of the introduction pages, and will soon have copies of this work in our City, to be had at Farmer Office.

The author of these Essays has recently been appointed to a very important and responsible post, as will be seen by the annexed notice we take from a Boston paper:

The large number of friends and acquaintances of Hon. G. W. Warren, whose able discussion of financial questions has frequently graced the columns of the Boston papers, will be pleased to learn that he has severed his business connection with New York and will remain in Boston. He has been selected to take in charge the agencies of the 'New York Life Insurance Company," for which he possesses excellent qualifications, and which will unquestionably inure to the large benefit of his principals.

WASHINGTON.

From our Special Correspondent.

Washington, D. C., December 30, 1878.

Col. Warren—*Dear Sir*:

There is one subject of immense importance to come before Congress before many days, which concerns deeply every part of this Nation, and that is a reponse to the inqury what can be done to revive our foreign commerce, to improve our markets, and find a readier sale for our manufactures and natural productions? With advantages such as no other Nation has for turning out almost every article demanded in the South American markets, yet the amount we sell there is less than the fifth rate nations of Europe. While we purchase more of the productions of the South American States than any other Nation, yet we sell less than most of them, and thus we drain our own money market and make ourselves poor in order to enrich the European manufacturers and traders.

The cause for this is found in the fact that all the leading nations of Europe maintain several lines of steamers to all parts of South America, until this year we have had none, and now we have but one, and that receiving no Government aid at all from us, and partly sustained by a postal contract with the Brazilian Government. Now, the practical question is, will we help to maintain the line by paying liberally for carrying our mails, or will we allow the British monopolists to drive us away even from this small but promising foothold of American commerce?

European gold is here to defeat all effort to maintain or extend American commerce or legislation, and the European ship owners put on guerilla steamers to reduce freights and influence our legislators the moment the subject comes up for official action.

The President in his recent message urging Congressional aid to maintain this American line and to extend its field of operations, truly, remarks that "If we have equal commercial facilities we need not fear competition anywhere." This is proved by the fact that before the American Line was put on, the European ship owners dared not run steamers from this country direct, knowing that this would destroy their home trade, but made all return voyages to South America via European ports, where frequently they took cargoes of American goods, thus working directly against the interests of American industries by increasing the burden of transportation and reducing the profits in the same ratio. Sec. Evarts joins the President in the urging some action by Congress in order to secure permanent steamship lines for the benefit of our own people, and this subject is now agitating all parties and finding friends among all classes.

The days between Christmas and New Year's are holidays in Washington more because the Government clerks are in their offices only 3 hours a day than for any other reason. Little business of any kind is transacted, and the chief occupation is the preparations of society people for New Year's day which opens the winter season.

Those interested in politics and Congressional doings are still harping on the Blaine investigation. The Committee had a meeting the other day, intending to begin work at once, but were stopped short at the very outset for want of funds. Then the Potter Committee was appointed, with its $20,000 House appropriation, the Senate reserved for itself the right to use the same amount of money for a similar purpose, and it is supposed that Blaine thought that available for the expenses of his Committee, which the Democrats say is not the case. However, the Solicitor General of the Treasury says there is evidently a misprint in the provision and that the clear intent of the act was to cover just such cases as this. If the decision holds, the Committee will start for the South at once. If not the matter is to be brought up at once on the reassembling of Congress, and meantime the Committee is gathering up its threads of obidence to work fast when once at it. Senator Blaine has sent them his letter of specifications as to what should be proved, and wants many leading Southern Democrats called to testify.

Martha.

TO WOOL GROWERS.

I have for a number of years been Manufacturing, Selling and Using Sheep Dip, with a view of getting an article that will be acceptable to sheep men as a remedy for the disease known as Scab in Sheep. Objections have been made to the use of my Hemlock Dip, on the ground that it was *Poisonous*, and in some cases it produced death when the dip was swallowed, or taken into the stomach by the sheep when dipping; this of course was one objection, and in the hands of inexperienced parties and rude workmen, a sufficient amount of care in using the dip was not observed, and notwitstanding its efficacy as a remedy for the skin disease, parties were constrained to abandon its use through fear of handling it. I have removed the only objection made to the use of my Dip by making and placing on the market an *NON-POISONOUS* Sheep Dip, and I confidentially recommend it as the cheapest and most effectual remedy ever made, and by its use you can eradicate the disease from your flock; try it, it is safe to use at any degree of strength, and is a remedy diluted 100 or 150 parts water.

Yours truly, S. H. KENNEDY,
Omaha, Neb.

Rhubarb Wine.—We have samples of the "Rhubarb Wine" advertised by us in the Farmer, to which we call special attention of wine dealers, as we have it on sale at our office.

Commercial Records of our State.—We have the most excellent Double Sheet of our neighbor, the *Commercial Herald and Market Review*, which appeared this morning, it is the best compilation of statistics yet produced.

We have also scores of Letters, Books, Pamphlets, etc., received too late for notice this numb

GOLDEN RULE BAZAAR,

718 Market St.---419 Kearny St.

Five Stories High, 45 x 200.

CLOCKS! CLOCKS!

Every clock that leaves our salesroom, has been thoroughly run and tested, and is *warranted*, if properly used, to be a good time piece. Following are the price of a few of the many styles we keep:—

Young America—A 30 hour time-piece with porcelain dial.....$1.00
The Eclat—Ansonia 30 hour movement, walnut case, 10½ inches high.....1.25
The Economy—Black or nickle plate, 30 hour time-piece.....2.00
The Gem—Same as above with alarm.....2.50
The Bijou—(See cut) Nickle plated case, patent lever, stem winder.....2.50
The Chief—Metal case, marble finish, gilt lined.....3.00

PEEP O' DAY, ALARM, $3 50.

This has the loudest and longest alarm of any clock made, is fitted with Ansonia Co.'s best movement, screwed pillars, strong plates, silver plated, and requires only one winding for the time and alarm—will go in any position.

The Jupiter—One day striker, patent self-adjusting pendulum, 15 inches high.....$5.00
The Roman—Eight day striker, patent self-adjusting pendulum, 21 inches high.....7.50

Over 50 other styles on hand.

THE AUSTRALIAN GUM TREE.

The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

☞Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the bush bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach o Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

TESTIMONIALS.

The manufacturer of these Pills has a great objection to the "wholesale" publication of testimonials, which in many cases are fictitious, and are only intended to mislead. Yet, for the satisfaction of those who are suffering, and have not yet used his medicines, he selects a few, who are best known in the colony and in the town he lives, and their *personal testimony* will satisfy the most sceptical.

These testimonials above named with many from California, since their recent introduction, will quickly show that the

Eucalyptus Remedials

are the best ever yet introduced. Full and ample testimonials accompany all parcels.

Home Miscellany.

"There is no place like HOME.
Home! It should be Heaven on Earth

DON'T MARRY A MAN TO SAVE HIM.

SARAH E. BOLTON.

A cry comes over from Oregon
For a car-load—not of women wan,
But of women of brain and blood, and ten?—
"Come, marry these men to save them!

"There are thousands here in these haunts of sin
Spending their money in game and gin,
Corrupt without and corrupt within;
Come, marry these men to save them!

"They have been somebody's pride and joy!
Somebody's petted and pampered boy;
Spoiled for lack of a maiden coy;
Come, marry these men to save them!

"You must be healthy, and pure, and strong,
Alike to breast and bear the wrong,
Willing to carry a burden along;
Come, marry these men to save them.

"You must be leader, but always seem
To be gentle and helpless as love's young dream,
And leaned upon when you seem to lean;
Come, marry these men to save them!

"You must be cleanly, and kind and sweet,
Making a path for their godless feet
Up to the grace of the mercy-seat;
Come, marry these men to save them!"

Oh! Woman, you're sold at a fearful price
If you wed your virtue to a chance device;
And trust your soul to that of vice;
Don't marry a man to save him!

A life that is pure needs a pure one in turn,
A being to honor and not to spurn,
An equal love, that shall constant burn;
Don't marry a man to save him!

A woman's life is a precious thing.
Her love is a rose unwithering,
Would you bury it deep in its early spring?
Don't marry a man to save him.

You can pray for his soul from morn till eve,
You can win the angels to bring reprieve
To his sin-bound heart; but you'll always grieve
If you marry a man to save him.

God gives to Woman a right to press
Her claim to a man's best manliness;
A woman gives all, should a man give less?
Don't marry a man to save him!

—*Woman's Journal.*

THE SENSES.

BY SOPHIA C. GARRETT.

I.—SEEING.

We should not know the world was fair and bright
If God in wisdom had had not given us sight.
Vainly would bloom the flowers with gorgeous dye
If we could not discern them with the eye.

II.—HEARING.

Music's sweet sounds that oft around us float,
Enchanting us with many a varied note,
The song of birds, voices of loved ones dear
Thrill us with joy. God gave us power to hear.

III.—FEELING.

By feeling, too, how many things we learn,
That ice is cold, that glowing fire will burn.
The blind by feeling read and study, too,
What those with sight often will fail to do.

IV.—SMELLING.

The sense of smell many delights disclose,
Sweet balmy air, the perfumes of the rose.
It warns of danger—Bids us haste away
From noxious vapors, lurking where we stray.

V.—TASTING.

This sense was given us that the greatest good
Might be derived from rich or simple food.
With care and prudence we this gift will use,
Nor by unwholesome fare its powers abuse.

—*Chicago Ledger.*

IF ONLY MOTHERS KNEW.

HELEN RICH.

If only mothers knew, she said,
How hungry children are for love,
Above each virgins little bed
A mother's lips would prove
How sweet are kisses that are given
Between a rosy mouth and heaven.

If only my mamma would kneel,
As your dear mother, every night,
Beside her little girl, to feel
If all the wraps are folded light,
And hold my hands, her elbow fair
Between my cheeks and her soft hair.

And looking in my dreaming eyes,
As if she saw some lovely thing,
And smiling in such fond surprise
On all my hopes in life that spring
Like flowers beneath her tender gaze,
I could not stray in evil ways.

I would not wound the gentle breast
That held me warm within its fold;
My mother's love would still be best,
However sad, or plain or old;
And even though the world forsake,
I'd love her for her love's dear sake.

A Cool Dish of Strawberries.

The last cold snap was death to the strawberries, it froze them solid.

It made a very good dish to take the frozen berries and smother them with sugar and cream, as it would thus be iced strawberries and cream, a similar dish, strawberries and ice cream often called for in warm weather.

Kind Words never Die.

Good thoughts produce good deeds.

Greet a friend with a genial smile and it brings out a smile in return like as the sun's warm breath upon the bud causes it to burst into blossom.

A thoughtless, cold look of recognition from a true friend strikes into the soul a chill, as does the icicle upon the tender flesh.

"THE BESTEST CHRISTMAS."

My dear little cousin Marie had such a charming Christmas that I really think I must tell you about it; for when there is a pleasure that anyone may have it seems very selfish not to let it be known.

You must know that Uncle Ben is very fond of teasing Marie, and by way of doing that he gave her last November a roll of lozenges, as he called it and to be sure, that is what the little silver-papered roll looked like; but then it wasn't that, though Marie thought it was, for when she pulled out very carefully one end of the roll, and put in her little thumb and forefinger to pull out a rosy lozenge, what should come but a bright new cent! —or a penny, as Marie called it because she lived in Brooklyn! Really, she did not look very badly disappointed, for her eyes were dancing, and her feet began to dance too when out rolled a penny on the floor, and another, and another; and down Marie herself went to scrabble them up, laughing merrily all the time for the pennies looked so bright and pretty. Then she sat down and poured them all into her lap, and counted them over and over.

"One, two, three, four," on and on, till she came to twenty-five. Oh, how rich she did feel! Was there ever such a paper of lozenges?

She put them all carefully back in the paper and went dancing around the house, showing everybody her treasure, and telling what wonderful things she was going to buy with all; but many a time that day she emptied the pennies again into her lap, into a saucer, into a box, and counted them over and over. Indeed, every morning the minute she awoke, she would sit up in bed, her little head all covered with frizzles of golden hair, and drawing the precious bundle from under her pillow—where it had spent the night—begin to count again and plan anew how she would spend all that money, while her brother Ned would caper around the room, singing,

"Queen was in the parlor, counting out her money;
I must be the king, and where's the bread and honey?"

I can't begin to tell you of all the things she thought she would buy with those pennies. Of course the first thought was a doll; but, then, she would have a nice picture-book instead; yet, how delightful it would be to have twenty-five sticks of candy! She wondered if ever a little girl had so many.

Then she would go down to "Norman's" and look all through his "penny-drawer," wanting everything there. I must tell you there is one drawer in which everything costs a penny, and 'most always some little eyes are peering into that drawer. Then, on the shelves, what pretty little dolls there were for five cents! What nicer ones for ten! What "perfect beauties" for two shillings!

Oh, dear, what should she buy? What should she do? So every day she came home still undecided, and still all the pennies were in that bright little roll. Really, some days she grew quite tired of that shopping—I mean with thinking about it—and so Christmas morning came, and still Marie was counting her money—though she said now she knew what she was going to buy. "Ten cents for a dear little blonde-haired dolly; ten cents for the sweetest little box of furniture, and five cents for just the loveliest beads you ever saw!"

Those were the things she wanted most, she was quite sure; but the store was closed on Christmas Day, so she must wait till the morrow; still, she could be thinking of all the good times she was going to have with the lovely things.

Before church-time her mamma wanted her to carry a mince-pie and a cake to poor Mrs. Cragg, for a Christmas greeting to herself and her little boy and girl, and to help them have a good Christmas dinner; and they were all so pleased that Marie came away feeling very happy.

She was so much interested in the stores now that she thought she would go back through Smith street and look in the shop windows. When she came to the first toy store there was already a little girl staring in the window. Poor little girl! She had very few clothes; her hands and her face looked purple and cold; but she didn't seem to be thinking of that, so wistfully was she gazing in at a little china doll. Marie knew what that look meant—so, many days, *she* had looked at the fascinating things in Norman's window.

"Are you going to buy it?" asked Marie, eagerly. "Do you like it *very much*?"

"Like it!" and the little girl turned wonderingly to her. "Oh, if I only could! Dear Bessie!"

"Bessie! Who is Bessie?" asked Marie.

"My little lame sister. She has to lie on the bed all day, and oh! she wants a doll so much," she said, sighing wistfully.

Then up spoke Marie's warm little heart within her and said to her, "Suppose you buy it." Quick as the thought, she seized the little girl's hand and drew her into the shop, saying joyfully, "I'll buy it, and then you can take it home to Bessie," and in a minute the purchase was made. The little girl in the ragged clothes seized the doll, and ran away so fast she hardly had time to say "Thank you," for she was so eager to carry it to Bessie; and I do not believe she was a bit happier than Marie, who came skipping along the sidewalk, thinking how Bessie would smile when she saw the dolly.

"It only cost five cents," said Marie to herself, "and I can buy the other dolly that costs five cents. It is almost as pretty as the ten-cent one"

Then she saw two poor little shivering boys looking into a candy-store, for some most tempting tin-trumpets were hanging there. All through the streets on Christmas morning, one hears the trumpets, for the boys think there isn't much better fun than to blow a trumpet and make a great noise. These boys looked so wistful that Marie did not stop a minute, but ran in and bought two trumpets. She was just turning to come out when the thought crossed her mind that perhaps those little boys never had any candy, and soon she had bought and put into each trumpet an ounce of mixed candy—she thought the boys would like that best. Meanwhile the little shivering fellows were staring in at her, and to them she seemed like a princess, spending so much money. When she came out, and gave them each a trumpet they could hardly believe their eyes, and when they looked into the trumpets and found the candy, you would have thought they were the richest little people in all the world, they looked so happy. They called out:

"Bully for you!" which was not very elegant, but it was the highest praise they knew. Some of the candy they put in their mouths, and some into their pockets. Then they began to blow, and indeed I think nobody but a boy could have made so much noise with his mouth full of candy.

Now Marie had only five cents left to spend on herself and she began to think which of all the things she wanted the most, but just then an organ-grinder came along with a miserable-looking little girl holding a cup for money. Her poor little wizened face looked as though it had never smiled. It was very, very sad to see on a bright Christmas morning, when everyone is so merry. Then Marie was filled with pity for her, and she longed to make her smile too. The little girl looked so old and sad that Marie could not think of her playing, so she went into the store and bought some more candy. Bringing it out she went up to the little girl and gave her the candy, saying:

"I wish you a Merry Christmas, and please take this for a Christmas present," and I know she must have smiled very sweetly when she said it.

The little girl looked perfectly astonished. I suppose she was not used to having anyone care for her, but she grabbed the candy eagerly and began to eat it with great satisfaction, staring with wonder at Marie, all the time; and though she did not know enough to say "Thank you" Marie saw how glad she was to have the candy, and my little cousin came dancing on her way home. She had not a bit of money now to spend for herself but somehow she didn't mind that at all, for she kept thinking how happy those little boys and girls were and she was as merry as a cricket all Christmas day. Indeed she says:

"It was the very, very bestest Christmas that ever I had."

WARM SLEEPING ROOMS.

I'm glad that the barbarous idea that it is healthful to sleep in frigidly cold rooms is being combated. For my part, when I recall all the discomforts, yes, and absolute pain I've endured in cold bed-rooms, I'm ready to pronounce a sentence of perpetual banishment to the Arctic regions, against the inhuman monster who first promulgated the idea that it is "unhealthful to sleep with a fire." If a fire is a good thing during the day when our bodies are at a higher temperature than during sleeping hours, why isn't it a better thing at night? People pile on a hundred weight or so of bed-clothes, shut doors and windows to prevent the entrance of even a breath of fresh air, and in spite of their precautions, what with having to breathe the cold air of the room and the liability there is of the clothes slipping off, they are not comfortable. There is another thing to be considered, heavy covering is weakening. Many delicate women and children are made weary by sleeping under great quantities of covering. Then, it has been demonstrated time after time, in medical reviews and in newspapers generally, that pure air is absolutely necessary to perfect health. What sort of air is that which has been breathed and rebreathed scores of times during the night? Have a fire, and open your windows an inch top and bottom. Instead of laying in a heavy stock of blankets and comfortables, just invest in a stove, the children can then make their toilets in their rooms instead of rushing through the house half clad to dress by the kitchen-fire, thereby impeding breakfast preparations. Besides, it isn't nice to have washing and scrubbing going on in the same room and at the same time as cooking. A fire need not be kept in the bed-rooms all day. From eight in the morning until about six in the evening it could be dispensed with, and the expense and trouble would thereby be lessened. Think it over ladies, and if you have ideas on the subject, please ventilate them for the benefit of the club.—LINDA BROWN, in *Rural New-Yorker.*

Setting a Fashion.

"Whence come the fashions?" is a question often asked. Several years ago a leading New York house imported, through a blunder, a certain very ugly material which would not sell, and lay dead upon their hands. Something had to be done. The proprietors of one or two fashion papers were interviewed. The next week their columns told thousands of eager readers that there had recently been shown a new and stylish fabric which promised to be very fashionable, and the statement was widely copied by the daily press. Retail dealers found their customers inquiring for it, and sought it of the jobbers. The jobbers in turn sought it of the importers, who quickly unloaded their whole stock at a handsome profit. The goods were voted "beautiful" and "stylish," and the fabric was "the rage" for a time. Just how much the fashion papers were paid was never divulged. All of which shows how one fashion was "set," and "what fools these mortals be."—*Boston Transcript.*

California an Empire.

California is more an Empire than a State with its 188,981 square miles, or 130,927,840 acres. The combined area of the six New England States is but 63,338 square miles, showing that California has an area almost three times as great as this division of the Republic. The area of the six Middle States—New York, New Jersey, Pennsylvania, Delaware, Maryland and West Virginia—is 137,464 square miles, showing that California is 51,515 square miles larger than this section. The combined area of the twelve States forming the New England and Middle States is 205,812 square miles, showing that California contains an area almost as great as these twelve States. It is 78,235 square miles larger than the whole of Great Britain, the latter being 110,856 square miles. It would make twenty-four States the size of Massachusetts, and one hundred and forty-five States as large as Rhode Island. Great is California.

A BOY'S LEISURE HOURS.

What a boy does with his leisure is most important; what he gets in school is mainly drill or exercise; it is a gymnasium to him; he must eat elsewhere. What he does with his spare hours determines his destiny. Suppose he reads history every day, or scientific books; in the course of a few years he becomes learned. It matters very little what he undertakes, Latin, Greek, Hebrew, Sanscrit, all disappear if he uses his spare time on them.

A boy was employed in a lawyer's office, and had the daily paper to amuse himself with. He commenced to study French and at that little desk became a fluent reader and writer of the French language. He accomplished this by laying aside the newspaper and taking up something not so amusing but far more profitable.

A coachman was often obliged to wait long hours while his mistress made calls. He determined to improve the time; he found a small volume containing the Eclogues of Virgil, but could not read it, and so purchased a Latin grammar. Day by day, he studied this, and, finally, mastered all its intricacies. His mistress came behind him one day as he stood by the horses waiting for her, and asked him what he was so intently reading. "Only a bit of Virgil, my lady." "What, do you read Latin?" "A little, my lady." She mentioned this to her husband, who insisted that David should have a teacher to instruct him. In a few years he became a learned man, and was a useful and loved minister of Scotland.

A boy was hired to open and shut the gates to let the teams out of an iron mine. He sat on a log all day by the side of the gate. Sometimes an hour would pass before the teams came, and this he employed so well that there was scarcely any fact in history that escaped his attention. He began with a little book on English history that he found in the road; having learned that thoroughly, he borrowed of a minister Goldsmith's History of Greece. This good man became greatly interested in him and loaned him books, and was often seen sitting by him on the log conversing with him about the people of ancient times.

The Power of Love.

Love is inspiration; it encourages to great deeds, and develops the creative faculty of our nature. Few great men have flourished, who, were they to be candid, would not acknowledge the vast advantages they have experienced in the earlier years of their career from the spirit and sympathy of woman. It is woman whose prescient admiration strings the lyre of the desponding poet, whose genius is afterwards to be recognized by his race, and which often embalms the memory of the gentle mistress whose kindness solaced him in less glorious hours. How many an official portfolio would never have been carried, had it not been for her sanguine spirit and assiduous love! How many a depressed and despairing advocate has clutched the Great Seal, and taken his precedence before princes, borne on by the breeze of her inspiring hope, and illumined by the sunshine of her prophetic smile! A female friend, amiable, clever and devoted, is a possession more valuable than parks and palaces; and, without such a muse, few men can succeed in life—none be content.—*Disraeli.*

The better the farmer the more successful will he be in his financial as well as agricultural efforts. Every farmer should entertain a very high opinion of his employment, and at the same time not forget that in unintelligent labor there is no dignity. The short-sighted, aimless, inefficient farmer is the one whose houses and surroundings bear false witness against the neat buildings and fine appearing surroundings of his more tasty neighbors.

Mind what you run after. Never be contented with a bubble that will burst, nor with a fire-work that will end in smoke and darkness. Get that which is worth keeping, and that you can keep.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary Instruments and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

WHERE WAS THE ADVERTISEMENT?

Purchasers who read the Advertisements in our Columns, and make their purchases thereby, will do us a kindness by stating to those of whom they purchase, where they obtained the information of their Wants.

Miscellany.

Gatherings along the way side,
Floating gems by every tide.

WHEN YOU'RE DOWN.

What legions of "friends" always bless us,
When golden success lights our way!
How they smile as they softly address us,
So cordial, good-humored, and gay!
But ah! when the sun of prosperity
Hath set, then how quickly they frown,
And cry out in tones of severity,
"Kick the man don't you see he is down!"

What though, when you know not a sorrow,
Your heart was as open as day,
And your friends when they wanted to borrow,
You obliged and ne'er asked them to pay
What though not a soul you o'er slighted,
As you wandered about through the town,
Your friends become very near sighted
And don't seem to see when you're down.

When you're up you are loudly exalted,
And traders all sing out your praise,
When you're down you have greatly defaulted,
And they really don't fancy your ways
Your style was tip top when you'd money,
So sings every sucker and clown,
But now 'tis exceedingly funny—
Things are altered because you are down.

Oh give me the heart that forever
Is free from this world's selfish rust,
And the soul whose high noble endeavor
Is to raise fallen men from the dust;
And when in adversity's ocean
A victim is likely to drown,
All hail to the friends whose devotion
Will lift up a man when he's down.

The Irrepressible.

They were all at the springs—father, mother and the five-year-old boy. After an invigorating bath they went up the hill to the "chicken-soup" spring, and while regaling themselves with the delightful drink, the little one looked at the bubbling, steaming water a moment, and then asked:

"Mamma, what makes that water boil so?"

"God does, my son."

"How does he do it?"

"Oh! he builds a big fire under it."

The little one reflected a moment, then asked: "Mamma, does God kick over the chairs and swear at Mrs. God when he has to get up and build the fire?"

The wife glanced suggestively at her husband, but his eyes were fixed intently upon some object way down the river. The silence for a minute was absolutely painful, and then the man softly remarked:

"I never before knew the Humboldt to be so low at this time o' year.—*Elko Post.*

Independence.

GOOD ADVICE FOR THE YOUNG.

Have your own things. Accustom yourselves to be careful to keep on hand your own stock of writing paper, pens, pencils, and India rubber. Do not depend on mamma's work-basket for a thimble or needles, nor on her bureau-drawer for cuffles and handkerchiefs. Do not consider that you have a right to borrow papa's knife, nor to make a foray on Brother Tom's room for strings and wrapping paper. Everybody should be independent of the home world, so far as some personal belongings are concerned. If you allow yourself to form the habit of going here and there with "Please lend me this," and "Do oblige me with that," you will often annoy people who are too polite to show their feelings, and you will sometimes incur mortifying refusals. It is usually much better to do without the use of an article than to borrow it. This is especially true of things to wear. There are girls who put on their sisters' hats and aprons quite indiscriminately. There are boys who never have a collar in their box, nor a tie that isn't a perfect string, and not fit to be seen. Remember that a very wise man has told you, "The borrower is servant to the lender." This has many meanings, or rather, the meaning makes itself plain in many ways, as you go on in life. You will have a truer self respect if you decide that you will, so far as you can, stand on your own feet, and not borrow your neighbor's crutches.—*American Cultivator.*

If there is any day that we respect it is the Sabbath; of all the Christian ordinances that which we hold in highest esteem is the one that says we shall do no work on Sunday. Upon this holy day the bill collector has no authority to annoy us with his importunity; the devil does not pursue us for corp. We wish there were six Sundays in the week instead of one. We never could see the propriety of giving six days to the devil and one to the Lord.—*Argonaut.*

There is but one advantage in "dying rich": it reanimates many of one's relations who died years before. They come crawling out of their graves as thick as earth-worms after a rain, and they attack the estate as a regiment of Kansas grasshoppers assails a cabbage patch. And then they go back on their own epitahs, and say that they have all the time been canning salmon at Santa Fe, or herding cats in Siskiyou, or mining for bar soap in Humboldt, or growing door-knobs in Oregon, or doing anything anywhere that there is no money in. But these stories are weak; it is not possible to mention an industry so unprofitable as to produce such destitution as theirs. A man must have been dead—and dead a long time, too—to be as poor as the contestants of a rich man's will.—*Argonaut.*

Massachusetts leads all other States in the value of her wheat crop per acre.

AMERICAN Berkshire Record.

Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE

FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard o Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol. I. is $3.00, post-paid; that of Vol. II, $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid. the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with studs for retaining memoranda, price $1.00 per set. These forms are adapted to general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Management of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven illustration therewith, have been published together in pamphlet form. They will be sent postpaid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the idea. We will immediately answer, and give the necessary instructions. For this advice we make no *charge.*

We also send, free our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, cand find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

TO ADVERTISERS AB OAD.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best Houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows.—All line advertisements will be ONE DOLLAR for Five Lines, or less, Nonpareil, *first insertion*; larger space, *Fifteen Cents per Line*; each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months.. . $15.00 | For one-half of a column, three months. 50.00
For one-quarter of a column, three months ... . 30.00 | For an entire column, three months 100.00

For a six month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the abov rate

WARREN & CO., Proprietors,
320 CLAY STREET, SAN FRANCISCO.

Worth a Guinea a Box!

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, April 21, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills, I thought I would try them. I have only taken three small boxes: the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you. I am, truly yours,

WILLIAM STEWART.

PARTICULARLY NOTE THIS.

HERMITAGE, WARWICK, August 14, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food Consulted a Physician in Warwick; was under his treatment four months without improvement. Dissatisfied, went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.

MICHAEL BYRNE.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed good *health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)

JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus:

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved an cured from long and great suffering by the use of thes Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you Davi Clarke's Australian Pills—the only genuine.

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, January 30, 1879.

Money and Exchange Tables.

Exchange on England, new style, long and short	$ 82½ a $ 83
Value of Gold	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	9s 9d a 9s 3d
Value of Club Wheat in Liverpool	9s 3d a 9s 6d
Value of Wheat in New York, bushel	1 05 — 1 12
Brewers Barley in New York, bushel	1 10 — 1 15

MONEY AND EXCHANGE TABLES.

The *Money Market* is an enigma to many who claim to be wise financiers, and while they admit the apathy of trade and business generally, and the want of money among the farmers, country traders and the mass of the people generally, they also admit that there never was such an abundance of money laying idle as at the present time. Money, too, that can be had at very low rates of interest—five and ⅌ per cent.—on long loans even, while the ordinary value of money at bank counters is nine to ten per cent.; and, with this condition of money hitherto no building, and manufacturers almost at a standstill for want of funds and business. The U. S. bonds, four per cent., are sought for and purchased by the *millions of dollars* daily at the east, and also largely here, and the gold that buys them goes into the Treasury of the United States, where now there are hundreds of millions locked up, the people preferring the greenbacks to gold.

We believe the enigma is easily explained by the fact of this continued drain from the business channels into the U. S. Treasury of the gold of the country has a great tendency to stagnate trade, will our financiers elucidate?

The Bank of England and France are both reducing the rate of interest, and gold accumulates as large failures increase, and factories, foundries, coal and iron mines close, people out of employ go about asking for bread—bread wanted and gold plenty—labor unemployed and money abundant, is the great enigma of the times.

GRAIN AND FLOUR MARKET.

Our *Grain Market* and our grain trade has had a dull time for a month past, shipments abroad have been but very moderate, with a strong disposition on the part of grain growers to "hold on," our farmers more impressed with fear than hope for the season.

We have never had a doubt but that the later rains would come, and they have come and will continue to come until the earth is full of riches for those who till the soil.

Our exports of *Flour* and *Grain* has been only about a dozen cargoes since January 1st, yet since July, 1878, to now it is more than three-times the number of ships loaded the same time last year, and more than double the value, being over $12,000,000.

The glorious dispensation of rains, now universal, over our State, will clear our markets quickly, and bring the grain from our storehouses and start it abroad, for with the present prices in Europe, the large stock and dull trade there, prices are not likely to go up in the face of good rains and a good season.

The *Flour Market* has been a dull one for some little time past, but shipments will now begin again and a general renewal of trade commence, prices about as last report.

The *Wheat Trade* itself is dull, prices remain steady and will for a little—then—then—we shall see by the news from Europe of the crops there.

We refer as important to the report of W. H. Walker, Secretary of the Produce Exchange, for the estimate of grain on hand January 1st, in this State.

The *Barley market* has had an electric touch from the East, and away goes the barley overland, some two hundred tons or more at good figures.

The *Trade* in Oat is not very large, we have constant recruit in stock from abroad, Oregon and Washington Territory, yet prices keep steady.

Corn, firmer market—*Rye* and *Buckwheat* little or no sale.

The *Feed stuffs* are a little higher, and in good demand, in cold weather all animals eat more and feed is in better demand, *Bran, Middlings, Corn Meal, Ground Barley*, and *Oil Cake Meal*, all better in price.

The *Seed Trade* has been dull and by reason of delayed rains and cold weather but little alfalfa or any grass seeds have been planted yet, now a start will be given.

The *Hop market* is not hop at all, nothing moving, price from 7 to 12 cents, the last for choice bright stock.

The *Honey market* is now out of mark, and of large value, as show by the very interesting letter from our valued correspondent, whose letter in this number will astonish many—choice honey in demand, exports large—*Lectures*, a large over supply—price lower.

The *Hay market* has improved in price with quicker demand, the colder the weather, the more feed for cattle and horses wanted.

The *Potato market* is tolerable lively, choice brands, like Early Rose, Salt Lake, White Prolifics are quick sale at $1.50 to $1 75 the central other brands like the River Reds sell at 80 to 85 cents—*Sweets*, plenty in market at $1 40 to $1.75.

The best stock of nice potatoes can always be found at the commission store of Lazarus, Witham & Co., corner Davis and Clay Streets—they are large dealers, and can always suit.

Foreign Pecan Nuts	15 — 20
Foreign Brazil Nuts	15 — 20
Filberts	15 — 20
Chili Walnuts	8 — 10

Retail Price in the Vegetable Market.

We can with truth repeat what we said in our last.

The *Vegetable Market* when the severe weather is considered is remarkable—there is no market in the world that can show as large a display of superior vegetables at the Winter's season as our own California markets.

The large quantities, the great variety, and the superior quality cannot be equalled the world over.

Artichokes, (French) per doz.	15 — 20
Tomatoes, per lb	6 — 8
Beets, per doz	— — 25
Broccoli, each	10 — 12

do do sugar cured	13 — 15
Hams, California	13 — 16
Choice hams, Duffield	16 — 18
Whitaker, St. Louis, Mo	15 — 18

Poultry and Game Market.

The *Poultry market* shows a full supply and easier prices to the buyer, yet liberal sales—Game supply not so abundant but a good demand and a little higher figures for some kinds.

RETAIL PRICES.

Ducks tame each	75 — 90
Canvas Backs, pair	75 — 1 50
Small Ducks, dozen	1 00 — 1 50
Geese tame, per pair	2 00 — 2 50

Rabbits, tame, per doz.	1 50 — 1 75
Squirrels, per doz	75 — 1 00
Venison, per lb	7 — 8

Retail Dairy Market.

The *Dairy Market* has aroused up, grown active with larger sales and less stock on hand, choice butter scarce keg and pickled butter nearly a bare market.

California and choice cheese in wanted, prices better.

Eggs are rather plenty and a little less in demand.

Butter, California, Extra Choice per lb	40 — 45
do. do. for (Cooking) do	25 — 30
do. do. packed best roll	27 — 30
do. do. Eastern	25 — 30
California Eggs, per doz	30 — 35
Oregon	27 — 30
Duck Eggs, do	27 — 30
Cheese per lb	15 — 20
do. Sage, per lb	25 — 30
Eastern Cheese, do.	25 — 30
Lard, California, per lb	18 — 20
Lard, Eastern, do.	— — 15
Honey, Comb	15 — 18
do. Strained	8 — 12
Vermont Maple Sugar, per lb	— — 20

Dairy Produce, Eggs, etc.—Wholesale.

The *Wholesale Dairy Market* is not active, large stocks are gathering, and sales not large, the retail trade is all that gives life to it.

Butter, California, per lb. (Fresh)	32 — 37½
do. Packed Roll, do.	24 — 27
Eastern Butter	20 — 22
Cheese, California, per lb	10 — 12
California Eggs, per doz.	27 — 30
Eastern Eggs, per doz.	22 — 25
Duck Eggs, "	27 — 30
Lard, per lb., in tins	12½ — 14
Eastern Lard, per lb., in tins	13 — 15

Grain, Wool, Potato Bags, Etc.

The *Bag and Bagging Trade* is now at low tide—the dormant season for sellers, but just the time for our grain growers to buy, now is their time, the bags will never opened their mouths for them so wide as now for them to save in price.

We counsel all who want grain bags for their crop of next year, buy now, go to Neville & Co. and secure your bargains without delay—remember last year, the fall season of '77—they could have purchased bags at 8½ cents, they waited and paid 12½ to 15 cents—learn wisdom and buy now.

Hand Sewed Bags, Standard, 22x36 com. prices	8½ — 9 cts.
Second Hand, Extra	8 — 8½ do
Machine Sewed, 22x36	10½ — 12½ do
do. do. 20x30	10½ — 11 do
Barley Bags, 22 x 40	11 — 12½ do
" 24 x 36	9½ — 10 do
" second hand	— 9½ do
Wool sacks, new	45 — 55 do
do second hand	30 — 40 do
Potatoe Gunnies Double Sewed	13 — 14 do
do do. Second Hand	10½ — 11 do
Flour Bags, quarters	6½ — 6½ do
do. halfs, six qualities	9 — 11 do

Staple Home Products.

The exhibit of *Home Products* are not as large as usual—cold and storms prevent a large stock, Oranges and Lemons are not yet in good stock, only the first small crop—Raisins are very fine, the "Blower" Raisins of Woodland now sweep the market and are highly esteemed abroad, where large quantities are sent. California Nuts and Almonds are fine, and so of our Peanuts—our own products are always the best.

Flax Seed, per lb	2½ — 3½
Hemp Seed, per lb	6 — 7
Castor Beans, per lb	3 — 3½
Castor Oil No. 1 Diamond in cases, per gallon	— 1 10
" " " barrels "	— 1 05

Coriander Seed	8 — 10
Broom Corn	4 — 6
Bees Wax	23 — 28
Pea Nuts	5 — 7
Walnuts	8 — 10
Almonds, Soft Shelled	12 — 14
do. Hard do.	8 — 10
Pecans	14 — 15
Filberts	12 — 14

California Leather Market Report.

The *Leather, Hides* and *Tallow market* still continues stagnant, but prices do not yield much—the trade in all these will revive soon.

California Sole Leather	23 — 30
do. Harness do.	— — 30
do. Skirtings	34 — 37½
Bridle Leather	4½ — 6½
Rough do. Oak Tanned	18 — 25
Waxed Calf Skins	50 — 1 00
do. Kips do. per dozen	20 00 — 55 00
do. Leather per foot	15 — 17

Wool, Tallow, Hides, Etc.

The *Wool market* remains very quiet, home demand for manufacturers light, but some overland shipments and some are now on the way, the "Gen. McClellan" sailed lately as reported by sea, the "Gen. McClellan" sailed lately as reported by the *Market Review* this ship, and carried away 1047 bales wool, 1,030 546 pounds, so much to relieve our market.

Wool, Spring Clip	16 — 18
do. Choice Extra	17 — 20
Fall Clip	14 — 18
Oregon Wool, per lb	19 — 21
Medium, bright	12 — 14

1854. 1879.

THE CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1879, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on the Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the first and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONING WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER being placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 00
Six Copies,	20 00
Ten Copies,	35 00
Twenty Copies,	65 00

THE SANDWICH ISLANDS.

LETTER FROM AN OLD CALIFORNIA PIONEER.

HONOLULU, SANDWICH ISLANDS, Dec. 23, 1878.

COL. WARREN—*Dear Sir*

Hoping this shall find you in the best of health and spirits and knowing the great interest you take in the prosperity of California, and in the farmer's interest, I can tell you how you can all get rich and happy. It was left for the Sandwich Islander to discover the philosopher stones that turn all things into gold. You have only to put the farmer and land-owners on the right track; it works like a charm, if the farmers will ask the Federal Government in Washington to deal as kindly with them as they have done with the Sandwich Islands; that is, to give the farmer 50 per cent. on their grain and fruit, which is done by a scratch of a pen, without any trouble. What the Government has done for strangers they will do with pleasure for their own people—no doubt.

It is the biggest thing out. Land here that could not be sold for any price, now rents for ten dollars per acre. The planters which were all "bankrupt" are now millionaires. They talk about nothing but their immense wealth. They live in grand style, I wish you could see them; the change is incredible, two years ago their property could not have been sold for 10c., on the dollar what it had cost. The Arabian Nights is nothing to it. Think of giving a parcel of trumps from all parts of the known world $2.50 and each hundred lbs. of sugar and rice. You will see the smiling faces of your brother farmer when the Government shall give them $1,00 coin on a sack of grain. Only try it for 7 years—only 7 years. The gold and silver mines is nothing—houses, town lots will as it has, all turn into gold. The man that was able to get that sugar treaty through Congress, will live in history forever. I have in my mind's-eye the condition of things.

When going through the farming countries next year in place of seeing the farmer in the field attending to his laborious business, you find him sitting in the parlor in grand rocking-chair style, with two Chinamen fanning him and a bottle of champagne at his side. He will not inquire about the price of grain, but what he can do with his money, if you think the Banks are good, etc. You will not then believe that he is the same man you saw in so much trouble last year to raise the interest money at the Bank. You will press your hands to your head to see if it is all right—no doubt. Here doctors, tailors, shoemakers and merchants, all hands are going into the sugar business. The King himself has gone into it. But this is but a small country compared to California, and will only be a drop in the bucket. You will no doubt buy up all U. S. Bonds as fast as they can be bought. They say here that Mr. Spreckles will have 40,000 tons of sugar next year; think of that, 2½cts. premium. Two years ago this country was utterly bankrupt; the people were all leaving that had the means of doing so. They talked of nothing but the miserable condition of the country. It looks like a fishery but it is a fort. Just think you people of property in California that can hardly get rent enough to pay your taxes, here they give their King $21,600 a year; $50,000 for his body-guards; $60,000 for a new house, they have sent $10,000 to Boston for a cast iron Kanaka. But the beauty of it is this—it all comes out of the people of the United States. Now sir, I wish you a Happy New Year.

Very Respectfully, SAMUEL NORRIS.

P. S.—The sugar treaty should be set aside, it is a gross fraud on the people of U. S.

Home Correspondence.

THE SALMON TRADE.

SAN FRANCISCO, January 24, 1879.

COL. WARREN—*Dear Sir*

Your article on this subject in the FARMER, Dec. 26th, contains some errors which I hope you will permit me to correct. It is also I think more narrow and local in its tone than is consistent with that leadership which seeks to enlarge the views of that class of the people who are the creators of the world's wealth.

Your error is in stating that the Fish Commissioners have been sending salmon ova to the "Eastern and middle States, to Europe and almost everywhere, to Australia and New Zealand and recently to Germany very largely." These salmon eggs have been taken from the fish, fecundated and shipped by the *U. S. Government* and the expenses are paid by an annual appropriation by Congress. The United States also gives to this State annually without cost from two to three million of these eggs with which to keep up and increase the supply in our rivers. You say:

"Now we ask the reader to reflect upon the result of thus sending our 'Salmon Ova,' abroad, where every river and stream will be stocked, how long will it be before our Export in the Salmon trade will be checked or completely superceeded by their own Home supply."

I think this is a noble act on the part of the Government. It is now doing something still more enlarged and generous. It is catching codfish in the Bay of Fundy (each female fish has an average of two million eggs) and is hatching these at Gloucester, Mass., and turning the young fish by millions into the ocean, Who so narrow as to object that some of these may be caught by Englishmen, Frenchmen or Germans and to that extent thereby Gloucester fishermen be injured. There is no more danger that the rivers of the world will be overstocked with salmon than there is that the world will be overstocked with gold. The more they are spread abroad the greater will be the demand. I hope the time may come when the rivers of New Zealand, Australia, Chili Germany and the south of Europe will be filled with California salmon, and all of the sloughs, lakes and warm ponds of America with Carp from Europe and Gouramí from Cochin, China. Any action of a Government that creates cheap and nutritious food for the human race is to be commended. You would admit that it would be a selfish and narrow policy that would cause the Government of Equador to prohibit the exportation of the seeds or plants of the Cinchona to India because while all humanity would be benefitted, the bark-gatherers of Equador might in a hundred years have their profits lessened.

When Europeans settled North America there were no animals domesticated, and no cereals cultivated other than maize. To the food of the world, of native products, so far as I can now remember. America has added only Indian corn potatoes, tomatoes and the domestic turkey. Our wheat, rye, barley, horses, cattle, valuable grasses are all natives of other countries. Suppose these other countries had prohibited the exportation of horses, cattle and wheat to America because such exportation might have injured the business of their people who raised and cultivated these products? China pursued this policy with silk-worm eggs, but you would hardly take the policy of China as a guide.

The rivers of Maine and Connecticut, from obstructions and unregulated fishing, had been exhausted of Salmon. Our Government applied to Canada to purchase or take salmon eggs from her waters with which to restock these streams. Canada was doing a large business in sending fresh and cured salmon to Boston and New York. No such policy as you have suggested was pursued. Canada sold us the eggs at a good round price as she would have sold a new and valuable variety of wheat or an improved breed of horses or cattle.

Europe and Asia have given us all our most valuable domestic animals, cereals, fruit trees and grasses. If we can increase their food supply let us do so. The world would be benefitted and food would be cheaper and more easily obtained if every river, stream pond and lake was filled with all the valuable food fish they could support. Let us have the best and most prolific fish of other countries for our waters and in return give the best we have. America could not then repay for all that other continents have given to her.

I believe with Malthus that the time is coming when the world will be over populated, when there will be literally a struggle for human existence. The work of postponing this evil day was commenced by our Government when it authorized Prof. Baird, Secretary of Smithsonian Institute, to hatch fish and turn them into the ocean. Three-fourths of the surface of the globe is water; every cubic foot is filled with millions of animalculae on which higher organisms can feed, these again become food for others still higher. The capacity of the ocean for the production of human food is therefore almost illimitable. When the intellect and discoveries of man are applied to the increase of those fish valuable for his food at the expense of the lower organisms, there appears to be no present limit to the amount of food that can be produced at a trifling cost. It may be that the Gloucester fisherman may never catch one of the fish thus hatched, but other fishermen may, and so much increase will be added to the world's supply. If, as Franklin said, that man is a benefactor to the race who causes two spears of grass to grow where but one grew before, how much greater a benefactor is that Government that creates a vast additional supply of food not only for its own people but for all people and for all time.

The rivers of this Coast cannot supply the market of the world with salmon. The world is not a quarter supplied and yet all our rivers other than the Sacramento, are becoming exhausted. The Columbia is falling off year by year, and the "Canners" are moving their works to other streams. It was the testimony of a fisherman of the Sacramento who had been twenty-eight years in the business,—before a Legislative Committee last winter,—that he did not know a man in the business who would not catch the last salmon if he could even if it caused the race of salmon to become extinct, and he added he did not know of a canning establishment that was not ready to purchase this last fish.

The State of New York a few years since during two seasons hatched eighty million of shad and turned them into the Hudson. Shad had been selling for a dollar a piece. When these came back from the ocean they were taken in such large numbers in the Hudson that they sold for ten cents a piece in the New York market. Fishermen and nets increased in the same proportion. They became so numerous that the fish could not reach their spawning grounds. The law regulating the times for netting was defied and Seth Green had to commence the work of hatching sturgeon so that when these grew they would tear holes through the shad nets and allow some shad to reach their spawning beds.

With unrestricted fishing, with salmon canning as profitable as it has been for some years past, with a public sentiment that does not sustain the laws for the protection of fish and that does protect and preserve the natural enemies of the salmon, it is necessary that our Government should send the eggs of our fish to rivers in other countries. If it did not do so and at the same time artificially replenish our rivers the salmon would soon become as extinct as the Mastodon, the Irish Elk, the Great Auk, the Dinornis and the Dodo.

B. B. R.

IMPROVEMENT IN HORSES.

There has been no plan for the true and permanent improvement in the breed of our Horse Stock in all the years of trial on this Coast that has approximated to the right standard, until the action taken by Gov. Stanford at his Stock Farm at Menlo Park.

We know of many efforts made by Breeders of Blood Horses upon a small scale and for their own individual gain and benefit, but no plan has ever been laid and carried on with an enlarged view of a grand public good, until the plan was adopted to which we allude, and now being perfected at the Stock breeding grounds at "Palo Alto."

The character and quality of the Stock selected and purchased for Gov. Stanford by the best judges, number at present some *three hundred animals*, Stallions, Brood Mares, and young Stock, and is beyond question the very best collection of Horse Stock in the United States, and these are to be bred from with the noble purpose of faithfully advancing a great and valuable interest for the public good, as the future will show, the past efforts of the same gentleman in the scientific development of the Horse's action in trotting and racing, by Maybridge, is guarantee of future great improvements in the interest of this noble animal.

Searle's Wine Factory.

The manufactory on Jackson Street of what is known as the De Turk and Searle Sherry Wine, is now one of the features of the wine trade of our city.

There is manufactured from 12,000 to 15,000 gallons per month, the great bulk of which is now shipped to New York, the last year over 100,000 gallons were shipped from this manufactory.

All Copies of the FARMER sent from this Office are POST PAID by us, consequently, all who *receive our Paper are relieved from all Postage* at the Office where they are received.

OUR EXTRA EDITION.

THE GREAT DRAGON TREE OF TENERIFFE.

OUR ILLUSTRATION.

The largest specimen ever known was one of Dracæna Draco, or the Dragon tree of Orotava in Teneriffe, one of the Canary Islands. This tree was remarkable for its monstrous dimensions and prodigious longevity. About eleven years since, or in the autumn of 1867, this magnificent specimen was destroyed by a gale of wind. It was a special object of interest in the Canary Islands, and received the attention and veneration of visitors, as do the great Sequoia trees of California. Its trunk below the lowest branches was eighty feet in height, and ten men holding hands could scarcely encircle it; by one measurement this span around it was seventy-nine feet. The trunk was hollow, and in the interior was a winding staircase, by which one might ascend as far as the part from which the branches sprang. It is affirmed by tradition that, when the island of Teneriffe was discovered in 1402, this tree was as large, and the cavity in the trunk as great, as at the time of its destruction. We are even assured that in the fifteenth Century, at the time of the conquest of the Canaries by the Normans and Spaniards, they celebrated mass on a little altar erected in this cavity. From the slow growth of the young Dragon trees in the Canaries, it has been estimated that this monster tree, before it was destroyed, was the oldest plant upon the globe. A writer in describing it, says: "Long leaves, pointed like swords, crowned the extremities of the branches, and white panicles, which developed in autumn, threw a mantle of flowers upon this dome of verdure." The popular name of this species is Dragon's-blood Tree, because of a resinous juice of a red color which exudes from the cracks in its trunk. At one time this resin formed a considerable branch of commerce, as it was used medicinally as an astringent, but it has fallen into disuse.

[We are indebted to the courtesy of James Vick, Esq., the popular seedman and florist, of Rochester, New York, for the above illustrated cut, and the facts stated in his admirable *Magazine*, which every lover of flowers should subscribe for—(see club list of the FARMER.—ED. F.]

Our Advertising Patrons.

We call special attention to the following in our Journal:

To the NURSERYMENS' business; now is the time to purchase such stock and we advertise only the best.

To the SEEDSMEN abroad, who offer new and valuable stock those we advertise are most reliable.

To the Santa Clara Valley Nursery of B. S. Fox, Esq., especially, whose immense stock is worthy of particular remembrance.

To purchasers of Lands and Farms, to the Advertisement of Steiner, Klauber & Co., their special Land Sales.

To our *Sheep Men* to the valuable remedy of S. H. Kennedy, Esq., of Omaha—agency of same at J Moore & Co., Front street, San Francisco.

Premium Seeds.

Seeds from Rural New-Yorker Office.—We have been favored with sample parcels of the Seeds sent out to all subscribers to this Journal, and which are choice.

Our readers will bear in mind that we *club* the FARMER and the *Rural New-Yorker* now, and send them for ($6) six dollars with the Seed Premiums from each Office—a rare chance.

WARD'S FERTILIZERS. These very superior kinds of *Fertilizers* and also *Insect destroyers* should be universally used upon plants and flowers

THE GOOD OLD DAYS OF '49.

We promised in our last issue to publish *Records of the past* that we might recall to the minds of our "Old Pioneers" some reminiscenses of those "Good Old Times" when trade was lively, profits large, and money plenty, and what is always better and of more value than gold or silver, to recall the times and memories of those who were ever the ready helpers and friends of all their brother men.

The following account current of the Schooner "John Dunlap" up the Sacramento River in early '49, will be read with interest and astonishment, by those of later times, the names of the early Merchant Shippers on the "John Dunlap" will revive many recollections of the past, for nearly all here named are sleeping in the "Spirit Land."

The name of W. H. Stowell, Esq., now a Commission Merchant of our City was the head Bookkeeper with Simmons, Hutchinson & Co., and at a salary of $500 a month, A. F. C. Eugert, 412 Front St., was also with the Firm with Mr. Stowell.

The special lists of freights and passage money we give, freight to Sacramento paid from $20 to $60 per ton, passages from $20 to $30 each, these were the "Good old Times" of '49.

These days have past and left no sign, a goodly host of our Pioneers are gone and with but a few years

These days have past and left no sign,
A goodly host of Pioneers
Are gone, and in a few years
That noble host will pass away
To a better home and a brighter day.

Schooner "John Dunlap and owners, in account current with Simmons, Hutchinson & Co.

WINE AND SPIRIT REVIEW.

From Messrs. J. R. Parkington & Co.,

Our Correspondent at London,

Crutched Friars, London, E. C., January, 1879.

[We give only a part of an extensive Report sent us—not space for all, but these facts are important to our Wine Interest.—Ed. F.]

THE VINTAGE.

The Vintage of 1878, taken as a whole, was far from satisfactory. The weather was too damp and variable to allow the vines to flourish to any great extent.

It is calculated that the French wines in 1878 amounted to 48,720,000 *hectolitres*, whilst the average yield for the ten years from 1869 to 1878 was 56,204,694 *hectolitres*, or 1,236,503,268 gallons. The falling off is attributed to the ravages of the *Phyllozera* and *Oidium*, of which we have so frequently written. The Cognac districts have suffered most, and hence the hardened state of the Brandy market.

The Claret yield (classified growths) was good, but in those districts producing cheap and medium wines there was a serious decrease.;

The vintage in Germany was a complete failure as regards both quality and quantity. The unseasonable weather and the *Phyllozera* rendered the yield of the Douro very small, and according to estimate only about 35,000 pipes. A rise, therefore, of from £2 to £4 per pipe in the cheaper wines has taken place. The Sherry vintage was, as anticipated, most disastrous for farmers as well as shippers. Madeira was favored with quantity, quality and reasonable prices.

CHAMPAGNE.—The eagerness of some of the leading shippers to purchase prior to, and at, the gathering caused great surprise, and the prices paid were high to absurdity. Those who preferred to wait were able to buy at much more reasonable rates. The new wine is better than was at first expected, but will not rank as a noted vintage. The 1874's have been in great request, and there now remains but little at the disposal of shippers. Prices are very firm for this vintage.

CLARET.—The Bordeaux market was very flat during the first half of 1878, but has been tolerably active since July. The 1875's, 1876's and 1877's have sold freely, and stocks of old wines in hands of growers are, therefore small. Heavy parcels of cheap and medium 1878's were secured even before they could be tasted, and prices show an upward tendency.

PORT and SHERRY.—The official figures for December have not yet reached us, but we conclude they will only further decrease the returns, which already exhibit a decline of about 17 per cent. and 20 per cent. for the eleven months.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have GRAIN to sell and to keep.

TO FARMERS.

Neat be your farms, 'tis long confessed
The neatest farmer is the best.
Each bog and marsh industrious drain,
Nor let vile balks deform the plain,
Nor brushes on your headlands grow,
Nor briers a slovenly culture show.
Neat be your barns, your houses neat,
Your doors be clean, your court-yards sweet;
No moss the sheltered roof enshroud,
Nor wooden panes the window cloud;
No filthy kennels foully flow,
Nor weeds with rankling poison grow;
But shades expand and fruit trees bloom,
And flowering shrubs exhale perfume;
With pales your garden circle round;
Defend, enrich, and clean the ground;
Prize high the pleasing, useful rood,
And fill with vegetable good.

DAN'S WIFE.

[We find a sad but a too true picture of the wife in *The Laws of Life*, which we copy in the hope that many a husband, who perhaps thoughtlessly overlooks his overworked wife, may read a lesson and make amends before it is too late, as shown in this touching poem.—ED. F.]

Up in early morning light,
Sweeping, dusting, "setting right,"
Oiling all the household springs,
Sewing buttons, strings,
Telling Bridget what to do,
Mending ripe in Johnny's shoe,
Running up and down the stair,
Tying baby in her chair,
Cutting meat and spreading bread,
Dishing out so much per head,
Eating as she can, by chance,
Giving husband kindly glance,
Toiling, working, busy life,
"Smart woman,
Dan's wife."

Dan comes home, at fall of night,
Home so cheerful, neat and bright,
Children meet him at the door,
Pull him in and look him o'er,
Wife asks how the work has gone?
"Busy times with us at home"
Supper done—Dan reads at ease,
Happy Dan, but one to please;
Children must be put to bed—
All the little prayers are said,
Little shoes are placed in rows,
Bed-clothes tucked o'er little toes,
Busy, noisy, wearing life,
Tired woman,
Dan's wife.

Dan reads on, and falls asleep,
See the woman softly creep,
Baby rests at last, poor dear,
Not a word her heart to cheer,
Mending basket full to top,
Stockings, shirt and little frock,
Tired eyes and weary brain,
Side with darting ugly pain;
"Never mind, 'twill pass away,"
She must work but never play;
Closed piano, unused books,
Done the walks to cosy nooks,
Brightness faded out of life,
Saddened woman,
Dan's wife.

Up stairs, tossing to and fro,
Fever holds the woman low;
Children wander, free to play
When and where they will to-day;
Bridget loiters—dinner's cold,
Dan looks anxious, cross and old;
Household screws are out of place,
Lacking one dear, patient face;
Steady hands, so weak but true,
Hands that knew just what to do,
Never knowing rest or play,
Folded now and laid away;
Work of six in one short life,
Shattered woman,
Dan's wife.

MARKETS FOR HONEY.

The general markets for honey during November has been about as follows, i. e., for good, choice, marketable honey.

NEW YORK MARKET.

Strictly white comb, put up in what is called small cup	20 — 22
Put up in large cup	16 — 20
Dark shades of honey	12 — 14

The sales of beeswax from June 1st, for the year thus far, over 100,000 pounds, prices realized from 25 to 30 cents.

CHICAGO MARKET.

Choice white comb honey	16 — 19
Liquid honey, in jars	9 — 10

Beeswax realized from 25 to 29 cents.

LOUISVILLE, KENTUCKY, MARKET.

Choice white comb, only	12 — 16
Liquid strained honey	6 — 10

Beeswax realized from 25 to 28 cents.

CINCINNATI MARKET.

Choice white honey, small cup	15 — 20
Best pure strained	10 — 12

Beeswax realized from 23 to 28 cents.

SAN FRANCISCO MARKET.

Choicest white honey in comb	14 — 18
Choicest strained, in glass jars	10 — 12

Beeswax realized from 26 to 29 cents.

Change of Seed.

One of the surest means of securing choice Grain of all kinds and we might add with truth almost every variety of product raised from seed, is to procure new seed from other sections of the world every few years, change of soil and climate with seed when carefully practiced, is certain to produce an increase of quantity and an improvement in quality, it is very essential that Seed of any kind should not be continued year after year raised from the soil and planted as it is termed "in and in," a change is necessary to insure success.

AGRICULTURE.

THE SCIENCE AND BASIS OF ALL WEALTH.

[We present our readers, and especially our cultivators of the soil, with the following essay, which we give (only a part of it) from the Report of the Hon. Thomas P. Janes, the able Secretary of the Board of Agriculture of Georgia. The Report from which we copy contains a vast amount of valuable statistics of the crop of that State, and its rapid progress in agriculture, the report is a very valuable one, for which, thanks to the secretary.—ED. F.]

Is it not wise to consider the relations between agriculture and the State, as well as the duty of the aggregation of citizens called the State, to foster this great fundamental productive interest?

The miner exhumes the ore already existing in the earth, but useless to man until taken from its bed.

The manufacturer changes the form of already existing crude material, prepares it for man's use, and thus increases its value.

The mechanic changes the form or brings into new combinations crude or partially manufactured materials, and by his skill presents them in forms useful to man and enhanced in value.

Mining, manufactures and mechanics are productive but not creative industries—they produce values, but do not create products.

The skillful agriculturist creates products not before existing, and at the same time increases his power of production by the improvement of the soil.

Every pound of cotton, ear of corn, grain of wheat, pound of wool, mutton or beef, produced on the farm is so much added anew to the wealth of the State. Every dollar added to the value of an acre of land by the skill of the farmer increases the income of the State one-half of one per cent in the form of taxes.

Mining and mechanics may be classed as a species of manufactures, so that we may say, with perfect propriety, that agriculture and manufactures are the "nursing breasts" of the State. Without them no values are created, no wealth produced. On them depend individual and collective subsistence, comfort and prosperity.

Agriculture is the only source of primary creative production. Manufactures, mining and mechanics enhance the value of products, but do not create them.

Agriculture not only creates products and hence values, but if skillfully conducted, its productive capacity is increased even during the exercise of its creative power. Not so with any other productive interest. The greater the skill and energy brought to bear upon mining, the sooner the mine is exhausted

The more persistently the machinery of a factory is run, the sooner its productive capacity is impaired.

Agriculture and mining furnish the crude material for almost the entire manufactories of the world.

Agriculture, in its most comprehensive sense, feeds and clothes the world, and yet its productive power is continually increasing. Its handmaids, science and mechanics, are yearly becoming more subservient to its commands. Civilizing the necessity of extending the fostering care of their organized power to its advancement and development.

Recognizing it as the fundamental source of their wealth, and that upon the knowledge and skill of its votaries depend the increase of its productive power, departments, schools, colleges and experimental stations have been established for its encouragement. Under such fostering care it is no longer regarded as an art controlled by mere empiricism, but has taken its proper status in the estimation of men and nations as a science, to which other branches of science are made tributary.

Geology, botany, meteorology, physiology, chemistry, mechanics, zoology, entomology—all the natural sciences which existed as such while agriculture was looked down upon as a mere art, are now proud to make their contributions to the science of agriculture.

As a mere art, agriculture was exhaustive of her own resources; as an applied science, she builds up her waste places, and while yielding annual profits, constantly increases her producing capacity.

The suspension of agricultural productions for a single year would stop the wheels of factories, suspend every branch of business and depopulate the earth by famine.

Assuming, then, as we may safely do, that agriculture is the great primary source of the production of wealth, and that upon which all other industries depend for their very existence, the questions for the people of Georgia to consider are:

1. What can individuals do to increase its productive power?

2. What can voluntary organizations do by co-operation that cannot be accomplished by individual enterprise?

3. What should be done by the State, or the political organization of citizens, which can neither be done by individuals nor by voluntary organization?

The duty of individuals, stimulated, as it is, by self-interest, would need no illustration, were all engaged in agriculture, possessed of the knowledge and skill necessary for the most judicious conduct of their peculiar business. Unfortunately, however, this is not the case, and is not likely to be for many generations to come.

Successful agriculture secures a liberal annual profit upon the capital invested in land, appliances and labor, and at the same time increases the fertility or producing capacity of the soil.

Wasteful agriculture, such as is practiced in the early history of every country, may secure annual profits, but is often accompanied by a diminution in the fertility of the soil; and hence a reduction in the value of the capital invested in land.

This has been the histories of the agriculture of most countries as the result of a destructive system of cropping without return to the soil of fertilizing material until agricultural exhaustion take place.

Recuperative agriculture, under the influence of science and skill, build up the waste of the previous system, and results in successful agriculture. Many of the countries of Europe have long since reached this point, the older portions of the Northern and Middle States more recently, and it is believed that Georgia is just entering upon the recuperative system which, if persisted in and properly fostered, will, before many years shall elapse, make Georgia what she should be—the most successful agricultural State of the Union.

To accomplish this, agriculture, as a pursuit, must be dignified in proportion to its importance, and the rising generation of young men must be not only impressed with its dignity but educated with a view to its successful practice.

The most pressing present duty, therefore, of individuals engaged in agriculture, is to avail themselves of the teachings of science and that of the practice of the most advanced and successful agriculturists, to educate their sons to the principles of agricultural science, and their application to agricultural art, to realize, themselves, the dignity and importance of agriculture as a pursuit, and impress the same upon their sons and daughters

To do this, they must keep abreast with the progress of agriculture as an applied science, by reading the best agricultural books and journals, by attending the meetings of clubs and societies where the information of one is made the property of all, by attending fairs where the results of the best practice are exhibited, and, lastly, personal supervision must be given to all the work of the farm, in order that muscle and machinery may be under the immediate guidance of brains.

When those engaged in agriculture properly appreciate their noble calling, and by the necessary mental culture, place themselves in a position to command the respect for their avocation from all other classes of citizens that its importance and their dependence upon it seem to demand, the trades and professions will be less crowded, and the farm sought by the best talent and material that the country affords.

How is this to be done?

Education, both of farmers and farmers' sons and daughters, must be relied upon as the lever for the elevation of the great agricultural masses. They must read more, think more and bring more knowledge and skill to bear upon their daily avocation. Not only is agriculture the most important productive resource of the State, but it affords a wider field for the exercise of executive ability and the application of knowledge than any other avocation pursued by man.

There is much that may be done by individual enterprise for the advancement of our agriculture which cannot be accomplished by any other agency, but its paramount importance to all classes of citizens, and its controlling influence upon the material prosperity of the State, justify the conclusion that other agencies than individual enterprise should be brought into requisition. There is much that can be done by voluntary organization and co-operation.

THE FUTURE GRANARY OF THE WORLD.

South Australia, having carried off the highest prize for wheat at the Paris Exhibition, has established her claim to be classed among the most important grain-producing countries; and as this award is certain to bring into more general notice the capabilities of the colony, it is pretty certain that the quantity of its cereal produce will eventually exceed that of any other country, as much as its quality has now been proved superior to that of all others. The actual area of land in the colony, excluding the "Northern Territory," which is tropical in its climate, and not so well adapted to the production of corn, is about 240,000,000 acres; and although perhaps one half at least of this is available for arable purposes, not more than one-thousandth part is actually under cultivation of the barest kind. Agricultural settlement has not, according to Mr. Boothby, extended 150 miles from the coast, and pastoral occupation may be said to have reached no further than 500 miles. Over the whole vast area the population does not exceed 211,000; and yet more than one and a half million quarters of wheat were reaped at the last harvest, the total area under wheat being about a million acres. That the quality of the samples exhibited at Paris, which carried off the prize against the rest of the world, was not extraordinarily good, but fairly represented the average quality of the wheat produce, is shown by the fact that the prize wheat exhibited at the Colonial Agricultural Shows during the last years has averaged 63 lb. per imperial bushel. The comparatively small yield per acre, shown by the above statistics, is accounted for by the facts, that the whole area returned as "under wheat" is not actually all sown every year; that a great portion of the soil has been sown with wheat for many successive years without manure or rest; and that the limited means of the farmers have precluded that perfect cultivation which is practised in other countries where wealth and mechanical appliances and labor are more abundant, though, in some districts where these advantages are to be found, the average yield of wheat is as high as twenty-seven bushels per acre.

Feed down your Grain.

The cold weather of late and especially in many places near the cold line grain has been chilled and blighted by the prevailing Northers, and considerable grain has been more or less frost touched, but this will do little or no injury; the best thing a Grain Grower can possibly do will be to turn a flock of sheep or young calves in upon this grain and let them eat it off; young stock can do no great harm not half as much injury as benefit, by feeding off the early growth it gives the grain a check back, causing it to throw out a great mass of *extra roots;* which will cause the grain to stool strong, and thus make many stalks of grain where if this was not done there would be but one.

We earnestly commend this plan to our Grain Growers, if they hesitate about doing this on a large scale let them try *half a field* and they will then see the result, and we are sure that the benefit of the grain by this plan will be so great that they will ever after adopt our plan, as a general rule.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces, therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $ 500. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory filled salt, therefore, is there any gentleman who would risk the spoiling of $1,500 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs at 50 cents extra per annum for a family of six. Why not use the best salt?"

SCAB AND TICKS

IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H. KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Horticulture.

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

BOTANIC GARDENS AT BRISBANE.

We have been favored by Walter Hill, Esq., the excellent Colonial Botanist and Director of these Gardens, with his able report to the Legislative Council, it is a valuable work, showing how much has been done to advance the public interest, and at same time advance and improve the public taste, the expenditures by the Government are always on a liberal scale, and this it is that so distinguishes the English Government, from many others in scientific enterprizes.

The Director says:

The season of 1877-8 has been specially marked by a continued drouth, extending from the month of July, 1877, to February, 1878, the aggregate rainfall during that period only amounting to 19¾ inches. On the 28th December last year we were visited by an unusually heavy hail-storm, which caused considerable damage, especially among the *araucaria, excelsas*, and camellias; many plants of a tender nature were also destroyed during this storm by the breakage of glass in the breeding pits and green-house (the roof of the latter being only saved by the wire covering), and the sudden check experienced from the hail lying a long time at the roots. The breaking up of the drouth and a continuance of genial rain have already done much towards repairing the damage done, and restored the general appearance of the gardens to such an extent that the effects of the untoward events above referred to are scarcely noticeable.

The rosery during the past season has been a special attraction to visitors. Never since the gardens have been established has there been such a display of rose blooms of all shades and colors, and there have been fifty new varieties added to the collection. The plantations of the rhododendrons and azaleas were also a special feature in the gardens during the months of September and October last, the varied colors and luxuriant growth being much admired by visitors. The borders along the sides of the different lines of walks have been planted with *francisceа latifolia, francisceа uniflora, francisceа eziuia, francisceа calycina, francisceа acuminata, francisceа lindeni, gardenia florida, gardenia fortunii, gardenia thunbergia, gardenia stanleyana, gardenii rothmannii, brunsea coccinea, brownea ariza, Jonesea asoca, plumieria acutifolia, acalyphas*, &c., &c. All of these plants are thriving admirably, and from their beautiful foliage, exquisite scent, and varied colors of bloom, a very pleasing effect will be realized. The island is especially rich in tropical foliage plants, there being some magnificent specimens of the *caryota urens, coryphea Australis, seforthia elegans, areca lutescens, alsophila dicksonia, cyathea*, &c., their stems being covered with *platycerium ophioglossums, cittaria* and *angiopteris, marattia*, and *thanmopteris*. The great collection of palms and ferns at this spot, all in the most luxuriant growth, surrounded by bamboos, forms one of the most attractive features in the gardens, especially to visitors from the neighboring colonies.

The aquariums, with the white *nelumbium album*, pink *nelumbium Leichhardti*, and blue *nymphæa gigantea*, water lilies, which blossom most luxuriantly during the months of January to March, are usually the subject of much admiration. The walks on either side of the *araucaria bidwelli* (bunya bunya) is the most favorite promenade of the public, and the noble line of these spendid trees justly excites general admiration. Several fresh beds for the reception of flowers have been laid out between the fountain and the aquarium, but it has been deemed unadvisable to plant them until the total eradication of the nut grass has been effected, and which is now nearly completed.

There has been a marked improvement in the attendance of the public during the past year, and it is gratifying to have to record that, with but very few exceptional cases, the regulations lately promulgated have been strictly complied with. This is mainly attributable to the discontinuance of the practice of allowing the use of the gardens for public entertainment, at which a number of reckless people were drawn together, and much wanton damage was the result.

Good and Beautiful.

Our readers who are not acquainted with the fact may be benefitted by being informed that one of the handsomest magazines in existence is *Vick's Illustrated Monthly Magazine*, published by James Vick, Rochester, N. Y. Each number contains one or more beautiful colored plates, representing some flower or family of flowers, worth more than the price of the *Magazine*. In the January number we find two colored plates, one a group of roses, and the other illustrating church and holiday decorations, with a world of information on the subject that will be invaluable to the ladies especially for public festivals.

COSTLY GARDENS.—The expense to which the late Duke of Devonshire went in relation to the gardens at Chatsworth is illustrated by the fact that it cost him $5,000 to convey thither one enormous palm tree, weighing twelve tuns. Sir Joseph Paxton, who is believed to have derived the idea of the Exposition building of 1851 from the great conservatory at the duke's, was his head gardener.

A Swedish colony of 10,000 persons is in negotiations with the Canadian government for lands on which to settle.

Felix Gillet's Nursery

NEVADA CITY, CAL.

I offer for sale trees of the following varieties of fruit introduced by me in California, and most all on in full bearing on my grounds, viz:

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, FEB. 6, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Mabels Building—Up Stairs.

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,
PUBLISHERS CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair.

Home.—Our Home Page opens with our Poets Column, "The Mother's Dream" will explain the mysteries of that *Divine Providence* which often *seems* to send *affliction* taking away loved ones, which if they had been spared might have caused great sorrow and agony living, than was caused by their death.

The Poem of the "Storm at Sea" is a beautiful one on confidence and trust—a confidence that never betrays, "Say well, and Do well," capital.

"The Passion Flower" will please many; "A Sermon on Cooking," good counsel; Dr. Beecher's Sermon on "Eating by Rule" will do much good if people will practice it.

Horticulture.—"The Botanic Gardens at Brisbane," these Gardens are supported liberally by the *Government*, therefore they can be made *beautiful*, Mr. Hill is the "right man in the right place," his skill and taste makes everything prosper under him.

Miscellany.—"The Dog and the Child" and the "Singing Mice" shows how great is the power of the human over the animal species when that power is directed by humanity and kindly love to these interesting subjects—kindness always wins, cruelty to animals is a sin against the Divine law.

Agriculture.—We place upon this page (10) a brief poem "To Farmers," we hope these simple lines may induce many to adopt them and make their *Homes*, their *Farms* and all within their influence prosperous and beautiful.

"Dan's Wife."—Here is a picture which we hope will awaken the serious attention of many a farmer and laboring man, who is too apt to forget that the Wife is often overburdened and sent to her grave when her life were but half spent.

We give a most excellent Essay upon Agriculture, on same page, to which we ask the special attention of the farmers of this State—here are *great truths* for their consideration.

The future "Granary of the World," it will be seen by what we publish that *Australia* designs to compete for this Prize with *California*, with *Illinois* and other States of our Union, let our Grain Growers look to this matter.

"Markets for Honey."—Here are the prices for this sweet commodity—the Eastern papers scarcely remember *California* in their reports, and yet the crop in this State for 1878 was *one thousand tons*, and was shipped largely to all parts of our Union, to England, France, Germany, Australia, China, Japan, the Islands and British Columbia, the amount exported was nearly $100,000 in value.

Our Front Page.—We give on this Page a valuable Letter from one of our best scientists upon the *Salmon Trade* of our State, of which we speak in an Editorial.

The Sugar Interest.—We invite special attention to the Letter from Honolulu, from one of the earliest Pioneers of our State, a gentleman whose residence of late years and whose business at the Island among the planters and plantations enables him to see how the Treaty with the "Sandwich Islands" works against the true interests of California and the whole Union, one thing is very certain it has been a very serious injury to the Beet Sugar Industry of California, and may eventually destroy it unless that treaty is annulled.

We hope to hear more on this subject, pro and con.

We have valuable Letters, from Galen Clark from the Yosemite Valley, and Railroads in 1853, with Letter from Ajax on Home Influences, and a mass of valuable Mss. for our next.

"Health Dress."—We return thanks to Mrs. Harriet N. Austin for a valuable little book on "Health Dress" a little book with *diamond* like truths.

It will be remembered that Miss Austin is the able Editress of that excellent Journal, *The Laws of Life*, at Dansville, N. Y.

OUR HILLSIDES—OUR GEMS.

For long, long years past until within a few late years the *Press* of this State rarely spoke of our *hill sides* or mountain slopes as of any value, they said they would do for grazing purposes only, and were very lightly valued by the Tax assessor.

The last decade of years has made a wonderful change, the almost valueless lands upon our mountain sides that ten or twelve years ago could have been purchased for one or two dollars the acre, now in many places command as many *hundreds per acre*, and are cheap at that.

We desire especially to call the attention of all our readers to the peculiar effect of the late cold weather in different parts of our State, its peculiar severity upon the lowlands and low slopes and the mildness of the frost upon the side hills even quite high up, we have many evidences of these facts from the "Santa Cruz mountains" from the "hillsides" beyond San Jose and from the high lands of "Newcastle" in Placer county, and on the high lands back of Oakland, in all these places, even where the very mountain tips were white with snow, and the low lands of the valleys were ice congealed—all the middle slopes were uninjured and escaped any serious loss.

It has been our belief always that the healthiest, most prosperous and profitable cultivation would be found upon our "hillsides," it is the best, safest and most certain land whereby to escape severe frosts, severe winds or ruinous drouths, for the soil of our mountain sides is always fed by the underground moisture that comes from above in the thousands of springs, while the soil is mostly light and porous, easy of constant culture, being the decomposed vegetable matter from forest leaves of a thousand years of silent preparation, for those who should come to make the "wild places blossom" with the richest of vegetation.

For more than twenty years, yes, even from the issuance of our first number of the Farmer in 1854, we directed attention to our "hillsides" as the *best place* for our Vineyards and Orchards, and although the Press generally over our State differed widely from us, contending that as no *Irrigation* could be had high up, the "hillsides" never could be cultivated; but after our steady faith, and with "line upon line, and precept upon precept" and many good workers and believers in our plan, we can say that our *Richest and Best Fruits* both from *Orchard* and *Vineyard* are now the products from "hillside" culture.

We do not say there is not a good and very fine showing fruit from many valley and river bank Orchards and Vineyards, but we do say and repeat—and challenge a contradiction of *this fact:*

That the largest and finest fruit, with the fairest bloom, the most perfected juices, and the richest flavor and aroma, are from those cultivators whose "homes and gardens" are all on the "Hillside."

The *Fruit* that comes to our markets from the highlands is always very clearly distinguished from that of the lowlands by its color and bloom, for,

> 'The peaches glow sunny dyes
> Like maidens' cheeks when blushes rise.'

The coming season will give the richest fruit and the largest harvest of it, ever gathered in California.

THE SALMON TRADE---EXTENDING.

Having published many articles upon the rapidly extending interest of the U. S. Fish Commissioners in various sections of our Union, and particularly of the energetic and beneficial labors of the Fish Commissioners of our own State in their distribution of salmon spawn—and spawn and young fish of many kinds to almost every country in connection with us. We had been called upon, and inquiries made by many persons, what effect this wide extension and wholesale distribution of the salmon spawn to our country, where we are now shipping thousands of dozens of canned salmon every steamer, would have upon the future trade of this article. So repeatedly were these inquiries coming to us that we adopted the plan of making the inquiry, as we did in the Farmer of December 26, 1878, we felt sure such an inquiry would draw forth all the facts we needed, so we could place them in response to the inquiries in a satisfactory way.

We have the pleasure of giving a most excellent letter from "One who knows," who has touched the *key note* of true progressive science, and has given them statesmanlike views that we were most anxious to draw out.

We ask the careful reading of this valuable letter and desire the reader to note specially the paragraph quoted by our correspondent, which was simply an *inquiry*, an inquiry too, made in behalf of several who are now canners and shippers of salmon to other countries. Our own views are in full accord with our esteemed correspondent, who we know is devoted heart and soul in promoting the great interests of science and human progress.

That this Journal believes in an enlarged philanthropy and a wide spread spirit of doing good by diffusion of knowledge in every possible way, and in the interchange of all and every product in our power, we can refer to the course we have pursued to this end for twenty-five years in the free bestowal of seeds, trees and plants from our own office—that would now be numbered by the many tens of thousands of parcels.

Our aim and our doctrine has ever been from the publication of the first number of the Farmer, that California was to become the very "Garden of the World," and destined to become the *Almoner* to other States and nations of the rich products of our State in every department of all its its great and varied interests—whether it should be our grains, our fruits, our wines, or any products of the earth, or the "Birds of the air," or the "Fish of the sea," for it is a well known fact that all these are now being distributed, either as merchandise in trade, or as gifts, or exchanges, and all making our State as famed for the excellency of each of these, as for the gleaming gold of her rich mines.

We are under obligations to Hon. Horace Davis for valuable public Documents and Volumes from Washington, also, to Hon. J. K. Luttrell for collections of seeds kindly sent us.

AGRICULTURE---MAN'S EMPLOYMENT.

The cause of the largest portion of the suffering that befalls mankind is chiefly owing to the fact—that *man* is too often *out of his proper sphere!*

To till the earth and dress it was the original destiny of man, and all who have departed from that sphere of action without a special calling—have departed from the *path of duty* and have entered a road that they will find continually hedged up with *thorns and thistles.*

A careful observer of human events cannot but see *this fact*, the many severe and disastrous results that is constantly occurring in the mercantile and commercial world by what is called *overtrading*, the same thing occurs in the manufacturing—but rarely in the agricultural interests.

California alone presents the spectacle of crops so abundant as to give it the appearance of being overdone, while in fact it has only resulted from not understanding *"that alphabet of Nature"* to which the Poet so aptly alludes.

That man is out of his "original employment" and pursuing a path that will prove unsuccessful, when he leaves the agricultural interest, can best be demonstrated by the fact which is a matter of record in the "Old Bay State," that State to which the citizens of all other States ever turn with grateful recollections, as the "Pilgrim and the Pioneer State" of agricultural science, and the Cradle bed of that glorious revolution which gave us the liberties and blessings that we now enjoy, and which if rightly improved, appreciated and guarded are destined to revolutionize the world.

The facts to which we allude are those gathered by that able advocate of agriculture, the late Gen. H. A. S. Dearborn, a name treasured in the memory of thousands in New England.

Mr. Dearborn after a long and careful investigation into the history of the citizens of Massachusetts obtained the following results:

The proportion of those in the various employments which were successful.

In the space of about fifty years they were as follows:

In the mercantile 92 out of every hundred were *unsuccessful, i. e.*, that number failed at various times.

In the commercial 80 out of every hundred.

In the manufacturing about 60 out of a hundred.

While in the agricultural only about 8 to 10 per cent. and these from ignorance of their employment, or calamities of the seasons, etc.

Thus clearly demonstrating the permanence of the agricultural over every other employment and the more certain success that ever awaits it.

We are now in California! and the Theories and the Practices of the old world and the old States, former times and seasons, are in a measure the ground work for our improvement.

California agriculturists must commence "De Novo" grateful for the past, we must move on with *electric speed.*

The History of the world presents no cases of success in agricultural efforts that are

PARALLEL TO CALIFORNIA,

where any just degree of attention has been given, it is not some 30 and some 60 fold but it is the full One Hundred Fold!

The first early developments of agriculture in California on a large scale was in the great valley of *San Jose*, under the impetus given to it by such men as John M. Horner and E. L. Beard, whose broad acres and immense crops were the theme of the world in early times in California, and whose great influence then gave to agriculture the standing it has attained.

To Messrs. Horner & Beard first and to others now in other counties whose enlarged and liberal efforts have advanced this great source of wealth, Californians owe much.

GATHERED ITEMS---OF CROPS,

In spite of the cold winter we have had all over our State, unprecedented in the past for severity and long continuance, the gleam of spring comes to us in sunshine again giving a warm breath, and touching the buds of Fruits and Flowers has once more shown us the blossoms of Spring.

The Almond, the Apricot and the Peach trees show the revival, and our early counties of Yuba, Yolo and Solano, show their bright blossoms already.

However many growers have been fearing of injury to the Fruit crop we are confident it has not been seriously injured, the long cold spell having prevented the roots from sending up any sap to the fruit buds, thus keeping them from starting till now, and even at this date only in warm sections as named above.

The Grain crops are not so much injured as was reported, in fact Grain that had peered above ground and become frost bitten has mostly recovered and is now promising well, and the Grain on "Summer Fallow" planted in dry soil now by the late rains shows well in every county in the State; since the late rains Grain has started and made a very promising appearance, to this also we can say a renewal of plowing and planting of a large area of land gives promise of a greater acreage in Grain this year in nearly every county in the State than ever before, in spite of the cry of no rain and dull sales of Grain

Everthing looks auspicuous now for a good season for our farmers who should do their best now to redeem all the past, there is every evidence from all scientific points that we shall have a plenty of rain and quite late, so the plowing and planting can be kept up to a late day this year.

There can be no complaint now among our farmers generally at the prospects ahead, the rain already come to us and the abundance near by, ensures the most successful prospects for many a year.

Zoological and Acclimatization Society of Victoria.—We have been the favored recipient of the Volume of this Society's Proceedings for 1878, which contains handsome Maps of the Gardens, Park and Grounds of the splendid "Home of Flowers" at Melbourne, the work is full of matters of interest, we return sincere thanks to the Society and the Hon. Secretary for this special favor.

DANGER.

The Tirade---The Poor Against the Rich.

There is now no greater evil in our community than the efforts made by designing men to array the poor against the rich.

In this communistic effort, for so we esteem it, the working men make a very great mistake, a very grave error—in fact, it is a criminal and suicidal act on their part, for it has all along been such men as Stanford & Co., of the Pacific Railroad interest—Flood and O'Brien, Mackay and Fair in the mining interest—and a host of rich men in all the various enterprises that keep the wheels of business moving, that give to the working men of our State their bread and butter.

To us it seems strange that working men rail against the capitalists and rich men, when from this very source they derive their employment, and by them they and their families are maintained, and by them they live.

We believe if the press of our city and State would cease to publish the arrant nonsense that so often fills their columns, of tirades against the capitalists and corporations and wealthy men—and would do more to encourage the manufacturing interest and promote the all important enterprises so needed to build up our State, if the press would cease their personal quarrels among themselves, and use their columns to advance the public good, we should have much more prosperous times; but, unfortunately, a portion of the press suppose they can win some fame by catering to some party or clique, by playing to a depraved appetite for a personal attack upon all wealthy citizens, or upon the "Great Railroad Enterprise," the "Nevada Bank" and its wealthy owners, and thus thus they pamper to a false issue to the very great injury of all the best and noblest interests of our State.

When our citizens shall frown down all such efforts and give an earnest encouragement to all the great enterprises that build up our State, then we shall see truly prosperous times and not before.

While it is to be regretted very much that the dividends of the Bonanza Mines have ceased to be paid to any amount for some months, the fact still exists that from May, 1874, to March, 1878, there was paid out in dividends the enormous amount o $63,720,000, we are not or never have been a believer in stocks or an owner of shares, we only quote facts.

TOBY ROSENTHAL.

This highly gifted Artist is now in our City on a visit to his Parents to whom he is devotedly attached, he has been welcomed by a host of friends who justly appreciate his most wonderful talent being a true delineator of life scenes; his great Pictures which have been exhibited here have clearly shown him to be a most remarkably gifted Artist.

It was our pleasure to have met this Artist at his home in early days when he first began sketching, and then we expressed our views freely of his future fame as a Painter, our opinion and our faith has been fully verified.

We were enthusiastic in our early expressions yet none too much so, for we believed then we saw his coming fame and believed that

> "All that imagination's power could trace
> Breath'd in his pencil's imitative grace,
> O'er all the canvas, form and soul, and feeling
> That wondrous art, infus'd with power of life,
> Portray'd each pulse, each passion's might revealing,
> Sorrow and joy, life, hatred, fear and strife."

Toby Rosenthal may truly be said to be an Artist possessing a Divine gift, his paintings showing the most remarkable life like expressions, as if the figures were in actual life before us, it is to be hoped that our wealthy citizens will improve the opportunity of the home visit of this true Artist to secure pictures of their home scenes in our Golden Land.

T. B. PETERSON BRO'S. WORKS.

We have received "Jave's Daughter" and other stories, by Mrs. F. H. Burnett, the author of many books published by the well known House named above—this book and all the works of these Publishers are for sale by Roman & Co.

"Lindsay's Luck."—This is another of the Peterson Books by Mrs. F. H. Burnett, a very pleasing and exciting story—this work for sale by Billings, Harbourne & Co.

"Philomene's Marriage."—A novel of exciting interest to the reader, by Mrs. Helen Stanley, author of "Saveli's Expiation" and many popular works—this is a new French novel, we have advance copy of the Preface to this book, written by "Henry Greville" to her American readers, the novel will soon appear and prove one of the most interesting and saleable books of the season, the Preface to this work ensures it.

The Ormsby and Pantlind.

Carson City is famed for many things.

"There is a "Trio" of good things.

1st. There is the Carson Mint that sends out its shining coin, that all will say is good.

2d. There is the Ormsby House that is admitted to be the best hotel in all the Bonanza region, and it gives better food, better care and better satisfaction than any other hotel for the hungry.

3d. Then there is mine host "Pantlind," and he is not only good and better, but best of all.

We have before us a Christmas card for dinner, the "Bill of Fare" even now sends forth a rich fragrance in imagination, even though weeks after the grand gala dinner at the Ormsby, Christmas day.

That Christmas dinner at the Ormsby was the merriest and happiest affair that the Bonanza State has seen for a long time.

Carson City was happy, the guests were happy, and Pantlind was happy too. What could be wished for more. Those who visit the Bonanza's must be sure to visit Carson and the Ormsby.

St. Valentine's Day.

This great and merry day is near at hand, and more than *Five Thousand people* have agreed to visit Davis Brothers at the Golden Rule Bazaar, on Market street, and buy their Valentines, as they have the richest, most tasteful and delicate, as well as the largest stock to be found on this Coast.

NEW ZEALAND SCIENTIFIC WORKS.

A little time since we received from the Acclimatization Society at Auckland, New Zealand, a very handsome collection of Scientific works, which we then acknowledged with many thanks for the great courtesy and liberality shown us.

It has ever been our great pleasure to do what we could to promote the great and growing interests between New Zealand, New South Wales and all the Australian Colonies, as we believe a large and vast trade must eventually be done between that Country and all the Pacific Coast.

Our neighbors "just across the waters" as our friend, "Commissioner Mackay" used to say, are doing wonders by their Government to advance all the great interests of the people, and California will never advance as she might until our State shall aid by subsidies from the Treasury the interests and industries of our State as Australia has done

The following are the works kindly and generously sent us, they show all the great Interests, Industries and public works of the Colony:

This valuable Donation was sent to us most courteously from the Government Office.

Progress and Resources of New South Wales, full of valuable and interesting data, by Chas. Robinson, Esq.

Essay on New South Wales, the Mother Colony of the Australias, with rich colored maps and valuable data, by Geo. H. Reid, Esq., author of Trade Essays, etc.

Climate of New South Wales, descriptive, historical and tabular, with extensive Maps, by Hon. H. C. Russell, B. A., F. R. A., S. F. M. G., the Government Astronomer for N. S. W., a most valuable work.

Essays on Sedimentary Formations of N. S. Wales, by Rev. W. B. Clark, M. A. F., R. S., F. G. S., F. R. G. S., a distinguished member of the Geological Societies of France and Australia.

Annual Report of the Department of the Mines for 1877, with extensive and valuable colored Maps of the various Mining districts—Governmental Report.

The Report of the Railways of N. S. Wales, their construction and working with extensive Maps and tabular work—by the Hon. John Rae, A. M., Commissioner of Railways.

The Statistical Register of N. S. Wales, being a most complete work, compiled from Official Resources and presented to both "Houses of Parliament" by E. G. Ward, Esq., the Register General.

This is an extensive series of Statistics, complete in all the valuable data of the Colony, presenting a clear insight into the Resources and great wealth of that country.

The Financial Statement from Hon. H. E. Cohen the Colonial Treasurer of N. S. Wales. This presents valuable data and is for 1878.

The Journal and Proceedings of the Royal Agricultural Society of N. S. Wales for 1877—with valuable Maps and interesting data of this influential society—the work is ably edited and compiled by A. Liversidge, Esq., Prof. of Geology and Mineralogy of the University of Sydney.

This Agricultural Society is indeed a Royal one, as its interesting journal shows great labor and great results.

AUSTRALIAN ORCHIDS.

In *four Volumes* Royal Octavo in size and finely gotten up—a most superb work—each Volume contains specimens of the Orchids life size and in all their beautiful natural colors—this is the finest work on Orchids published, and reflects the highest credit upon the Editor and Publishers for the perfection of the work—a real work of art, edited by R. D. Fitzgerald, Esq., F. L. S., and published by Thomas Edwards, Esq., Government Printer at Sydney

We shall ever be grateful for the Donation of these valuable works.

Hon. Angus Mackay.

The gentleman whose name we gladly herald in this notice, we are pleased to learn has lately been most triumphantly elected to the Parliament Assembly of Queensland, Australia; Mr. Mackay it will be remembered was the very able Commissioner from Queensland to the Centennial three years ago, and made quite a visit in San Francisco on his way to Philadelphia and on his return, and made many friends here who will be glad to learn of his elevation to the Parliamentary labors in Queensland, for which he is well qualified by his talents and real ability, his election as a Legislator secures for the people an able friend for all Industrial Progress.

RECEIVED AT READING ROOMS:

Catalogues Received.—We have received a perfect flood of Nursery and Floral Catalogues and Publications, we have

A very handsome embellished and fully illustrated Catalogue of Messrs. H. K. Bliss & Sons, Seedsmen of New York, a large and extensive Catalogue, and indications of a large and prosperous trade.

We have received the new and valuable Seed Catalogues from Peter Henderson & Co., also,

Thorburn & Co., of New York, these Catalogues all greatly improved in style each year—the present issues very fine Editions.

Catalogue of J. J. H. Gregory, the well known Seed Grower of Marblehead, Mass., a very fine Catalogue well illustrated.

"Guide to Rose Culture."—A new work on the subject with a Catalogue of the New and Rare Roses of Dingee, Conrad & Co., of the West Grove Nurseries at West Grove, Chester Co. Penn., have sent us a very handsome Catalogue.

Catalogue of the Nurseries of Cole Bro's, of Pella Co., Iowa.

Catalogue of the Seed business of J. F. Tillingharp of Factoryville Penn.

We have the Catalogues of the Bloomington Nurseries at McLean Co., Ill., a series of plant novelties.

GOLDEN RULE BAZAAR,

718 Market St.—419 Kearny St,

Five Stories High, 45 x 200.

CLOCKS! CLOCKS!

Every clock that leaves our salesroom, has been thoroughly run and tested, and is *warranted*, if properly used, to be a good time piece. Following are the price of a *few* of the many styles we keep:—

Young America. A 30 hour time-piece with porcelain dial $1.00
The Ecliat—Ansonia 30 hour movement, walnut case, 10½ inches high 1.25
The Economy—Black or nickle plate, 30 hour time-piece 2.00
The Gem—Same as above with alarm 2.50
The Bijou (See cut) Nickle plated case, patent lever, stem winder. 2.50
The Chief Metal case, marble finish, gilt lined 3.00

PEEP O' DAY, ALARM, $3 50.

This has the loudest and longest alarm of any clock made, is fitted with Ansonia Co.'s best movement, screwed pillars, strong plates, silver plated, and requires only one winding for the time and alarm—will go in any position.

The Jupiter—One day striker, patent self-adjusting pendulum, 15 inches high $5 00
The Roman Eight day striker, patent self-adjusting pendulum, 21 inches high. 7 50

Over 50 other styles on hand.

FANCY GOODS.

DAIRY BREEDING CALENDAR

We invite Dairymen who desire a valuable "Dairy Breeding Calendar," containing very valuable items of great value to them, to call and examine the article named above—it is of but little expense, yet of great value.

CALIFORNIA FARMER OFFICE.

THE AUSTRALIAN GUM TREE.

The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

☞Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the bush bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach or Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

TESTIMONIALS.

The manufacturer of these Pills has a great objection to the "wholesale" publication of testimonials, which in many cases are fictitious, and are only intended to mislead. Yet, for the satisfaction of those who are suffering, and have not yet used his medicines, he selects a few, who are best known in the colony and in the town he lives, and their *personal testimony* will satisfy the most sceptical.

These testimonials above named with many from California, since their recent introduction, will quickly show that the

Eucalyptus Remedials

are the best ever yet introduced. Full and ample testimonials accompany all parcels.

MANUFACTURED ONLY BY

DAVID CLARKE,

Wholesale and Manufacturing Chemist,

AT HIS LABORATORY,

WARWICK, QUEENSLAND.

"There is no place like HOME.
Home! It should be Heaven on Earth

A LIFTED CURTAIN.

A MOTHER'S DREAM.

The curtain o'er her darling's fate
Was in the mother's sight updrawn,
And all the future of her child
Was in the hour of sleep made known,
With anxious eyes she saw it rise:
A lovely girl stood smiling there,
And yellow sunlight played around
The pale blue lilies on her hair.
The mother heaved a long drawn sigh,
She was too fair—too fair.

She saw a wealthy suitor come,
And lure her from her home away,
Before a ring was on her hand,
Before a happy marriage day.
The mother wept even as she slept,
Till agony too strong for tears—
Too strong for speech had touched her life,
And frozen all her sunny years;
The paradise of hope was lost
In clouds of blackest fears.

Despised by all the chaste and pure
A wretched outcast shivering stood;
No lilies on her draggled hair;
No graces left of womanhood;
With sin and shame upon her name,
Forsaken, left to meet her fate,
She lingered by the river's brink,
With love of life now changed to hate;
A darkened future on her frowned,
Repentance seemed too late.

A desperate plunge—a stifled cry,
And all of life for her was o'er.
The mother started from her sleep,
To find her darling came no more—
To thank her God the grassy sod
Waved o'er her little one's pure brow.
All might have been if she had lived,
But not a stain could reach her now;
The mother's soul to Heaven's decree
At length could humbly bow.

—*By J. Jackson.*

MY GOD DIRECTS THE STORM.

The spirit of the tempest shook
His wing of raven hue,
Above the sea and hollow winds
Howled o'er the waters blue.

Up rose the mountain billows high,
And swept a stormy path;
Darkness and terror mingled there
Their ministry of wrath.

A lonely bark, by bounding seas,
Tossed wildly to and fro,
Dashed o'er the billow's foaming brow,
To fearful depths below

Crash echoed crash!—the quivering spars
Broke o'er the leaning side,
And left the bark, a shattered wreck,
The stormy wave to ride.

The sturdy seamen struggled hard
To hold the yielding helm,
And hold the ship's prow to the surge,
That threatened to o'erwhelm

And when the plunging ruin spurned
Their impotent control,
They flew to drown their gloomy fears
In the accursed bowl.

Upon the raging ocean then
Helpless was left the bark,
To the wild mercy of the waves,
Amid the tempest dark.

Upon the deck, alone, there stood
A man of courage high;
A hero, from whose bosom fear
Had never drawn a sigh.

With folded arms, erect he stood,
His countenance was mild—
And calmly gazing on the scene,
He bowed his head and smiled.

A wild shriek from the cabin rose—
Up rushed his beauteous bride;
With locks dishevelled, and in tears,
She trembled by his side.

"O why, my love, upon thy lip,"
She cried, "doth play that smile,
When all is gloom and terror here,
And I must weep the while?"

No word the warrior spoke—but he
Drew from beneath his vest
A poinard bright, and placed its point
Against her bearing breast.

She started not, nor shrieked in dread
As she had shrieked before
But stood astonished, and surveyed
His tranquil features o'er.

"Now why," he asked, "dost thou not start?
May not thy blood be spilt?"
With sweet composure she replied,
"*My Husband holds the hilt!*"

"Dost wonder, then, that I am calm,
That fear shakes not my form?
I ne'er can tremble while I know
My God directs the storm!"

Say Well and Do Well.

In closing a sermon on "Good Works and Good Words," Dean Stanley of Westminster quoted the following lines, which some suppose were written by one of the earliest Deans of Westminster:—

Say well is good, but do well is better;
Do well seems the spirit, say well is the letter;
Say well is goodly and helps to please;
But to do well is godly, and gives the world ease;
Say well do silence sometimes is bound,
But do well is free on every ground.

Say well has friends—some here, some there,
But do well is welcome everywhere.
But say well many to God's word cleave;
But for lack of do well it often leave.
If say well and do well were bound in one frame,
They all were done, all were one, and gotten were gain

Would you be wisely and safely INSURED, call at the New Zealand Insurance Co., and obtain their Policy of safety.

THE PASSION FLOWER.

A TALE OF LOVE.

'Twas early "olden time," as the landscape proved. There was a rugged and recently battlemented house; from its keep a crusader's banner waved, and pike and crossbowmen paced the walls. The castle stood upon a hill, surrounded by a trench, across which was a drawbridge. At the foot of the hill was a scattered village—a village by courtesy alone, for the cottages, or rather huts, were desultory and widely parted from each other. The spot of ground taken up by the village had evidently been the clearing of a small portion of an extensive forest, the latter itself having originally been a portion of the first Norman's great hunting-grounds.

For a time nothing human is seen upon this landscape. At length there is a clanging of chains, the portcullis is raised, the drawbridge is dropped, and a young knight rides forth. He is but slightly armed; insufficiently for the joust, enough for self-protection in an age when all carried arms for self-defence, if not of offence. Unattended and alone he rode down the hill, and through the village; passing out at the opposite side, he forces himself through some thick underwood until he reaches a rough road, hewn through the trees for the passage of men-at-arms and knightly escorts. He rides for a good half hour till he reaches the foot of a hugely-spreading old oak; dismounting, he fastens his horse to the tree, and wends his way through a path edged on either side with brushwood until he comes upon an open and verdant glade of some acres in extent. Choosing a particular spot, he unfolds a scarf and waves it above his head.

There stands a tall turret, like the remains of an old castle, in the distance. He has not long waved his scarf in the direction of the turret, ere the action is answered by the waving of a crimson flag from the top of the tower, and shortly afterwards the figure of a female attired in pure white, and having a pink scarf around her waist, is seen galloping along the path upon a palfrey. The knight hastens to meet her, and they are speedily locked in each other's arms.

"Sweetest Maude, had I not known thee, I should have taken thee for an angel," said the knight, first speaking.

"I know not what thou couldst have taken me for, dear Florian, but it is not the first time you have flattered me with the title," replied the lady, and then many love passages passed between the two, till they seemed to forget the passing time, and that it was growing dusk. The sound of a neighboring convent-bell was heard through the distance.

"Harken, dear Florian, it is the vesper-bell; we must part," said the girl.

"So soon?" replied the knight, reproachfully.

"Nay, Florian, we have passed somewhat longer in each other's company than of late; but have you spoken to the proud lord, your kinsman?"

"Speak not of him, speak not of him, if you love me, Maude; he has commanded me to wed the Lady Florence, and I swear——"

"Nay, Sir Florian, swear not, for she is beautiful, rich and of noble descent. I am neither, since the last has been attainted."

"Maude, I pledge my knightly honor I love but you alone. Fly with me to a happier land. But first your secret—the secret of your birth; let me proclaim aloud to the world that the heir of a princely house has dared to wed the object of his love. You cannot, oh! you cannot be of base descent. Fly with me to the monastery; Father Ignatius will unite us, and then in a foreign land, we may dare the vengeance of my haughty kinsman; nay, I may even carve a new line;" and he clasped her in his arms.

The girl yielded to his embrace, and consented. The knight was in raptures, and in another moment he would have led her to her palfrey; but arresting his movement, she said, "But stay, Florian; ere we are united for ever, listen to my secret: I am the sole child of a brave but calumniated knight, Sir Roger de Beaumanoir."

"Sir Roger de Beaumanoir!" echoed the other, with amazement. "Then would that you had been the child of the basest serf!"

"Sir Florian," replied the lady, indignantly, "is it thus you repay my love like a false knight?

"But no, no," she added, passionately, "I live for you alone."

"Maude, I dare not offer you my hand; my race is clear from dishonor, my own fame is like my polished armor. Sir Roger was attainted for treason by the king, his spurs were struck from his heels in open court—I dare not, even for your love, bear all this," replied the knight, proudly.

"You are speaking to his daughter, Sir Florian," was the calm reply of the girl, her eyes suffused with tears.

The tears aroused the love of the knight. He fell at her feet, sought her pardon, again swore his love, and besought her to fly with him. Again she relented.

"We will start at once for Flanders," said Florian.

"Is Father Ignatius in readiness?" asked the maiden, and the color mounted high in the knight's cheeks, as he replied, "What need we, dearest Maude, whose love is so pure and holy of the interference of a priest? We can live and love—ay, I could exchange my very knighthood for your love."

For some minutes the girl made no reply. Her face was suffused with blushes; the blue veins in her forehead were gorged; at length she broke out into a wild, hysterical laugh: "Ah, ah, ah! What, Sir Florian, my father's daughter a light-o'-love? It were indeed worthy his punishment, but neither his merits, birth, nor my honor—all, all, Sir Florian, too high even for an emperor's leman."

Still she moved not from the spot. Florian caught caught her in his arms—she resisted—he became more importunate. A strong grasp was on his arm. He turned to resent it; it was an aged priest. The knight seemed to know and respect him, for he let go his hold of Maude.

"What means this strange trysting?" said the monk. "Sir Florian," this is not seemly; thou hadst better join thy princely kinsman; hearken to his horn; he is returning this way;" and at the moment a gay troop of knights and gentlemen in hunting gear passed; the elder of the troop, who seemed the leader, addressed Florian:

"What ho!" Florian, toying, thou sly rogue, with a pretty demoiselle? This would not sound well in the ears of thy affianced, the fair lady Madeline; nevertheless, home with us, cousin and we will not tell of thy disportings."

Maude had listened to the old lord's words; they sunk deeply into her heart, and she was carried, fainting, homewards by the monk.

"A base knight and a craven," said the latter; "forget him, girl; thou art as well born; he has dared that, and were I his age and cloth, would have cost him a dagger's thrust! But, God's me! I have already suffered too much by human passions and distempers."

"Father, he loves me, and yet would disgrace me."

"Forget him, child."

"In the grave, father. I have none to love but him; my heart, my soul, is formed of his love; destroy that, and all is gone—I die—but then I should love on in some form; I cannot exist without love—and love is Florian—Florian is love."

Months passed on; the tree of love had taken root in the maiden's heart, strong and wide-spreading as an oak; remove it, and you removed and tore into fragments the soil in which it was embedded;—poison the root, and the flower perishes—sinks sapless into nothing. So with Maude, fair flower of the wilderness; the root of her existence was her love; it had been sapped, but she loved on; the more she loved, the less she lived—would she live, she must kill love—would she love, she must kill life. She lived till summer time, and then she flickered with life, fragile but brilliant; and in the hot summer days she would sit by the neighboring stream, day-dreaming of Florian. One day she sat by the water's edge, and called upon the name of Florian, implored of him to return her pure love; she gazed into the water, she saw his image there; the trees, the clouds, nay, in the very distance, she could see her Florian, but he would not speak to her; and as life drew nearer to its close, her love grew firmer; she swore upon her heart she would see, watch, and protect his future; praying, dreaming, watching, nay, peering into hope, she swooned. She recovered to discover herself in the arms of a beautiful being of a female form—too pure, too good in aspect for an inhabitant of this earth. She then with her last gasp implored for a future existence in the form of something that would keep her ever near the being she loved, and a soft voice whispered, "it shall be even so, and he will love you yet."

A SERMON TO GIRLS---ON COOKING.

Cooking-classes have been popular among fashionable young ladies of late years. But there is no cooking-class which quite equals in its opportunity for excellent information, that which you may find at home. Presuming that I am talking to a girl who has just left school, I advise you to make use of your leisure in taking lessons of your mother. There is an absolutely splendid feeling of independence in knowing how to make perfectly light, sweet, substantil bread. Then try your hand at biscuits, muffins, corn bread, toast, and all the different forms into which breadstuffs may be blended. Toast seems a simple thing enough, but it is frequently so poorly made that it does not deserve the name. Toast, a necessity of the sick room, is often a hopeless mystery to women who have the vaguest idea of how it is evolved from the raw material. After you have mastered the bread question, try meats and vegetables. Any bright girl who can comprehend an equation, or formulate a syllogism, can overcome the difficulties which beset her when learning to cook. Lucent syrups, golden cake, delicately browned bread, quivering jellies, melting creams, and the whole set of material things glorified, because made for love's sake, and for the good of one's dear ones, are fit expressions for any woman. The charm of this accomplishment lies in the fact, that it imparts to its owner a gratifying sense of power, it bestows on her, too, the power of blessing and resting those she loves best. Wherever the cook goes she takes her welcome along. One may tire of the sweetest singing, of the loveliest poetry, of the finest painting, and of the most witty conversation, but of good cooking, never. But I would be sorry to have you contented to be only a cook, only a domestic machine. That is not my meaning or intention. Be artist, poet, inventor, and well-bred woman; be the most and the best that you can, and add, as a matter of course, ability to keep house well and to do all that good housekeeping includes.—*M. E. Sangster.*

Departed Friends---Still Speak to Us.

We have laid our friends in the grave, but they are around us. The little children who sat upon our knee, into whose eyes we look with love, whose little hands have clasped our neck, on whose cheek we have imprinted the kiss—we can almost feel the throbbing of their hearts to-day. It seems to me that sometimes when our heads are on the pillow, there come whispers of joy from the spirit land, which have dropped into our hearts thoughts of the sublime and beautiful and glorious, as if some angel's wing passed over our brow, and some dear one sat by our pillow and communed with our heart to raise our affections towards the other and better world.—*Bishop Simpson.*

Floral Magazine.

The lovers of flowers, if there are any not acquainted with the fact, will be glad to learn that *Vick's Illustrated Monthly Magazine* is just the work they need to render success in flower culture both easy and pleasant. It is as beautiful as it is interesting and useful. Each number, besides many engravings, contains at least one colored plate, and the January number, now before us, has a group of roses, finely colored, and one representing different styles of church and house decoration for festive occasions, published by James Vick, Rochester, N. Y.; $1.25 a year.

EATING BY RULE.

Eating is a thing of prime importance in this world. Looked at it merely in a philosophical way, it is the fuel that generates steam for the engine. The body unfed would in a day or two, be like a steamer without coal, unable to turn the wheel, and drifting helpless. Yet no one eats with this thought in his mind, but simply because he is hungry. For thousands of years men have eaten without a scientific motive, without rational appreciation of the relations of food to bone, nerve, muscle and so on. The whole motive lay in the mouth. Men ate because it tasted good! But, by and by, when science shall have opened up the matter properly, when we know just the ingredients which the various parts of the body need, we shall have scientific bills of fare, in which dishes will not be obscured in absurd foreign names, but will be named from their true uses. Then we shall have bone-building, fat-producing, nerve replenishing, muscle-forming dishes. The host will scorn the days of ignorance when men asked their guests to take beef or pudding. To a lean and cadaverous guest he will say: "Let me fill up your tissue," or "My dear sir, your bones are brittle, allow, me to pass this compound. Better bones were never made than this produces." To some exiguous scholar, thin and nervous, the jolly host will say, "My dear fellow, let me help you to brains. What do you affect? This dish runs strongly to poetry—or philosophy is it? This has been found to be admirable. Why, sir, philosophy is only food etherialized. To such a nicety have we reduced the science of cooking, that I can send a bill to my cook any day: 'Send up four philosophers, two musicians, and one poet,' and he will at once set things a-stew, and in his skillet or pan the hidden elements will begin to hiss and sputter, that in a day or two will come forth from some brain as a sonnet or madrigal, or a grave chapter of philosophy."

What an age that will be! Now a man eats promiscuously. Often when the preacher would be tender, he in his ignorance has been feeding combativeness? He fain would appeal to men's consciences, but has been eating food that breeds abstract thought. In the culinary millenium, a man and his cook, will be like twin brothers. The lawyer will say: "Give me a jury breakfast, Tom—an average jury;" and looking into his new philosophical receipt book, his dear Tom will find just the articles required. The man will gain his case, unless his opponent has a better cook and was fed up to a higher pleading power. In that day intuitions will be subject to order. The right part being fed, it will be automatically active. We shall no more hear about "ragout" and "chops," and "steaks a la," this, that or the other thing. The comfits and custards and bon-bons will give way to higher names indicative of mental powers. We shall hear men say, "Do let me give you another spoonful of conscientia. Those speculations are very trying, and you need strength in the right spot."

"Lost the game? Why, you neglected yourself. Chess is a sure thing on this diet. Let me help you to a little more."

"Don't my dear madam, don't touch that! not but that I am willing that you should have anything that the house affords. But it is provoking to the temper. It is for timid persons entirely."

Ah, me! what a world of teaching and trouble, and mistake, and blaming, will be over with, when we can extract morals from a stew-pan, and turn out problems from the kitchen like omelets. Meanwhile we shall have to eat on in the old way, only looking over into this promised land of science—*Henry Ward Beecher.*

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day

GODDARD. Your instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

SANTA CLARA, CAL.

THE TWENTY-SEVENTH ANNUAL SESSION OF THIS Institution will be resumed Thursday, January 3d.

This Institution was founded in 1851, and in 1855 was incorporated with the privileges of a University. It occupying six large buildings with extensive shady playgrounds, covered gymnasiums, swimming pond, etc.

It possesses a most complete philosophical apparatus, and valuable collections of mineralogy and geology. It has also practical schools of Assaying, Surveying, Telegraphy, Photography, and Commercial business. For the latter a new building 150x40 has just been finished that leaves nothing to be desired.

Diplomas are given in two Departments, the Classical and the Scientific, and certificates in the Commercial course.

Floating gems by every tide.

THE DOG AND CHILD.

Mr. Elihu Burritt gives in his book, called "A Walk from London to Land's End and Back," a touching illustration of the affection of a dog in Truro:

"I was sitting at the breakfast-table of a friend, who is a druggist, when he was called into the shop by a neighbor, who had come for medical advice and aid, in a very remarkable and affecting case.

"He described it briefly and simply, but it would fill a volume of beautiful meaning. His family dog had incidentally made the acquaintance of a neighbor's child on the other side of the street.

"While lying on the door-stone, he had noticed this little thing, sometimes at the chamber window and sometimes on the pavement, in a little carriage.

"During one of his walks on that side of the street, he met the baby, and looked over the rim of the basket carriage, as a loving dog can look, straight into a pair of baby eyes, and said 'Good-morning!' as well as he could.

"Little by little, day by day, and week by week, this companionship went on, growing with the growth, and strengthening with the strength of the little one. The dog, doubtless because his master had no young child of his own, came at last to transfer frequently his watch and ward to the door-stone on the other side of the street, to follow as a guard of honor, the baby's carriage on its daily airings.

"With what delight he gave himself up to all the petting, and little rude rompings, and rough-and-tumblings, of those baby hands. One day, as the dog lay in watch by the door-stone, the child, peeping out of the window above, lost its balance and fell on the stone pavement below. It never breathed again. It was taken up quite dead! The red drops of the young life had bespattered the feet and face of the dog as he sprang to the rescue. His heart died out within him in one long whining groan of grief. From that moment he refused to eat. He refused to be comforted by his master's voice and by his master's home. Day by day, and night by night, he lay upon the spot where the child fell.

"This was the neighbor's errand. He told it in a few simple words. He had come to my friend, the druggist, for a prescription for his dog—something to bring back his appetite."—*Our Dumb Animals.*

SINGING MICE.

The song to which the little creature gave utterance again and again in our full view was as sweet and varied as the warbling of any bird. It most resembled that of the canary; but the melody of the nightingale was occasionally introduced. Every note was clear and distinct, but withal so soft, so gentle, tender and pianissimo, that I can only compare it to the voice of a bird muffled by being heard through a down pillow. In the room was a canary, whose cage was suspended in one of the windows. He had settled himself to roost, and his head was under his wing; but at the sound of "Nicodemus's" serenade he awoke, and listening attentively, and fantastically leaning alternately to the right and left, peeped curiously down to the floor. I learned that mouse and bird were intimately acquainted with each other, and that the former frequently visited his feathered friend, and stayed to supper. Accordingly, while we look on with interest and pleasure, "Nicodemus" climbed up the drawn curtains, entered the bird's cage, and partook of the seed; the canary showing no symptom of disapprobation or disturbance, but merely from his perch peering down on his visitor in a ludicrously quaint and odd manner. During his supper-time, "Nicodemus" obliged us, from the cage, with several repetitions of his song; "The Chirper," down below on the carpet, occasionally coming in with a monotonous contralto accompaniment, and sometimes emitting a sound like the squeaking of a cork-screw through a cork. The two little songsters, having done their best to please us, were rewarded with all that mice could wish for as components of a feast; and, after selecting the portions they severally preferred, gracefully retired.—From "*Singing Mice*," by HENRY LEE, in *Popular Science Monthly.*

A Musical Compliment.

This is the way Col. Ingersoll indorses Miss Emma Abbott: "Since I saw you years ago with the guitar, your soul has burst into flowers. You were a chrysalis then. To-day when I listened to your voice I heard the rustling of wings. Who could have thought that the little bleak field of your past, drifted with snow, over which moaned the wind, would at last be covered with blossoms of song? And yet all this, it may be, was necessary. In your voice is mingled the pathos of the past and the glad victory of the present. You have suffered, loved, and succeeded. Your voice is as fresh as dew and as pure as dawn. Allow me to mingle my thanks and congratulations with the general voice, and to remain, yours, R. G. INGERSOLL."

In the Limerick paper, an Irish gentleman, whose wife had absconded from him, thus cautions the public against trusting her:

"My wife has eloped from me without *rhyme* or *reason* and I desire no one will trust her on my account, *for I am not married to her.*"—*The N. Y. Columbian of* 1811.

AMERICAN Berkshire Record.

Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE

FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard of Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol. I. is $3.50, post-paid; that of Vol. II. $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid, the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with studs for retaining memoranda, price $1.00 per set. These forms are adapted for general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Management of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven illustration therewith, have been published together in pamphlet form. They will be sent post-paid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make no *charge.*

We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, can find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

Worth a Guinea a Box!

CLARKE'S

Liver and Bilious Pills.

The BEST MEDICINE you can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is

Clarke's

LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, April 21, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills; I thought I would try them. I have only taken three small boxes: the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you. I am, truly yours,

WILLIAM STEWART.

PARTICULARLY NOTE THIS.

HERMITAGE, WARWICK, August 14, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food. Consulted a Physician in Warwick; was under his treatment four months without improvement. Dissatisfied, went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit. In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.

MICHAEL BYRNE.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed *good health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,

WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)

JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus:

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved and cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you Davi Clarke's Australian Pills—the only genuine.

MANUFACTURED ONLY BY

AGENTS FOR DAVID CLARKE'S REMEDIALS.

TO ADVERTISERS ABROAD.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion*; larger space, *Fifteen Cents per Line*; each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months.....$15.00 | For one-half of a column, three months..... 50.00
For one-quarter of a column, three months..... 30.00 | For an entire column, three months..... 100.00

For a six months, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable, the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the above rate

WARREN & CO., Proprietors,
320 CLAY STREET, SAN FRANCISCO.

CASH FOR ADVERTISING.

We desire it to be clearly understood that those who send us ADVERTISEMENTS FROM ABROAD must send the Cash with the advertisements—if they would have them appear.

We have numbers of advertisements sent us from strangers saying, "*Please Insert and Send Bill!*" this we cannot do without CASH, or a special understanding before hand.

WARREN & CO.

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, February 6, 1879.

Money and Exchange Tables.

Exc. on England, new style, long and short	4 80 a 4 85½
Gold, at par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	8s 8d a 9s 1d.
Value of Club Wheat in Liverpool	9s d.a 9s 4d.
Value of Wheat in New York, bushel	1 05 — 1 12
Brewers Barley in New York, bushel	1 10 — 1 15

MONEY AND EXCHANGE TABLES.

The *Money Market* continues to fill up with an abundance of capital, and large amounts of it is laying idle or seeking the U. S. Bonds as the best and safest investment—It is deeply to be regretted that our capitalists do not join and give an impetus to manufactures, which with a well directed effort can be made a better paying investment than even U S. Bonds.

Why should we import what we can manufacture? and do it as well and better than any other people, It has been proved that our woolen goods, and our blankets from the Mission Mills bore off the prize wherever shown—our brooms, pails and tubs and the cutlery of our State carries off the palm wherever exported—why should we not have manufactories of silk, mohair, linen and cotton goods on a large scale? It would pay better to our State than to import them.

The banks here and all our capitalists are working hard to find good investments for their money, let them encourage "Home Manufactures," and the new life given to business generally would soon call all the idle money into use, and yield them a good and a permanent return.

Money is very plenty here in the great depositories, but scarce among the common people and business men generally—scarce among farmers, mechanics, and tradesmen over the State, this stagnates trade.

The Bank of England has cut down the rate of interests to 3 per cent. France quotes very low interest, with full treasuries. Germany more use for her money. Russia, Turkey and other nations want money.

Our bank rates are 7 to 9 and 9 to 12 per cent, according to rates—long loans can be had at 7 per cent and less.

GRAIN AND FLOUR MARKET.

The *Grain market* has been in a quiet condition since our last, a very moderate movement in comparison to former months—the whole export of Grain and Flour from January 1st being but 16 cargoes, the value of a little over a $1,000,000—the whole shipment from July, '78, being 106 cargoes, and in value over $12,000,000—more than double the value of shipments in the previous year

The prices of *Wheat* and *Flour* have not materially changed from the last week, although Wheat has softened a little, even while efforts are made to create a rise, by reason of the Plague spot in Europe that would shut out Russian Wheat from England, and so advance the price in our market.

It should be borne in mind by all that move in this matter, that there is more Wheat and Flour in the Eastern States to spare than was ever known before, and California must not be supposed to be the only supply for England.

The report of the Grain crop, on hand, that we published last week, large as it was, we believe that there is 25 per cent more in our State than then supposed, and this arises from the fact of a vast number of small lots not easily found.

The *market* for *Barley* has improved and quickened, price advanced, sales quick for both Brewing and Feed Barley, with prospects of continued demand.

The demand is not active for *Oats, Corn, Rye* or *Buckwheat*—all these are of slow sale now, and stocks accumulate of each kind.

The various *Feed Stuffs, Bran, Middlings, Ground Barley, Corn Meal*, and *Oil Cake Meal*, are about the same rates as last quoted.

The *Trade* in *Hops* was never so flat, there is no demand and no value, one of the dullest articles of produce in our market is Hops, price low down, rates from 1 to 2 cents, extra 1½ cents.

Our export of Hops the last two years have been about 500,000 pounds each year

The *Honey market* gives a very sweet and palatable business to dealers, the crop this year of marketable Honey being about ten times the crop of 1877, about 1,000 tons, a wonderful harvest, and with a good export demand, it has been a good paying business to the producer, as bees cost nothing to feed, they go out foraging for the sweets everywhere, and come home loaded. *Beeswax*, large stock, price declined.

The *Hay market* has been a good one, the receipts to this market from July 1st, last, is nearly 400,000 bales, the price of Hay this week is about the same as our last quotation—very little change—steady supply, steady trade.

The *Seed Trade* has not been good this season, the delay of rain checked the sowing of all kinds of grass seeds—the cold freezing weather stopped the planting of Alfalfa, cutting off a large sale of this seed for the season and putting down the price—seed Alfalfa is 2 or 3 cents less in value from a month ago.

The *market* for *Potatoes* has been good, *Spuds* in good demand, varying from 85 cents to $2—Early Rose commanding the highest figures, no Salt Lakes, no Cuffy Cores in market—*Sweets* are in fair demand at $1.60 to $1.75

The scarcity of *Onions* has caused them to advance to 7c.—a price rarely known in this market.

Straw per ton	5 00 — 6 00

Retail Prices in the Fruit Market.

Our *Fruit* market does not make as great a display of varieties of fruit as usual—the great show is Oregon Apples—our California Oranges now begin to flow in, small at first but better soon, and the Island Oranges, Bananas, Lemons, Limes, Nuts, etc.—in about a month or six weeks, a change will come, and a good show made.

Apples, per box	75 — 1 50
do. do. lb	0 — 8
Pears, per box	1 00 — 1 50
" per lb	10 — 12
White Grapes, per lb	15 — 20

do. soft shell, do.	15 — 20
Foreign Pecan Nuts	15 — 20
Madeira Nuts	20 — 25
Foreign Brazil Nuts	15 — 20
Filberts	15 — 20
Chili Walnuts	8 — 10

Retail Price in the Vegetable Market.

We can with truth repeat what we said in our last.

The *Vegetable Market* when the severe weather is considered is remarkable—there is no market in the world that can show as large a display of superior vegetables at the Winter's season as our own California markets.

The large quantities, the great variety, and the superior quality cannot be equalled the world over.

Artichokes, (French) per doz	10 — 20
Tomatoes, per lb	5 — 6
Beets, per doz	— 25
Broccoli, each	10 — 12

Rabbits, tame, per doz	1 50 — 1 75
Squirrels, per doz	75 — 1 00
Venison, per lb	7 — 8

Retail Dairy Market.

The *Dairy market* has been moderately active, good choice roll butter fair demand—pickled butter scarce, Eastern butter out: fresh eggs plenty and lower—choice California cheese wanted, price better

Butter, California, Extra Choice per lb	35 — 40
do. do. for (Cooking) do.	25 — 30
do. do. packed best roll	27 — 30
do. do. Eastern	25 — 30
California Eggs, per doz	23 — 30
Oregon	25 — 27
Duck Eggs, do.	22 — 27
Cheese per lb.	15 — 20
do. Sage, per lb.	25 — 30
Eastern Cheese, do.	25 — 30
Lard, California, per lb	18 — 20
Lard Eastern, do.	— 18
Honey, Comb	15 — 18
do. Strained	8 — 12
Vermont Maple Sugar, per lb	— 20

Dairy Produce, Eggs, etc.—Wholesale.

The *Wholesale Dairy Market* is not active, large stocks are gathering, and sales not large, the retail trade is all that gives life to it.

Butter, California, per lb. (Fresh)	32 — 35
do. Packed Roll, do.	24 — 27
Eastern Butter	20 — 22
Cheese, California, per lb	10 — 13
California Eggs, per doz	23½ — 25
Eastern Eggs, per doz	20 — 21
Duck Eggs, "	22 — 25
Lard, per lb., in tins	12½ — 14
Eastern Lard, per lb., in tins	13 — 15

Grain, Wool, Potato Bags, Etc.

The *Bag and Bagging Trade* is now at low tide—the dormant season for sellers, but just the time for our grain growers to buy, now is their time, the bags will never opened their mouths for them so wide as now for them to save in price.

We counsel all who want grain bags for their crop of next year, buy now, go to Neville & Co. and secure your bargains without delay—remember last year, the fall season of '77—they could have purchased bags at 8½ cents, they waited and paid 12½ to 15 cents—learn wisdom and buy now.

We thus repeat what we said last week, for it is the best advice we can give our grain growers.

Hand Sewed Bags, Standard, 22x36 com. prices	8 — 9½ cts.
Second Hand, Extra	8 — 8½ do
Machine Sewed, 22 x 36	10½ — 12½ do
do. do. 20 x 36	10½ — 11 do
Barley Bags, 22 x 40	11 — 12½ do
" " 24 x 36	9½ — 10 do
" " second hand	— 6½ do
Wool-sacks, new	45 — 55 do
do. second hand	30 — 40 do
Potatoe Gunnies, Double Sewed	13 — 14 do
do. do. Second Hand	10½ — 11 do
Flour Bags, quarters	6½ — 6½ do
do. halfs, six qualities	9 — 11 do

Staple Home Products.

The exhibit of *Home Products* are not as large as usual—cold and storms prevent a large stock, Oranges and Lemons are not yet in good stock, only the first small crop—Raisins are very fine, the "Blower" Raisins of Woodland now sweep the market and are highly esteemed abroad, where large quantities are sent—California Nuts and Almonds are fine, and so of our Peanuts—our own products are always the best.

Flax Seed, per lb	2½ — 3½
Hemp Seed, per lb	6 — 7
Castor Beans, per lb	3 — 3½
Castor Oil No 1 Diamond in cases, per gallon	— 1 10
" " " barrels "	— 1 05

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH Year with 1879, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on this Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CTLURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the FIRST and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONING WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER being placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 50
Six Copies,	7 50
Ten Copies,	12 50
Twenty Copies,	25 00

From our Special Correspondent.

PARIS, January 2d, 1878.

SOIL FERTILIZERS.

No doubt it is very laudable to extract phosphates from the bowels of the earth; to import guano from South America and Australia; nitrate of soda from Chili, and fish guano from Scandavavia. Not less important is the economic utilization of the detritus of public markets. In Paris, cesspool matters afford annually 7,000 tons of *pondrette*, and 3,000 tons of ammonical salts. At Amiens, fecal matters instead of charcoal for the base of its *pondrette*, has the chopped refuse of flax and hemp, velvet clippings, brewers' refuse straw, wool and leather waste, this mixture, when enriched with assimilative phosphates, sells well. Since years the debris of slaughter houses have been in much request in France, a dead animal ever enhanced the urine tank or the manure heap. But industry entered the list, and by its aid, the utilization of blood, flesh, horns, hoofs, hair, skins, etc., has become a speciality in France The firm Bourgeois, for example, contracts for the blood of the chief slaughter houses in this country, amounting to 13 millions of quarts annually, which employ 250 persons to work up into marketable products. The blood is dried by three processes, contains 13 per cent of nitrogen, and is mixed with superphosphates in various proportions. Another company forms the intestines, etc., of the killed beasts, and when manipulated this detritus is sold in three classes. The average number of animals daily killed in the city abattoirs is, 700 oxen, 150 cows, 30 bulls, 400 calves 6000 sheep, and 500 pigs.

MATERIAL FOR FERTILIZERS.

But as horns, hoofs, hair, skins, leather, etc., require 2 or 3 years to decompose in the soil, their reduction to a pulverable form is indispensable—hence torrefaction is resorted to. The preparation of bones has many various methods of application, but none particularly new. On the west coast of France, sardine, tunny, mackerel, etc., refuse with sea plants, are cooked after being previously drained, in large boilers, then pressed into cakes while hot, and ultimately dried and ground. The peculiarity about guano consists in its now being rarely employed otherwise than in a dissolved state, thus permitting of a fixed rate of nitrogen, 12 per cent generally, to be obtained; of late years much of the Peruvian guano imported had not more than 2 or 3 per cent of azate, and the farmer was invited to pay a uniform price all the same, by the Peruvian government. France does not manufacture either dissolved or pulverized guano, but supplies her demands from England and Germany. Farmers habituated to employ only farm yard manure, guano, etc. Viewed with suspicion the use of chemical manures the honor of destroying their prejudices under this head reverts to M. Georges Ville, only he rode his hobby to death, by prescribing doses of chemical fertilizers, compounded on the data of the ashes of cultivated plants, to restitute the salts carried away, just as if we were certain of the conditions of a soil's fertility. Strange not a manufacturer prepares artificial manures for the general market on M. Ville's principles. It is only in 1860 that Norway commenced to utilize the refuse of her herring, cod and mackerel fisheries, etc., having by pressure and steam, succeeded in depriving the refuse of the oil and glue, which proved insurmountable obstacles to the dissolution in the soil of the phosphates and agotised matters. Fish guano is now prepared along sea coasts in every part of the world, on an average it contains 667 per cent of organic nitrogen—rendering in this form the action of the manure more slow, certain, and generally useful—and 16 per cent. of phosphoric acid—but not in a state immediately soluble, hence the difference between it and ordinary guano, and the practical lesson, that it ought not to be employed as a top-dresser, but harrowed into the soil before the sowings.

THE PHYLLOXERA.

At last we appear to have something definite about the phylloxera, thanks to the International Committee, named at the Trocadero Congress, and presided over by M. Vimont. The Committee consisted of 25 members, six of whom were distinguished foreign vineyard proprietors, they have examined the question from the first appearance of the malady in 1869, in the department of the Herault, down to the present moment, they noted the chief cures attempted—3,000 were sent to the Minister of Agriculture to claim the governmental reward; and visited the suffering and ruined vineyardr The report states that the phylloxera was imported to Europe from America, and that the disease can be propagated by artificial transporting of plants, as well as by natural means—the wind chiefly. Stocks of American vines, as first revealed by M. Laliman of Bordeaux, can resist the bug, they flourish vigorously when the native vines die, the grafting does not in the least alter the delicate bouquet of the French grape, but all American stocks are not equally resisting, the Solonis, Clinton, Vialla or Franklin, and Taylor being the best. The plant when attacked at the root dies from inanition, hence, any insect destroyer, must be succeeded by a good manuring to give strength to the wounded plant, after farm yard manure, the next best fertilizer is dried blood, into sulphates of potash and iron and superphosphates. The only efficacious insecticide is sulphuret of carbon, as first employed, on the appearance of the disease, by Baron Thenard, and abandoned owing to its severe effects. The manner of employing this remedy is now better understood, two injection holes per square yard, suffice to inundate the soil to the depth of 11 inches with the poisonous vapors, and some apply the quantity in 3 doses, at intervals of 4, 6 and 10 days. Submerging the vines, drown the bugs, but the flooding ought only to take place in autumn after all vegetation has ceased. Then the vines can support 11 inches of water, from 30 to 50 days, to be followed in spring by liberal manuring.

Veterinary Surgon Felizet recommends a snow shoe for horses: cut a piece of leather or skin, to cover the sole of the foot, and after oiling it, fasfasten it under the shoe by the ordinary nails. This leather plate will protect the ball of the foot from cakes of snow.

[CONCLUDED].

BOURBARD'S "OIDIUM DESTROYER."

[We copy the following new plan for removing the Oidium from the Grape vine, invented by M. Bourbard, Esq., and published in the *Garden and Field*.—ED. F.]

This is one of those simple means of treating a pest which, if successful, will make nearly every one wonder it was not thought of at first; but if it should turn out a failure will make the same people remark upon the simplicity of the inventor—just as the courtiers are said to have done in the story of "Columbus and the egg." M. Bourbard seems to reason thus:—"Sulphur is the antidote for oidium, and the sulphur is applied as a powder to the affected vines at a great expenditure of labor and a considerable waste of sulphur. It is not the actual contact of the sulphur that causes the oidium to disappear, but it is the sulphureous fumes—or the odor—that is effectual. These fumes are generated only when the sulphur is subjected to a certain heat (say 120 deg.) but if the powder is applied to-day, it may be washed into the ground to-morrow, and its efficacy is lost, and the labor of puffing it over the vines is thrown away." So he makes a pan of a tambourine shape, but with the frame a little lower on one side than on the other. Over this a sheet of glass is placed, and the lower edge is set towards the north, so that the rays of the noonday sun can reach every part. On the eastern and western sides are apertures, and inside the pan, under the glass, is placed a dish containing sulphur and iron filings, or fine borings obtained from the machinery shops. All the work is made from black iron; and when the sun shines upon it, the heat is absorbed to such an extent that the sulphur becomes nearly melted, and the sulphureous gas escapes through the orifices in the sides of the outer pan into the air. It is calculated that about sixteen of these pans will be enough for an acre. If so, the pans could be shifted from place to place by a boy, and the sulphur can be made to last a very long time; for in this way there is scarcely any of it used, and none at all wasted. The whole of the labor at present thrown away in applying the flowers of sulphurs with bellows will be saved; and where a hundredweight of material was used before, an ounce will now serve the purpose more effectually—always provided that the Oidium-destroyer is a success. The whole affair is as simple as can be; and if it is successful—as we hope it will be—M. Bourbard should be presented with an address and a big purse of sovereigns.

THE IMMORTAL WASHINGTON.

PATRIOTISM AND DEVOTION.

DISBANDING THE ARMY IN 1783.

We reprint the following, believing it good to keep alive the feelings that actuated the Heroes of the Revolution. The lofty patriotism that actuated the "Father of his Country" to deeds of imperishable fame, and his devotion to that country, in all her interests, together with the love and affection that his example inspired in all who were around him—to these we attribute, as one of the great causes that led to and kept alive that willingness of spirit to become martyrs, in all the officers and soldiers in the revolution, under his command or influence.

We would ever hold up these examples to all—to officers and soldiers, whether military, civil, or judiciary. When such patriotism in defending and such devotedness in sustaining our institutions pervades the minds and hearts of our people, our country will be safe.

The revolution was over. Eight years' conflict had ceased, and the warriors were now to separate forever, turning their weapons into ploughshares, and their camps into workshops. The spectacle, though a sublime and gorgeous one was yet attended with sorrowful feelings; for, alas! in the remains of that gallant army of patriotic soldiers now about to disband without pay, without suppers, stalked poverty and disease. The country had not the means to be grateful.

The details of the condition of many of the officers and soldiers of that period, according to history and oral tradition, were melancholy in the extreme. Possessing no means of patrimonial inheritance to fall back upon—thrown out of even the perilous support of the soldier, at the commencement of winter, and hardly fit for any other duty than that of the camp—their situation can be better imagined than described.

A single instance, as a sample of the situation of some of the officers, as related of the conduct of Baron Steuben, may not be amiss. When the main body of the army was disbanded at Newburg, and the veteran soldiers were bidding a parting farewell to each other, Lt. Col. Cochran, an aged soldier of the New Hampshire line, remarked with tears in his eyes, as he shook hands with the Baron:

"For myself, I could stand it; but my wife and daughters are in the garret of that wretched tavern, and I have no means of removing them;"

"Come, come," said the Baron, "don't give way thus. I will pay my respects to Mrs. Cochran and her daughters."

When the good old soldier left them, their countenances were warm with gratitude—for he left there all he had.

In one of the Rhode Island regiments were several companies of black troops, who had served through the war, and their bravery and discipline were unsurpassed. The Baron observed one of these poor negroes on the wharf at Newburg, apparently in great distress.

"What is the matter, brother soldier?"

"Why, master Baron, I want a dollar to get home with, now the Congress has no further use for me."

The baron was absent for a few moments, and then returned with a silver dollar, which he had borrowed.

"There, it's all I could get. Take it."

The negro received it with joy, hailed a sloop which was passing down the river to New York, and as he reached the deck, took off his hat and said—

"God bless you, Master Baron!"

These are only single illustrations of the army at the close of the war. Indeed, Washington had this view at the close of his farewell address to the army at Rocky Hill, in November, 1783.

"And being now about to conclude these his last public orders, to take his ultimate leave in a short time of the military character, and to bid a final adieu to the armies he has so long had the honor to command, he can only again offer, in their behalf, his recommendations to their country, and his prayer to the God of armies.

"May ample justice be done them here, and may the choicest of heaven's favors, both here and hereafter, attend those who, under divine auspices, have secured innumerable blessings for others.

"With these wishes and this benediction, the Commander-in-Chief is about to retire from service. The curtain of separation will soon be drawn, and the military scenes to him will be closed forever.

The closing of the "military scenes" I am about to relate:

New York had been occupied by Washington on the 25th of November. A few days afterwards, he notified the President of Congress, which body was then in session at Anapolis, in Maryland—that as the war was now closed, he should consider it his duty to proceed thence and surrender to that body the commission which he had received from them seven years before.

The morning of the 5th of December, 1783, was a sad and heavy one to the remnant of the American army in the city of New York. The noon of that day was to witness the farewell of Washington—he was to bid adieu to his military comrades forever. The officers who had been with him in solemn council, the privates who had fought and bled in the "heavy fight," under his orders, were to hear his commands no longer. The manly form and dignified countenance of the "great captain" was henceforth to live in their memories.

As the hour of noon approached, the whole garrison, at the request of Washington himself was put in motion, and marched down Broad street to Francis's tavern, his head-quarters. He wished to take leave of private soldiers alike with officers, and bid them all adieu. His favorite light infantry were drawn up all in line, facing inwards, through Pearl street, at the foot of Whitehall, where a barge was in readiness to convey him to Powell's Hook.

Within the dining-room of the tavern were gathered the generals and the field officers to take their farewell. Assembled there were Knox, Green, Clinton, Steuben, Gates and others, who had served with him faithfully and truly in the tented field; but alas! where were others that had entered the war with him, seven years before! Their bones crumbled in the soil, from Canada to Georgia. Montgomery had yielded up his life at Quebec, Wooster fell at Danbury, Woodhull was barbarously murdered while a prisoner at the battle of Long Island, and Mercer fell mortally wounded at Princeton; the brave and chivalric Laurens, after displaying the most heroic courage in the trenches at Yorktown, died in a trifling skirmish in South Carolina; the brave but eccentric Lee was no longer living, and Putnam, like a helpless child, was stretched upon the bed of sickness. Indeed, the battle-field and time had thinned the ranks which entered with him on the conflict of Independence.

Washington entered the room—the hour of separation had come. As he raised his eye and glanced on the faces of those assembled, a tear coursed down his cheek, and his voice was tremulous as he saluted them. Nor was he alone. Men, "albeit unused to the melting mood," stood around him, whose hands, uplifted to cover their brows, told that the tears which they in vain attempted to conceal, bespoke the anguish they could not hide.

After a moment's conversation, Washington called for a glass of wine. It was brought to him. Turning to the officers, he thus addressed them:

"With a heart full of love and gratitude, I now take my final leave of you, and I most devoutly wish your latter days may be happy and prosperous as your former ones have been glorious and honorable." He then raised the glass to his lips, and added: "I cannot come to each of you and take my leave, but shall be glad if each of you will take me by the hand."

General Knox, who stood nearest, burst into tears, and advanced, incapable of utterance. Washington grasped him by the hand and embraced him. The officers came up successively, and took an affectionate leave. No words were spoken, but all was the "silent eloquence of tears." What were mere words at such a scene? Nothing. It was the feeling of the heart—thrilling though unspoken.

When the last officer had embraced him, Washington left the room, followed by his comrades, and passed through the line of light infantry; his step was slow and measured, his head uncovered, and tears flowing thick and fast, as he looked at the veterans to whom he now bade adieu forever. Shortly, an event occurred more touching than all the rest. A gigantic soldier, who had stood by his side at Trenton, stepped from the ranks, and extended his hand.

"Farewell, my beloved General!"

Washington grasped his hand, in convulsive emotion in both of his. All discipline was now at an end. The officers could not restrain the men, as they rushed forward to take Washington by the hand, and the violent sobs and tears of the soldiers told how deeply engraved upon their affections was the love of their commander.

At last, Washington reached the barge at Whitehall, and entered it. At the first stroke of the oar he rose, and, turning to the companions of his glory, by waving his hat, bade them a silent adieu. Their answer was only in tears; and the officers and men, with glistening eyes, watched the receding boat till the form of their noble commander was lost sight of in the distance.

The Peer of Peers Among Men.

THE FARMERS' GARDEN.

EARLY FROSTS AND GARDENERS' SKILL.

The severe frosts of this month will test gardeners' and their assistants' skill very much, where they are in charge of forcing-houses, stoves, &c.

If these frosts visited us in January, one half the skill would not be required in attending on fires, hot-water pipes, or in paying attention to the rise of mercury in thermometers. But coming on us at the close of the year, when plant rest has not at all been sufficient to restore the wasted frame of vegetable life after its active season of growth, if any reckless heating takes place in stove, vinery, or greenhouse, and Nature not as yet satisfied with her short repose, she will awaken with a rude shock, from which she will not recover during the next or following summer. The bloom on her cheek will fade quickly. Her's will be but a hectic blush, like the consumptive patient.

The conditions necessary to sustain plant life without injury during the frosts of mid-winter, in forcing-houses and stoves, should be learned by lengthened practice in these departments of gardening. For instance, let a greenhouse in which a lot of Camellias, Heaths, or other miscellaneous plants be overheated night after night, and day after day; then watch the destruction that follows, in the falling of Camellia buds by the hundred; the foliage of Azalea's failing also after having become a prey to thrip; Heaths suffering from the same causes. To meet the plants' wants watering becomes a necessity. The plants then are started into growth, without a corresponding amount of heat or light in our solar system. Pelargoniums and all such soft-wooded plants that require a good ripening or consolidation of their young growth before blooming, are irreparably weakened, and the blooms produced are both flimsy and weak, and they fall off at a touch, if subjected to unskillful heating to ward off frosts. Much better to allow the heat to fall during the night to within two degrees of freezing point, than attempt to get up the extravagant heat of 60 degs., before going to bed, in order not to be disturbed during the night with our greenhouses. In stoves and forcing-houses I have known the heat to be put up to 90 degs. before bedtime, for the same purpose, viz., to save from early rising. Now, such proceedings are most unworthy for young healthy gardeners to adopt. It is a sheer waste of means and ends in view, and should not be practiced on head gardeners, where confidence should be the rule. I am aware that such things are often thoughtlessly done, the assistants not knowing the injury they were doing; and, indeed, head gardeners should lecture their assistants well before blaming them. Young men should be informed of all the evils likely to ensue in over-heating plant houses at this time of year. It should be explained to them that any growths produced in the absence of a correspondingly strong sunlight and heat, is much the same as working a loom in the absence of the weaver. The fabric cannot be woven of a proper texture or fibre without the aid of the great weaver of vegetable fabric, viz., strong solar light and heat, to give strength, durability and elasticity to all blooming plants, and fruits, and flowers, unless we awake them slowly, and in a proper season, with, and under, the conditions that will ensure successful cultivation.

Therefore, in greenhouses the heat should not exceed 40 deg. with fire heat, with a rise of 10 to 15 degs. during sunheat, in those days and nights of frost, in stoves and vineries at work, if the heat is 50 degs. or even 45 degs. one hour or two before sunrise, it will be found to be the safest at which it should range. If the day appears at that hour to forshow to be both bright and sunny, no matter how hard or severe might be the nights' frost, it then becomes the duty of the man in charge of the fires and ranges to slack down immediately just as the sun rises, and do all in his power to prevent the sunheat and hotwater-pipe heat increasing in the houses at the same time. It must be so managed that the pipes must have time to cool down very considerably before the sun's rays get strong, and it can be arranged to a nicety by any person knowing the management of fires. Let me add that it is the most experienced man in a gardening or nursery establishment ought to be at all times in charge of the boilers with the assistance of a small boy to do as he is directed.

Need I state that a many fine lot of plants have been destroyed by inexperienced men jumping without the aid of good practice into the charge of large forcing or plant houses. Many imagine that it is charge of a steam engine they have got under control, and that the greater the fires they keep, the greater the pace they move with, and I regret to have to state, many gentlemen and ladies coincide in their views for a short time, but soon see with mortification the result. I have been repeatedly called to order, in establishments I served in, for not adopting the race engine style during winter, which was practiced near me, and suffered much in striving to obliterate false impressions regarding the weakening or strengthening of vegetable life under artificial culture, but in some cases the truths came home to late to the minds of my employers, who were not satisfied until they heated great numbers of their plants out of existence.

In the out-door department of gardening I consider that the frosts of this year will prove a great blessing in giving us abundant orchards, and in filling our gardens with small fruits to overflowing.—J. M. D. in *Irish Farmer*.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have GRAIN to sell and to keep.

Written for THE CALIFORNIA FARMER.

THE SLANDERER

We search the earth, the air, the sea,
Beast, bird and fish we scan,
And none are found so vile to be,
As the vile slanderer—man.

With heart so chilled and soul so dead,
No love for man or God;
This pest of earth, whom all should dread,
Too oft escapes the rod

Sometimes in friendship's garb he comes
To practice his deceit;
We warm the serpent in our homes
And mourn his sting, too late.

Again within the social round,
This venomed reptile goes;
A tender link is broken found,
And mourned in tears and woes.

Sometimes he ventures in the church
To lift his Hydra-head;
But faithful Truth will reach o'en such
And strike the monster dead.

Elliot.

ON WATERING.

There can be no doubt that the variable climate, sudden changes from heat to cold and cold to heat, as well as from comparative humidity to almost perfect dryness in the atmosphere must greatly affect the vital forces of all plants, and especially those plants bearing heavy crops either of flowers or of fruit. If any one will take the trouble to look at a garden, during or after a spell of hot weather, he will observe that the foliage is not only drooping, but that the leaves are soft, flabby, and wilted, instead of being crisp and full of sap; the flowers appear as if they had endured an evening in a ballroom; and the fruits refuse to hang any longer upon the branches that are unable to supply them with the necessary amount of nutriment to carry them to maturity. There can be little doubt that a check of this kind, by contracting or partially drying the channels through which the ascending sap is conducted, not only injures the plant for the present but for the future also, and to this cause may be attributed the stunted growth of many of our perennial plants as well as those of annual duration. It is more than probable that trees that have become "hide-bound" or "bark-bound," have contracted their malady through some sudden change in the temperature or from becoming partially dried up from the absence of the necessary amount of moisture in the soil. In such cases there is only one cure—for no amount of watering will restore a tree that has become partially dried up in the bark—technically known as "bark-bound"—and that is to score the stem and limbs throughout their whole length with the point of a sharp knife, cutting through the outer envelope or bark which is choking the channels by its contraction. After doing this, if the soil is dug over, a thorough soaking given to it, and a mulching—or shading of the soil—with old stable manure, dead leaves, grass, or other substances spread over the land, the trees or shrubs will immediately revive, and put on a luxuriance which would never have occurred without that treatment. In a large measure the effect of cultivation is to render life of plants subject to the care or nursing of man, and if neglected or left altogether to their own resources they either die out completely or deteriorate to such an extent as to be scarcely recognizable. Human care will very materially alter the character, the habit, and even the nature of plants—as many familiar instances will testify—and this care is essentially necessary if it is wished to keep on improving, or even to maintain the standard of perfection reached. One of the chief points in which care is required is in supplying the plants with water according to their nature, and according to their periods of growth. Some plants require an almost unlimited supply of fluid at times when they are "making their growth," and an almost total absence of watering when that period has passed, and when they are going down to rest. Others want an almost continuous supply, whilst a few are very impatient of excess of moisture or of extreme dryness—with these it is difficult to maintain the happy medium between the two extremes. It may be looked upon as the almost invariable rule that plants grown in the open borders—(such as culinary vegetables and fruit-trees)—in this climate get an insufficient supply of moisture during the period when they most require it—that is, when maturing their product of leaves, or of roots, bulbs, or tubers, or of fruit. It is a generally acknowledged principle that the produce of pulp, or what not, is greatly increased by a liberal supply of water—especially if supplemented with liquid manure at this period in the growth, but there is generally such an amount of work on hand and so few people to do it at this time of the year that everything has to be performed in a perfunctory manner, the result being that an inferior product is yielded, the value of which, in commerce, would probably be less than half of that which would have been produced if a sufficient amount of labor had been devoted to it.

If these deductions are correct the obvious conclusion must be that it would pay to devise some means by which water could be supplied at pleasure to the plants requiring it. The first cost of pipes and adequets, of wells or dams, of pumps and horse-works or of steam engines would, no doubt, be very large; but in an extensive market garden, such as will ultimately be formed in the neighborhood of each large centre of population, the first cost, divided into a series of years, will be found to be but a tithe of what the inefficient power of manual labor would amount to.

GOATS.

GOATS AS AN INDUSTRIAL PRODUCT—THEIR VALUE AND USES.

From the day that Jacob passed passed through the flocks of Laban and removed therefrom all the speckled and spotted among the goats (along the centuries) until the present time, the keeping and rearing of goats has been a source of profit and industry, intimately and practically associated with man, and in some Asiatic countries still contributing to his requirements more than sheep. The pastoral life seems yet to be the favored occupation of the dwellers in Canaan, for the territory upon which the flocks of the ancient Patriarchs were fed and kept is still the home of shepherds and goatherds.

The delicacy, however, which exists among people in this country and Europe with regard to the use of goat's flesh or even that of kids, but who will nevertheless from long established custom partake of swine's flesh with a relish, is in striking contrast with the commands of the great Jewish Lawgiver to his people. By their laws goats were regarded as clean beasts, esteemed choice food, and in their peace and other offerings, kids were considered equally as efficacious as lambs for particular sacrifices.

A custom or prejudice which stand as a barrier against the use of goat's flesh in these days of want and suffering should be set aside. The wilds of Europe and America unfit for the pasturage of cattle and sheep have been in numerous instances practically demonstrated as inviting and well adapted to the culture of goats; immense numbers of which could be raised and want and suffering relieved at trifling expense.

The spectacle of the nomadic tribes of Asia deriving a support (in great part for themselves) from the culture of goats on their bare and unfertile hills and mountains, whilst the poor in the large and crowded cities of England and America are suffering and helpless.

Although both countries possess capital and wild lands in abundance, it is certainly a subject worthy the attention of the respective governments and particularly the capitalists and philanthrophists of each.

In other countries besides those of Asia, goats are a source of wealth and industry. The mountainous and barren parts of the Sandwhich Islands afford an illustration of the truth of these statements.

Immense numbers of goats are raised annually in these islands. A gentleman with whom the writer has had an instructive correspondence who is a resident of South Kona, in the island of Hawaii, the largest of the group, writes in answer to questions on goat raising.

"I breed goats for their skins in the most mountainous and barren parts of the country and have some six thousand of them. I drive out every three months and kill off all males above nine months old and old females. I kill between three and four thousand a year, and the flocks keep increasing."

This is only one of the many similar industries on the island. Here we have the example of a government which in the days of Captain Cook was a barbaric one, but which will favorably compare at present with many civilized ones as regards the wisdom of their rulers and the intelligence and prosperity of the people, giving the use and control of large tracts of waste and almost worthless lands to enterprising individuals who have established successful sheep and goat ranches (or stations as they are called) in different sections on the islands, thus enriching the country by their liberality. Its wilds and wastes becoming utilized—the flock owners successful and prospering. The natives also reaping immediate benefit from the establishment and success of these stations, having abundance of wholesome meat furnished them at more nominal prices, which brings it within the reach of all.

Contrast this with the existing state of things in our midst, 500,000 acres of waste but fertile lands lying dormant, as regards cultivation and useless as regards any benefit being derived from their surface products unless for the maintenance of a few wild animals (deer, foxes and rabbits). And this too, on Long Island, in the neighborhood of two large cities, which contain thousands of poor, suffering, and idle people, whom neither government, State, or national capitalists, or philanthrophists have devised measures, started industries, or devised means of intelligently assisting and utilizing their labors so as to enable them permanently or continually to help themselves, the only true and philosophic solution of the difficulty. If we reflect of the disadvantages under which poor people manage to keep goats on Manhattan Island, where space is limited and the laws in regard to keeping goats is very stringent. And yet we observe great numbers of them in the upper parts of the city, kept and raised annually for milk, meat and other purposes, such as draught animals for which they are both convenient and useful, their skins particularly those of kids are always in demand and bring remunerating prices.

We may, therefore, readily perceive what advantages are offered for their culture on Long Island and the inducements which exist for individuals to raise common goats for any of the above mentioned purposes.

Every benefit derived from the keeping of common coats, applies to Angoras, with the important and additional one that the wool or mohair fleeces of the latter is a valuable commercial or staple article. The demand for which is largely in excess of the supplies produced at present in this country.

JOHN HENDERSON.

Change of Seed.

One of the surest means of securing choice Grain of all kinds and we might add with truth almost every variety of product raised from seed, is to procure new seed from other sections of the world every few years, change of soil and climate with seed when carefully practiced, is certain to produce an increase of quantity and an improvement in quality, it is very essential that Seed of any kind should not be continued year after year raised from the soil and planted as it is termed "in and in," a change is necessary to insure success.

WHAT MAINE FARMERS ARE DOING

Mr. Robert A. Barnard, of Brighton, is engaged in an enterprise that he feels confident will result not only profitably to himself, but may be the means of becoming an important industry for the State. Mr. Barnard is a native of Brighton, but has been for many years engaged in sheep raising in California. There he owned a large ranch, but was necessarily deprived of the society and companionship that belong to well-settled States. He came home the last of June, and found all the requisites for the location of a large sheep farm near his old home. He proposes to establish a large ranch—large for this State—in Brighton, and has already imported some 280 fine Leicester sheep, and expects soon to increase his flock to 500 animals. These Leicester sheep are white faced, no horns, and clip from 8 to 13 pounds of wool from 10 to 15 inches long, of a fine texture. They come to early maturity, are very hardy, make large sheep, and are excellent mutton. Some of Mr. Barnard's lambs, five and a half months old, weighs 150 pounds, and much of his mutton will dress 25 pounds to the quarter. It will be noted that our steamers are now taking great quantities of sheep to Europe for mutton. Last winter at least 1500 sheep were exported! And Mr. Barnard sees no reason why Maine should not supply England with large quantities in the future. The wool is available for the large number of woolen mills throughout the State. Again, nice mutton has always been a scarcity in our markets, and there seems to be no reason why we should not have as good as our neighbors in Prince Edward's Island.—*Portland Press.*

The Nation's Prosperity.

By the statements and reports from the Bureau of Statistics, the following grand results are shown.

That for the year of 1878, the exports of our country exceed the imports by $250,000,000, in round numbers.

Our principal export as stated by Government reports are

Breadstuffs	$110 000,000
Cotton and its manufactures	120,000,000
Tobacco and its manufactures	120,000,000
Woods, lumber, timber, etc	25,000,000
Sugar	6,000 000
Provisions of all kinds as beef, pork, lard, hams, etc	90,000,000
Oils, of all kinds	50,000,000
Leather	7,500,000
Machinery, hardware cutlery, etc.	12,000,000
Tallow	6,000,000
Furs, and fur skins	4,000,000
Coals, (to Newcastle)	2,000,000
Flax seed and other seeds	2,500,000
Total of products named	$445,000,000

These are the leading articles and all were formerly imported from Europe more or less—and all our combined exports for 1878 amounted to over $550,000,000.

Cow-Milkers in New Zealand.

Mr. John Lambie, a New Zealand subscriber, sends an account of his experience with cow-milkers: "Some eight years ago I saw an advertisement in an Ayrshire paper, setting forth the merits of the milkers; so I wrote to Mr. John Drummond, of cheese-making celebrity, in Ayrshire, in reference to it. He sent us 2 or 3 sets, and I gave them a very careful and patient trial, extending over two years. The result of my experience is that the milkers (I refer to the "silver tubes") will never prove entirely satisfactory. Although used with the greatest care, the teats of some cows become inflamed and swollen. It varied in effect with the degree of coarseness in the animal. Fine-skinned cows were easily irritated, while coarse and thick-skinned animals were not affected, except by a decreased flow of milk from the continual use of the tubes. The inside of the teat would appear to be of such delicate structure, that no foreign substance, however skillfully formed, can possibly be introduced without producing irritation. I noticed some cases where, after the irritation had subsided, the inside of the teat appeared callous and hard, as if nature was making an effort to accomodate herself to the altered circumstance; this was also accompanied by a less flow of milk. That the milkers are useful in case of an accident to the teat when it would be impossible to squeeze it by hand, I can personally vouch for."—*American Agriculturist.*

Parsnips contain about twice as much dry matter or real food as turnips, and this of a superior quality. Carrots, again, contain about as much dry substance as mangolds, but are richer in sugar and better feeding quality.

VALUABLE INFORMATION FOR THE FARMER.

Next to the system of rotation in crops, the most important discovery yet made in Agriculture. Without any outlay of money, an increase of from 20 to 50 per cent. can be obtained in the crop of MARKETABLE

POTATOES

Proved by two years' experience. Costs nothing but time during Winter or early Spring to prepare the seed. Full directions sent for $1, payable after trial, at maturity of crop. ISAIAH T. OLIVER, Quakertown, Bucks Co., Pa.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, and for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

SCAB AND TICKS

IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Price per Gallon:

TOBACCO DIP	$2 75
HEMLOCK DIP	2 25
NON-POISONOUS DIP	2 25

GARDENERS IN AMERICA.

An English gardener who has spent many years in the United States, thus gives his experience, "as regards the life of a gardener on such a place, I would say that after it is laid out, seldom more than one man is kept, and he has to look after a horse, milk a cow, see to his garden, and make himself generally useful. If he is single he can obtain from twenty-five to forty dollars a month with board and lodging; a married man may obtain from sixty to a hundred dollars, and sometimes his rent free. A man in a place of this kind can always find plenty to do. For a man who has done nothing but work in a gentleman's garden in England, to have to look after a horse and milk a cow may appear *infra dig.*, but if he goes out there, such is his work. Before I went to America I served two years' apprenticeship at one of the largest places in Warwickshire, and received eight to ten shillings a week wages and bothy; afterwards obtained a situation as journeyman at fifteen shillings a week; another at seventeen shillings as foreman. It cost me from ten shillings to twelve shillings a week to live out of that, and like a good many more, could not save much, so I became dissatisfied. I could see I should have to throw all my young days away until I could obtain a situation as head gardener, for a man is not considered capable of holding such unless he is forty years of age. I once wrote a letter about the places gardeners had to live in, known as the bothy. I did this when an apprentice, and some head gardener replied I was a dissatisfied. He was right; I was dissatisfied, although I was fond of gardening. I at last resolved to go to America with what little money I had saved, and a little borrowed. I went; I obtained a situation as gardener to be generally useful. I had twenty-five dollars a month, all found. Afterwards undertook to lay out places, this plan being the first I ever undertook on my own responsibility. It was about five miles from the City of Chicago, State of Illinois. I made thirty-five dollars a month, board and all found. The question is, did I or did I not better my seven shilling? Such is the life of a gardener in the far West. Why did I not learn some other trade? Simply because gardening is my whole study, and I am always happy when engaged in garden work."—*Irish Farmer.*

BLISTERED PEACH LEAVES.

This is a most troublesome disease, chiefly, though not wholly, confined to the leaves, for it has been found on young shoots as well. It is often associated with mildew and aphides, and both have been held by some to produce, if not aggravate, this curious and most injurious disease. It may be said to utterly destroy the vital function of every leaf which it affects to any serious extent. The mid rib and main veins of the leaves become swollen and distorted, like a limb affected by gout, and a part or whole of the tissue and substance of the leaf is converted into irregular wart-like masses of great thickness and considerable brittleness. The malformation is most peculiar, and during its process the leaf often turns and rolls itself into the most singular and fantastic forms. The function of the blistered leaf is utterly destroyed. There can be little doubt that the cause of blistering is sudden and severe cold after growth has fairly begun and is proceeding with considerable vigor. And just as frost and fire have analogous effects on our own flesh, so are cold and also heat held to blister peach leaves in this way. As this blistering mostly follows on the heels of spring frosts, it can hardly be doubted that cold is the cause. Some cultivators, however, no doubt; and if, as they contend, blistering can be prevented by a winter dressing—of which nux vomica, tobacco juice, sulphur, and soap are the chief ingredients—this goes far to justify their opinion; one, however, which it must be added, I cannot endorse from experience. The best preventive, says the writer of the above in *Country*, to blistering is careful spring protection by some of the means described in a previous chapter. Cure there is none. The leaves should be picked off and burned, to make sure of destroying the germs of mildew and nests of aphides that are found in the curled and twisted leaves, and the trees be encouraged to make fresh leaves by overhead sprinklings, top dressings, &c. Mildew is very apt to accompany or follow blister or curl; therefore, it may be wise to top dress with sulphur as soon as the blistered leaves are picked off.—*Irish Farmer.*

THE RURAL NEW-YORKER.

TO OUR SUBSCRIBERS.

We offer to our readers THE CALIFORNIA FARMER and the *Rural New-Yorker* together for only $6 00 per year. Those availing themselves of this offer will be entitled, upon application, to receive with the *Rural New-Yorker* an assortment of new farm, garden and flower seeds, equaling in value the price of that paper. These seeds are all of new varieties, many of them originating on the Rural Experimental Farm. By sending orders to THE CALIFORNIA FARMER office immediately, they will send both papers at the price named, and a full description of the seeds offered with illustrations of the plants. We recommend our readers to secure these valuable and practical papers and premiums.

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, FEB. 20, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms, Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

Editor's Chair.

We offer valuable history of Washington as our best Tribute to his memory, for his Birth Day near at hand.

Home.—We give a choice lot of "Poetical Gems" in our Poets' Column this week on Home Page.

"Yosemite Valley."—We give a very admirable and beautifully descriptive Letter from Yosemite Valley, from our highly esteemed friend, Galen Clark, Esq., the early Pioneer of that wondrous Valley, whom we well remember more than twenty years ago in our own early trips there, our readers we know will be delighted with this Letter, of which this is the beginning of a series from the same gifted writer.

"The Mother's Love," "Social Life" "Facts about the human Body," "Nature—Spring Time," "Health Dress," "Living in France," "A Woman's Glove," all on Home Page (22) will interest.

We ask attention to the excellent Letter of our esteemed Correspondent "Ajax," on "Home Influence."

Miscellany.—"A Rebuke to Common Swearers," a brief poem we hope will help awaken reflections among those guilty of this singular and useless habit.

"A Bird in a Balloon," a very interesting fact, is worthy of note, "The Panharmonicon," with some items on same Page from an old paper will interest.

Horticulture.—"Gardeners in America," and "Blistered Peach Leaves" we have selected from our Irish friend, who teaches us good lessons on gardening necessities—our Cotemporary sends us many good things.

Agriculture.—The "Slanderer" let all who are given to the criminal habit of *speaking evil of their neighbors* read the brief Poem on this Page of the *Slanderer*.

"On Watering," a most excellent essay that all should read, it came to us in the *Garden and the Field*, "What the Maine farmers are doing," "The Nation's Prosperity," "Cow Milkers of New Zealand," all of interest.

"Goats" a sketch of these highly valuable animals, the Letter we publish was sent us as one of the Prize Essays before the American Institute of New York

The number of Goats in this State now count by the *Tens of Thousands*, but it needs a union of interests among the growers to make prosperity.

Our Front Page.—Our Paris Letter comes to us now regularly in 17 or 19 days from Paris, via England, quite quick time, the present Letter contains very interesting news upon soil fertilizers and the Phylloxera.

The "Farmers' Garden" will furnish valuable hints to all cultivators.

"Bourbard's Oidium Destroyer," on Front Page should be read by vine growers.

Music.—*To-Night* is the emphatic title of a piece of very choice Music just sent out by M. Gray, Esq., the Music Publishers, 117 Post St., where this Piece and a host more of choice Music can be had.

To-Night is dedicated to "Lillie Phillips Hutchinson" of the Hutchinson Family, the words by Emily Lillian Whitney, music by D. S. Hawks, the music arranged for a Duett, the Song and Music both beautiful, and will become a popular piece.

New Books.—Peterson's ever rushing mill of Literature sends us a goodly parcel of new light literature of an interesting and pleasant kind, of which we shall soon report at length.

"Philomene's Marriages," "Pretty little Countess Zina," "Amours of Phillippe," "Bessie's Six Lovers."

These works are now having a very large sale.

Harper's Monthly.—This great Monthly for January and February have come to us very greatly improved this year in quality and style of publication, the paper of superior fineness, the Illustrations the very highest style, many like steel engravings.

THE SEASON AND CROPS.

Who can ask or pray for a better prospect or a more lovely season than the present opens up to the view of our farmers and cultivators generally on this coast. It is true the season has been a cold one till the present month had reached near the middle of it—but this check to a forward growth was a blessing for the earth, giving all nature a longer rest, that it may make a more stately growth, and give to our farmers grander results, as will most assuredly be the case the present year.

We know there has been lots of grumbling against "Dame Nature" about the seasons, the drouth, the cold weather, price of grain, etc., but our farmers are so accustomed to grumbling that people get accustomed to it, and don't mind it, because grumbling won't bring rain or sunshine, but often does bring a storm of most unhappy feelings—but the rains have come, and so have the sunny and growing weather, we clip from a letter the following apt truth.

A correspondent from Contra Costa writes:—"Another soaking rain allays the croaking of many a clodhopper, but this habit is so imbued by the occupation, and so many slips between the cup and the lip, this moulds natural grumblers, and this glorious rain will sweeten us all."

From every section of our State we have the most cheering news of the growing crops—the same old story too that "Grain don't pay to grow," and yet every year the same parties will plant more than ever before—we suppose this is to make up for not planting enough before.

We shall commence a capital story in our next issue of a "Successful Farmer," and we hope all unsuccessful farmers will give it a careful reading, and so learn the grand secret of "How to make a farm pay."

ATTEND TO YOUR GARDENS.

The rains of long continuance will always leave the surface of our garden grounds in the Spring in a hard soggy condition, and when the warm sun comes out people are too apt to commence to dig up the soil while it is too wet, and thus do a great injury to the soil.

No garden grounds should be touched until after a sufficient time has elapsed to have the saturated soil drained well and the soil in such a condition that it will when spaded crumble up mellow, when wet land is spaded it tends to bake hard again, the soil where there is no drainage may be benefitted by a rough digging at first, leaving it in ridges to drain, and afterwards, after days of draining, give it a fine deep careful culture, such good work will pay well.

There is plenty of early garden work to be attended to before the spading is done; all the roses should be carefully pruned, all climbing plants thinned, shortened and tied up, all herbaceous plants that need dividing should be attended to and the divisions removed, offsets of all kinds taken away to a plant bed for future use, by doing this work before spading up the ground, a person saves the trampling down of the newly cultivated soil, and the necessity of doing the work twice over.

Many nice young seedling plants will be found in every garden, these should be taken up before the ground is spaded and removed to plant beds to grow a little, and then transplanted again where most need.

By care and good attention in these matters by deeply and finely cultivating the soil, giving it every season good fertilizers to renew its strength, any person can have a garden that will not only repay all cost and labor, but will be a credit to their care and a pleasurable reward for all their pains.

Strawberries on our House Tops.

Every family that love this goodly fruit can raise their own, if they will but give a little time to the culture of this luxury.

Many an apple box that is so readily converted into fire wood, can be filled with the rich scrapings of the street, and first boring a few holes in the bottom of the box for draining, they can plant six good plants in each box, filling the box two-thirds full of earth and then carefully planting the vines, spreading the roots of each vine star like, so as to allow them to bud upon the soil.

One dozen boxes of this kind upon the roof or balcony of a house, would give a luxurious dish often to a family, and from the new kinds of strawberries with proper care we believe every person can raise specimens of this fruit that would astonish every grower, the new kinds now offered are said to produce fruit from 8 to 12 inches in circumference. Those that feel interested in this system of culture, if they will call at the Farmer office we will lead them to a very successful experiment of this plan, where this fruit is now in bloom, giving great promise of paying well for all care and trouble.

Dull Times in San Francisco.

We feel we are safe in saying that we think the business men will record the statement that the *month* of January has been the most quiet and dull month for trade, in all departments of business that has been experienced for the last ten or even twenty years—those that doubt it can turn to their Ledgers, figures tell, *some* persons may have been fortunate ones—but the mass of business men have had a passive time, and want no more of it.

The reason why—responds—and tells this truth—too many business houses and traders for the trade that is done—this is proved by the closing up of so many stores and dwellings—and the *Big Placards of selling off at half price* and the fact that there are over three thousand stores and dwellings marked To Let

Prof. Tice, the distinguished meteorologist and weather prophet of St. Louis, has issued his *Annual National Weather Almanac for 1879*, in which, besides foretelling the weather for every day in the year and clearly explaining the theory on which his predictions are based, he gives a history, causes and effects of tornadoes—a chapter on lightning rods, exposes their general worthlessness, and explains how they may be made effective, etc. The whole is of great interest and practical value to every one, and especially indispensable to farmers. For sample copy and terms of sale to the trade and to agents, send 20 cents to Thompson, Tice & Co., Publishers, St. Louis, Mo.

GEN. GEORGE WASHINGTON.

In a valuable Volume in our own Library we have the *Fac simile* of the accounts of Gen. George Washington (as he kept them with his own hand) while he was Commander of the Armies of the United States from 1775 to 1783.

These accounts so correctly kept and so conscientiously minute and explanatory of everything between himself and his Government, make these "Records of the Past" a precious relic of the "Father of his Country."

We select the closing entry in his work as an example to all public men to induce them to become imitators of this Great Exemplar.

His Volume of accounts run over a period of 8 years, giving every data complete, and showing at the close that the Government was *indebted* to Gen. Washington on the 1st July, 1783, the sum of £1972. 9s. 4d. a sum equivalent to Ten Thousand Dollars.

We place these last entries before our readers with the particulars, and with Gen. Washington's full explanation, this Record we feel sure will gratify our patrons as we are now about to celebrate the Birth Day of him of whom it can be truthfully said:

> The noblest man of the noblest age,
> The scholar, statesman, patriot, sage;
> Ages to come shall speak his worth,
> And link his name with freedom's birth.

The following note explanatory is of great moment:

1783. The United States with George Washington Debtor.

July 1.	To balance brot from folio 50	£620 8 4
	To Interest of £509 10s. 11., being the balance due me Dec. 31, 1776. The amount having been applied to public uses in the preceding year from whence to wit, July 1, 1775, I charge interest at 6 per cent per annum	253
	To Mrs. Washington's traveling expenses in coming to and returning to my Winter Quarters, per account rendered. The money to defray which being taken from my private purse, and brought with her from Virginia	1061 1 0
	Total	£1972 9 4

"Altho' I kept memoirs of these expenditures I did not introduce them into my public accounts as they occurred—the reason was, it appeared at first view, in the commencement of them, to have the complexion of a private charge—I hail my doubts therefore of the propriety of making it—But the peculiar circumstances attending my command, and the embarrassed situation of our public affairs which obliged me (to the no small detriment of my private interest) to postpone the visit every year contemplated to make my family between the close of one Campaign and the opening of another—and as this expense was incidental thereto, in consequence of my self-denial, I have, as of right I think I ought, upon due consideration adjudged the charge as just with respect to the public as it is convenient with respect to myself; and I make it with less reluctance as I find upon the final adjustment of these accounts, (which have as will appear, been long unsettled) that I am a considerable loser—my disbursements having run a good deal short of my receipts, and the money I had upon hand of my own—for besides the sum I carried with me to Cambridge in 1775 (and which exceeded the aforementioned bill of £599 19s. 11d.) I received monies afterwards on private accounts, in 1777 and since, which except small sums that I had occasion now and then to apply to private uses, were all expended in the public service—and thro' hurry, I suppose, and the perplexity of business (for I know not how else to account for the deficiency) I have omitted to charge—while every debit against *me* is here credited.

July 1st, 1783. G. Washington.

GOV. LELAND STANFORD.

It is a source of very great satisfaction to the people of this Coast to learn as they now do, that the health of Gov. Stanford has been so much improved that in a few days he will again attend to the important duties of his most responsible position as the Head of all the great Railroads of our State and Coast.

While we pay due deference to all our public men in all the varied interests of our State, it is not too much to say that we know of no occasion when there has been a sympathy and interest so wide felt and so true and sincere for the health of any citizen as has been felt for Gov. Stanford while he has been an invalid, for all know how great and important were his responsibilities and services in promoting the great Enterprises that have built up our State, and made it a wonder to the world; to no living man more credit and honor is due than to Gov. Leland Stanford, and this is clearly proved by the deep interest and solicitude felt for his health and restoration, which now is a source of general sincere rejoicing and pleasure.

Nevada, the Independent.

It is reported that the State of Nevada is free of debt, and has $700,000 in her treasury, this looks like a well managed and goodly governed State—but we should have in mind that the "Bonanza Mines" are there, and they pay a heavy tax, and it is these rich mines that have made the State treasury full, even if the mining speculations have made many poor,—we must have evil with the good. Nevada, however, with such a showing is the richest State in our Union.

Beautiful Song.—"Somebody's coming when the dew drops fall," this is the name of a truly beautiful and handsomely illustrated song sent out by S. Brainard & Sons, of Cleveland, Ohio—words by J. C. May.

COLD WEATHER EAST.

Mr. Prowers has lost seven thoroughbred bulls within a few days. They were at his ranch east of here, and did not want for food. He is at a loss to account for their death, otherwise than for the cold weather.

Sam T. Smith reports cattle doing well in the canons of the Purgatoire and other streams south. On the hillside facing the south there is but little snow and stock can find feed in abundance. On the level plains north of the Arkansas the case is quite different. There is very little exposed surface, and cattle are wandering about for food and finding but little. They have begun crossing the river at various points.

The snow continues on the ground, with no signs of giving away. Its depth here is about five inches and pretty well packed. It is reported to be twelve to fifteen inches along the Divide. Losses of sheep in that region will doubtless be considerable, though no definite idea of their extent is obtainable at present. This we learn from Mr. Kenyon, of Colorado Springs. The snow is in every direction extending three hundred miles south. The Rio Grande is frozen over at Albuquerque. It is thought there cannot be much improvement under two weeks. Cattle on south side of the river, on the water courses and among the cedars, are doing fairly, but the immense herds from the north, congregated on the north side, are suffering bitterly. They have mostly disappeared from the plains opposite this place, having moved eastward—lowing piteously as they went. It is estimated by Mr. Hopkins, of Granada, that ten thousand head have crossed the Kansas line, and are now between Syracuse and Lakin. Should they get on the burnt district lying south of this, there will be immense losses from starvation. The river is still frozen solid, and would afford them easy crossing. Measures should certainly be taken to turn them back.—*Las Animas Leader.*

COLD WEATHER IN LONDON.

Novel scene on the Thames. The river Thames this afternoon presents a novel sight, and one which too plainly testifies to the severity of the weather. A moving mass of huge white blocks of ice are floating up, almost entirely stopping navigation. The river steamboat traffic is suspended; but barges manage, by the help of steamtugs, to float up in the middle of the stream. It is probable that when the masses of ice reach the narrower parts of the river a complete block will be witnessed, and a very few hours of the present severe frost would suffice to congeal the floating masses, and bridge the Thames at those parts with thick rough ice from shore to shore. It is just ten years ago since the Thames was last frozen over.

In course of the day large blocks of ice piled up on the shore side of the landing stage at Blackfriars-bridge, and canted it over to such an alarming extent, that it was deemed advisable to disconnect the barge from the piers and embankment and tow it up to where it now lies moored in the middle of the stream.—*London Globe, January 10th.*

Our Pioneer Woolen Mills.

We have a valuable history of the first efforts for establishing the business of Woolen Manufactories on this Coast, and the men who pioneered this great work.

It was Donald McLenan who first inaugurated the sorting and packing Wool for shipment to the East, and it was Donald McLenan who made the first movement for a "Woolen Mill" and aided in sending Col. Turner East to purchase the machinery for the "Pioneer Woolen Mills" at "Black Point," Mr. McLenan being elected the Manager of that Mill, the first on our Coast, and it was Mr. McLenan that also pioneered and greatly aided in establishing the "Mission Woolen Mills" with which the first was also united in interest, and it is but an act of justice to a most earnest and energetic worker for this great interest that we thus speak, for we feel that great credit and honor is due to Mr. McLenan, who is now Manager of the present Mills, for the great work he has done for our State.

The Horse's Foot.

No hoof, no foot, no horse.

A great deal has been said and written about the *Horse's foot* and it is a pretty well established fact that the Horse would not *stand* long without a good foot.

It is therefore of the utmost moment that the Horses foot needs the utmost care and attention, every little ail in the foot may lead to such serious evils as to unfit the horse to travel or labor, a little care at the first sign of trouble in a horse's foot may save great evil to this noble animal, and perhaps save the horse also.

The numerous diseases to horse's feet of scratches, mange, burns, scalds and all bruises or injuries to the foot by nails or gravel, or under the frog or shoe, need immediate care, and to remove all pains, inflammation or injury of any kind, there is no remedy superior or *equal* to "Gilhaw's Hoof and Healing Ointment," see the special qualities of it, as stated in the Advertisement, by Main & Winchester—on our outside Page.

Live Stock Sales.

We would call the special attention of all who have Live Stock of any kind, Horses, Cattle, Sheep or Swine, or those who desire to purchase Stock, to look at the card of Messrs. J. G. Rogers & Co., of the Stock Yards corner 9th and Market streets.

We have known Mr. Rogers for many years as a Horse Breeder and an experienced man among Stock, and those who have Stock for sale will find these Yards admirably arranged to receive and care for Stock, and in the purchase or sale of Stock we can commend this Firm as men that will attend to all duties confided to them.

Seedling Potatoes.—The "Beauty of Hebron" is a new white potato of very superior character, just now offered by Thorburn & Co., of New York, we have just received a sample and think it an extraordinary kind and worthy special care—we shall plant and try our sample and believe we can produce a potato worth its weight in diamonds.

Home Correspondence.

Written for The California Farmer.

HOME INFLUENCE.

A great deal has been written on this subject, "Home Influence," but the theme is inexhaustable, and presents new features with the advancing age; and, as new material springs into life, where the benefits of past written articles may not be felt, it is therefore well to keep the sentiments and teachings involved before the eyes of parents, that they may from time to time, be reminded of the importance of home culture, in the education of the youths of both sexes.

From infancy the child is observing, as it learns to walk, and talk, so it imitates every movement and action of the life going on about it, and these impressions become indelibly fixed upon their minds, and no matter what the after training may be, the early "Home Influence" cannot be entirely obliterated. The quiet, orderly home; where commands are given quietly but decisively, where order and neatness prevail, where servants respect and obey, and where the dinner table is made the place for pleasant converse, of a light, jovial character, and in which even the children are allowed to join.

The pleasant sitting room, common property of parents and children alike, where business cares are forgotten, unpleasant subjects and idle disputes thrown aside, all are met together for amusement and enjoyment, and in such a home as this, children brought up under such influences, cannot but acquire principles which will be of inestimable value to them in after life.

Amuse these little ones whose destinies are in your hands, join in their games, and as they grow older take an interest in their studies, making them a pleasure rather than an irksome task, and they will soon see that their presence is needed in the home circle, and there they will remain rather than romp the street, where disease is contracted, and idle companionships formed. Children do not usually run the streets at night from choice, it comes of neglect; they are starving for want of sympathy and love, and turn to the street, hoping to find it there. The little ones have appreciative hearts, and with them a kind look, or word of sympathy, are grains of gold, to be treasured up, bright spots in their lives, never to be forgotten, causing eyes to moisten at the mention of "Home, sweet Home," recalling happy, joyous scenes at the pleasant fireside, with the kind father ever ready to read, play and romp; the loving mother, whose advice was never sought in vain, whose promises were always fulfilled and whose hands never tired working for her children.

It is in the power of every parent, rich and poor alike, be they dweller in grand mansion or humble cottage, to make a happy home for their children; and it is their duty to do so, no matter what self denial they may have to make. It is not going to do for them to imagine that because they clothe and feed their children that here their duty ends; there is a higher and nobler work for them to perform, and it is this very Home Influence which if exerted in the right direction will accomplish all they desire. Pushing children aside with, don't bother me! some other time! as the answer to their simple requests, will not do. If you wish your children to honor and respect you, first win their love, and it can be done through kindness, little acts of love, trifles to you, but to them everything. Read to them, tell them stories, and make them feel that they have a place in your heart. And above all things their questions, the thousand and one questions, which all children ask, and to which they should have practical, satisfactory answers.

Children have rights, and parents are bound to respect them, and when they come to you, with one of their puzzling questions, give them honest answers, go into details, and give them reasons for everything and children will soon learn to think and reason for themselves.

Parents! think this matter over, and, those of you, who are driving your children out of doors by neglect, commence this very hour, before it is too late, and strive to endear them to their homes by making their lives one continual sunshine, so that in after years when battling with life and its trials, they can turn with gratitude and love, honoring the memory of the parents, who strove to make life happy and its burdens light, through "Home Influence." Ajax.

Land Plaster---for Clover.

Our *Haymakers* should bear in mind constantly the value of *land plaster* for their grass lands, and especially their *Clover fields*, there is no one fertilizer for *Clover* that is so truly beneficial to this particular species of grass as *Ground Gypsum*, or as it is called Land Plaster.

Liebig, the distinguished Essayist on agriculture wrote much in favor of *Gypsum* for Clover as the great fertilizer for Clover fields, and those who are now raising the *Alfalfa* should by all means use this excellent article to enrich and increase their Clover crop.

Vermont Sheep.—We have the handsome bound Volume of the "Vermont Sheep Breeders' Association" which gives a complete history of all the famed Merino Sheep of this wonderful Sheep Breeding State, this Book is the Register and history of all the distinguished Sheep Breeders of that State, the sources whence all famous Sheep came from, with Pedigree of all Sheep, number of flocks, Clips, etc., we return thanks to Albert Chapman, Esq., for his courtesy in sending us this handsome and valuable work.

Catalogues.—A mountain pile of new and handsome Catalogues of Nurserymen, Seedsmen and Manufactures, all waiting notice and notoriety, send along your Advertisements, Gents, then you shall have *especial* attention and notice that shall pay you well.

Among the handsome Catalogues received are those of Thorburn & Co., Peter Henderson & Co., Dingee & Conrad, the famed Rose growers, Hoopes Brothers and Thomas, Bliss & Sons and many more—of the best we shall soon speak.

GOLDEN RULE BAZAAR,

719 Market St.—419 Kearny St,

Five Stories High, 45 x 200.

CLOCKS! CLOCKS!

Every clock that leaves our salesroom, has been thoroughly run and tested, and is warranted, if properly used, to be a good time piece. Following are the price of a few of the many styles we keep.—

Young America—A 30 hour time-piece with porcelain dial..... $1.00
The Exhibition—Ansonia 30 hour movement, walnut case, 10½ inches high..... 1.25
The Economy—Black or nickle plate, 30 hour time-piece..... 2.00
The Gem—Same as above with alarm..... 2.50
The Bijou—(See cut) Nickle plated case patent lever, stem winder..... 2.50
The Chief—Metal case, marble finish, gilt lined..... 3.00

PEEP O' DAY, ALARM, $3 50.

This has the loudest and longest alarm of any clock made, is fitted with Ansonia Co.'s best movement, screwed pillars, strong plates, silver plated, and requires only one winding for the time and alarm—will go in any position.

The Jupiter—One day striker, patent self-adjusting pendulum, 15 inches high..... $5.00
The Roman—Eight day striker, patent self-adjusting pendulum, 21 inches high..... 7.50

Over 50 other styles on hand.

THE

Scientific American.

THIRTY-FOURTH YEAR.

THE MOST POPULAR SCIENTIFIC PAPER IN THE WORLD.

Only $3,20 a Year, including Postage. Weekly. 52 Numbers a year. 4,000 book pages.

THE SCIENTIFIC AMERICAN is a large First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, profusely illustrated with splendid engravings, representing the newest inventions and the most recent Advances in the Arts and Sciences, including new and interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of science, will be found in the Scientific American.

Terms, $3.20 per year, $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers 37 Park Row, New York.

PATENTS. In connection with the Scientific American, Messrs. Munn & Co. are Solicitors of American and Foreign Patents, have had 31 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all Inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, free of charge, whether a patent can probably be obtained, by writing to the undersigned. We also send free our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents.

THE AUSTRALIAN GUM TREE.

The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

☞Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the bark bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach or Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

TESTIMONIALS.

The manufacturer of these Pills has a great objection to the "wholesale" publication of testimonials, which in many cases are fictitious, and are only intended to mislead. Yet, for the satisfaction of those who are suffering, and have not yet used his medicines, he selects a few, who are best known in the colony and in the town he lives, and their *personal testimony* will satisfy the most sceptical.

These testimonials above named with many from California, since their recent introduction, will quickly show that the

Eucalyptus Remedials

are the best ever yet introduced. Full and ample testimonials accompany all parcels.

MANUFACTURED ONLY BY

DAVID CLARKE,

Wholesale and Manufacturing Chemist,

AT HIS LABORATORY,

WARWICK, QUEENSLAND.

Home Miscellany.

"There is no place like home.
Home! It should be Heaven on Earth

A Valentine.

Lines inscribed in the little volume "Garland of Thoughts" and sent as a Valentine by Avio.

Accept, dear friend, this little token,
This "Garland of Thought," by others spoken,
And may I not hope as this token I give
In the bright magic circle of friendship to live;
Kind friends here on earth are from God surely given,
Angel visits below, they are angels in Heaven.

MY HUMBLE, BUT BEAUTIFUL HOME.

Oh, give me, when day is declining,
And sunshine is flooding the west,
My ivy-clad mound, where reclining,
I can watch the birds seeking their rest,
And listen to their twitter of sorrow,
Whilst through the dew-breezes they roam,
To nestle and dream of to-morrow,
In my humble, but beautiful home.

Then give me, when moonlight is shedding
Its brightness o'er flowret and tree,
And stars like an army are treading
To nature's own music so free.
And then let me pensively wander—
Beneath the dark cedar trees roam,
And there on its loveliness ponder,
In my humble, but beautiful home.

When morn the gray orient is sheeling
With purple and vermilion hue,
And myriads of insects are greeting
First rays of the sun bursting through;
Then let me gaze out without measure,
Whilst vapors like shocted ghosts roam,
With a heart filled with innocent pleasure,
In my humble, but beautiful home.

You may tell me of fame and ambition,
Of pomp and wealth's dazzling array,
Of those who are high in position
And homage receive every day;
But give me the one I love dearest,
Away from me never to roam,
Then thou like an Eden appearest,
My humble, but beautifuln ome.

DREAMLAND.

The following poem by Dr. John M. Matthews, the eminent Phrenologist, we take from his book entitled "Magnetism the Life Principle, and Hygiene the Promoter of Health." A book which everybody should read.

We all have a fair little world of our own
A sacred retreat that we dwell in alone;
Not the dearest of friends or the nearest of kin
Are ever invited to enter therein.

If fate treats us harshly, or fortune 's unkind,
If clouds of despondency darken the mind,
Or cares vex the spirit, we turn for a time
To the soothing delight of this ideal clime.

The child growing tired of playmates and toys,
The youth feeling sated with pleasure's wild joys,
The world-weary man, sick of turmoil and strife—
All find in this realm new hope and new life.

No bleak winds of winter invade this retreat;
No frost chills its flowers, ever fadeless and sweet;
For its skies bend in shadowless beauty above,
And its airs are as soft as the whispers of love.

No wild disappointment, no sin and no care,
Ever come to us here, bringing tears and despair;
But ambitions most lofty and wishes most dear
Seem always attained in this magical sphere.

Oh, beautiful dreamland, sweet realm of the soul,
Lying safe and secure beyond sorrow's control!
Art thou foretaste and type of that shadowless shore
We all hope to reach when life's sad voyage is o'er?

THE END.

The course of the weariest river
Ends in the great, gray sea;
The acorn, forever and ever,
Strives upward to the tree.
The rainbow, the sky adorning,
Shines promise through the storm;
The glimmer of coming morning
Through midnight gloom will form.
By time all knots are riven,
Complex although they be,
And peace will at last be given,
Dear one, both to you and me

Then, though the path may be dreary,
Look onward to the goal;
Though the heart and head be weary,
Let faith inspire the soul,
Seek the right, though the wrong be tempting!
Speak truth at any cost;
Vain is all weak exempting
When once the gem is lost.
Let strong hand and keen eye be ready
For plain and ambushed foes;
Thought earnest and hands steady
Bear boat unto the close.

The heavy clouds may be raining,
But with evening come the light;
Through the dark are low winds complaining,
Yet the sunshine gilds the height;
And love has its hidden treasure
For the patient and the poor;
And time gives his fullest measure
To the workers who endure;
And the Word that no jar has shaken
Has the future pledge supplied;
For we know that when we "awaken"
We shall be "satisfied."

Wanted.

One of the arrows that Cupid shot.
A man to awaken the sleepers of a railway car.
A hat for the head of a nail.
A wick from the lamp of life.
A key to fit an elephant's trunk.
A splinter from a sunbeam.
A train of cars to run on the branch of a tree.
A pie made from the fruits of matrimony.

To every man as sure as fate,
To keep his daily business straight,
And give his work a proper date,
The almanac doth now dictate—
Not to forget till 'tis too late,
To curl that seven into eight.

Home Correspondence.

YOSEMITE VALLEY, ITS WONDROUS BEAUTIES.

YOSEMITE VALLEY, January 28, 1878.

COL. WARREN—*Dear Sir:*

THE WINTER STORMS.

After long delay the storms of winter have come upon us in good earnest. The old storm king of the Sierra Nevadas after blowing upon us a few fearful chilling blasts, like the blasts of "Euroclydon," which threatened to wreck everything here in the valley, has rallied his slumbering forces from their whitened icy tents, and craggy caverns within the great rocky battlements of the high sierras, and has been pelting and showering upon us snow, hail, rain and again snow, until we have the appearance of being near the arctic regions; we have now about two feet of snow. The Valley looks most sublimely grand in her immaculate winter robes. The trees are loaded to their utmost capacity with snow and ice, and look most superb in their chilling beauty. The branches of the deciduous trees look like gigantic sprays of coral and crystal. The Pines, Cedars and Firs, adorned with snowy lacework, overlying and mixed with the emerald color of their foliage look enchanting in the contrast of colors. The smaller trees might be taken for nymphs and fairies dressed in costume for a grand masquerade.

THE MIGHTY FALLS.

The waterfalls have again been replenished, and the falling torrent, adorned with rocket like forms, and folds of lace like waves, rivals the virgin snow in purity and whiteness. In summer the lights and shadows on the walls of the valley bring out wonderful fancied pictures, which are strangely real in appearance. And now the snow and ice lying upon every projecting cliff, and irregular ledge of rocks, brings out many new and fantastic figures. The walls of the valley seem to be embossed on a gigantic scale with various fancied forms of architecture, grotesque figures, and quaint pictures, such as outlines of buildings, faces, profiles, forms of animals, gargyles, scroll work and ornamental designs "ad infinitum."

THE ICE AVALANCHES.

The snow and ice accumulates about the falls, cascades and walls of the valley in large masses, until unable longer to adhere, it cleaves off and falls with a crashing, thundering noise, which reverberates around the Valley from side to side, and cliff to cliff, awakening the slumbering echoes from all the different points and rocky chambers, which send back their synchorous response, and in their seeming jolly glee, shake down lesser avalanches to prolong the resounding chorus. The higher top walls of the Valley are to-day hid in the clouds, and waving curtains and folds of fog float low down around the Valley, sometimes illumed by a few stray sunbeams to an irridescent glow. Altogether Yosemite is most exceedingly interesting in its winter scenery.

FAMILIES IN VALLEY.

Everybody living here this winter has been well so far, there are twenty-five persons altogether, three of them women, and twelve children. We have neither doctors, lawyers or preachers here to make us think of sickness, legal contests, or fear of a great tyrant of a God. Each one does his own praying; privately or silently his prayer rises up out of this grandest of God's earthly temples, to the throne of Infinite Mercy and Love, like incense from an altar. And we have faith that such prayers are not in parliamentary language either ordered laid upon the table, or a response indefinitely postponed.

There are no improvements as yet going on here this winter, except clearing the channel of the river of fallen trees and drift logs, which was very badly needed.

ICE HOUSES.

From the tenth of December until Christmas, all the laboring force here were busily engaged in putting up ice for use next summer, and we have an abundant supply. Now they are engaged in clearing the snow from the roofs of sheds, porches, and some of the weaker roofed large buildings, ready for another snowstorm. Cutting fire-wood, and trying to be comfortable and happy, we have not had a newspaper from the outside world for over a month, and don't know whether the Dutch still hold possession of Holland, or that the Constitutional Convention is still in session, or that R. B. Hayes is still President of these United States; we were to have a weekly mail through the winter come in by the Big Oak Flat route, but through carelessness somewhere, the mail matter goes to Mariposa as it did during the summer, and since Washburn & Co.s stages have stopped coming in here, we get no more mail from beyond Chinese camp, although the mail carrier from the Oak Flat route has made his regular weekly trips until this last storm.

Hoping that this matter may soon be remedied, and that may again be posted on the news outside, I remain yours most sincerely.

GALEN CLARK.

A Child Shall Lead Them.

The following extract shows how a child may throw light on the mysterious ways of God's providence: "I once experienced a great bereavement, which tested my trust in God's providence beyond any previous trial of my life. One night I was seated with my little boy on my knee, mourning over my loss, when my eye rested on a favorite text over the mantel-piece. The eye of the child also turned in the same direction, and without any request on my part he read the text aloud: 'The law of the Lord is perfect, converting the soul.' As I heard the words from my dear boy's lips, they seemed to sink into my heart with a power they had never had before. To my surprise the child asked the question, 'Papa, what does perfect mean?' My heart was too full to make any reply for a few moments, and before I could break the silence my little one supplied the answer by saying, 'Papa, does it mean that God *makes no mistakes?*'

THE MOTHER'S LOVE.

[Mrs. C. F. Young in *Woman at Work*, writes beautiful and sensible truth in the following brief but most excellent appeal to *Mothers* for a better care of their little ones.—ED. F.]

Who can fathom its depths? Who can doubt its sincerity? Who has not seen deep lines of care, yea, more, of agony, written all over faces? engraved in ineffaceable letters, all shaded with dark lines of suffering? No sorrow sinks so deep, or shadows life so long as the loss of children.

To-day we listened to the low earnest plaint of a heart-stricken woman whose only lamb had been taken, a beautiful six-year-old. In the morning prattling *about* the angels—in the evening *with* them. With her little life, the light went out of the house, and will never enter again.

Roses blossom over a little mound. How much better to see them in the pink cheeks of children! Money and labor have been lavished over the burial place of the little body. How much more sensible to have kept loose shoes and woolen stockings, and warm flannel dresses over the limbs of the living child!

Instruments of music are in the house. We have a keen appreciation of the artistic in tints and patterns, in the furnishing and fitting of a spacious and beautiful home. This artistic taste, directed to a study of the divine laws of life, and the adaptation of food and drink, dress and rest, to the natural forces of the child would have saved it.

We found in the orchards and gardens, the evidence of skill in the adaptation of seeds to certain soils; even so simple a thing as a melon seed is carefully related to moisture, warmth, and a light blanket of earth. Men and women understand that the conditions must be provided, or the vigor of the plant is impaired, and maturity is impossible. Are not children of as much value as cabbage plants or melon-vines? Then away with hap-hazard guess-work; and study physiology that you may understand how to relate them to sleep, sunshine, dress, and food. Study *child-life*, from the stand point of profit, and the art of preserving their lives and your happiness will be as interesting and practical as horticulture or agriculture.

COUNTRY SOCIAL LIFE.

Country folks are in general so fully occupied with affairs that they have no time to discover how lonesome they really are. So far as this is concerned we think it is a misfortune. We are too busy. We work too hard. We take few, or no holidays. We read and think too little, and do not spend sufficient time in social culture. There is no reason why these who plow the soil or "whose talk is of bullocks" should not experience the refinements which are the result of formal social life. In business, at bargains, in pursuit of dollars, no man is seen at his best. He is thorny, spiney, with his back up as a porcupine might be at his business. Let one doff his working clothes and enter a room full of his neighbors—men, women, young men and maidens—and he is a man of another kind. He naturally falls into the ways of an intuitive kindness which is really the truest politeness; the doing to his companion what he should do to him. He "lets himself out" to please, and after an evening spent in social converse, he retires with many rough corners and asperities toned down. For a few days the influence remains. It would be permanent if it could be reinforced now and then, and the good results would be most agreeable and useful. There is no difficulty in bringing these good influences to bear. Two or three persons with energy and some magnetism about them can put them in motion with ease. Now is the time to begin the effort.—*Rural New Yorker.*

Nature---Spring Time.

When storms lower and wintry winds oppress the, that Nature, dear goddess, is beautiful, always beautiful! Every little flake of snow is a perfect crystal, and they fall together so gracefully, as if fairies of the air caught water drops, and made them into artificial flowers to garland the wings of the wind.

Oh, it is the saddest of all things, that even one human soul should dimly perceive the beauty that is ever around us, a perpetual benediction.

Nature, that great missionary of the Most High, preaches to us forever in tones of love, and writes truth in all colors, on manuscript illuminated with stars and flowers.

If we were in harmony with the whole, we might understand her. Here and there a spirit less at discord, hears semitones in the ocean and wind, and when the stars look into his heart he is stirred with dim recollections of a universal language which would reveal all—IF HE ONLY REMEMBERED THE ALPHABET.

"If thou art worn and hard beset,
With sorrows that thou would'st forget
I then would read a lesson that would keep
Thy heart from fainting and thy soul from sleep,
Go to the woods and hills! No tears
Dim the sweet look that Nature wears."

Health Dress.

We have received a very neat little book bearing the above title; conceiving it to be a duty as well as a pleasure to make this valuable and instructive book known, we give the words of the able author of the book which came to us in the work, having carefully perused it, we endorse its teachings, and give wings to the opportunity for all to obtain the work at a small price, while it is worth fifty times its cost.

The author says:

MY FRIEND:—May I ask you to read this little tract, with generous indulgence toward its manner and careful consideration toward its matter. Should you find in it any important thoughts or valuable suggestions, which you would be glad to share with your neighbors, you can obtain any number of copies—in plain covers—at the following rates: single copies, three cents; one dozen copies, thirty cents; forty-five copies, one dollar; by addressing the "Secretary of the Hygienic Tract Society, Dansville, Livingston County, N.Y.

HARRIET N. AUSTIN.

LIVING IN FRANCE.

It has happened lately that a number of people with families to educate have gone to live in France for a few years that they may reduce their expenses. That is quite a compliment to France, but they might have lived here just as cheaply. It is not the prices that are so much the less, but the good management of the heads of families that makes everything go farther than it does here or anywhere else. There is not there so great profusion of everything as here, and so people must be careful and conscientious for fear they come to want the very things that are almost thrown away in this country. So if strangers keep house in France they find it no great saving, for they take with them the same prodigal wasteful ways that they have at home. If the prices of the same eatables are but small, others again are very much higher than in this country, and many compare very equally.

In France the leading thought in every good housekeeper's mind is economy; not parsimony, but regular systematic frugality. If servants there should throw away the water in which vegetables were boiled they would be considered wanting in thrift, for if anything is boiled the essence and flavor of that substance is to be found in the water in which it was cooked. It is usual there to steam most vegetables, but when they are boiled the least fluid possible is used; and if that, with the addition of cream or butter, if not suitable to serve as a dressing for the vegetables it is always put into the pot in which the soup stock is kept. That is kept as a receptacle for all things which will help to flavor and enrich the soup, and which seem to be proper only for that use. Every little bit of bone and gristle that is trimmed from meat that is to be served in other forms, every leaf of celery, every core of cabbage, even the wing tips of chickens and the crumbs that fall from the loaf of bread when the slices are cut off, and every other eatable thing that elsewhere would be thrown away, are dropped into the vessel, which in England is called the stock-kettle, in France the *pot au feu*. Do not fancy that the soups are weak, or that anything is put into them which would be disagreeble to think of. It is there the habit of housekeepers to buy often a nice bone of beef, with marrow left in it, and this will be the basis of stock for several days, the constant addition I have spoken of giving to it tone and flavor, and helping it to last longer, besides saving from loss many things that are nourishing and palatable. The first day the stock is made it should be cooked slowly for several hours and skimmed occasionally, and once every day after it should be heated over, it will be quite a jelly when it is cold, and you cut out a piece the size you will require, and take it for the foundation of soups of different names and flavors, straining, and if for a clear soup, clarifying the portion you make use of.

A WOMAN'S GLOVE.

A woman's glove is to her what a vest pocket is to a man. But it is more capacious, and in ninety-nine instances out of a hundred it is much better regulated. A man will carry two-hundred-dollars'-worth of small change, four matches, half a dozen toothpicks, a short pencil, and a pack of business cards in his vest pocket, and yet not be able to find a nickel, or a match, or a tooth-ick, or a pencil or a card, when he wants it. Not so with a woman. She has the least bit of a glove, and in that glove she carries the tiniest hand and a wad of bills, and the memoranda for her intended purchase of dry goods, and car tickets, and matinee checks, and maybe a diminutive powder-bag. We have no idea how she does it—how she manages to squeeze those thousand and one things into that wee space. But she does it every time and the glove never looks the least discomposed, or plethoric or ruffled. And when a woman wants any article concealed about that glove, she doesn't seem to have the least trouble in the world getting at it. All that is required is a simple turn of the wrist, the disappearance of two fairy fingers, and the desired article is brought to light! It is a wonder that no savant can explain.

Facts About the Human Body.

The skin contains more than two million openings, which are the outlets of an equal number of sweat glands. The human skeleton consists of more than two hundred distinct bones. An amount of blood equal to the whole quantity in the body passes through the heart once every minute. The full capacity of the lungs is about three hundred and twenty cubic inches. About two-thirds of a pint of air is inhaled and exhaled at each breath in ordinar respiration. The stomach daily produces nine pounds of gastric juice for digestion of food; its capacity is about five pints. There are more than five hundred separate muscles in the body, with an equal number of nerves and blood vessels. The weight of the heart is from eight to twelve ounces. It beats one hundred thousand times in twenty-four hours. Each perspiratory duct is one-fourth of an inch in length, of the whole about nine miles. The average man takes five and one-half pounds of food and drink each day, which amounts to one ton of solid and liquid nourishment annually. A man breathes eighteen times a minute, and three thousand cubic feet, or about three hundred and seventy-five hogsheads of air per hour.

A CHURCH PICTURE.—Twenty men scheming business and forgetting to raise their heads at the close of the prayer; twenty whom an inordinate breakfast has betrayed into sleepy stupidity; twenty women wondering if their "hair is right," or scanning the neighbors' bonnets; twenty young folks studying postures; twenty intermittent listeners whose consciences prick them into only a disjointed attention—who wonders that we hear so much of powerless preaching? The sun works wonders in photography, but not on wrapping paper. The material must be prepared. When the congregation goes—as it expects its minister—from the closet to the house of God; when it meets him with eager eyes, moistened with sympathy and speaking hunger for the truth; when he can feel that his prayer is upborne, not by the faithful few alone, but by the great congregation, preaching will have a new power.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MUHSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

$350.00.

WHERE WAS THE ADVERTISEMENT?

Purchasers who read the Advertisements in our Columns, and make their purchases thereby, will do us a kindness by stating to those of whom they purchase, where they obtained the *information of their Wants.*

Miscellany.

Gatherings along the way side,
Floating gems by every tide.

A REBUKE TO COMMON SWEARERS.

(We copy these lines from an *original copy* of the *New Hampshire Sentinel* of November 10, 1811, in our possession. Here is a noble sermon against the terrible evil of swearing so very common in our City, here is a good admonition to all parents as to their example before their children.—Ed. FARMER.)

To mention God, no man has just pretence,
But to his honor, or his truth's defence,
In common talk, where trifles most abound,
God, Christ or Lord, strikes horror with the sound

Nor should we dare appeal to Him on high,
To gain belief, or to attest a lie,
Thus to abuse that name, if men presume,
The third commandment loudly speaks their doom.

Yet some, alas! in every trivial cause
To stop the gap in speech or for a pause,
To fill the sentence at each others word,
From mouths unhallowed breathe, Christ, God or Lord!

Thus children hear their parents, oaths repeat;
To them they listen, think the sound is great;
And by example learn to do the same!
And wickedly profane God's holy name!

Hence, where such children meet, a dreadful thing!
The streets with oaths, and horrid curses ring!
Good Lord! if e'er such monsters I came nigh,
From their ill ways, give me thy grace to fly.

A BIRD IN A BALLOON.

Miss Nellie Thurston made a balloon ascension from Oneida, N. Y., last fall, and after a journey of sixty miles landed safely at Burlington Flats, Oswego county, making the distance in forty minutes. She took with her a humming pigeon from the Oneida community, and when she reached an altitude of three miles undertook to release it. Miss Thurston opened the cage but the bird would not fly. She then put it on the edge of the basket and it immediately jumped down to the bottom and nestled near her in a manner which seemed to say, "Please protect me." Miss Thurston said she felt sorry for the pretty little bird, and dreaded to throw it out, but thought she would try it again and see if it would not go willingly; so she sat it on the edge of the basket again, when it immediately alighted on her shoulder. She then took it in her hand, and gave it a gentle toss, but instead of starting for the world below, it sailed around the balloon several times and alighted again in the basket. She took it again in her hand, petted it, and with words of sympathy and assurance she gave it a kiss, saying, "Birdie, you will get home all right," and the pigeon, as if comprehending the words of kindness and assurance, flew from her hand and was soon lost sight of. It did not, however, reach its home until the next day.

Panharmonicon.

This *chef 'douvre* in the musical world, now exhibiting at the City Hotel, commands the admiration of the auditors, as well as the amateurs as those unskilled scientifically in the "concord of sweet sounds." This instrument is a combination of instruments, put in motion by machinery, and playing a variety of pieces, from a solo to the full concert of an orchestra or band. The instruments it plays on are, the bass and kettle drums, serpent and bassoons, and trumpets, clarinets, and hautboys, concert and octave flutes, cymbals and triangles, all performing separately or together with exquisite harmony and in perfect time. The inventor, Mr. Pardi, of Italy, was 15 years in completing this astonishing work. After gratifying the citizens of Paris with its unrivalled powers, the proprietor brought it to Boston. There it was set up and improved by Mr. Goodrich, a self-instructed artist, whose natural taste for music and untaught skill in mechanics, are probably without an equal in this country, and who now attends it in this city. Its performances, whether in the soft solo of sacred music, the lively air of a cotillion, or the grand military march of "the tented field," afford the highest satisfaction to the auditors and richly compensate for the time and cost of the attendance.—*The N. Y. Columbian of* 1811.

A ball of fire appeared in the commune of Chargeauville, on the 23d of November, which, bursting with a tremendous explosion, let fall three large stones, accompanied with smoke, and darted with such force, that they entered the earth to the depth of nearly 80 centimeters. One of the stones is covered with a crust of greyish black, while the inside is more clear. It is very compact, and hard enough to cut glass. It appears to contain globules of iron, pretty large and brilliant. —*The N. Y. Columbian of* 1811.

A NEAT PUN.—The United Irishmen who regulate the elections in Pennsylvania, have propagated an electioneering story, that the federal municipality have made wood so very scarce and dear, that they cannot purchase it. A writer in the *Gazette* of the United States pities them and wishes every one of them had a *cord* at the public expense; and wonders that they do not take it into their heads to return to the *dear* land of *trees-on*.—From *New Hampshire Sentinel*, published in November, 1811.

"Mother, what is an angel?" "An angel? Well, an angel is a child that flies." "But, mother, why does papa always call my governess an angel?" "Well," explained the mother, after a moment's pause, she is going to fly immediately."

Col Middleton, of South Carolina, has a mule over seventy years of age. The animal still does duty on the farm.

AMERICAN
Berkshire Record.

Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE

FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard o Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol I. is $3.50, post-paid; that of Vol. II. $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid, the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with studs for retaining memoranda, price $1.00 per set. These forms are adapted to general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Management of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven illustrations therewith, have been published together in pamphlet form. They will be sent post-paid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

N. B.—These Splendid Volumes can be seen at THE FARMER OFFICE.

PHIL. M. SPRINGER, Sec'y,
4:7 Springfield, Ill.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience*.

Patents obtained through us are noticed in the *Scientific American*. This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

How I Obtain a Patent? The question is often asked. Write to us, and we will tell you the best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the idea. We will immediately answer, and give the necessary instructions. For this advice we make no charge.

We also send, free our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE often urged our farmers to keep full Records of all their farming operations—keep them in full details in every department of their labor The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, cand find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

CLARKE'S

Liver and Bilious Pills.

The BEST MEDICINE you can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is

Clarke's
LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, April 21, 1877.
MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills; I thought I would try them. I have only taken three small boxes; the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you. I am, truly yours,
WILLIAM STEWART.

PARTICULARLY NOTE THIS

HERMITAGE, WARWICK, August 14, 1877.
MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food Consulted a Physician in Warwick; was under his treatment four months without improvement. Dissatisfied, went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.
MICHAEL BYRNE.

WARWICK, December 30th, 1872.

TO MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed *good health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 28, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)
JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus.

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,
GALEN CLARK.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved as cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you Davi Clarke's Australian Pills—the only genuine.

MANUFACTURED ONLY BY
David Clarke,
Manufacturing and Wholesale Chemist,

CASH FOR ADVERTISING.

We desire it to be clearly understood that those who send us ADVERTISEMENTS FROM ABROAD must send the Cash with the advertisements—if they would have them appear

We have numbers of advertisements sent us from strangers saying, "*Please Insert and Send Bill*" this we cannot do without CASH, or a special understanding before hand.

WARREN & CO.

TO ADVERTISERS ABROAD.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion*; larger space, *Fifteen Cents per Line*, each subsequent insertion, *Ten Cents per Line*. This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months..... $15.00 | For one-half of a column, three months..... 50.00
For one-quarter of a column, three months..... 30.00 | For an entire column, three months..... 100.00

For a single month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the abov rate

WARREN & CO., Proprietors,

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, February 20, 1879.

Money and Exchange Tables.

Exc. on England, new style, long and short	4 80 a 4 88½
Gold, at par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	8s 6d a 9s 1d.
Value of Club Wheat in Liverpool	9s 1d a 9s 5d.
Value of Wheat in New York, bushel	1 05 — 1 15
Brewers Barley in New York, bushel	1 00 — 1 05

MONEY AND EXCHANGE TABLES.

The *Money Market* is full of money in the capitalists hands and there is plenty of loose capital in banks, as the report of the Commissioners show, our banks now show a sound condition, yet in the business circle and in the country money is hard to collect, the masses of the people want money.

We repeat what we said last week, because it is one of the great needs of the country, we ask

Why should we import what we can manufacture? and do it as well and better than any other people, it has been proved that our woolen goods, and our blankets from the Mission Mills bore off the prize wherever shown—our brooms, pails and tubs and the cutlery of our State carries off the palm wherever exported—why should we not have manufactories of silk, mohair, linen and cotton goods on a large scale! it would pay better to our State than to import them.

The banks here and all our capitalists are working hard to find good investments for their money, let them encourage "Home Manufactures," and the new life given to business generally would soon call all the idle money into use, and yield them a good and a permanent return.

The Bank of England has cut down the rate of interests to 2 per cent. France quotes very low interest, with full treasuries. Germany more use for her money Russia, Turkey and other nations want money.

Money in New York is a drug, as low as 1, 2, 3 per cent per annum on three months' paper.

Our bank rates are 7 to 9 and 9 to 12 per cent, according to cases—long loans can be had at 7 per cent and less.

GRAIN AND FLOUR MARKET.

The *Grain Market* this month is in great contrast with the markets six months ago, then a good high figure and lively sales, now dull low figures and slow sale and an overstocked market, and the evidence clear that the price will be lower—even in spite of the effort of speculators to raise the market by the "Plague spot in Europe."

There has been but little real life or activity in the flour or grain market for some weeks, now and then a spurt, that is all.

Our flouring mills do not run full hours and some only half time, as the demand is lessened.

Our exports of grain much less than hoped for or expected—freighting ships not so plenty, and freight rates advancing—all this tends to lessen the value of wheat—while added to these facts Rain, Rain, Rain, in plenty coming, all indicate quite a decline in the wheat market here at home—and as it has taken place in Europe.

The *Flour* exports continue lightly, while *Wheat* exports are only a tithe of former months, dullness marks this trade.

The *Barley Trade* dull, no rush, price nominal. *Oat Trade* the same.

The *Market* for *Corn, Rye,* and *Buckwheat* are all flat, but the weather has something to do with trade, by and by when the sunshine comes all trade will wake up and our markets grow into life.

The various *Feed stuffs*, of *Bran, Middlings, Corn Meal, Ground Barley, Oil Cake Meal,* are all the same as last reports.

The *Hay market* also remains dull, no change in price.

The *Seed Trade* will soon wake up, and more trade in this us be done and with profit.

The *Potato market* is not overstocked and prices are a little firmer, the Early Rose commands the highest figures we quote—*Sweets* are less this week.

Onions way up, last week 7 cents, this week 4½ to 5 cents, a big price.

Wholesale Grain Report.

Straw per ton	5 00 — 6 00

Retail Prices in the Fruit Market.

Our *Fruit market* does not make so great a display of varieties of fruit as usual—the great show is Oregon Apples—our California Oranges now begin to flow in, small at first but better soon, and the Island Oranges, Bananas, Lemons, Limes, Nuts, etc.—in about a month or six weeks, a change will come, and a good show made.

Apples, per box	75 — 1 50
do. do. lb	6 — 8
Pears, per box	1 00 — 1 50
" per lb	10 — 12

Madeira Nuts	12 — 15
Foreign Brazil Nuts	15 — 20
Filberts	12 — 15
Chili Walnuts	7 — 10
Pea Nuts	8 — 10

Retail Price in the Vegetable Market.

We can with truth repeat what we said in our last.

The *Vegetable Market* when the severe weather is considered is remarkable—there is no market in the world that can show as large a display of superior vegetables at the Winter's season as our own California markets.

We have now in market new tomatoes, potatoes, mushrooms, and salads, all very fresh.

The large quantities, the great variety, and the superior quality cannot be equalled the world over.

Asparagus	35 — 40
Artichokes, (French) per doz	15 — 20
Tomatoes, per lb	5 — 6
Beets, per doz	— 25

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on this Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the FIRST and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONING WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER being placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 00
Six Copies,	5 00
Ten Copies,	8 00
Twenty Copies,	15 00
Fifty Copies,	35 00

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer, 1879.

OUR NEW CLUBBING LIST.

We propose for the year of 1879 to offer to our Patrons the following valuable JOURNALS in connection with our own, all at reduced rates, so as to give them the best works at a low rate—(all postpaid). Price per year

PACIFIC RAILROAD.

(Early records, Copy to Legislature in 1852-'53.)

To the Committee of the Pacific Railroad—Gentlemen

Permit us to offer you the following brief thoughts bearing upon the great subject under your immediate charge:

There is no class of our citizens whose interests are more deeply involved and none who should take a deeper interest, or who should make greater exertions for the success of the PACIFIC RAILROAD than the AGRICULTURISTS OF CALIFORNIA.

A new, a successful and a glorious field is opened to them if they will but obey those laws that Nature and Providence points out to them.

This is the "Age of Progress" and the farmers the tillers of the soil must keep pace with the age.

A brief time—as it were but yesterday, Agriculture was unknown in this country—gold and gold only, was the crop sought for—and a vast amount of the treasures of this newly discovered country was was sent abroad to pay for Grain, Flour and Produce that was needed for man and beast.

Millions were expended for Barley alone, as food for the animals that conveyed the agricultural produce of other countries to the hardy miners in the mountains and on the river banks and in the river beds of California.

The riches of earth other than gold was not sought for, not discovered—though far richer than the Yellow Ore, that cost so much labor, and so many lives.

Millions too were annually expended for the Flour, Potatoes and Onions, the great articles of import and traffic.

Vast amounts too were sent out of the country for the purchase of Agricultural Implements when the dawn of this great interest burst upon our favored land.

This export of the precious metals kept the country poor, for the high cost of the necessaries of life and the long time that capital lay dormant added to the cost and burden, already too heavy.

The cost of Agricultural Implements and the large amount of capital required for farming purposes prevented owners of the soil from the purchase of the necessary implements, and thus the work was retarded—for a time.

A new era is dawning and its brightness should be hailed by the cultivators as the "Golden Era" indeed. the agriculturist above all others needs facilities the *most rapid* and convenient—they need them for the introduction of their Grains, Grasses and other seeds that they may test the capabilities of the soil they cultivate, they need them that they may secure to themselves at the earliest moment all and every new and valuable Implement of husbandry, especially labor-saving—and they need them as cost saving, for the less time required in importations, the less cost of capital employed.

The agriculturist more especially is interested in this *Great Pacific Railroad* for the rapid increase of crops are now awakening their interest and attention that they may find an outlet, a market, when these crops shall become so large as to affect the markets unfavorably.

Here, the attention of the cultivator should be awakened, grand as this country is, immense as her population will be in a few years from the increased immigrations, yet the fertility of the soil—the better understanding of the nature of it and the superior advantages arising from the use of Implements of the highest character—it will be found that the produce of the country will more than keep pace with the increase of population and then will be found a surplus of the products.

It will then be a question of great moment to the cultivator, What shall be done with the surplus produce of California?

We have no fear that the agriculturist will not always be amply repaid for his labors (those that have been judicious) however abundant the crops may be or however extensive the railway facilities for the immigrations from the old states to come, may still continue as heretofore—yet we shall for many years receive a large and still increasing population from England, France and Germany, and from China we can hardly dream the influx that circumstances now operating *there*, may throw upon our shores.

And may not Japan and still other Nations not yet revealed as among our population flow in upon us?

With these considerations we have no fear of the results of the agricultural interests, this is the GREAT INTEREST of the Country, it is the basis upon which the permanency of this Commonwealth will be founded.

Were the "Gold mines" the only source of wealth, and had this interest alone have been the promoter of the varied trade and traffic, we should have had but little improvement in our City, and the many large cities that have arisen and will arise throughout the length and breadth of our land, would never have existed.

Agriculture has built more cities, established more "homes" reared more churches, built more school houses, Academies and Colleges—than all the "gold mines" of the world—for however abundant may be the yield of the mining interests gold itself becomes valueless in the hands of a civilized people unless it can be dispensed for the comforts and blessings of a "Home," and where can "Homes" be made, where there is no agriculture.

The discovery of the immense fertility of the soil of California give to the new settlers a disposition to make this country their "Homes" it is the certainty that all the comforts so necessary arising from this valuable interest are to be found here, that induced the thousands to make this land their adopted "Home" and to *Agriculture* more than any other Interest may we now attribute the greatness of the prospects of "Francisco" and the other principle cities and the whole country.

The more this Interest is fostered and cherished the greater will California become, and the vast amount of her soil now uncultivated, her hills, vallies and mountains will ere long become fruitful fields teeming with rich products—that now are uncultivated and unknown here—the valley of the far famed Sacramento will have its Coffee, Tea, Sugar, Rice and Tobacco plantations, and the Sacramento River will be to California in fertility what the Nile is to Egypt.

The immense crops that must be harvested in coming years will demand an outlet, and this will be found in new channels of trade laid open by means of the Great Pacific Railroad.

The vast amount of labor required for many years in the construction of the road and the great extent of the line of travel and communications opened will require productions from this country long before the new settlements ever become producers, the advantages this country possess now by her facilities of agriculture will give her for many years the advantage over all competition in the new opening along the entire road, for it cannot be supposed that much attention will be given to agriculture for years after the road is open, or *Depots* or *Towns* are built along its entire line.

Here there is one source of relief to *Farmers* for his overplus of produce, and with this opening we may expect others verging along the entire lines to points yet unknown, but destined to become great "Marts of Trade," to which we can safely look and on the steadily rising, as this country will inevitably become by her abundant supply one of the granaries to which they will look for their produce, for California is destined to become the "Garden of the World."

If the time would permit we could furnish statistical tables showing the amount that could be found as the surplus of our great staples in the coming years—but we trust we have given sufficient data to enlist the attention of your Committee to a subject we believe of greatest moment to this State and Coast.

WARREN & CO.

WHEAT ELEVATOR AND CLEANER.

The California Dry Dock Company have lately erected at their Mission Rock warehouse, a wheat cleaning apparatus that is intended to work a revolution in the grain trade of the coast. This is the first of the kind introduced west of the mountains, and as a means of cleaning and grading wheat, it cannot fail to come into general use, and thereby benefit not only the shippers, but the producers of the millions of bushels of wheat produced on the Pacific Slope. In a portion of the large warehouse accessible to ships, has been built a huge receiver, into which the wheat is poured care being taken to select different grades or qualities, as it may be desired to raise or lower the standard. This wheat, as it is poured into the hopper is found full of straw, oats, barley, cheat and other impurities. From this hopper the wheat is elevated thirty-two feet by means of a continuous belt, to which is attached 50 buckets, each bucket having a carrying capacity of nine pounds. This belt makes 100 revolutions per minute, so that it will at once be seen that the wheat is rapidly elevated at the rate of 21 sacks a minute to the required height. Here it is deposited in two bins 4x6 feet, from whence it runs into two separate cleaning machines kept in rapid motion, and the wheat is soon separated from its impurities, thoroughly mixed and deposited in another bin, which has a capacity of thirty tons. This bin in which the wheat, thoroughly cleansed and deposited, is provided with eight spouts, and from it men are engaged in bagging the now purified wheat. Thirty men are in this business and the work is done thoroughly and expeditiously. The Produce Exchange of this city having fixed the grades of wheat, the Mission Rock Warehouse is enabled by the process to bring their wheat up to the standards fixed by this Exchange—which grades wheat into first, second and third varieties—No. 1 weighing 62 pounds to the bushel, No. 2, 60, pounds, and No. 3, 58 pounds. The effect this new departure in the wheat trade on this coast will have upon the European market is easily discerned—a better article of wheat will be forwarded at a less expense, and the return in coin will be correspondingly increased. J. W. H Campbell is the prime mover of this business, and deserves considerable credit therefor. Two ships are now loading at this Dock with standard wheat. Success to the enterprise.—*Commercial Herald.*

OUR ILLUSTRATIONS.

We present above one of the handsomest "Group of Swine" ever pictured, generally it is hard to call a *Hog* a handsome creature, but when we contrast the really handsome animals above with the long snouted, coarse haired, cross and savage creatures of former times, we think every one will give due praise to C. F. Mills, Esq., originator of the Improved Berkshires shown here, and we think all who wish fine Stock of this kind should by all means endeavor to import some of this Stock from Mr. Mills.

RHUBARB WINE.—We have samples of the "Rhubarb Wine" advertised by us in the FARMER, to which we call special attention of wine dealers, as we have it on sale at our office.

The *imports* of foreign cheese at New York for 1878 aggregated $382,097 in value.

Foreign Correspondence.

PAPEETA, TAHITI, December 5, 1878.

COL. WARREN—*Dear Sir:*

I notice by the papers the appalling and dreadful fulfillment of the prognosis I made in your paper on the 27th of June last, so far as I referred to "Yellow Fever." The dreadful carbonic acid gas generated rapidly in the lower part of the Mississipp river valley, owing to the moisture, heat, etc., has developed the minute aerial fungi in immense quantities, which being breathed, drank and eaten by the people there, are causing a most awful destruction of the human race in that region. Whenever a number of causes work together to produce a great accumulation of carbonic acid gas, and favors the growth and decay of vegetation, we must expect these dreadful visitation of disease. As carbonic acid gas is heavier than our ordinary atmosphere, it will settle in low places, and when it is assisted by heat, moisture, etc., its effects are extremely bad. High locations, dry, cold and airy, should be sought for in such calamities. Lying near the ground in tents, by people fleeing from the infected cities, is a bad plan. Our medical men and medical science are lamentably weak on these subjects of pestilence as they are on many others.

I see also that my prognosis in regard to the phylloxera had also an awful fulfillment in France. The find that where their vineyards have been destroyed by the phylloxera, the land refuses to produce anything else. Mr. C. A. Wetmore, writing from France, in his letter to the *Alta California*, published in that paper on the 26th of November last, says that a large owner of vineyards which had been killed, told him that the land now refuses to produce, or only gives him 3 for 1, instead of 200 or 300 fold. And Mr. Wetmore in the same letter says: "That while there is the greatest dispute as to the value of many proposed remedies, all agree, that when the land is properly manured with potash and well taken care of, the vines however severely attacked do not die."

Until these facts are perfectly understood and acted upon, distress and suffering must continue, and you must continually warn your farmers and vine growers upon this subject, or they will suffer the consequences.

Yours, etc.,

THOS. CROFT.

[The above letter did not reach us for many weeks, else we should have given the important information to our readers at earlier date.

We cannot omit to improve this opportunity to remind all who are sufferers by those fatal gases which prevail in lowlands, that there is a certain remedy for this by planting the Eucalyptus trees, and when the disease appears the "Eucalyptus Remedials" will arrest the disease and save life—try it and the truth is fully established.—ED. F.]

Oakland Ferry Income.

A nice little income is earned by the Oakland Ferry Line, the average travel has been over 15,000 passengers per day—the total number of passage carried in 1878 was 6,981,978 and the income of the year from this was $584,473,00.

Well! they deserve it, for it is the most prompt and best regulated Ferry Line in the United States and these Ferry Boats the most convenient.

GREAT INTERNATIONAL EXHIBITION, SYDNEY.

We have been favored by our courteous Correspondents at Sydney with descriptions of the plan of the Building now in process of erection, and the efforts making to have a Grand Building and a very successful Exhibition,

We publish a portion of the preparatory work and shall give more details as they come to us; the Exhibition will be held in August, and offers a great opportunity for the manufacturers, inventors, mechanics and producers of this Coast to make themselves and business known:

This building is to be built in the Inner Domain, and designed to suit what may be termed a site of almost matchless natural beauty; overlooking the Botanic Gardens, the waters of Farm Cove, and the pleasant anchorage of her Majesty's Australian squadron; but, from its rapid slope, it presents considerable difficulties to the erection of a building suitable to Exhibition purposes. These difficulties have been overcome by facing the building towards the north-east, following as far as possible the contour of the ground, and taking advantage of the fall to obtain on the north-eastern front—as seen in our view from the harbor—two stories, but at the rear, or south-western front, toward Macquarie-street and Governor Burke's statue, one story.

In plan the building will have a nave 800 feet long and transept 500 feet long, 50 feet wide, and 50 feet high; surrounded by a gallery 25 feet wide on either side, and of similar length, will be aisles 50 feet wide and 25 feet high; and on the south-western side 450 feet by 100 feet, 25 feet high; on the north-eastern side a basement about 1000 feet long, 75 feet wide, and 20 feet high.

At the intersection of nave and transepts a lofty dome, 112 feet diameter, and top-towers 50 feet square at each of the four main entrances, will break the horizontal line of this vast structure, erected to afford a fitting although temporary home for the rare examples of industry and art from the various quarters of the world and our neighboring colonies. The total floor-space provided will be 7½ acres; the basement, 1½ acre; ground-floor, 4½ acres; and the galleries, 1½ acre, to which refreshment-rooms can be added. The building is designed so that it can be reduced or extended if necessary without marring the effect. The basement will be lighted from lofty side windows, the aisles and annexes from the roof, the nave and transepts from the clear story, and the whole ventilated by a novel arrangement for the delivery of fresh air vertically.

Water will be laid on all round the building outside and in, with ample power of extinguishing fire on its first appearance. The drainage will be carefully attended to, and the electric light used to enable the workmen to proceed night and day, if required, to complete the building in time. The design is by Mr. James Barnet, the Colonial Architect, under whose superintendence the structure is being erected.

Applications for space are pouring in from every quarter, both at home and abroad. It is impossible to give even an approximate estimate of the amount of space needed to meet demands up to the present time, as most of the applications are to know what space will be allowed. There are very few applications for a stated area. It is interesting and satisfactory to know that there will be no lack of British and foreign exhibitors, to judge from the telegram received by his Excellency the Governor, and read at the last meeting of the Commission, by which it appears that there is a demand for about 250,000 superficial feet, or nearly two-thirds of the estimated floor-area of the main building. The Executive Commissioner (Mr. P. A. Jennings) received an application for space from Messrs. Rabone, Fees & Co., on behalf of the celebrated Eau de Cologne manufacturer, Johann Maria Farina, who intends to exhibit, and also, we understand, to erect a fountain of perfumed water similar to the one which proved so attractive a novelty at the Great London Exhibition.

The work of erecting the building is proceeding apace. At present about 100 men are employed on the ground digging shallow trenches for the brick foundations, raising a sawmill on the lower portion of the ground for Messrs. Hudson Brothers, laying down pipes to conduct water on to the ground for building purposes, erecting a galvanized iron fence on the southern side to keep out idlers, and otherwise carrying on the work of preparation. It is intended that the Botanical Gardens and the Outer Domain shall be made accessible from the Exhibition Grounds, so that there will be no lack of open space for the accomodation of visitors.

We understand that Mr. Augustus Morris has accepted the office of general secretary to the Commission.

In order to bring more clearly before the Commission the relative size of the proposed Exhibition Palace, a paper was submitted showing the size and cost of the various Great Exhibition buildings erected since 1851, and also an estimate of the one proposed to be erected in Melbourne in 1880, together with ground-plans and drawings of the Philadelphia and Paris buildings.

The capacity and space of all the "International Buildings" since 1851, are given, the space for this Building at Sydney if 340,000 feet.

The meeting appointed very able men to serve on the various committees, of which there were 15 departments.

It is worthy of note to say the Government aid is about $500,000 to this work.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have corn to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER I.

"Now, Helen," said my uncle, as he leaned back in the great rocking-chair, and carelessly jingled the ponderous seal upon his massive gold chain with his left hand, "I have been thinking this matter over ever since I heard of poor William's death, and I have made up my mind just what is the best thing for you to do. You might sell the wood off, and sell the stock and tools, and in that way pay the mortgage; and then you could live a few years by selling the hay, with what those boys could earn, but the farm would be growing poorer and would not sell for so much as it would sell for now, and my advice would be to make a clean sale of everything now, and pay off the debts, and get a little place in Blackington, where the boys could go to work in the factory; and upon what they earned, and upon what you would have, you could live quite comfortable. And if you felt able to take a few boarders, with Alice to help you, you might make a good thing in that way, I dare say."

And Uncle Robert, who was a prosperous merchant in the distant city of Woodville, and an influential man there, looked as if the business was all settled to his satisfaction, and nothing more remained but to carry out his plans. I, the before-mentioned Alice, a girl of thirteen, who had a keen dread of leaving our old home, which I loved so dearly, but with too much awe of my energetic, loud-talking uncle and his gold seal, which I had always looked upon as if it were a badge of authority, to venture any remonstrance, glanced anxiously at the other members of our family circle to see how they received it. Mother, in her newly put on widow's weeds, looked as if the very thought was an additional distress to her, and yet as if she knew not which way to turn or what to do. She had always been used to having my father decide upon all matters of business, and although, like most New England farmers' wives, she had always been ready to "have her say" upon all matters, yet she would have been astonished if she had thought that anything depended entirely upon her will, and would not have known what her will really was. I could see that she did not want to leave the old farm, but I knew any real opposition to the plan must come from some one else who could offer a better plan.

Ned, my playmate, my brother, scarcely a year older than myself, was already exclaiming against going into the factory village; but it was to Clarence, a boy of sixteen, one of those rare ones who seldom spoke until he had well considered what he had to say, and who usually ended by having things his own way, because he felt sure that way was right, and he never gave up although he made no violent opposition to other people, it was to him I looked next as the one who would decide the question. He said nothing, but the contraction of his brow, and the lips which were firmly closed, as was his habit when he was thinking intently, gave me an indefinite sort of encouragement that he had some other plan, which he would bring forward when he had fully considered it.

"I don't know what is best," at last answered my mother, sighing heavily, "and I have no doubt you are right; but I do not like the idea of giving up the old place, where I have lived with William for eighteen years, and where the children were born, and which has been in the family so long; I must have time to think it over and to make up my mind to it, if it must be."

I could see Clarence's face light up, as if the time to think it over was just what he wanted, but my uncle impatiently exclaimed:—

"What is the use of thinking it over? Can't you see that it is just what must be, if you think it over for a year? And the longer you wait, the worse for you. Now I am here, I can give you my advice about what to do and how to do it, and I might see some one in Blackington to-morrow, as I go back, who would look out for a place for you there by stopping over a train, though I ought to get back to Woodville as quickly as possible. But I cannot very well come down again this winter it is so far and such a cold ride, and I must be very busy now looking out for the spring trade, which I hope will be better than it has been for a year past. If it is not I cannot tell how I may come out, for it is a hard time for me to get money to meet my bills."

I was ungenerous enough to look upon that as a hint which was calculated to put a stop beforehand to any appeals to him for aid, but I may have been wrong. It was the hard winter of 1857, when many business men felt as despondent as Uncle Robert. At any rate it was not needed, for my mother would not have thought of making such application even to him, her only brother, unless we had been suffering for the necessaries of life.

"Well," said my mother, "I cannot decide it to-night. I am too tired to think now, and I must think of it and talk it over with the children, and perhaps with Mr. Grey, before I do anything."

"Much these children know about such things, and a farmer who never was out of the county will not know much more, I suppose: but you can have your own way," said Uncle Robert, indignantly, and in a tone that said as plainly as words that we should get no more advice from him unless we asked for it. And then the conversation drifted upon indifferent subjects, while Ned pouted, with the tears occasionally starting from his eyes as he thought of leaving our dearly beloved home. And I, instead of going to him for sympathy as I would have done if we had been in trouble of a more trivial nature, crept close to Clarence and put my hand in his, feeling as if I relied upon his stronger will for strength to resist against being further bereaved.

We had that day followed to the tomb the mortal remains of our father, who had been taken from us suddenly. Only a few days before he had left us well and strong as usual, and gone to the Corners with a load of wood, and before night the minister of our little church had come in and gently broken to us the news that he had been found dead upon the road, having apparently fallen beneath the wheels of the wagon in such a way that the wheels had passed over his neck and broken it instantly. What caused the fall none knew.

Our father had been taken from us, and now to try to take away our home and put us down in Blackington, a village where I had been a few times with my father, as it was only eight miles from us, where I seemed to see my brothers growing to look like the boys I had seen coming to and going from the factory; with faces black as they came from work or pale and peaked after they washed the black off; with pipes in their mouths, or still worse, with tobacco juice staining clothing, uttering oaths and coarse jokes, regardless of those who were in hearing; even a vision of myself, like a girl of about my own age that I had once seen there, quarrelling and actually swearing at some one who might perhaps have been her mother, who was calling her to come home. No, no, it was too dreadful. I think if I had been offered a choice to go there or go to the poor-house, where good-hearted, though rough, Uncle Tom Hardy ruled over and cared for the half-a-dozen aged and infirm, and poor crippled Sally Jones and her two quiet children, I should have hailed the poor-house with joy. I knew it well, and it was not so awful;—but Blackington seemed full of unknown dangers.

And now let me tell you something of ourselves that you may know into what society you have been so unceremoniously introduced. My grandfather, on my father's side, was descended from one of the early settlers of Brookfield, where we resided. It was a quiet country place, a half-dozen miles from any railroad. No village had been formed in Brookfield, or nearer than Blackton, eight miles away, though at Brookfield Four Corners, some two miles from us, was the blacksmith shop, the old stage tavern, and the grocery, which was also the post-office. At the tavern was also a public hall, where an occasional lecture, dance, or show of some sort sometimes appeared to break the monotony of our quiet existence. Elsewhere through the town the houses were scattered at irregular intervals along the road, mostly standing a little back from the road, with old orchards around them, and barns near by where cows lowed and pigs grunted or squealed at feeding time. The people within a mile either way were neighbors, and the farmers borrowed and loaned tools and carriages and teams, and exchanged spare-ribs of pork and legs of beef at killing time, and changed works in planting or hoeing or haying time, without often figuring up to see just how the account stood until death took one of the parties and so balanced the account. And the farmers' wives and mothers tripped back and forward, with shawls or aprons over their heads, in the twilight to gossip, and compare calico, and borrow drawings of tea and cups of sugar or molasses of one another, to be conscientiously repaid when their husbands should get time to go to the Corners again.

Here my grandfather—Thomas Reynolds—had owned a large tract of land, from which he had given my Uncle Thomas, his oldest son, the land which was now his farm upon which he lived, just north of ours. For the next son, Uncle James, he had sold some outlying lots and some of the cattle and raised five hundred dollars, which James had taken as his portion and departed for the West. He had first settled in Western New York, then moved to Ohio, and, when last heard from, had sold out there and was going to the newly discovered land of gold—to California. No tidings had come for many years, and we had long thought of him among those who had perished upon the plains in the endeavor to reach the gold regions, or had succumbed to the hardships of the mines.

Aunt Matilda, the only daughter, had married James Grey, the son of old Squire Grey of the neighboring town, who was now a squire himself, and a well-to-do farmer, with better barns and better fields than any in Brookfield, and good stock of improved breeds and patent tools of all sorts, which he was perpetually praising as being so superior to those possessed by his humble neighbors that they would pay their cost in one year, sir," as he confidently asserted. However, as he kept no strict account of profit or loss, and had interest and rent coming in, people received his praises of improved farming with a little mental reservation, and said "it was all very well for the squire to do so, but poor farmers must go more carefully, and make less if it must be less." And while the squire, as became a man of property, was a man of great influence in town matters, and esteemed as shrewd in advising other people in matters of business not connected with farming, yet he could not persuade the farmers to mount any one of his hobbies. He was generous and liberal to a fault toward all with whom he came in contact if business was not attempted, but he was sharp in trade and a most exacting creditor. It was to pay off the marriage portion of five hundred dollars, which my grandfather had promised Aunt Matilda, that father had placed that mortgage upon the farm; borrowing the money of the squire to pay his wife, when grandfather gave him the deed of the old homestead. When father had brought home to the old house the pretty Helen Talbot, the school-teacher in our district one term, and presented her to his father as his wife, then grandfather resigned control of the farm and gave my father the deed of it, upon condition of a support while he lived, and the payment of the before-mentioned sum to Aunt Matilda when he died. And here father had lived and managed the farm very much, I fancy, as his father had done before him, saving not much while the children were small, especially while grandfather lived, and then at his death came the mortgage, of which the squire had rigorously demanded the interest every year; and if father had any money left one year, after paying interest and taxes, the next year he perhaps had to sell a cow or a hog to square up. And so, at his death, we had the farm, the stock and tools, and the mortgage as our inheritance.

The winter before the one on which my story opens, father and Clarence had cut the wood off the north lot, and had sold it to a man at the Corners, and it was nearly the last load which father had carried upon that last day of his life, so that we felt sure of having money enough there to pay all funeral expenses and live upon for a short time, for our wants were not many. We had beef and pork in the cellar, and potatoes and pumpkins, and in the crib there was a good supply of corn and rye, and hay and corn-stover in the barn for the cattle, and the cows would give us plenty of milk and butter, and the sale of butter and eggs would supply us with groceries, for a while at least. So, when in the morning Uncle Robert, as he hurried to get away for the morning stage from the Corners, ventured to repeat a little of the advice which he had urged so persistently the night before, my mother could afford to reply: "No need of hurrying about it, Robert, we can stay here awhile longer yet, I trust, and we may see a better way yet."

And when he had gone, mother and I went about our work of clearing up and putting away, and our domestic duties, stopping, now and then, for a quiet cry together, as some article came to hand which too strongly brought to mind the great loss we had met. And the boys went to the barn and the woodpile, where we could see from the window that they were in earnest conversation about something much of the time, Clarence doing the most of the talking, I thought, which was contrary to the usual custom when they were together. I say we could see, but I doubt if my mother noticed it; but I did, and wondered what it meant. At noon and at supper I looked for something from Clarence upon the question of going to Blackington, but he was about as usual, only, as I thought, a shade more quiet. He seemed to have a load of care upon his mind which was not there before, while Ned, though quiet, seemed to have become more manly all at once. It was not until evening came again, and we had gathered once more in the little sitting-room, with mother knitting (an occupation which she had not tried since the shock came upon her; but which she would have gone to the evening before if it had not been for the restraint of Uncle Robert's presence. It was the unwonted idleness of her fingers which had made so at a loss that night, I thought) and me with my book, that the third plan was unfolded.

[TO BE CONTINUED.]

MARBLEHEAD MAMMOTH

CABBAGE.

There being a good deal of seed in the market raised from very poor stock, which must fail to give satisfaction, having been the original introducer of the Giant Cabbage, which when raised from the right strain of seed under proper cultivation, has been grown to weigh *over 60 pounds* to a single plant, and sixty tons to the acre, I now offer seed to the public that has been raised by myself, with peculiar care all of it from extra large, extra solid heads. The Marblehead Mammoth is not only the largest, but is one of the most crisp and sweetest of all varieties of the cabbage family, as will be seen by extracts of letters to be found in my Seed Catalogue, where my customers state that they have raised cabbages from my seed that have weighed 40, 45 and 50 pounds each. Full instructions for cultivation sent with every parcel of seed. Seed per pound $5 00; per ounce, 50 cts; per half ounce 25 cts. My large seed Catalogue sent FREE to all applicants.

49-4t JAMES J. H. GREGORY, Marblehead, Mass.

VALUABLE INFORMATION FOR THE FARMER.

Next to the system of rotation in crops, the most important discovery yet made in Agriculture. Without any outlay of money, an increase of from 25 to 50 per cent. can be obtained in the crop of MARKETABLE

POTATOES

Proved by two years' experience. Costs nothing but time during Winter or early Spring to prepare the seed. Full directions sent for $1, payable after trial, at maturity of crop. ISAIAH T. CLYMER, Quartertown, Bucks Co., Pa.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March

"A sack of salt contains 7,168 half-ounces, therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the saving of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13, for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

SCAB AND TICKS

IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab. It only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Price per Gallon:

TOBACCO DIP..... $2 75
HEMLOCK DIP..... [illegible]

The Remarkable Cures which have been effected by the Wonderful Remedials, known as CLARKE'S EUCALYPTUS REMEDIES from Australia, have, and are exciting a great influence among all those who have long been sufferers by those terrible sources of suffering, RHEUMATISM, NEURALGIA, DYSPEPSIA, and FEVER AND AGUE.

These are the hard diseases which the Eucalyptus Remedies battles with and which they cure—of this, HUNDREDS OF TESTIMONIALS could be had.

Be sure you ask your Apothecary for the true Medicine, DAVID CLARKE'S EUCALYPTUS PREPARATIONS The only Genuine article.

Horticulture.

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

NEW PLANTS.

DAHLIA IMPERIALIS.

We have several times made note of this comcomparatively new species, and its probable value in out door gardening. It appears it is also useful ful in conservatory decoration. A correspondent of the *Garden* says: "One of the most interesting and beautiful plants in flower at Kew, at the present time, is this truly Imperial Dahlia, some specimens of which are flowering freely in the palm house. It is difficult to intelligibly describe without an artist's aid the chaste beauty of its flowers, so different are they from those of the ordinary garden varieties. The flowers, which are single, are born in loose terminal clusters, and assume a somewhat nodding position. They measure about 6 inches across, and have many narrow pointed ray florets of a pure white color, tinted with carmine at the base, colors which contrast finely with the bright yellow centre. The foliage, too, is handsome, being much larger and more divided than that of the ordinary dahlia. Altogether it is a stately plant, forming specimens from six to eight feet, though perhaps this is a point which deters many from growing it, as it requires the protection of glass in order to flower it, though it may be grown outside until early frosts set in. It is to be regretted that this fine plant produces its flowers so late that they cannot be enjoyed in the open air in our climate. Something, however, might possibly be done in the way of hybridizing it with earlier and dwarfer species, and notably with the beautiful little D. Glabrata, which, being of very dwarf habit, would probably infuse a dwarfer growth into the D. imperialis, while the color of the flowers might not be materially affected by it as those of glabrata are almost pure white, varying to deep mauve."

[This choice plant will do well in California and make a grand show flower.—ED. F.]

SWEET VIOLET, THE WHITE CZAR.—This is a new variety of the well-known violet "The Czar" so largely grown for the market on account of the size of its flowers and the length of their stalks, their fragrance and their abundance. To these advantages the new variety adds the merit of having white flowers, which come into market at a season when white flowers are very scarce.

SEEDLING CARNATION.—Mr. Wm. A. Bock, North Cambridge, Mass., writes: "I send by this mail samples of flowers of a seedling carnation which I have raised. I have tested it now two years and find it to be a very profuse bloomer, and of very dwarf habit.

PHYLLOXERA---THE VINEYARD PEST.

Here in California we fear there is too little thought or attention paid to this fearful scourge of the Grape vine, and if there is not an early awakening here to this evil we may rue it, when it will be too late to stay its progress, as the case in Europe.

It is a fact that this pest is in many Vineyards of our State, but even the owners do not like to admit it, and have given it little or no attention, we have the following facts from our Correspondent in Europe to show the fearful ravages there, and we earnestly hope to see some movement among our Vineyardists here to arrest this evil before we shall suffer in California as they have in Europe.

"The appearance of the *Phylloxera Vestatrix* has caused great consternation among the vine growers here. It is estimated that over 150,000 vines have already been destroyed, and yet no very great efforts are at present being made to stop the progress of this destructive insect. It is, however, expected that the Spanish Government will come to some determination in this matter without delay.

Very recently however the French Government have authorized the Minister of Agriculture to at once make every effort to discover a remedy for this terrible scourge, and have placed at his disposal a credit of 50,000 francs or £2000—$10,000.

Here is a nice little reward to the fortunate man or it may be reserved for a *woman* to discover a remedy) who shall rid the Vineyards of the world of the worst plague that has ever yet appeared upon this interest.

We are glad to know that recently efforts are being made by scientific research among the chemical compounds for a cure for this evil, and a triumph to the owner of the Prize offered by France, to which undoubtedly other Governments will add rewards also.

Planting the Fever Tree in Cyprus.

Sir Garnet Wolseley has kindly promised Col. White to ask for £3000 for planting Eucalyptus trees round the salt lake at Larnaca, and fencing it with wire fencing. The Commissioner is already making experiments, and has a considerable plantation; but it seems strange that, for the sake of showing a surplus, such necessary works should be left so long untouched. All this time the trees might be growing, and Larnaca might be healthier in consequence next year.—*London News.*

TO START TUBEROSES.—I plant them in old tomato cans, without punching any holes for drainage, set them on the mantle over the kitchen range, and keep warm and wet. When well started I move them to a cooler place, and at the proper time set them out in the garden. In this way I have raised during the past two years vigorous plants, yielding from twenty to thirty-five blossoms each.—*Vick's Monthly.*

WARD'S FERTILIZERS.—These very superior kinds of *Fertilizers* and also *Insect destroyers* should be universally used upon plants and flowers

VICK'S ILLUSTRATED MONTHLY MAGAZINE

Each Number contains THIRTY-TWO PAGES of reading, many fine Wood Cut Illustrations, and one COLORED PLATE. A beautiful Garden Magazine, printed on elegant paper, and full of information. In English and German. Price, $1.25 a year; Five copies $5.00.

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, MARCH 6, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms, Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,

PUBLISHERS CALIFORNIA FARMER,

San Francisco, Cal.

Editor's Chair.

Home.—We invite attention to the selections in our "Poets' Column" each poem a gem, that will repay a careful reading.

"Our Yosemite Letter."—We give another admirable Letter from our Correspondent in the great Valley of the Yosemite, now decked with Nature's jewels. "Anniversaries," "Street Talk" and other selections to note on same Page.

Horticulture.—"New Plants" we selected from the *Gardeners' Monthly*, these should be cultivated here, "The Phylloxera," this pest must be guarded against in this country if we would save our Vineyards—our State Government like France should offer a bounty as safety and protection.

Miscellany.—Our usual selections to please.

Agriculture.—We give Chapter I. of the splendid story of "How we saved the Old Farm" one of the most interesting stories ever written, a story told with such a pleasing and winning interest as will lead to practical labor on the farm, a story too that will win more attention than half the great sensational stories of the age—the story is written by a young farmer near Boston, and published in a neat volume by Loring & Co., Boston. The writer tells the story of "How we saved the Old Farm," and "How it became a New Farm," if our farmers will read this story and "buy this book" it will be a good heritage for their sons—there should be *ten thousand copies* of this book sold in our State—to read such a book is a rich and refreshing feast in agricultural lore, most earnestly do we commend this book.

Our Front Page.—"Railroads in early days," we call attention to this early document on our Front Page.

We call attention to the Letter from our Correspondent at Papeete, as the former letters as he states were indeed actual prophecies of what must result as he wrote them.

We have a mass of Books received with music and many Reports of value, in type laid over, also Letters of travel by Ajax, and others, which by reason of our long reports we must defer till our next.

Australian Exhibition.—All needed information of the coming International Exhibition at Sydney, can be had at Farmer Office where Australian maps, records and plates of the Fair Building can be seen.

☞SEND THE FARMER ABROAD.☜

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, if they send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a Journal as the California Farmer. We know our Journal is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the Home circle everywhere, as a Journal free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, special premiums of seeds are donated with the paper, to benefit our State.

A Magnificent Estate.

A large and very fine estate of some FIFTEEN HUNDRED ACRES with a fine Orchard of the very choicest fruit; a large Vineyard, very productive; a large number of Fig Trees, great bearers.

ORANGE, LEMON, OLIVE, and choice EXOTIC FRUITS of all kind.

This estate is located in one of the "Beauty Spots" of our State, a retired, healthy and delightful spot.

This estate will be sold at a great bargain by reason of declining health of the present owner.

Particulars can be had from EDITOR FARMER

THE SEASON---PROSPEROUS.

From every county in our State comes "Good news of the crops"—and amid all the varied clouds that fall upon business men by losses, by fire and by flood, still there is a goodly rally of hope for the coming year in an enlarged crop everywhere, and a more general prosperity among the farming interests for many years, at the last dates the rains have blessed every county and district in our State, and our farmers are jubilant, hopeful and happy now, and if they will learn wisdom by their past losses and avoid losses in future, all would be well.

BUY YOUR GRAIN BAGS NOW.

It has been said a thousand times, and perhaps *ten thousand times*, that our farmers and our grain growers will never take good advice, even when it is clear that it is for their interest to do so, they do not wish any advice, they prefer to have their own will and way in every thing.

The selling of their grain on hand, or storing it, the buying their *grain bags* in advance of the season or waiting till they harvest their grain, these are matters that our grain growers all are as set and wilful as a balky horse, they think they know all the markets of the world, know when grain will rise and when is the best time to buy bags, etc., and yet we believe that it has been clearly proved by the heavy losses our grain growers have made every year, that in seven cases out of ten they were far from showing good knowledge or good judgment in either case, and by their errors involved themselves and their families in losses and bankruptcies.

When the Grangers began their great *reform* and engaged "Morgan Sons" to be their champion to export their grain, believing the grain grower could be a *merchant* as well as a *farmer*, then their troubles began, and ever since by the system of *shipping* their own grain instead of selling it outright at the harvest, hundreds and thousands of our grain growers find themselves in a much worse condition than if they had wisely sold at harvest and paid their debts and purchased all their supplies each year in advance for cash.

If the great mass of our grain growers will go back the last ten years and review what they have done, if they will recall the opportunities they have lost every year by not wisely improving the time to *sell their grain* and the best time to *buy their grain bags*, we think they will in nineteen cases out of twenty agree that the best time to sell their grain is at the full harvest time, and the best time to *buy their grain sacks* is in the autumn or winter, in advance of the season.

Let our grain growers compare the price of wheat and barley last August *six months ago*, with the price to day, and compare the price of *bags* in the autumn of '77 and '78, and our position is maintained in the strongest sense. When will our grain growers be wise?

The New Constitution.

The framers of the *New Constitution* have enjoyed the longest *one hundred and fifty days* ever noted in any almanac we have ever seen, yet scarce a word was said of it when their time was out—or who pays their bills.

It is certainly admitted they have agitated many valuable improvements to our laws, provided they have well matured and completed them, but after all is done, the *people* at the "Ballot Box" decide the question, we certainly approve the plan of placing a copy of the *New Constitution* in the hands of every voter, so he may read, study and know how to vote.

Orange Culture.

We are glad to see our press all over the State now encouraging orange culture and other tropical fruits, they talk of it, however, as if it was something new; twenty years ago these fruits were cultivated in various places in this State and reported in this Journal, which has advocated such culture before many of these papers were born.

We have always urged the great value of *our hillsides* as the best place for such culture, as the midway slopes of our mountains were the best sheltered from frosts and storms; for ten, fifteen and twenty years past the *hillsides* have been our favorite places for orchard and vineyard culture, and for the healthiest "Home Spots" of our State.

Our Trotting Stock.

A new Association has recently been formed in our City for the purpose of promoting the true interest of a race of Trotting Horses, the great desire is to create and introduce the best horses in our State for travelers on the *road*; not mere Racing Stock, but for all purposes, and to secure fine Stock.

To this end a society of our best men have been organized, we learn also that Gov. Stanford has recently imported into our State fourteen of the finest *Brood Mares* that ever came to our State, paying a large and liberal sum to promote this good enterprise, Mr. Covey a well known judge of Horses went East for them and returned wth them safely to Menlo Park "Palo Alto Farm," the residence of Gov. Stanford, where they will be kept. Much credit is certainly due to Gov. Stanford for his great public spirit in promoting all such good Enterprizes.

The Walnut.

Why should we import the Walnut from Chili or from any other source when we can grow them here far better, and always have them fresh and good and not sweated and mildewed as most of them are when coming in the ship's hold on long voyages.

We lately received from *Felix Gillett, Esq.*, of Nevada City, samples of the *Praeparturiens Walnut* a new variety grown by him, and advertised in our Columns, the samples sent us were very fine, a light colored nut of good size, meat white, sweet and very excellent, and a nut we can most safely recommend to all who are desirous of cultivating Walnuts.

It will be seen also by the advertisement of Mr. Gillett that he offers many other kinds of trees, strawberries and other choice fruits.

As is always the case when lands are overflowed and we have a wet season—Fever and Ague follows—let all who may be afflicted with this dire disease, *Remember* that Clarke's Eucalyptus Remedials are a sure cure for Agues and Fevers, for Rheumatism, and even for Diptheria and Neuralgia.

RAILROADS---INTERNAL PROSPERITY.

Having been an active friend for all internal improvements from our earliest days, and for more than forty years advocating the cause of railroad and steamboat lines as a means of advancing the highest interest of the people, giving employment to large numbers of workingmen in their construction—opening up new avenues of trade and making new markets for the productions of the soil, we have always advocated earnestly the *granting aid from States and cities* where these improvements are made as a just measure and the best investment that could be made of public funds—as such improvements tended to the building up of manufactories, increasing all mechanical industries, opening up new lands and cultivating them, thus increasing the resources of a State by such measures, vastly greater than all the aid given by subsidies of lands, monies, or bonds given or loaned for such purposes.

As early as the year of 1836, we advocated such a public policy as wise and good, we were a stockholder in the Great Western Railroad, from Boston to Albany, of which Hon. Josiah Quincy, Jr., was President, also a stockholder in the Boston and Bangor Steamboat Company, both these at their start, we believed then as we do now public aid was wise and right.

When we came as a pioneer to this "Land of Gold," we saw a great future to our State if internal improvements could be inaugurated, and when the great Pacific Railroad was started in Congress, we hailed it as a good omen for our State, and advocated it with our pen and humble efforts, and although that effort was for Eastern routes, we said the coming glory would be in the West and that California would have her share of this great work.

As early as 1852, the subject of railroads sprang into being, and the first meetings were held in Sacramento of that year, and plans laid for the Sacramento Valley Railroad to Folsom—the records of which are now in our possession.—The first directors of the first railroad on this coast were: Wm. McNulty, C. J. Hutchinson, James L. L. F. Warren—(the present Editor of the Farmer).

When the Pacific Railroad was agitated in '53-'54 in our Legislature, we were called upon for our views as to the benefits which would accrue to this State and coast, and we then prepared a Memorial and presented it to the Committee of our Legislature as expression of our confident belief of the vast good that would accrue to our State, this was more than *twenty-five years ago*, and at the wish of kind friends we now *republish that document* as a good evidence that we judged rightly, and that our prophecy has been more than fulfilled.

It will be remembered that this was years before our California Central Pacific enterprise was conceived, and which has been the crowning glory of railroad enterprises in our country.

We publish this document to show that as the strong advocate of aid and subsidies to public works it is no new thing with us, but has been a life-long belief, and we thus continue to believe and act for all great and good enterprises that

build up our country.

OUR UNIVERSITY.

honors not even.

There has been a very warm controversy of late relative to admitting women to all the privileges of education at the Law Department in "The Hastings' Law School" of the University.

We feel confident that right will prevail and woman stand in our University upon her true merits, entitled to the same privileges for advancement as men, and then if women excels, give her the honor she wins by the power of her mind.

We would open the doors of *every* college and institution of learning to woman, as readily as to men, and let both stand upon their own merits—we say,

LET HONORS BE EVEN.

Now while speaking of our California University we would again pay a just tribute of honor to the noble gift of Hon. S. C. Hastings, who with a princely liberality gave $100,000 to found "The Hasting's Law School," which will prove of great value to our State and Coast, we would we had an *hundred wealthy men* to do deeds of like liberality.

Now while we would do honor for such deeds, we cannot omit to say that we think a great omission of justice and honor to another act of liberality has not been properly accorded. We allude to the liberal gift of Dr. H. H. Toland, of the means to establish the "Medical College" for the University, and we would hope that a public recognition of that gift should be so made that while the name of the "Hasting Law School" is recognized and engraved upon the one building of our University, the same honor should be paid to the other benefactor, and the name "Toland Medical College" engraved upon the other building, and thus both noble donors justly recognized.—When this is done and when woman is admitted to both these colleges with equal privileges—then will we say that

HONORS ARE EVEN.

PACKING NURSERY STOCK.

One of the most important matters in the packing and sending away *trees, plants, shrubs* and *vines*, next after a careful preparation for packing and correct direction of the boxes, bundles or parcels, is the preparation of the labels and the marking the same, some of our nurserymen are careful, using *zinc, lead* or *wooden labels* and writing names carefully and distinct—others by reason of haste or their inability to write or spell correctly, send labels wholly unintelligible, while others write names in pencil on unpainted labels, again others write names on paper, and ere the parcels reaches their destination all record of the names are lost.

This is an error, a fault that should at once be corrected, all labels should be of lead, zinc, or painted wood, all should be painted and the names written in paint and dried—then they are durable, reach the owner safely and satisfactory—and one thing more, all labels should have fine wire ties, not strings, they quickly rot off.

"SAVE DIND, SAVE FIND."

TANNERS' BARK---TANNERS' TREES.

One of the most important inquiries yet started in behalf of the great Leather and Hide interest of the world has been under a most careful and searching inquiry in Victoria, Australia, by a large committee of scientific men who having given the subject a long and thorough investigation, and gathering valuable information from many sections of that country on the relative value of the various trees that yield the best *Tanners' Bark*, have just issued a valuable Report of these researches in a 66 paged quarto volume—the title of their work is, *Report of the "Wattle Bark" Board of Inquiry.*

When we state that this Board of enquiry in their Report show the great value of the Wattle Bark as the best Tanning material known, its extensive use and exportation from Victoria (Australia) many of our readers will be surprised to learn that this famed Tanners' Bark is none other than the Bark of the *Acacia* tree which is grown nearly all over this Coast, and that it has been for years in use in the Tanneries of Victoria and other parts of Australia, and is considered of such great value as to demand from the Government of Victoria a special Board of Inquiry, to show up its value and take means to increase its culture on Government Lands, and protect the trees from destruction and depredation.

This report is extremely interesting and voluminous, yet exhaustive in its details, furnishing a most valuable fund of information.

We give only a few selections from its pages, and will give more hereafter.

In a return made to the Government of Victoria showing the quantity exported from Victoria from Nov. 1, 1877 to June 30, 1878 a period of 7 months, the quantity was 11,378 tuns, and the value of the same was £85,903, equal to $449,515, and this from the bark of the *Acacia*, a most extensive genius, of which in Paxton's Botanical works we find over 250 species, and yet this Acacia which is grown here quite common is only used as an ornamental tree, but could be grown by the hundreds of acres and made a source of great profit to the grower and of immense value for our *Tanneries.*

This Report speaks thus of this tree, "The Mimosa bark of Commerce" in this Colony is derived from three species of the *Acacia*, the *first* in point of strength being *acacia pycantha*, more commonly known by the several names of the "broad leaf" "golden" and "green wattle" (for the purpose of more clearly defining this species the Board has characterized it throughout the proceedings as the broad leaf) next, if not equal in strength, and certainly more common in Victoria, is the *acacia decurrens* or "black wattle," and the third species is the *acacia dealbata* or "silver wattle."

The Board of enquiry give detailed characteristics of these three species so generally used, of which the last variety *dealbata* is well known, and extensively grown in California, but its real value for *tanners' bark* not yet developed—this must be now alluded to.

There are 96 tanneries in full operation at Victoria, employing 1150 hands, and consuming 12 to 15,000 tuns of this bark annually—the value of this bark is about £5 or $25 per tun.

We shall give more from this valuable report and would tender our sincere thanks to our esteemed friend, Baron Ferd. von Mueller, a member of this Board for this highly valuable work.

Splendid Stallions for Sale.

Those who are desirous of breeding from good Stock are specially reminded of the fine Stallions now offered for sale by Messrs. John Rodgers & Co., on Market and Ninth streets.

These horses are of unusual merit, therefore we ask attention to them; One a fine Black Stallion, John Wallace 17½ hands high, sired by England's Glory, an imported horse of pure *Norman blood*, fine form and figure, proud action, worth $1,500, Another Black Stallion of high merit and good speed, record of 2:30, sound and perfect, of good blood; An Iron Gray Stallion, 16 hands high, fine action, perfect in every respect, and from Belmont on the Dam side and Messenger stock on Sire side, can trot in 2:40, a Stallion of great merit, really worth $2,000.

These animals would make their cost in one season in a good location, and will be sold at a bargain.

Our Australian Stock Breeders are specially reminded of this great opportunity for the best quality of Stock for their Breeding Farms, as all these animals are unusually excellent.

Tree Planting---Seed Sowing.

The season of tree planting is with us and had it not have been for the dullness of trade and the general depression of business of all kind, with the want of means to purchase land and homesteads, and make improvements, the planting and building season would have been greatly enlarged, as it is there will be considerable work done for the next two or three months, as our season is this year much later than usual.

We call the attention of all who are making improvements, planting trees, making gardens, sowing seeds, to the nurseries advertised in our columns both at home and abroad.

The Santa Clara Nursery, of E. S. Fox, Esq., has always stood at the head of the nurseries of our State, and is justly celebrated for its immense stock of trees, plants and tropical collections, to this nursery purchasers should go who wish the best.

The sowing of alfalfa and other grass seeds, and all field and garden seeds will continue to a late period this year, as experience shows we can cultivate all the year round.

To the famed establishment of Vick, Thorburn, Henderson and others, we call special attention—orders should go there immediately for their new seeds.

Shipment of cattle from Pensacola to Havana bids fair to become quite an extensive industry. Arrangements are in progress to ship three cargoes per month for the next three months.

The California Farmer Reading Room.

THE Register of the California Farmer Reading Room will be found of value, especially to New Comers from abroad, as it will give the names of our visitors and their locality.

We publish the names of persons from abroad and other prominent callers occasionally. The following are recently registered; large numbers call whose names are not registered as they visit our Reading Rooms often, to give all would fill columns

RECEIVED AT READING ROOMS:

We have received from the Bureau of Agriculture and Horticulture of Kentucky, their Bound Volumes of Reports of the Resources and conditions of that rapidly growing State, this is a valuable and important work, showing the great and increasing prosperity of Kentucky

We return thanks to Winslow J. Davis, Esq., Ag. Commissioner for the Volumes.

We have also the Transactions of the Department of Agriculture from the State Board of Agriculture, of Illinois, giving full reports of every county for the year of 1877, as prepared by E. D. Fisher, Esq., Sec. of the Board, these reports in Vol. 15 of the old Series and Vol. 7 of the New, with fine Maps and Plates, and full statistics.

We return thanks for the favor of this Volume.

Stock Books.—We have received from Smith and Powell of the "Lakeside Stock Farm" of Syracuse, N. Y., their illustrated books of Stock, their "Hambletonian and Clydesdale Horses" and their "Holstein Cattle," a fine collection of valuable Stock, shall note again.

We have received the latest Reports from the Department of Agriculture at Washington—they give encouraging news for 1878x1879.

The Chinese.

This is the "Question of the hour" this all absorbing topic is now the great theme of all; in church and State, in all political parties, and among all our business men; among the rich and among the poor, among our capitalists and among our working men, men, women and children are all interested, this shows how closely the Chinaman has become identified in all the interests of our State.

There is at time a *universal* interest in this question shown on the surface—but a very deep undercurrent smothered now, that if not guided with statesmanlike ability by those in power, will if the will of the people is crossed create a commotion on the Coast that will be hard to control. Much depends upon the action of Pres. Hayes at the time—we hope for the best, the course of Pres. Hayes may stop the smothered public hatred to the Chinese a little time will tell.

A Good Steel.—The hoodlums of our City are causing a lively business for our police, our courts and our jails—hundreds are arrested for *stealing* weekly—but we know a better kind of stealing that is done in our City, and a kind of stealing that works to a great advantage to our State.

Messrs. Nelson & Doble are Agents for the sale of the famed *Steel* of "Thomas Firth & Sons," of Sheffield, England, the best in the market, and the polished "Miners' Picks" and other tools made from this *Steel* at the workshops of Nelson & Doble, on Fremont Street, show a bright polish and finish rarely equalled—and this is what we call *steeling* with credit and honor.

TO DRUGGISTS AND APOTHECARIES

THE GREAT EUCALYPTUS REMEDIALS.

These wondorful and truly successful medicines that have been so promptly effectual in curing Bilious and Liver Complaints, Rheumatism, Neuralgia, Fever and Ague, and Dyspepsia, can now be supplied in any quantity by

MESSRS. CHARLES LANGLEY & CO.,

who have been appointed as our

WHOLESALE AGENTS.

Messrs. Langley & Co. will supply Druggists and Apothecaries of our State and Coast with these Great Remedials at shortest notice.

WARREN & CO.,

SOLE AGENTS FOR THE UNITED STATES.

A Free Book of nearly 100 large octavo pages for sick. Full of valuable notes on Scrofula, Diseases of Women; Aches and Pains; Heart Troubles and a variety of Chronic Diseases, with evidence that in many cases, these diseases are curable. Sent for one stamp. Address MURRAY HILL PUB CO No. 129 E. 28th Street, N. Y.

THE

Scientific American.

THIRTY-FOURTH YEAR.

THE MOST POPULAR SCIENTIFIC PAPER IN THE WORLD.

Only $3,20 a Year, including Postage. Weekly. 52 Numbers a year. 4,000 book pages.

THE SCIENTIFIC AMERICAN is a large First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, profusely illustrated with splendid engravings, representing the newest inventions and the most recent Advances in the Arts and Sciences; including new and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American;

Terms, $3.20 per year, $1.50 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 37 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. Munn & Co. are Solicitors of American and Foreign Patents, have had 34 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all Inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, free of charge, whether a patent can probably be obtained, by writing to the undersigned. We also send FREE our Hand Book about the Patent Laws, Patents, Caveats, Trade Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents.

THE AUSTRALIAN GUM TREE.

The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

☞ Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the back bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach or Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

TESTIMONIALS.

The manufacturer of these Bills has a great objection to the "wholesale' publication of testimonials, which in many cases are fictitious, and are only intended to mislead. Yet, for the satisfaction of those who are suffering, and have not yet used his medicines, he selects a few, who are best known in the colony and in the town he lives, and their personal testimony will satisfy the most sceptical.

These testimonials above named with many from California, since their recent introduction, will quickly show that the

Eucalyptus Remedials

are the best ever yet introduced. Full and ample testimonial accompany all parcels.

MANUFACTURED ONLY BY

DAVID CLARKE,

Home Miscellany.

"There is no place like home.
Home! It should be Heaven on Earth

THE CHRIST-CHILD.

BY MRS. E. T. HOUGH.

Where afar o'er Judean mountain
Fell the holy hush of night,
Opened wide the gates of Heaven
Circling earth with radiant light;
Listen to the angel voices—
Heaven's choral host rejoices—
"Glory to God in the highest,
And on earth peace, good will to men."

Where a weary mother weeping
O'er a babe in manger low—
Shepherds that their flocks were keeping,
Haste their treasures to bestow,
But what *gift* could o'er compare
With the Christ-child sleeping there!

Tell again the old sweet story—
Where the yule-logs brightly glow;
And where holly-berries glimmer
Scarlet on December snow.
Breathe it in the land of flowers,
Wreathe with song in sunny bowers—
Christ on earth, good will to men.

Tell it where the children gather
'Round the merry Christmas trees;
While their joyous notes of laughter,
Ripple through the Christmas breeze,
All to them of joy or love
Brought the Christ-child from above.

For one day let fall the curtain,
Of our toils and cares and fear:
Take instead the cup of gladness,
That the Christ-child bringeth near.
Then from shore to shore the story
O'er and o'er, and o'er again
"Glory in the highest, glory,
Christ on earth, good will to men."

—*The Woman at Work*

GRANDMOTHER'S BIRTHDAY.

BY CLARA DOTA RATES.

Just seventy years ago
A little baby smiled;
And they gave the sweet old Bible name
Of Hannah, to the child.

She slept, no doubt, such sleep
As only falls on eyes
That still have shut within their lids
The light of paradise.

No doubt the little hands
Lay passive on her breast,
As, with the cradle's lullaby,
They hushed her to her rest.

Ah, me! who could foretell
What works those hands should do?
How many they should help to lead
Life's troubled mazes through?

What never faltering part
Their tender strength should take;
What burdens for the tired one's bear?
What barriers help to break?

Scarcely a day or hour
In all these long, long years,
But they have helped some weaker one,
Or wiped some sufferer's tears.

And, ah, who could foresee
Upon that baby brow,
Where lay the dark and silky locks,
Its crown of silver now?

Peace, as at first, is there;
The world has never set
One single line of its hard seal
Upon that forehead yet?

The constant shade of pain
Has dimmed, perhaps, the eyes,
Yet still they hold within their lids
The light of paradise.

Just seventy years ago
Since the little baby came,
And now her children's children bless
That sweet old Bible name.

WRITE THEM A LETTER TO-NIGHT.

Don't go to the theatre, grange or ball,
But stay in your room to-night;
Deny yourself of the friends that call
And a good long letter write—
Write to the sad old folks at home
Who sit when the day is done,
With folded hands and downcast eyes
And think of the absent one.

Don't selfishly scribble "excuse my haste,
I've scarcely the time to write."
Lest their brooding thoughts go wandering back
To many a by-gone night,
When they lost their needed sleep and rest,
And every breath was a prayer—
That God would leave the delicate babe
To their tender love and care.

Don't let them feel that you're no more need
Of their love or counsel wise;
For the heart grows strongly sensitive
When age has dimmed the eyes—
It might be well to let them believe
You never forget them, quite,
That you deem it a pleasure, when far away,
Long letters home to write.

Don't think that the young and giddy friends,
Who make your pastime gay,
Have half the anxious thought for you
That the old folks have to-day.
The duty of writing do not put off,
Let sleep or pleasure wait,
Lest the letter for which they looked and longed
Be a day or an hour too late.

For the sad old folks at home,
With locks fast turning white,
Are longing to hear from the absent one—
Write them a letter to-night.

A Word for Seventy-Eight.

Good-by, Old Year, and thank you, too,
For many blessings sent us in disguise;
Friends that have proven earnest ones and true,
And lessons taught to those who were thought wise.

Home Correspondence.

YOSEMITE VALLEY, ITS WONDROUS BEAUTIES.

YOSEMITE VALLEY, February 8, 1879.

COL. WARREN—*Dear Sir:*

The long delayed mail has at last arrived, bringing news, and most welcome letters; yours of December 31st among the rest. Since I wrote you last, we have had very fine pleasant weather. The snow has gone so that we have some bare ground to look at. For about a month during the shortest days we had only about three hours sunshine on the south side of the Valley where the Hotels are situated. Now as the sun rises higher we have five hours. This makes it much pleasanter, and gives renewed life, joy, and gladness to every living thing here. The sunset's crimson hued glow, upon the great whitened domes and craggy peaks, is most gorgeous and enchanting. I do not wonder that the old Persian Pharisees and astrologers were sun worshippers. I am very near being one myself, after living so long within the frigid shadows of these cold towering granite rocks, mostly sheeted with ice and snow, and corrugated with frozen cascades. It is all very grand to look at for a while, but it soon makes one feel chilly, and his soul yearns for the bright and warm sunshine.

YOSEMITE—A HEALTH RESTORER.

We need no blue glass Sanitarium here. The atmosphere is so pure and clear, that the sky is of a very intense blue, and seems a low arched cerulean vault above, resting upon the high walls and peaks around the valley. At night the stars glisten and twinkle with a coruscant brilliancy, unknown in lower altitudes. It is a great luxury to breathe this pure mountain atmosphere. It exhilarates and thrills through every nervous fibre of the body, and makes the old feel young again. THE BRAIN BREATHES AS WELL AS THE LUNGS! The lungs inhale atmospheric *air*, the brain *electricity*. As the air rushes through the nostrils on its way to inflate the lungs, the brain attracts and inhales electricity from it. Perhaps this is one of our old mother Nature's secrets, that many have not found out, but everyone who has been two hours in a close lecture-room or theater, has felt the immediate reviving effects of it, as soon as they had inhaled one breath on reaching the open air. Hence the great importance for many reasons, why we should breathe through the nose instead of the mouth. There were five tourists here in the month of December, four in January, and there were three came in on the fourth of this month. They came on horseback *via* Mariposa. The trip is too hard and unpleasant to undertake until the road is open again for carriages.

EARTHQUAKE IN YOSEMITE.

By the latest news received here, I see that the Constitutional Convention is still in session. I fear that this *Constitutional Child* which so many have been looking forward to, as a *coming saviour* and which the Conventional body has been carrying *in embryo* so long overtime, will either prove an abortion or a monstrosity which the people will reject and kill at the first opportunity. It may be that some of the members of the Convention think that they have found a golden *egg*, which by the careful incubation will hatch out a multitude of little *golden chicks*, which they may sometime appropriate and divide among themselves; *Quien sabe*. On the night of the 3rd inst. a little before twelve o'clock we had quite a little shake of an earthquake here. No damage done, nor anybody badly frightened. Only a few avalanches of ice came down from their high places of repose, to salute the rambling, quaking visitor, and awake the slumbering echoes. Colonel would you do me the great favor to send me by mail two or three boxes of your EUCALYPTUS PILLS. I wish my friends here to try them when medicine is needed. I think that they are the BEST PILLS known, for such diseases as they are recommended. *They always prove beneficial.*

Yours sincerely, GALEN CLARKE.

CLARKE'S NEW SCIENCE OF BREATHING.

P. S.—My dear Colonel, I have sent you a sort of rambling communication. If you feel like abridging any of it, do so. But I think the idea, or rather *fact* advanced with regard to breathing is one of great importance, and one which *I* have never seen published in any work on Physiology. I have found that by perseverance in breathing through the nose, that I could climb mountains with much less fatigue than when I went *panting* with my mouth open half of the time. The reason is that the *brain* is better supplied with *nerve power*. It takes a little time at perseverance, to expand the air passages, but they very soon do their work freely. It will also do more towards curing that terrible disease called Catarrh, if persevered in, than any medicine I have seen. At least it is a good preventive.

Yours truly, G. C.

Wives of Men of Genius.

Under the title of "A Glorious Destiny," a writer in *Waverley* says: "A right-minded woman thinks it a glorious destiny to be the wife of a really great man. To soothe him in grief and comfort him in sorrow; to hide the petty cares of life from him; to rejoice in his happiness and exult in his success; to share his secret thoughts and hopes; to listen to his schemes and discuss his projects, and by loving care and thoughtfulness smooth out those little peculiarities and eccentricities which so frequently cling to genius, as creases rest on the finest fabric: to know that the moments he does not give to the world he gives to her; to know, above all, that she influences his life, as every woman does influence the life of the man who really loves her—and genius and greatness are not niggardly in their affection—for what better lot can she hope for?"

Kiss the children, and say that the best looking ones resemble the mother. This always leads to a fresh bottle of wine.

THE ANNIVERSARIES.

How do the anniversaries come in groups, jostling each other, and crowding together as the years go on, till as I said, life gets to be made up of anniversaries! Is this not true? You can answer me—you, sir, or you madam, who have crossed the glad meridian heights, and are on the downward slope. This day, perhaps, is the anniversary of your graduation; this, of your entrance upon some field of labor—no matter whether it be a wide or narrow one—for which you had eagerly prepared yourself; this, it may be, of your first communion, when it seemed to you, in your hour of exultation, that God had set his seal upon your forehead and whispered "Peace;" this of your happy betrothal; this, of your wedding day, with its solemn joys, its trembling hopes, its tremendous, yet half-felt responsibilities. Yesterday was the birthday of your eldest son. He is a man grown, perhaps—but you think of him as your boy still, the little fellow whom you loved and scolded twenty years or more ago. To-day a twelve month since, five or ten, as the case may be, you gave your one sweet daughter to be the light of another man's heart, the joy of another man's home. You wonder how you ever did it; and you think, for the fiftieth time, that of all cool proceedings on the face of the earth, the coolest is when some young fellow, in all the self assurance and blessed audacity of youth, steps up to a father and quietly asks him to pluck the heart out of his bosom and place it in his hands!

Just twenty years ago to-day, it may be, your baby died—the little one that had not learned to know his name. He would be a tall, manly boy now if he had lived. You wonder how it is in the land to which he has gone. Is he still a babe, or has he grown to the full stature of manhood? Who can tell? But it does not matter. Your heart, your father-heart, your mother-heart, tells you that in this world or the next, be he child or man, "he cannot drift beyond God's love and care." If Whittier had written no single line but that, you would bless him to your dying day.

Yesterday was the anniversary of your white-haired father's death, and one day last week your first awakening thought was that for just so many years your wife, or your husband, or your mother, had known the secret of the eternal years. As we grow older the grave stones multiply in our paths till we can scarcely see the way for the shadows they cast.

But there are births as well as deaths—there are smiles as well as tears—there are words of joyous congratulation as heart-warm as those of sympathy.

One generation crowds upon the heels of another; and before you know it, and you are keeping the anniversary of your grandson's birth, and pledging the new-comer in a cup of cold water, if you prefer it. The King is dead—long live the King!

What was the proposition with which I started? That, as we grow older, anniversaries inevitably take on a tinge of sadness? The world is so wide, separations are so long, there are so many changes and so many partings, that this is undoubtedly true, even of the general anniversary—those that belong to the world and not the person. We laugh with tears in our hearts, if not in our eyes; and there grows to be a good of make-believe in our joy.

And yet, after all, and notwithstanding all, this is a blessed world; and it is a good thing to be alive in this last quarter of the nineteenth century—so good a thing that we wipe our eyes, thank heaven, and take courage, even while at the beginning of this New Year we pray with Tiny Tim:—

"God bless us, every one!"

Street Talk.

A GOOD LESSON FOR THE YOUNG.

There is a "slang" which, though vulgar, is amusing, and there may be some excuse for an occasional use of it. But there is another "slang," known as "street talk," which is not amusing, and is vulgar and rude. Such may never be used.

"Learn to talk like a gentleman, my boy. Papa is sorry to hear you talk 'street talk.' Do quit it."

"What is 'street talk,' papa?"

"What did you just now say to your sister?"

"I told her to be quiet."

But you said, 'Shut up!' and said it very loudly and rudely. And what did you ten minutes ago say to Martha?"

"I told her to go out of my way."

"But you did not say it half so nicely as that. You said, 'Get out of this!' and I think you called her some name. What was it?"

Harry looked ashamed, and the tears came; but he answered, "I called her a 'dirty sneak.'"

"Just so. That is what I mean by street talk. All these words, and especially the rough tone and manner you hear on the street, belong to those boys who have never been taught any better, and to those men who, though knowing better, yet do not care anything about the better way. But my dear boy, must never use street talk."—*Youth's Companion.*

Mental Improvement.

The effect of mingling with new people, who have new methods of thought, is very salutary. Always to see the same people, do the same things, feel the same way, produces a stagnant condition of the mind and heart that is very distressing to behold. There are thousands of invalids who might be greatly benefitted by getting away from home, to mingle with the magnetism of the great world as it courses in its accustomed rounds. And there are mental invalids who need the same change, to get their minds and hearts enlarged, and let in a little more of the great light of life. Outside influences are very valuable to those who at home have been well trained by healthful influences in early youth, so that they can avoid the snares and pitfalls into which they so often blindly fall.

The coldest weather ever known in California occurred last week, when ice formed five inches in thickness at Fresno, Dec. 1st.

THE BLOOD---THE LIVER---LIFE.

Almost every newspaper in our land far and near herald new preparations for curing "Liver Diseases" and "Purifying the Blood," page after page of our daily and weekly Journals publish all the old and new drinks. "Bitters" of all kinds have posters on the fences and buildings all over our State and Country, for all know that BLOOD IS THE LIFE AGENT and without PURE BLOOD diseases of all kinds are constantly generating.

Our newspapers all are almost daily making records of sudden deaths by *heart disease* and by *apoplexy*, and these are only in truth BLOOD DISEASES, which all the vinous or spirituous stimulants in the world, though they may relieve from pain temporarily, yet can never thoroughly cure of disease.

To perfectly cure, the blood must be made pure and life giving; its diseased condition must be changed, and new vitality must be so infused into it, and with such power as to drive out all the impurities, so that new vitality shall infuse *new life* into its circulation.

Among all the many preparations that have thus far been perfected there has never yet been any equal to DAVID CLARKE'S EUCALYPTUS BLOOD PURIFYING REMEDIALS.

These are entirely free from all mineral or spirit ingredients, nothing but the pure properties of the *combined virtues* of *leaf*, *bark* and *root* of more than fifty varieties of this famed tree are concentrated in this wonderful Blood Purifier and life saving Medicine.

Those who would be saved from sudden death by *heart disease*, *apoplexy*, *diphtheria* and the other fearful diseases which this renowned Medicine cures, should not fail to guard their own lives and that of their kindred and friends by using this *Australian Remedial*, the only pure variety is that of David Clarke, Warwick, in Australia, ask your Apothecary for this Preparation and thus save life.

DOMESTIC RECEIPES.

Reheating coffee just before grinding brings out the flavor.

Make two large pockets in your kitchen apron and in one of them always keep a holder.

HAM BALLS.—Chop fine cold cooked ham; add an egg for each person; beat together; make into balls and fry in hot butter.

PRUNE WHIP.—Sweeten to taste, and stew three-fourths of a pound of prunes; when perfectly cold add whites of four eggs beaten stiff; stir all this together till light; put in a dish and bake twenty minutes; when cold serve in a larger dish and cover with whipped cream.

TO REMOVE RUST FROM IRON.—The easiest method of removing rust from iron is rubbing it with a rag dipped in oil of tartar. The rust will disappear immediately.

TO KEEP A GUN FROM RUSTING.—Clean the barrel occasionally and cover the exposed portions of the metal with a film of linseed oil. For lubricating the lock, purified olive or sperm oil is best.

Common Sense.

It is simply in keeping with common sense to say that a specialist who gives his undivided attention to the treatment of a certain class of diseases ought to succeed where practitioners in general practice may fail. DR. E. B. FOOTE, of 120 Lexington Avenue, New York City, has given his exclusive attention to the treatment of CHRONIC DISEASES for twenty-five years, during which time he has cured thousands whose faces he has never seen. If you will send to him for his searching list of questions you will see how this has been done in part. Consultations in person or by mail FREE. Dr. Foote's works, Plain Home Talk embracing Medical Common Sense, Science in Story, etc., are publications well known to the reading public. Taking all of the Doctor's publications together it is not too much to say that millions of copies have been sold. 48:20 4t

The Amateur's Handbook of Practical Information.

for the Workshop and Laboratory: Containing clear and full Directions for Bronzing, Lacquering, Polishing Metal, Staining and Polishing wood, Soldering, Brazing, Working Steel, Tempering Tools, Case-Hardening, Cutting and Working Glass, Varnishing, Silvering, Gilding, Preparing Stains, Waterproofing, Making Alloys, Fusible Metals, Cements, Glues, etc., etc. Price 10 cents. New York: Industrial Publication Company. 1878.

This is not a mere book of recipes clipped from old journals and encyclopedias, but a carefully compiled book of instructions for performing those little technical operations which are so frequently required in every-day life, and in the workshop of the amateur. In most of these operations the recipe is but half the battle; when we come to put it in operation we are apt to fail from ignorance of some general principle, or from inattention to some important though apparently trifling detail. In the book before us this defect is avoided, and minute practical directions are given, so that any one may be able to put the recipes in practice. This is specially apparent under such headings as glass-cutting, lacquering, steel working, brazing and soldering, silvering, staining woods, waterproofing, etc.

[We return thanks to publishers for a copy of this little but valuable book.

We have just received *Nellis' Floral Instructor*, which is an elegant illustrated quarterly, devoted to gardening in all its branches, containing a complete list of seeds, plants and bulbs at greatly reduced prices, and much other useful information. The subscription price is only ten cents a year.

He sends a sample copy and packet of choice flower seed as a trial to any one who sends him a three cent stamp. His address is A. C. NELLIS, Canajoharie, New York.

TAKE NOTICE.—Upon my return from Europe, 1878, I advertised largely "Beatty's offer for 1885, 13 stops, 2 knee swells, 3 sets reeds, weight boxed 850 pounds, monopolist price about $340; MY PRICE ONLY $68." So great was the demand, our men worked at factory till 10 P. M. to fill orders. This unparalled offer is extended until further notice. To secure it, however, order now. Now pianos $126, $135, $145, and upward. New organs, $65 to $460. Pay only after testing instruments at YOUR OWN HOME. Latest circulars free. Address DANIEL F. BEATTY, Washington, N. J. 49:4 It

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your Instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated make, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival any where."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your Instruments surpass my expectations and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

Santa Clara College, S. J.

SANTA CLARA, CAL.

THE TWENTY-SEVENTH ANNUAL SESSION OF THIS Institution will be resumed Thursday, January 3d.

This Institution was founded in 1851, and in 1855 was incorporated with the privileges of a University. It occupies six large buildings with extensive shady playgrounds, covered gymnasiums, swimming pond, etc.

It possesses a most complete philosophical apparatus, and valuable collections of mineralogy and geology. It has also practical schools of Assaying, Surveying, Telegraphy, Photography, and Commercial business. For the latter a new building 160x40 has just been finished that leaves nothing to be desired.

Diplomas are given in two Departments, the Classical and the Scientific, and certificates in the Commercial course.

TERMS—(Payable semi-annually in advance) Matriculation fee, to be paid but once..... $ 10.00
Board, Lodging, Tuition in all branches, Washing and Mending of Linen, School Stationary, Medical attendance and Medicine, Baths, etc., per session of ten months..... 250.00

For further particulars apply to the President of Santa Clara College, or to St. Ignatius College, 841 Market Street, San Francisco
34-1 REV. A. BRUNENGO, S. J., President.

WHERE WAS THE ADVERTISEMENT?

Purchasers who read the Advertisements in our Columns, and make their purchases thereby will do us a kindness by stating to those of whom they purchase, where they obtained the *information of their Wants.*

Miscellany.

Gatherings along the way a.
Floating gems by every tide.

WONDER WHO THEY'RE FOR?

My ma's been working very hard,
And also very sly,
And keep her sewing out of sight
Whenever I am nigh.
I asked her once what made her stop
Her work when I came in
She said she only stopped to get
A needle, thread or pin.

The bureau drawer next to mine
Is locked both night and day
And when ma wants it open
She sends me off to play.
I stole a peep one afternoon,
Although it was not right
But, oh! the little things I saw
Were such a pretty sight

The cutest, nicest little clothes
Just big enough for a doll,
But then I know they're not for her—
She needs them not at all.
I know they're not for ma or pa,
Nor me nor brother "Bor,
For we can't wear such little clothes
I wonder who they're for?

A QUEER TEAM.

A traveler in the Western District was struck by the absence of the usual tesselated language of a bullock driver, in the case of a man on the road with a small team, which he thus apostrophized:

"Come hither, Baptist! Who-o-a Presbyterian."

The mode of address seemed so strange to the traveler, that he entered into conversation with the man, and asked him how these titles were applicable to a bullock team.

"Well, sir, you see," said he, "I calls this the 'steriastical team. You see that bullock on the off side leading? I call him Baptist. We'll be crossing the creek presently, and he'll be bound to make for the water. That one on the near side, he's 'Piscopalian, 'cause he holds his head so worry high. That bullock on the off side of the pole, the one with the crumple horn, I calls him Presbyterian. He is the most out-and-out knowing bullock of the lot. The brindle in the same yoke with him, he's Wesleyan. He always a grunting and a groaning as if he was dragging the whole load. Bless your life, sir, he's not pulling an ounce."

Art of not Quarreling.

Sensible husband: "How is it that we never quarrel, Mr. Xantippe?" Well, I will tell you. One person can't make a quarrel. Now, if I am in a quarrelsome humor, and break out, my wife remains cool and collected and don't say a word. If my wife is peevish, and displays more temper than is becoming to one of her beautiful sex, I, her husband, remain as unmoved as the monument, or else cheat myself into the belief that I am listening for the moment to some heavenly song. We only quarrel one at a time, and it is astonishing. If you leave a quarrel alone, how very soon it dies out! That's our secret, madam; and I should advise you and all Xantippes to follow it.

A Speculative Era.

The present is emphatically an era of speculation. Professionals, merchants and mechanics are all alike drawn into the vortex of wild speculation; for the wilder it is and the more rapid its changes, the greater its allurements. Even some Reverends cannot escape the contagion, but take their chances, with the common herd, to make a fortune or be ruined in a day.

The State of California is 700 miles long with an average width of 220 miles, making an aggregate area of 98,634,240 acres. Of this amount, 65,000,000 are adapted to agriculture, 15,000,000 to grazing, 4,000,000 are swamp and overflowed land, and 14,034,240 are lakes, bays and precipitous mountains. The Federal Government has granted to the State 10,782,160 acres of public lands.

Excuse yourself for not having called since last New Year's day; any well-framed, graceful lie will do.

In complimenting the young ladies on their rosy cheeks, don't ask where they bought it.

A Florida negro has discovered that figs, melons, and oranges fed to a pig make no better pork than potato-peeling and wrinkled ears of corn.

Mr. Simms says if it wasn't for the hole in the hoop you couldn't put it on the barrel, and the barrel would burst.

A correspondent (unmarried) suggests that Solomon's wisdom was due to the fact that he had 700 wives, whom he consulted on all occasions.

New Zealand Flax.

(Phormium Tenax.)

This wonderful Plant is worthy more and better attention than it has ever received at the hands of our people.

Had this plant been received as it deserves an *hundred thousand* acres of our supposed reclaimed land would have been saved from floods, it is the best guard for embankments, it can also be utilized for paper making, cordage and basket making, and made a source of income as well as a protection to all swamp lands.

Two large plants in the Post Office grounds in our City show the character and growth of this valuable plant, it is ornamental as well as useful.

The seed can be had at THE CALIFORNIA FARMER Office.

AMERICAN Berkshire Record.

. Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE

FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard o Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol I. is $3.50, post-paid; that of Vol. II. $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid, the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with studs for retaining memoranda, price $1.00 per set. These forms are adapted to general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Management of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven Illustration therewith, have been published together in pamphlet form. They will be sent post-paid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

N. B.—These Splendid Volumes can be seen at THE FARMER OFFICE.

PHIL. M. SPRINGER, Sec'y,
Springfield, Ill.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make no *charge.*

We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, cand find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

TO ADVERTISERS ABROAD.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion;* larger space, *Fifteen Cents per Line;* each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eighth of a column, three months..... $15.00 | For one-half of a column, three months..... 60.00
For one-quarter of a column, three months..... 30.00 | For an entire column, three months..... 100.00

For a six month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the above rate

WARREN & CO., Proprietors,

320 CLAY STREET, SAN FRANCISCO.

Worth a Guinea a Box!

May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, APRIL 21, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills; I thought I would try them. I have only taken three small boxes: the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you. I am, truly yours,

WILLIAM STEWART.

PARTICULARLY NOTE THIS.

HERMITAGE, WARWICK, August 14, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food. Consulted a Physician in Warwick; was under his treatment four months without improvement. Dissatisfied, went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit. In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.

MICHAEL BYRNE.

WARWICK, December 30th, 1872.

TO MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed *good health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 23, 1874.

TO MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)

JOHN GREEN,
—Tentmaker, &c

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved an cured from long and great suffering by the use of thes Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you Davi Clarke's Australian Pills—the only genuine.

MANUFACTURED ONLY BY

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, March 6, 1879.

Money and Exchange Tables.

Exc. on England, new style, long and short	4 86 a 4 88½
Gold, at par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	8s 9d a 9s 3d.
Value of Club Wheat in Liverpool	9s 1d a 9s 7d.
Value of Wheat in New York, bushel	1 00 — 1 10
Brewers Barley in New York, bushel	95 — 1 00

MONEY AND EXCHANGE TABLES.

The subscription of the new U. S. four per cent. loan are more active than they were at the beginning and middle of the month. Mr. Secretary Sherman is kept pretty busy issuing calls for the redemption of 6-20's, to facilitate the work of exchanging the six per cents. for four per cents., he offers inducements for holders to come forward and make the change before a formal call compels them to do so. One important feature about the rapid placing of the new U. S. fours is that the great bulk of them are kept at home, foreign capitalists do not like them, and as our own people are absorbing the bonds rapidly, moneyed men abroad are not likely to be offered any special opportunities for taking the new certificates. This new condition of things will, in the future, keep the interest on Governments at home, instead of sending it across the ocean, as has been the case for so many years. European financiers, too, must be surprised at the facility with which the fours are being sold at home; to the average capitalist and banker in London and Paris, Berlin, Amsterdam, and Vienna, the placing of a Government loan anywhere, save in London, is next door to an impossibility; it may be that the foreigners are holding off from the four per cents, with the hope of securing them at a cheaper rate in a year or two.

The *Money Market* is full of money in the capitalists hands and there is plenty of loose capital in banks, as the report of the Commissioners show, our banks now show a sound condition, yet in the business circle and in the country money is hard to collect, the masses of the people want money.

The Bank of England has cut down the rate of interest to 3 per cent. France quotes very low interest, with full treasuries. Germany has more use for her money. Russia, Turkey and other nations want money.

Money in New York is a drug, as low as 1, 2, 3 per cent per annum on three months' paper.

Our bank rates are 7 to 9 and 9 to 12 per cent, according to cases—long loans can be had at 7 per cent and less.

GRAIN AND FLOUR MARKET.

The *Grain market* continues in a dull state and no prospect of a more active or better market until our holders of grain give way and meet the market, and help load the ship, that float in our bay idle now waiting for cargoes, when the holders of grain more, their grain goes, then ships load, and business will be lively again, for the large amount of grain in store counts by millions in value, and is so much capital lying idle, checking the wheels of trade.

Our grain growers we fear have made a sad mistake in their "Hold on" rule this year—the "Plague spot" in Europe is fading out, the Russian ports will open and pour into Europe their grain in such masses that a lower rate must soon rule—besides the quantity of grain in Liverpool and all European markets is now large and steadily increasing, so we can not tell where we can expect to see any rise upon the California market, for grain, certainly, not by any means enough to pay the cost of delay in selling, by interest, storage, waste, insurance, etc. If our grain holders had sold their grain months ago, and bought their bags for 1879's crop, their gain would have been a handsome sum—Let time will show who is right.

The *Flour market* is very dull, mills run half time, price is now on the down grade, and with prospects of more rain and better crops, breadstuff must rule lower.

The *Wheat market* has had a little spurt of trade for shipment, large stocks of wheat in Napa and San Joaquin counties have had a call and a few ships will hurry up cargoes at less figures and so relieve our market a little—by a letter from a correspondent (one who knows) there were 35,000 tons wheat at Stockton last week—now it begins to go—it would be a grand thing if all the holders of grain would but raise the cry

THE WHEAT MUST GO.

The *Barley Trade* dull, no rush, price nominal. *Oat Trade* the same.

The *Market* for *Corn, Rye,* and *Buckwheat* are all dull, and comparatively nothing doing.

The various *Feed stuffs*, of *Bran, Middlings, Corn Meal, Ground Barley, Oil Cake Meal,* are all the same as last reports.

The *Hay market* also remains dull, no change in price.

The *Seed Trade* will soon wake up, and more trade in this work be done and with profit.

The *market for Potatoes* has been liberally supplied and prices give way—*Sweets* are now more plenty at same rates—*Onions*, more in market and prices now about 5 cents, this is a big price.

The *Hop market* has gone after some new invention to raise a market for hops, our own market is overstocked—England is overloaded and sending her hops to Australia this takes our trade from thence, and hops won't move, and the growers are badly discouraged.

Alfalfa Hay	—
Straw per ton	5 00 — 6 00

Retail Prices in the Fruit Market.

The *Fruit market* increases in the show of oranges, lemons, limes, etc., from down south, in the quantity, but not in quality, the first comes in small, which indicate too much fruit upon the trees, and a neglect of pruning and culture, and a neglect also of mulching the trees in dry weather, all these things must be attended to if fine fruit is expected.

We have plenty of Island fruit and foreign fruits and nuts—while our own is far better—a few "Buerre Pears" are in market, but passe—Oregon apples continues to come, but the quantity is fading out, the display not as good as usual.

Apples, per box	75 — 1 50
do. do. lb	6 — 8
Pears, per box	2 50 — 3 00
" per lb	10 — 12

English do.	4 — 5
Canary Seed	4 — 5
Coriander Seed	5 — 10
Broom Corn	4 — 6
Bees Wax	23 — 20

California Leather Market Report.

The *Hide, Leather* and *Tallow markets* partakes of the general stagnation of trade—waiting, waiting, for a revival, no change since last week everything dull, little or no sale.

California Sole Leather	23 — 30
do. Harness do.	— 30
do. Skirtings	— 37½
Bridle Leather	33 — 36
Rough do. Oak Tanned	1 8 — 26
Waxed Calf Skins	50 — 1 00
do. Kips do. per dozen	30 00 — 55 00
do. Leather per foot	15 — 17

Wool, Tallow, Hides, Etc.

The *Wool market* makes no sign of trade till the new clip comes—trade here at a standstill—in New York, Boston and Philadelphia it brightens up, as manufacturers are buying wool more freely.

Wool, Spring Clip	15 — 18
do Choice Extra	17 — 18
Fall Clip	14 — 18
Oregon Wool, per lb	19 — 21
Medium, bright	12 — 14
do. Burry	10 — 11

1854. 1879.

THE CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on this Coast—this was at Sacramento in the year of 1852, and at the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an individual enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the first and ever advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONE WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL doctrines that to-day now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE of AGRICULTURE, which such years of labor merit, as the JOURNAL sends out NO AGENTS, NO RUNNERS, but only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER are placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1
Six Copies,	5
Ten Copies,	8
Twenty Copies,	15
Fifty Copies,	35

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer 1879.

WASHINGTON.

From our Specia' Correspondent.

WASHINGTON, D. C., January 6, 1879.

COL. WARREN—*Dear Sir*

Our lazy, do-nothing holiday week which began amid holly Christmas greens and children's rejoicing, joy-bells and gift-laden trees, and which ended in ice, snow, watch meetings and fashionable receptions, is only now fairly over. Now comes a fresh beginning in everything. Schools and meetings, salaries, clerkships, house-rents, lecture courses, diaries, everything begins anew at this time. It almost seems as if the new year ought to begin in Spring-time, with the world's new life and nature's fresh beginning. Congress re-assembling is very like the opening of a new session. There is apparently as much hand shaking, as many questions and answers, as if the sage brethren had not met for six or eight months instead of after only a two week's separation. To what the august body will first turn its attention is now the mooted question before the political public. Lobbyists are here in full force, one wanting one thing, another hoping for something else. What with lobbyists, constituants, newspaper reporters, and so on, the average Congressman must have a sorry time of it here. He may well be counted among the wicked for whom there is no peace. The Senatorial contest in Kansas has awakened much interest in certain circles from the personal relations of many here with the several contestants, and from the disgraceful developments in the case of the present incumbent, Mr. Ingalls, whose desire to succeed himself has kindled a fire in his rear that threatens to overtake and utterly consume him. A letter has been published in which Ingalls threatens a Kansas postmaster with removal unless he promptly pays over a certain amount monthly to a person indicated, "according to contract," with him, (the Senator). This has left a decidedly bad impression and tends to confirm the belief entertained by many that Ingalls was really at the bottom of the "put up job" on Senator Pomeroy a few years ago, accusing the latter of bribing for the evident purpose of defeating him in the Senatorial race. All remember how successful it proved by springing the matter suddenly on the Legislature and taking advantage of the resulting demoralization. The reaction in Pomeroy's favor in Kansas is shown by his prominence as candidate to succeed Mr. Ingalls.

The following is the result of an estimate of the strength of the average Republican candidates before the Kansas Legislature, made before this Ingalls' scandal became public; Ingalls 50; Anthony 30; Phillips 20; Simpson 15, and Anderson, Campbell and Pomeroy the balance of the 130 votes. It is now intimated that many of the Ingalls and Anthony men will give their candidates a complimentary vote then go over to Pomeroy who is accounted about the best representative of Kansas interests over in Congress.

The public reception at the White House on New Year's day went off more pleasantly than on many similar occasions. The unpropitious state of the weather prevented a crowd; hence the great comfort to those present. These annual receptions are divided into several parts for the sake of order and perhaps for other more aristocratic reasons. Cabinet officers are first received at 11 o'clock A. M; then come the following in the order named; Members of Supreme Court, Senators, Representatives and other high officials. At 1 o'clock the "sovereign people" are admitted. High and low, rich and poor, black and white, all are inextricably mixed in the grand rush to be the first in. Only one distinction is observed towards them not enforced against the big bugs and little bugs who have preceded them; that is the crowd is forced to "keep moving" while those who preceded them are allowed to pay their respects a trifle more leisurely. Last Wednesday Mrs. Hayes was dressed in rich, ivory-tinted silk with train and high waist cut V shaped in front, and filled in with fine lace. She wore no jewelry, her only ornaments being a white plume, and ivory comb in her purple-black hair. Four ladies assisted Mrs. Hayes, and the President, Vice-President and Webb Hayes were also in the line of the receiving party, Mrs. Jewett, of Chicago, wore lemon-colored silk and point lace; Mrs. Gen. Hastings (*nee* Emily Platz, President Hayes's neice) was in a princess robe of blue silk brocaded with silver threads and natural-tinted flowers. The other ladies wore equally rich and handsome toilets. The parlors were beautifully decorated with festoons of similax and pots of luxuriously growing tropical plants from the conservatories, and beautiful flowers were on the mantles and tables about the rooms. MARTHA.

Eastern Correspondence.

EMIGRANT'S ENQUIRY.

RICHMOND, IND., February 12, 1879.

COL. WARREN—*Dear Sir.*

At the suggestion of the Cincinnati *Weekly Gazette*, I write you for information in regard to the price of land and the inducements offered to sheep raisers in southern California. On what terms can land be bought, and what is the opening for a young man with but a few hundred dollars to start with?

Any information in regard to the general affairs in the vicinity of Los Angeles will be thankfully received. Also, what is the opening for a young man to enter business? I am teaching school at present. Have spent one year in Cornell University. Have a fair knowledge of book-keeping and would be willing to enter any profitable business that may offer. I am thinking of making California my home and so desire information. Hoping if it will not be too much trouble, you will give me what information you can, I am,

Yours truly.

OUR REPLY:

The above is about the style of hundreds of Letters constantly received at our Office, and it would be very difficult to prepare such answers as would meet all cases as a general thing, for as to the *Price of lands* the value varies according to its location and quality, and its nearness to the Railroad and markets.

Good land varies from $10 to $100 per acre, sheep raising has paid well generally, and sheep raisers have made themselves rich, *i. e. those that managed well.*

A young man or an old man cannot expect to "set the world on fire with but a few hundred dollars," *cash* is one of the best implements to have to carry on a farm.

Los Angeles and all the Southern Counties are doing well, crops good, business fair with promise of a good harvest year.

We cannot offer any great inducements to young men that are *without much means* for any great business operations—*money* is the essential, and any young man that is now doing well *East* we say, hold fast to a good position and stay where you are, "let well enough alone" too many persons give up a certainty for an uncertainty—and regret it when too late.

Colorado Hemp.

Our attention has been called to a species of wild hemp which grows on the bottom lands of the Colorado river. The botanical name of the plant is Appocynum, Cannabinum. Its grows about nine feet high and in general appearance resembles our native wild mustard. Its fiber which is white, fine and strong has been used from time immemorial by all the native tribes of the Colorado river for their ropes and for their clothing. There are also other plants which they use for this purpose. This is however preferred by them where great strength is required. This plant has attracted the attention of the Agricultural Department at Washington, and also of paper manufacturers of the East. We learn that an Eastern manufacturer has sent a practical man who is also a scientist, to make an examination of the plant in its native habitat. If his report is favorable the plant will be cultivated in its native soil and climate for an increased growth with the object of shipping the fiber East to be used in the manufacture of the finer kinds of paper requiring great strength.

AUSTRALIA.

AGRICULTURAL NEWSPAPERS.

Editors, strangers and citizens from the Eastern, the Middle, or Southern States, also Editors over our own Coast who may desire to see or refer to their own Journals, or any Agricultural or Horticultural Journals, will always find them on file in the FARMER READING ROOM, to which they are always bid welcome.

ONE HUNDRED of the leading Journals and Magazines of this class, the best in the United States, are in this collection, giving to those in search of Agricultural knowledge the best Information on this Coast.

A Large Library also, for *General Reference.*

Australia and California

We have full files of Australian Papers from all parts of Australia, showing the great interest they take in this Country, one thing of great moment, is the "Steamship Line," it is of vital importance to the welfare of the Colonies, and so vastly important to the Pacific Coast in the great trade that can be built up between the Colonies and California, if our Merchants do their duty.

These Journals are arranged on file for the convenience of all who may desire to peruse them. We have as follows:—

The Sydney Morning Herald, Sydney.
" *Town and Country*, Sporting Paper, Sydney
" *Australasian*, Melbourne.
" *Weekly Times*, "
" *Adelaide Observer*, Adelaide.
" *Queenslander*, Brisbane, Queensland.
" *Week*, " "
" *Capricornian*, Buckhampton, Queensland
" *Port Dennison Times*, Port Dennison.
" *Wide Bay and Burnett News*, Queensland.
" *Darling Downs Gazette*, Toowoomba, "

Many of these Journals are of the largest size, from 20 to 38 pages, several, splendidly illustrated with views of the Public Buildings, Landscapes, Public Men, Stock, etc.

CONTRIBUTIONS FROM QUEENSLAND.

We Invite all our readers and our citizens especially who are interested in our MANUFACTURES and the MECHANIC ARTS, and our AGRICULTURE, to visit the FARMER Office and see the RICH PRODUCTS brought from QUEENSLAND by the Commissioner, they are now on Exhibition open to all, in the READING ROOM and MUSEUM of the CALIFORNIA FARMER OFFICE.

The Great Sydney Exhibition.

We are truly glad to see our citizens moving now to prepare for the coming Exposition in September next at Sydney.

We are glad also to know that H. H. Williams, Esq., the able Agent of the Pacific Mail Steam Ship Line, is so kindly favored to this Enterprise; and we are assured by him that he will do all he can, by a liberal plan of freights, to forward so important an opportunity for our merchants and manufacturers to make a grand display from the Pacific Coast.

We are glad to see meetings called to carry out this good work, but to make it a complete success a strong and efficient Committee should be selected to manage the whole affair this side, and if such men as W. T. Coleman, merchant, W. L. Booker, English Consul, J. C. Merrill, merchant, Hugh Craig, New Zealand Insurance Agent, with a member from some six or six firms that are interested in Australian trade could be added, the work would be a Triumph—let this be done.

AUSTRALIAN EXPOSITION.

We are informed that arrangements are in contemplation with several of the leading manufacturers in the East of agricultural machinery, to send a well arranged assortment of their manufactures to the Australian Exposition. And that the medium through which these several interests are to be represented, will be a well known gentleman of this city, who has had great experience in every department of agricultural machinery, both as an extensive manufacturer, user, and vender of the same.

His commercial education, business knowledge, great experience, commanding ability and address as a salesman, fit him in an eminent degree to represent most efficiently and ably the important interests to be confided to his care.

We suggest in this connection that such manufacturers in this city (of whom there ought to be scores, if not hundreds), as contemplate sending samples of their wares to this Exhibition avail themselves of this same medium, by means of which their expenses will be greatly lessened, and their several interests ably represented. The time for opening the Exposition has been extended from August 1st to September 1st, by reason of which ample time is given all to make the necessary preparations and shipments.

OUR MINES.

What an excitement about our Mines; no other interest in our State has the power to create so sudden and uncontrollable a *furore* as the mining interests of this Coast, let but the words go forth that *Sierra Nevada, Union, Ophir* or *Con. Virginia* had made some astounding development in their lower depths and the result would create a *rush like the cry of fire* in a theatre, when the audience are deepest engaged in some exciting *tragedy.*

Perhaps our similitude is an apt one, for our people are deeply engaged in what has ended in a tragedy to many, the theatre they attend is on *Pine* or *California* streets, and thousands know how they have been excited by the fire cry of *new discoveries*, which after a brief time like the "will of the wisp" led them on *to ruin.*

It seems strange indeed that so *great an interest* as our Mines should now be at so low an ebb that of all the long lists daily reported there is scarce a paying mine, and *dividends* are as angels' visits, while assessments are as plentiful as *flies* in a *butcher house.*

It is a matter of serious inquiry, where are all our dividend paying mines? the present status cannot long continue—all *assessments* and no *dividends* would soon *break the Bank of England.*

We have a very interesting Document before us that was sent us some months ago, being a report of the BONANZA DIVIDENDS from May 1874, to March 1878, the Dividends for 8 months of the year '74 were $324,000 each month, from that date to March 7, '78 each mine paid the dividend of $1,080,000, of which

Con. Virginia paid	$38,880,000
California "	24,840,000
Making a grand total of	$53,720,000

These were official figures.

And we ask, where has all this SIXTY-THREE MILLION DOLLARS GONE?

That immense amount was dug from the Mines, those dividends were paid, and now where is that $63,000,000?

We wait for an answer.

THE WORLD'S MONEY.

While the cry is going over the world of the depression of trade want of employment for the laboring man and such scarcity of money that the poor are provided for by the great hearted, and the Benevolent Societies of our land, let us see how great is the *scarcity* of money in the *great Money Marts* of the world.

The financial condition of the *six* famed monetary centres at the close of business up to Feb. 1, 1879, was as follows:

Gold on hand, coin and bullion, Feb. 1, 1879.

The Bank of France	£ 81,002,000
" Bank of England	20,008,700
" Bank of Germany	24 850,000
" Bank of Austria	10,142,000
" Bank of Netherlands	10,352,000
" Bank of Belgium	8,920,000
Total	£171,300,700

These Banks are the National Banks, and the public depositories and managers of the Nation's finances and fix rates of interests and values of Nation al Bonds, Consols, etc., and the vast amount named above if reduced to our American Currency equals the enormous amount of over $850,000,000, and with capital of private Banks and other National Banks not reported, of Russia, etc., would swell the gold and silver coins of Europe to a probable sum of nearly the amount of our national debt of *Two Thousand Millions of Dollars*, and yet while interest here ranges from 7 to 12 per cent. the rates in Europe are now from 3 to 4½ as extremes, and yet we have the cry of scarcity of money among our industries, and hard times among the laboring classes.

AGRICULTURAL IMPLEMENTS.

The season is opening for the busy work of the FARMER, plowing and planting of grain is nearly over, save on the tule and swamp land where work is still to be done and planting will be continued.

PLOWS, MOWERS, REAPERS, HARVESTERS and FARMERS' WAGONS are now being sold steadily, even in these dull times of trade.

GEO. A. DAVIS.

We take pleasure in announcing to our farmers that Geo. A. Davis, Esq., who has just returned from an extended trip at the East among the manufacturers, the agent of the very justly celebrated plows of the Furst, Bradley & Co. manufacture at Chicago, that have won so much approval and been so largely used on our tule lands, has received a large invoice of these plows by rail.

Mr. Davis is also the agent of the celebrated Fis Bros. & Co.'s farm wagons, from Racine, Wisconsin. Mr. Davis is also agent for the sale of the celebrated Anson Wood's Mowers and many of the best kinds of AGRICULTURAL IMPLEMENTS now in use, and we take pleasure in commending the farmers of our State to call on Mr. Davis at 327 Market Street, at his warehouse, and examine the NEW IMPLEMENTS now being displayed.

Mr. Davis will offer his implements of new patterns and his wagons and buggies at very accommodating prices, as is sure to win the approbation of all who call on him.

OLE BULL.—This most wonderful Violinist, the very *maestro* of this magic instrument, still lives and enjoys good health and a happy life at his home at Madison, Wisconsin, the best wishes of thousands of his warm friends on the Pacific Coast rejoice at his happy old age.

BE TRUE TO CALIFORNIA.

Walter Brown & Son's Monthly Wool Circular.

NEW YORK, March 5, 1879.

During the month of February there was a moderately active trade in wools of all descriptions, and prices were steadily maintained, and notwithstanding the temporary disturbance occasioned by the failure of some large woolen manufacturers, a fair average amount of business has been transacted. The supplies of wool in dealers' hands are naturally becoming reduced, but there seems seems to be quite enough remaining of most descriptions to meet the requirements of consumers until the next clip shall become available.

An increased demand for medium grades has developed, which may occasion some scarcity before the market can be replenished; a few weeks, however, will bring forward the early clip from the Southern States, to supply any deficiency there may be in this grade, while the approach of the California spring shearing, with an increased clip, is near enough to assure consumers of finer qualities against any fears of a wool famine.

Present rates will probably be maintained throughout the remainder of the season, and there is likely to be little material variation in values.

Our first public sale of wools in Boston, held on the 26th of February, attracted considerable attention from both manufacturers and dealers from the Eastern States. The offering was not very large, but the spirited bidding of the manufacturers present showed that they appreciated the desirable character of the wool, and the manner in which it was arranged.

The principal point established by the sale is, the fact, that desirable wools which are offered at public sales which are properly and fairly conducted, are sure to attract buyers who will pay the market prices of wools so offered.

As evidence of this, we give prices obtained for the principal lots offered which were bought by our best manufacturers—Ohio XX fleeces, 33½c. and 34c.; Ohio X fleeces, 33c.; Wisconsin, 32c.; Michigan X, 31½c.; Unmerchantable, 28½c.; Ohio fine unwashed, 23½c.; Medium unwashed, 24½c. There being but a comparatively small stock of California wools in the market, none of these were included in the sale; had there been such to offer they would undoubtedly have brought good prices.

PULLED WOOLS.—There has been a good demand for all well conditioned and well sorted pulled wools at full market value, and the receipts from the best pullers are well sold up—mixed and irregular parcels still remain comparatively neglected.

CALIFORNIA WOOLS.—Quite an active business has been done in California and Oregon wools and the desirable lots have been in great measure taken by consumers at prices not materially varying from our last quotations.

TEXAS WOOLS have also received a good share of attention, and some large lots have changed hands and many smaller ones gone into consumption. There are still some desirable parcels on the market, and a considerable quantity of undesirable stock which should be cleared off before the new clip comes on the floors.

TEXAN CATTLE DRIVE.—Mr. J. W. Taylor arrived in this city on Wednesday (yesterday) from Austin, Texas, where he reports that at an impromptu gathering of prominent cattle men, estimates were made of the coming "drive" of cattle from Texas to Kansas and the northern Territories, which placed it at 175,000. Advanced prices have deterred many from driving, and most of the cattle which will be driven were purchased last fall at lower prices than are now ruling.—*Kansas City Commercial Indicator.*

Agriculture.

Plow deep, while sluggards sleep,
And you shall have grain to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER II.

We had sat but a few minutes when Clarence gravely changed his seat from the chair where he had been sitting, into the arm-chair by the stove, which had always been called "father's chair," either as if thus asserting his position as the head of the family, or perhaps from an idea that what he was about to say would have more weight if advanced from that position, and when my mother glanced at him as if in surprise, he looked full at her and asked, "Have you thought much to-day about what Uncle Robert said, and of his two plans for us?"

Not much, my son, and I do not feel ready to decide yet. We can live as we are for a while, and when I can, I will go over and talk with your Aunt Matilda and the squire about it. Robert is a smart man in the city, and in his own business, but he has not judgment for us down here upon a farm, I am afraid, and I cannot bear to think of leaving the old farm, unless there is no other way for us to do."

"But I think I can see another way, mother, besides either of Uncle Robert's plans, and I have thought it carefully over, and *now* I want you to think of it and see if it is not better than the others; it will enable us to stay here together upon the old place."

"How?"

"Do you know that I am sixteen years old, and Ned is over fourteen, and we know how to do almost all kinds of farm work, and I can do as much as a man at most work; and I think we can run the farm so as to make a living for ourselves."

"And I am willing to work just as hard as ever I can," says Ned, "and I will help milk and do chores and drive team, and shovel and hoe, and help take care of hay, and dig potatoes, and cut wood, or do anything, if you only will say that you will not go to Blackington. Just think of those boys we used to see when I went there with father, begging for apples, as if they were half-starved, and swearing if father wouldn't give them any; and if he did, they came back again, lying, and saying that they had not had any. I know them even when they had swapped hats and coats before they came back. You wouldn't want me to look like them, would you mother?"

"No, Ned; I should not expect you to look or act like them, even if we moved there, but I cannot say about you and Clarence managing the farm. You are only boys, and I am afraid that you could not do work enough to make a living on the farm. It would be quite an undertaking."

"But, mother," said Clarence, again in his moderate way, "I have thought it all over, and I know just what lots father meant to plant next year, and I know how to do the work, and I shall not plant quite as much, so that there will not be so much to take care of, but I will put on manure heavy where I do plant, and I see if I can't raise as much on a little field as we used to on big ones. I heard Squire Grey tell father one day that he ought to do so. And, then, I remember what I have read in the old *Farmers*, and *Ploughmans* and *Cultivators* that I have borrowed, and I think I can manage it so it will pay."

"But that mortgage will be a drag on us all the time, and you never can make a living for us and pay that; only you two boys."

"Well, we can pay the interest on it as has always been done, and the squire will not want anything more than that until we get older and can make more. And you can make the butter, and Alice can take care of the hens and chickens, we will sell butter and eggs and chickens, and I will raise calves and pigs and lots of other things on the farm to sell, and I know we can get money enough to live on, and pay the interest besides. What do you think of the plan, mother?"

"I am afraid you and Ned do not realize how hard you must work; and what will you do if you have a job that you do not know how to do, or that is too heavy for you, or if any of the cattle are sick?"

If I do not know just how to do, I will ask some of the farmers in the neighborhood, if I cannot find out by reading my papers; and if I have a hard job I will get Jake Wood to help me. He knows how to do everything after some fashion or other, and we could get him for a few days at any time, you know."

"'Talk of angels and you may hear their wings,'" said my mother; I believe I hear Jake's wings now."

And surely enough, we could hear a lumbering tread coming up the foot-path to the backdoor, which certainly sounded like the foot-falls of the individual mentioned, though there was not much resemblance to the usual idea of angels' wings; but as I never heard angels' wings, I cannot tell. And while he is coming in, let me introduce him to your acquaintance. Jake is one of those harmless individuals who have never settled down to any steady occupation. There is perhaps a taint of the blood of some Indian ancestor in his veins; such is the usual opinion of the country people about him, and it is borne out as much by his habits as by his long, straight, black hair, dark complexion and prominent cheek bones. He lives alone in a little cottage near the edge of the great swamp, and has done so since his mother died, many years ago. Alone, I say, excepting a hound, which is his constant companion indoors and out. He is a famous hunter, trapper, and fisherman, and by his earnings in that way, and the products of a little garden near his cottage, and, with the proceeds of berry-picking in the summer, he is independent, and under no obligations to work for any other man; yet he can be got to work a few days when any neighboring farmer is hard pushed; but it will be only a few days before the roving spirit will seize him, and he must be off. Some favorite spots of berries have ripened and must be picked, and Jake knows many such places almost inaccessible to any one else; or he gets to hankering for rabbit or partridge meat, and fish, and off he goes. I have heard that he once worked for Bill Varnum over a week, when Bill was sick, and no one else would work for him because they thought Bill was poor pay. At any rate, there is no surer way to get Jake's help than to tell him that you had been everywhere else and could not get any one to help you. But it is time to let him speak for himself, which he will not be backward about doing, now he is in the room, with his hat under his chair, his dog Rover beside him, and his game-bag in his lap. Jake would resent any attempt to take his hat and hang it up as an insult, and I am not sure but Rover would also resent it. The game bag is not empty, and I feel sure that he means to leave its contents here. I am planning already with what I will refill it, for such exchanges are not uncommon with us.

"Good-evening, ma'am, and young folks," said Jake, as he took the chair which I put by the stove for him; thought I must come in and see you a few minutes, bein' as I was comin' this way. Should have brought my wife along, too, only the baby is having the hoopin' cough and she couldn't leave it and daresn't bring it." This, by the way, is a favorite joke of Jake's, and seldom fails to win a smile from the younger portion of his audience. The idea of Jake having a wife and baby.

"I am sure, Jacob," said my mother, smiling faintly," "I should be glad to see your wife, if she could come with you."

"Well, ma'am, you just wait till a sartian little gal gets a half-dozen years older, and you may see stranger things than that," said he, with a significant glance at me. "If she only learns to eat partridge-meat and chestnuts, which is all we have down at our house, she may grow up so as to suit me. Just you look in this, Miss Alice, and see if you can't find some better place for what is in here than in Jake's game-bag."

And I, knowing Jake's way too well to feel any offence at his remarks, or the way in which he proffers his well-meant gift, take it to the pantry, to find a plump pair of partridges, and the rest of the bag filled with chestnuts, as he had indicated, and I called mother to consult about the propriety of filling it with apples and a generous strip of pork; and when I had done so I came back to hear Jake saying:—

"Most distressing circumstances, ma'am, and happening so sudden like. But as the preacher said, 'In the midst of life we are in death,' and we don't know whose turn may come next. And now, I suppose, you will be breaking up and selling out. I declare it always makes me feel almost as bad as a funeral to see a man's little sticks and tools that he has worked to get together, just such as suit him, and that he has got used to, and the critters that he has taken care of till he likes them, faults and all, sold off at auction, and going East and West and North, 'mongst folks that don't think nothing of them only that they got them for so many cents. I reckon sometimes 'twould be better to do as the Injuns did. They had their bows and arrows and tools buried with 'em, and the horse killed on the grave, too, they say. I know about the arrows and tools, anyway, 'cause I've found them in the graves. But, to be sure, what a hole it would take to put in Squire Grey's tools, now!"

"But," interposed Clarence, who felt as we all did, that Jake's jeating was a little ill-timed; "we are thinking of trying to get along without selling. I have been telling mother that Ned and I can run the farm so as to make a living off of it, and if there is anything we don't know how to do, or are not able to do, we must look to you to help us out. You would, I know, wouldn't you, Jake?"

"Stand up and let me look at you, boy," said Jake, gravely. He did so, and we all looked. Not a very tall lad of his age, but broad-shouldered and well-made, with an earnest look upon his face that showed that he would not be hindered in carrying out his plan by trifles. "Why, you was only a boy when I helped your father cut the bog meadow last fall, and now you look like a man. You'll do. How is Ned? can you help about this job, boy?"

"I am willing to do almost anything rather than to leave the old farm and see things sold off, and I can do lots of work when I have a mind to."

"Well said, Ned. I reckon you are the right grit, and if anything old Jake can do will help yer, you need not be afraid to name it. I could run over for a day or two almost any time, and I know how to do lots of odd jobs that will come handy to you chaps, I expect."

"I am sure, Jacob," said my mother, who I fancied, did not quite like rushing so hastily to a conclusion of such an important matter, and perhaps thought Jake not the best adviser that could be chosen, "the boys ought to be thankful for your very kind offer, and I am also; but we have not yet decided upon it, and I must think it over and talk to Squire Grey about it before I agree to it; and until then I should prefer not to have anything said about it among the neighbors, so I hope you will not speak of it, Jacob."

"Well, ma'am," said Jake, "I always calculated that a man had two ears, and two eyes, and only one tongue, because the Almighty meant that he should not tell more than half what he saw, and half what he heard, and my tongue hasn't worn my teeth out yet. Guess they can stand guard over it awhile longer, anyway, and if I want to talk very bad about other folks' business, I just take Rover into the house where we are all alone, and I talk to him, and he never tells anybody of it. But I must be getting home again, or the wife will pull my hair when I do get there. And I allow that the job is as good as settled if you are going to talk to Squire Grey about it, for he has got a head, the squire has; and he can see as far into a millstone as the man that picks it, and he knows the stock there is in these lads."

"I guess, Miss Alice, you and mother didn't lighten the game-bag much while you had it in the closet there, but I shall see when I get home. Come, Rover," and Jake reached for his hat, swung the strap of the bag over his neck, and was backing out of the door before we could make any reply to his remarks, and the hearty "Good-night, ma'am; take care of yourself for me, Alice! Good luck to you, boys; Jake will help you all he can, every time," which he delivered as he got into the doorway, just ready to close it after him, might have been considered as his farewell shot.

There were a few moments' silence after he went out, until we heard the last echo of his shrill whistle going toward his solitary home, and then Clarence began again:—

"And will you, mother, actually go over and talk to the squire about it?"

"Yes, I think I will, for I should be very glad to try your plan if I can see any hopes of your succeeding in it; but I feel very doubtful about it, and you must have a stronger advocate, and a better promise of help, if you need it, than Jake."

"Now, mother, you know Jake is not lazy, for he is a first-rate hand to work when you can get him, and he is not to blame if he wants to hunt or fish part of the time, especially if, as some folks say, he makes more at it than he does at work for the farmers. And his promise is always good, for he always comes to work if he says he will. But may we all go to Aunt Matilda's with you? I shall want to talk to the squire, and Ned and Sis will like a day there, and we can do the chores and go over there to-morrow morning, and we can get back at night early enough to feed and milk."

To this, mother gave a reluctant consent, I thought, but I thought she also was desirous of having a decision reached upon this important question, and indeed it was quite time, for it was now late in January, and if she should decide to sell, the early spring would be the best time, while if she adopted Clarence's plan, the sooner it was decided upon the sooner we should feel as if we were settled, for since Uncle Robert's words I had felt very much as if we were living upon sufferance, liable to be turned out at any minute, and so, I thought, had mother. But nothing more was said of the plan that evening, although Ned and Clarence had some talk about the fine stalk at the squire's, and Ned and I laid our plans for the day, knowing that our big brother would be apt to be closeted a part of the day with the old folks, of whom he had so suddenly become a part, or would become a part if he was promoted to farm manager. We had not been to the squire's for a long time, nor had we seen him or Aunt Matilda, expecting at the funeral, when the etiquette of Brookfield would not have allowed anything but the interchange of the common salutations between those who were known as mourners, even if our feelings had led us to desire it.

In some sections of New England it is customary for the family to provide a hearty repast, of which all the relatives, friends and assistants at the ceremonies must partake after the return from the burying-ground. But this custom was as yet unknown in Brookfield, and the people there would have as soon thought of finishing the funeral ceremonies with dancing as with feasting. Those who came so far that they could not return the same day, as Uncle Robert had done, were hospitably received and entertained until they could return home; but those who lived within a reasonable distance for walking or riding, were expected to return home directly after the services.

[TO BE CONTINUED.]

MARBLEHEAD MAMMOTH

CABBAGE.

There being a good deal of seed in the market raised from very poor stock, and not giving satisfaction, having been the original first cause of the name Cabbage, which when raised from the right strain of seed under proper cultivation, has a large and even shaped head to any one plant, and sixty days from date I now offer seed to the public that has been raised by myself, with peculiar care all of it from extra large, extra solid heads. The Marbleheaded Mammoth is not only the largest, but is one of the most crisp and sweetest of any variety of the cabbage family, as will be seen by extracts of letters to be found in my Seed Catalogue when it is out, to state that they have raised cabbages from my seed that have weighed 40, 45 and 50 pounds each. Full instructions for cultivation sent with every parcel of seed. Seed by mail, 25 cts per ounce, 50 cts, per half pound, $1 per pound. My large Seed Catalogue sent FREE to all applicants.

49 4t JAMES J. H. GREGORY, Marblehead, Mass.

VALUABLE INFORMATION FOR THE FARMER.

Next to the system of rotation in crops, the most important discovery yet made in Agriculture. Without any delay of money, an increase of from 25 to 50 per cent. can be obtained in the crop of

EARLY MARKETABLE POTATOES

Proved by two years' experience. Costs nothing but time during Winter or early Spring to prepare the seed. Full directions sent for $1, payable after trial, at maturity of crop. ISAIAH T. CLYMER, Quakertown, Bucks Co., Pa.

N. ASHTON & SON'S Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,163 half-ounces; therefore it will make 7,163 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

SCAB AND TICKS IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H. KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Price per Gallon:

[REPUBLISHED BY SPECIAL REQUEST.]

CAIRO, EGYPT, Dec. 6, 1878.

EDITOR CALIFORNIA FARMER—*Dear Sir:*

GROWING FIGS IN SMYRNA.

Before I left California in the fall of 1877, I promised a Southern California fruit grower that I would make the necessary enquiry, at Smyrna, if I would visit that place respecting the method of curing the fig by which the hardness that characterizes the fruit as preserved in California may be prevented.

I took much pains to inform myself as to the climate, soil and the cultivation of the fig and visited the district where the fig orchards are, in order to test the reliablity of the information given me at Smyrna. The first fig orchard I saw was fifty miles from Smyrna near the ancient city of Ephesus. This was on rich alluvial ground near the sea level and beyond this for many miles in a narrow valley the trees extend. The Niles on either hand are of limestone. The climate there is similar to that of San Bernardino with about the same amount of rainfall. There is no rain from April to November and this year there was no rainfall up to the 1st of December. The trees are planted about forty feet apart, although two trees are planted together. The reason given for this was that in case one should fail to grow or should die the other would ensure a tree. These are all female or pistilate trees. The natives regard the staminate trees as wild figs and are only suffered to grow around stone walls and waste places. No irrigation is used. Only the fruit grown in the months of July, August and September are preserved. The first crop are used as fresh figs or allowed to go to waste as not being sweet enough to preserve. About the first of July children gather the green figs from the staminate or wild trees and two or three are fastened to each end of a string about three feet long and three or four of these strings are thrown into each tree where they lodge in the branches, without this they say, the fruit will not come to perfection but drop immature.

CURING AND PACKING FIGS.

The fig is allowed to hang upon the tree until it falls spontaneously, it is then gathered from the ground and laid in the sun until it has the doughy feel which distinguishes the fruit when packed, it is then placed in boxes and sent to Smyrna where it is sorted into grades and packed in boxes. In packing the packer has near him a dish of sea water with which he keeps his fingers wet. These are the practical facts. It is well known to botanists that the flowers of the fig tree are in a drupe (that becomes the fig), that the staminate flowers and the pistilate ones are on different trees, that the fertilization is affected by insects flying from one to the other and entering at the small opening at the top of this drupe carrying the pollen of the one to the pistils of the other. This may be affected by planting a few of the staminate trees among the others though they will not bear fruit their vicinity is necessary to enable the others to do so. The Smyrna fig is a large greenish, yellow fruit, and when suffered to remain on the tree until it falls spontaneously very sweet. If it ripens too early, before the sun has become sufficiently powerful, it dries hard and tough like the figs usually seen in California. I have seen the blue fig grown and cured on one of the Islands of the Grecian Archipelago as soft and sweet as those of Smyrna. If the development of sugar is sufficient, the fig not will dry hard except it be exposed too long to a hot sun. If they are removed too soon before the water has been sufficiently evaporated they will turn sooner. I have no doubt that some section of the interior valleys of California will be found to be adapted to the growth of the fig in as great perfection as that of Smyrna and its proper cure would add greatly to the permanent wealth of California.

I have sent home to be distributed among the melon growers, the seeds of the Cassabar melon of Smyrna. It may be no new thing there though I have never seen it. It is a large and luscious melon and has the merit of keeping late in the autumn and winter.

I send also a few seeds of a large melon grown on the greatest perfection on the Ionian Island, of Cephalonia. They are larger though inferior in flavor to the *Cassabar*, the rhind of both is corrugated longitudinally.

Yours,
J. D. B. STILLMAN.

Lentils for Food.

Considerable attention is still paid to the subject of lentils It should be remembered that those grown in Egypt are threshed in the open fields, where they lie in large heaps until exported, and that, to render them suitable for human food here, they have to undergo sundry processes of sifting, winnowing, washing, splitting, etc., and that these operations add, of course, materially to the cost of the retailed article. The whole German lentils on the other hand, arrive here beautifully clean, and quite fit for immediate use.

Boiling peas also share in the increased favor accorded to lentils. The following table exhibits at a glance the highly nutritive qualities of this kind of food.

100 pounds of beans and peas contain:

Pounds.		Pounds.	
48	Heat-supplying matter	25	Flesh-forming matter.
15	Water.	5	Fibre.
2	Fat.	2	Minerals.
		100	pounds.

Each Number contains THIRTY-TWO PAGES of reading, many fine Wood Cut Illustrations, and one COLORED PLATE. A beautiful Garden Magazine, printed on elegant paper, and full of information. In English and German. Price, $1.25 a year; Five copies $5.00.

Vick's Flower and Vegetable Garden, 50 cents in paper covers; in elegant cloth covers $1.00.

Vick's Catalogue,—300 Illustrations, only 2 cents.

Address, JAMES VICK, Rochester, N. Y.

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, MARCH 30, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Mercie Building—Up Stairs.

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for ONE insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,

PUBLISHERS CALIFORNIA FARMER,

San Francisco Cal.

Editor's Chair.

Bills Sent Out.

We would hope that those of our patrons to whom we have sent bills, will kindly remember that a good many *little sums from each* would be of great advantage in times when money is of value.

Home.—In our Home department we give a very interesting sketch of a "Trip to Europe" by our Correspondent Ajax, those who have crossed the Atlantic will recognize the various scenes so familiar to all on such a voyage.

"Drinking at Meals," "The Blood, Liver and Life," "Debt," "Marriage," "A Novel Ornament" will all give interest to the reader.

Our "Selections of Poetry" we feel sure will *gratify* the reader.

Horticulture.—We have republished by request the very interesting Letter of J. D. B. Stillman, Esq., from Cairo, gives a very interesting and valuable Letter from *Smyrna* relative to the culture and curing of the Fig—the information here given will be of great value to those who grow the Fig for our markets, and those who are preserving them.

Miscellany.—We give a very bewitching little Poem of "Little Dan" that will well repay the reading.

"The Camel's Revenge," "The Laundress," and items, make our Miscellany page.

Agriculture.—"How we saved the Old Farm," we continue this very interesting story, it will richly repay the reading—such is the interest for this story that we give nearly a whole page for this story this week.

We invite attention to our very pleasing letter from Washington, D. C.—it will interest.

We also ask a reading of the letter enquiring "All About California."

Walter Brown & Son's letter on the "Wool Market" of New York should have the attention of our wool growers—all who ship wool to New York for sale, should make the acquaintance of Messrs. Brown & Sons.

Lake Tahoe in Glory.—The coming summer John T. Pantlind the popular "Mine Host" of the Ormsby House will preside at "Lake Tahoe," and make that famed resort one of the most fashionable and happy quarters on our Coast.

☞SEND THE FARMER ABROAD.☜

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, if they send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a Journal as the California Farmer. We know our Journal is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the home circle everywhere, as a Journal free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, special premiums of seeds are donated with the paper, to benefit our State.

POSTPAID PAPERS.

All Copies of the Farmer sent from this Office are Post Paid by us, consequently, all who receive *our Paper are relieved from all Postage* at the Office where they are received.

We give this Special Notice so that our Patrons, and all our subscribers, and those who receive our Extras, and Complimentary copies, may know they are *Free from all Postage.*

THE SEASONS, PROSPECTS, ETC.

The opening year so reads the story
Is full of buds and blossoms, full of glory,
The air is fragrant with Nature's flowers
Their breath exhaled by gentle showers,
Oh, why should mortals here complain,
Where beauty decks the hill and plain.

The long months of doubt and fear that pervaded the farming interest up to the late glorious rain caused many of our farmers to be despounding, now from all sections of our State comes very cheering news of growing crops and prospering seasons.

We have always had in our State too many *unbelieving* Thomas's, their doubts cast a mildew and a blight upon the energy of many that would not have doubted but for their bad example, they seemed to forget the promises of the Almighty; God says:

"*There shall be the early and the latter rain*;" and He also says:

"*There shall be seed time and harvest*" and

THESE SHALL NEVER FAIL.

If our farmers will but look back and recall how often their *doubting* caused them to *delay their work* they would see that the reason of a *loss of crops* was more their *own fault* than the fault of Nature or the seasons.

The present prospect is now most propitious, and if our farmers will but press on in their work in good faith plow and plant, they will reap a rich reward if they faint not.

The orchards are now coming into blossom, the hill tops are showing their verdant beauty in great luxuriance, the grain fields are showing a sett of grain of great promise, while the vineyards give assurance that in their season the wine presses shall gush out with new wine.

We commend most earnestly to our farmers the prophecy of the *Old Testament*, Isiah and Jeremiah tells us of "The cattle upon a thousand hills," of a "Land flowing with milk and honey," of a land also, where there is a "Season of perpetual fruits" and where the "Hills and mountains are full of gold and silver,"—we earnestly commend these prophecies, and give them as a true picture of California, for we believe that

"CALIFORNIA IS THE PROMISED LAND."

And believing thus, we also say that there are many that the great leader Moses found would *never enter that Promised Land*, i. e., they never would *live* to enjoy it, in its full fruition

California is now going through its great trial, as it did when Moses came down from Mount Sinai and found the people bowing down to the Golden Calf, and this present period is that time, for we see in the disasters around us, many that have been bitten by the Serpent, and the few only that survive the present calamities that are now trying the faithful, will be permitted to enter into the

LAND OF PROMISE.

The hope of our State is now resting upon the agricultural, manufacturing and mechanical industries—all other interests must be made subservient to these, and unless it be so, we cannot become permanently prosperous.

WHERE'S THE MONEY IN IT?

The words we quote above can often be heard used whenever anything is said about starting *new Enterprises* of any kind, or lifting a helping hand for the Manufacturing Interests or any plan whereby the true industrial interests of our State could be awakened to a more prosperous condition and made to occupy the true place that such interests should occupy in the minds of our capitalists and business men, in a State of such wonderful resources in soil, climate and great natural capacities.

If our bankers and capitalists would go over our City, and count the *thousands* of stores and dwellings marked "To Let" they would certainly see that there are more *houses* and *stores* than the population needs, and if asked to erect more buildings they would ask *Where's the money in it?*

The fact is self-evident, there are more buildings now than we have people to occupy them, and the only remedy now is, the people must go *from the City to the country*; a change is needed.

Thousands and we might say, tens of thousands of people living in this City—(no! *staying*, not living,) should go into the country and instead of being *consumers only* or living upon their wits—go into the country and become *producers*, and thus raise or manufacture *something* that would support them and their families, and thus help build up a genuine prosperity for all.

We need more *Produces* and to make a change we must empty our cities into the country, there are *millions of acres* of land that needs to be cultivated, and produce will always sell, *Grain, Fruit, Vegetables, Poultry, Eggs, Butter and Cheese*, these all pay when the business is wisely managed, no one need ask, *Where's the money in it?*

Industry and economy, close application; these will give a health not enjoyed in the City, especially in *doing nothing*, as thousands in our City are so hard at work at now—for such a life of idleness as is seen on Pine and Montgomery streets every day we often ask, *Where's the money in it?*

Great Calamities.

The horizon around us seems to have been studded with heavy calamities within the past few months, the Angel of Death has come suddenly upon us and taken away many of our early and prominent Pioneers, making a sad vacuum in our business community.

We have also to record great and disastrous fires like that at Reno, at Silver City and other places, collision of steamers in our Bay, heavy gales and storms, freshets and floods, and these too when disastrous losses are daily made in all the mercantile circles everywhere, would almost lead us to feel we had fallen on evil times—but comfort comes with this assurance "that after the storm comes the calm," so after all these sad events and the losses attendant on them the clear blue skies ahead do give promise of a goodly year to come—and if all in every community will but now look on the *bright side*, and be ready to help one another, like brethren of God's great family.

BETTER DAYS WILL COME.

OUR NEW CONSTITUTION.

SHALL WE VOTE—YES OR NO.

The *Long Parliament* that will cost our State about "a quarter of a million dollars" will not have been completed without some *great good*.

The need of some wise alterations in our Constitution has been clearly proved, as the discussions in the Convention and the preparation of the new forms has clearly shown that *alterations* and *improvements* were needed, but there was not a due consideration given to the true merits of the case nor time enough devoted to the most important subjects acted upon, and therefore the whole work was not well and thoroughly done, certainly not well or perfect enough for

THE CONSTITUTION OF A STATE

destined to exert so momentous an influence as California is destined to exert in all coming years.

The "quarter of a million of dollars" is a small sum compared to the great good which the *discussions* and *examinations* of the subjects needed to be altered and improved in our Constitution will be worth when the work shall be well and faithfully done, and this can be done by the *next Legislature*, provided the people will now, after carefully examining all the proposed *alterations* and the new laws, if they will but elect the very *Best Men for coming Legislators*, and then lay the New Constitution before them to examine, correct and improve, and then put their well revised work before the people in the year of 1880; for to our view the people are fast making up their minds to *oppose the present work*, and as we said months ago we think the *New Constitution* will be *Rejected* by a large and decided majority.

Let the people now see to it, and elect incoming Representatives and Senators with special fitness for this all-important work, then we can have a Constitution of which our people will be proud.

All should remember life can never give
A charm to him who does not like a FREEMAN live.

While we would by all wise means do all we could to advance, sustain and build up the true Agricultural Interests of our State and advance the real interest of the laborer and working men of every class, we also must remember the interests of the *Manufacturers*, the *Mercantile* and *Shipping Interests*, which are directly connected with the agricultural, and also our *Monied Institutions*, our *Banks* and our *Insurance Companies*, for with each and all these, the great Agricultural Interest is directly and closely connected, the *Banks furnish the means* to buy and work the lands, they advance the money by exchanges to ship our Grain, and the *Insurance Companies* give policies of safety to *farmers' buildings*, to *manufactories*, *to ships* and even *crops in the field*, our *Railroads* that carry the *products* and *manufactures* of the State, they too are a part of the machinery that keeps alive and continues the business of the whole State and tends to make all these working *parts* a united whole, for the general prosperity of all, and any Legislation by the Government or any action by the people that deranges or disorganizes or destroys the harmonious working of these great parts is sure to cripple all, and bring loss and ruin to all.

It should be borne in mind by all who desire to vote understandingly upon the New Constitution how great is the importance of their obtaining a copy of the *New* and comparing with the *Old*, for this purpose we hold that the State authorities should adopt a plan whereby every real voter who has his name registered could obtain a copy of it for his careful perusal, and the Registering Offices over the State is the best places for their distribution.

Much is said by those who preach the *economy and saving* of the *New Constitution*, they tell how it is done, let *farmers* note this fact:

All appropriations for *Agricultural Societies is crossed out and abolished.*

Let those who feel for the unfortunate, also note

All appropriations to the Orphan Asylums and *Benevolent Institutions* are also abolished, this should kill the New Constitution.

We believe that to adopt the present New Constitution would be the cause of a series of disasters to all these interests, and tend to bring on months and perhaps years of stagnation to trade and business generally, and that our Agricultural Interest would be among the heaviest sufferers, for this reason we hope every farmer in our State will look to this matter seriously, read, reflect, and act wisely, that his own best interest may be guarded, to this end he should resolutely vote—NO.

Roof Covering---Asbestos.

We specially call attention to the matter of a *good protection* to the roofs of all buildings, and especially among our *farmers' buildings*, their *homes, barns and tool houses*, their *granaries* and their *cattle, and stock buildings.*

A *little leak* may cause a *great loss*, and now that the Asbestos Roofing can be had at so little cost no *farmer* nor any one else should run any risk from leaky roofs, and in addition to the safety from Rains it is also Fire Proof—thus a double protection.

Seedling Potatoes.—The "Beauty of Hebron" is a new white potato of very superior character, just now offered by Thorburn & Co., of New York," we have just received a sample and think it an extraordinary kind and worthy special care—we shall plant and try our sample and believe we can produce a potato worth its weight in diamonds.

MESSRS. VILMORINE, ANDRIEUX & CO., PARIS.

[The oldest and largest Seed Warehouse in the world.]

This distinguished Firm so long engaged in the Seed and Plant Trade in Paris are known all over the world; wherever there grows a tree, plant or flower and an educated mind to cultivate and care for those good gifts of our Creator, there the name of this Firm or some of their valuable seeds or books will be remembered.

This famed Seed Warehouse originally was established about 200 years ago, and it has borne the present name of Vilmorins, Andrieux & Co., for more than *one hundred years past*, passing from father to son or kindred in name, and now their business is extended to all parts of the world and with sales of Seeds, Bulbs and Plants to an immense amount annually.

It will be remembered by our readers that Maurice Vilmorine, Esq., one of the Firm visited California, arriving in the month of Dec. 1876, and made a tour of the State, he came expressly to *learn of California*, of its capacities, its beauties and its wonders.

Mr. Vilmorine was delighted with California, and paid it many high compliments, his name is upon our Register previous to his departure, dated July 23, 1877.

When Mr. Vilmorine came to say farewell he recorded his name upon our Register, and beneath it wrote thus:

"Sit mea sides utinam senectæ;
Sit modus lasso maris, et viarum}
Militaeque."

This is a quotation from the Ode of Horace to Titus Septimus Carminium, Lib. ii., 6—and translated reads:

"Oh that it may be the dwelling place of my old age
That it may be the limit to the weariness of the sea,
And of journeyings, and of war!"

Beneath this expression of feeling and sympathy for our beautiful land, Mr. Vilmorine also wrote:

California!

Who can stay in California and leave it without regret?
Nature has made of it the "Garden of the World,"
Its inhabitants are making of it, A Land of Wonder!

We take pleasure in transcribing these generous tributes to our State, and doubly gratifying it is to us to know they come from gifted and cultivated minds like him we quote, Mr. Vilmorine made many very warm friends while here—and his words assure us we shall ere long see his genial face and welcome him once more—even away from "Sunny France" to our own Sunny and "Golden Land."

From the above popular House we recently received a very friendly and most courteous Letter accompanied with a full and complete collection of the Vilmorine Album Plates of the large size, life colors, the collection is as follows:

Vegetable and agricultural plants 29.
Flowers grown from seed 28.
Flowers grown from bulbs 20.

In all 77 plates, this we esteem one of the finest collections ever published, and reflects the highest credit upon this House for their artistic taste and skill.

The Letter thus speaks their kindness:

"We have always had much pleasure to receive your Journal and shall be glad to receive it, but we must ask you, send us your bill every year for the amount and we will have it paid.

We have taken the liberty to send you a complete sett of our Chromo-Lithographs of Vegetables and Flowers, which we hope will be acceptable, we at least have thought we could not offer you anything else that would be of more interest, and please you better than these Plates."

Such kindly words and such a liberal gift we duly appreciate, and coming from the oldest and most popular Seed Warehouse in the world, we most gratefully acknowledge the distinguished favor.

We would hope all who are in the want of European seeds of rare kinds will make the acquaintance of this honorable House, and secure from them the treasures they have in the great collections they possess—we shall be happy to show these Plates to such as would appreciate them.

Our Postoffice.

Gladly our people hail the most excellent improvements recently made in the San Francisco postoffice, and although the work has progressed but slowly, it has been a sure work, and will reflect much credit upon our excellent postmaster, Gen. Coey.

The new arrangements gives an airy style that has most creditable appearance, and looks like a public building, and when all is completed within the building, there will be a real comfort for all the workers inside and a greater convenience for box-holders and all outside—and the finale will be or should be, a nice creditable fence around the postoffice yard and a good coat of paint upon the building, also a good clock in the new hall, then we will say the work was complete.

That Oakland Newspaper Boy.

Glad as we always are to see generous actions and benevolent deeds, we could not but feel when that unfortunate lame newspaper boy's death was announced—how strangers felt—yet there were many who knew that boy while living, and could have aided him them, did they do it?

Now that this lad, one of our world's unfortunates has "Gone Home," charity or notoriety would raise a monument for him, this is all right, but how much better would it have been to have aided him while living, who even knew of his *life struggles.*

That monument will not feed him now, that tomb tablet will not give rest to his weary and lame limbs—away with this kind of *delayed charity* and we fear *false humanity*, if we would aid the sufferer while struggling with the ills of life, let us do it for them while they are in life.

Build monuments for the good, while they live, that it may incite all to do good, and such deeds will become living charities, blossoming upon earth, and fruiting in heaven.

"Agriculture, the soul, the basis of my empire."—*Napoleon.*

OBITUARY.

The death of Mrs. Amanda Reed, widow of Edmond L. Reed, deceased, who recently came from Willsoybille, Tioga County, N. Y., was mentioned last week in the Stockton *Independent.*

Mrs. Reed had but lately come to California, and resided with her children at Oak Dale, Stanislaus County. Her illness was very brief, only a few days, and was not considered dangerous. She retired to rest and waking upon the Sabbath morn, March 2d, her countenance began to change, her daughter spoke to her and she said she *felt better*, another change and her spirit had taken its flight to a better world.

Mrs. Reed was 72 years of age. Her whole life was that of a true Christian; a loving wife, a devoted mother, and a true friend to all who ever knew her; her cheerful happy countenance, her quiet ways and gentle speech, was the evidence of a good heart, a heart full of generous love *for all.*

Mrs. Reed was a remarkably active woman even up to her last years and hours, although she had reached the fullness of age; thus suddenly called away, her loss will *long* be lamented, but her memory will ever be cherished.

THERE IS NO LOVE LIKE A MOTHER'S.

A daughter in San Francisco, and a favorite grandchild in Stockton at school were summoned by telegraph to her bedside, and though instantly answering the call, the time of a few hours and less than 100 miles could not be made ere the sleep of death separated that daughter and grandchild from their mother's last kiss.

MY MOTHER.

Art thou asleep dear mother? O! wake to me;
The lightning message came that thou wert sick,
I came and hoped my mother I should see
And hasten'd with all speed, as quick
As railroad time would bring me to thy bed,
But, ah! *too late*, dear mother, *thou wert dead!*

Oh, no, it cannot be, my mother sleeps and dreams
That I am coming to her now.
For o'er her gentle face there beams
My mother's smile, it rests upon her brow

It cannot be, my mother cannot die;
She had laid down so gently for a sleep,
And then was called up Home on high,
So we, could while below, her memory keep,
And thus like her to live, like her to die.
No, not to die, but live—*with her on high*

M.

RECEIVED AT READING ROOMS:

Hon. M. P. Wilder's very able Address before the Historical Genealogical Society at Boston, Mass., is received and will be published at early day—the words of such a man are always like a Patriarch's counsel, we tender our thanks for the Address so kindly sent us by the author.

Agriculture of Nebraska.—We have received the very able Speech made in the Senate of the United States in the support of agricultural appropriations of our Government by Hon. A. S. Paddock, of Nebraska, so excellent do we esteem that Speech that we shall at early day give it to our readers wholly if possible, though a long one—it should be read by every farmer in the land.

The California Horticulturist.—We have the opening numbers of this Magazine, and like it much, its Editor is working abroad and at home to awaken a new interest for horticulture, and has greatly improved the Magazine; we hope he can can start up the apathy of our many horticulturists and gardeners, build up a Horticultural Society, create spring and autumn Fairs in our City, and do "lots o' good" for the cause, we wish him all manner of success.

The Southern Horticulturist comes to us with reports of its late meeting of the horticulturists down South—they had a good Exhibition for a first one, they must keep up the work, even if such labors are hard—this Journal works well, and we hope it finds a reasonable reward.

The Floral Californian for the January term, a Quarterly published by W. A. I. Stratton, Esq., of Petaluma, a small, neat Publication of 8 pages, has many good things and very excellent suggestions in it, its Editor loves his work, and sends out his winning missive at the low price of 50cts. per year—everybody can afford it—*everybody* should have it.

The Lecturer.—We have a most excellent Pamphlet bearing this title, being a *Bi-Monthly* sent out by Messrs. Austin, Jackson & Co., of the *Laws of Life*, being a publication of the Lectures given by Dr. Jackson at the College at Danaville, a valuable work, $1.50 per year.

Scientific Publications.—We have received the "Annual Report" of the "Connecticut Agricultural Experiment Station" published by the State by the "Board of Control" of the Agricultural Interests of that State, a very extensive and valuable work, showing the wise oversight taken by those in authority and power, his Excellency the Governor and State Officers giving agriculture their warm interest and advocacy.

We wish it were so here.

We have received from the Commissioner of Agriculture of Atlanta, Georgia, Hon. Thomas P. Janes, a very valuable analysis of values of the *Commercial Fertilizers* now used in the country.

The various analyses numbers *eighty-nine* described in full detail, and are very valuable.

The Sorgho Hand Book.—This is a very interesting work we have received from the Blymyer Manufacturing Co., of Cincinnati, Ohio, giving a history of the Chinese and African Sugar Cane, their varieties, their culture and manufacture with drawings of the various evaporators, engines, etc., made by this Company for sugar planters and manufacturers—a very valuable pamphlet.

The Journal of Applied Sciences.—We have copies of this invaluable Monthly, a great aid to science, just received from London, published at 20 Cheapside.

Catalogues.—A mountain pile of new and handsome Catalogues of Nurserymen, Seedsmen and Manufactures, all waiting notice and notice, send along your Advertisements, Gents, they shall have *especial* attention and notice that will pay you well.

For Sale.

A special bargain will be offered in the splendid new pattern Farm Wagons and Buggies now on exhibition and sale at the agricultural warehouse of G. A. Davis, 327 Market Street, S. F.

THE HOP MARKET.

We have been kindly favored with the following report of the hop market to this time, by the well known hop dealer and shipper Phil. Neis, Esq.

This leaves 3,117 bales on market, for which there is little or no demand. Mr Neis has a process of packing the best hops in ½, ¼ and 1 pound packages for druggists and grocers, done up neatly and packed in 30 pound boxes at $3 each.

RECEIPTS FOR 1878.

California	4,762 bales.
Washington Territory	4,686 "
Oregon	2,244 "
Total	11,492 bales.

EXPORT

Overland from October to January	6,132 bales.
Returns for February not received yet, but estimated to be shipped	600 "
Overland to date	6,732 bales.
Australia	662 bales.
New Zealand	250 "
Other countries	185 "
Total	7,785 bales.

THE AUSTRALIAN GUM TREE.

The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the back bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach o Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

TESTIMONIALS.

The manufacturer of these Pills has a great objection to the "wholesale" publication of testimonials, which in many cases are fictitious, and are only intended to mislead. Yet, for the satisfaction of those who are suffering, and have not yet used his medicines, he selects a few, who are best known in the colony and in the town he lives, and their *personal testimony* will satisfy the most sceptical.

These testimonials above named with many from California, since their recent introduction, will quickly show that the

Eucalyptus Remedials

are the best ever yet introduced. Full and ample testimonial accompany all parcels.

"There is no place like home.
Home! It should be Heaven on Earth

TIME'S CHANGES.

BY MATTIE W. TORREY.

The song we sang in other years
They greet us now no more;
The love that roused our hopes and fear,
Are vanished now, and o'er.
The friends we love are scattered wide,
Familiar scenes are changed;
And hearts that once were true and tried,
Are lifeless or estranged.

The lip the sweetest smile that wore;
The cheek that bloomed most fair;
The voice that charmed us long before,
With music rich and rare;
The eye whose lightest glance could still
Our hearts with love enthrall,
Whose smile could bless, whose frown could kill,
Are changed, or vanished all.

The way was bright before us then,
The coming day seemed fair;
We mingled with our fellow-men
With hearts to do or dare.
The hopes of youth are faded now,
Its fevered dreams are past;
And time, upon our furrowed brow,
His silvery shade has cast.

We, too, are changed, but not in heart
Old Time may do his worst,
He cannot from remembrance part
The things we loved at first.
The eyes may dim, the cheeks grow pale,
The snows of age may fall,
Yet shall our memories never fail
To heed affection's call.

THE GOLD OF HOPE.

BY HENRY BURTON

Bright shines the sun, but brighter after rain;
The clouds that darken make the sky more clear;
So rest is sweeter when it follows pain,
And the sad parting makes our friends more dear.

'Tis well it should be thus: our Father knows
The things that work together for our good;
We draw a sweetness from our bitter woes—
We would not have all sunshine if we could.

The day with all their beauty and their light
Come from the dark and into the dark return;
Day speaks of earth, but heaven shines through the night,
Where in the blue a thousand star-fires burn.

So runs the law, the law of recompense,
That binds our life on earth and heaven in one;
Faith can not live when all is sight and sense,
But faith can live and sing when these are gone.

We grieve and murmur, for we can but see
The single thread that flies in silence by;
When if we only saw the things to be,
Our lips would breathe a song and not a sigh.

Wait, then, my soul, and edge the darkening cloud
With the bright gold that Hope can always lend,
And if to-day thou art with sorrow bowed,
Wait till to-morrow and thy grief shall end!

And when we reach the limit of our days,
Beyond the reach of shadows and of night,
Then shall our every look and voice be praise
To Him who shines our everlasting light.

THE WAITING ONES.

[The Baltimore *American* gives a graphic description of "Delayed Hopes."—Ed. F.]

To some 'tis given to stand and wait,
And watch the green mould of decay
Steal o'er their work, because stern fate
Has scourged them back and barred the way.

Some lives stand ever on the brink
Of joy. They wait through all life's day
To see hope's sun shine out, and sink,
And drag their sunset hues to gray

They wait and watch some coming good
That flings its radience ahead.
'Twas for another; where they stood
Falls but the shadow cold and dead.

As starving children through a pane
Watch others at some rich repast,
They see each boon they craved in vain
On happy, rated favorites cast.

To some 'tis given to wait and yearn
Till faith slow smoulders into doubt,
Till love and faith to ashes turn,
And all life's fires have burned out.

Courage leaps for valorous deeds,
And time will wipe out sorrow's tears;
But for the waiting heart's sore needs
Patience grows threadbare through long years.

Aye! if the lines grow hard and deep,
And eyes grow cavernous that wait,
'Tis nobler far to wait and weep
Than conquer worlds when helped by fate.

Brave, brave is he who bears his curse
With courage and a cheerful heart;
Who ever says, "It might be worse,"
And lifts his head when hopes depart.

God's Voice.

God has made the whole earth vocal with sweet sounds. The untraveled forests echoes the notes of the wild bird, and the habitations of men are made glad by the song of the feathered minstrel; but above all, the human voice, that combines the highest charms of sweet sounds with the inspiration of thought, is given for no ordinary purpose of earthly pleasure. In its whisper of affection, how grateful! In its whisper of religious devotion, how exalted! For its participation in joy, how unspeakable!

Write your name in kindness, love and mercy, on the hearts of those you come in contact with, and you will never be forgotten.

Be deaf to the quarrelsome, blind to the scorner, and dumb to those who are mischievously inquisitive.

"Father" said a lad, "I have often read of people being 'poor but honest,' why don't they sometimes say 'rich but honest?'"

NOTES OF A TRIP TO EUROPE.

THE START FROM NEW YORK—UNPLEASANT SENSATIONS—CONVALESCENCE—LIFE ON SHIPBOARD—ARRIVAL AT LIVERPOOL.

BY AJAX.

The usual excitement and confusion attending preparations for a long journey being over, we found ourselves comfortably settled on the steamship *Oceanic*, of the White Star Line, bound for Liverpool. The *Oceanic* being the first ship launched, this being her maiden voyage, was exceptionally well commanded, the officers and engineers being the captains and first engineers of the ships to follow; besides these, were also the owners and builders who had come over for the express purpose of watching the working of the ship, with a view to improving, and remodelling where changes were necessary. Taking all these things into consideration, probably no steamship ever started out under more favorable auspices, and what with the pleasant company on board, there was every requisite for making our trip most enjoyable.

The cry of "all ashore" notifies us of our speedy departure, and leave taking over, the iron monster hauls out into the stream, and slowly swings her prow toward the old world.

The day (the 15th of April) was unusually fine, and as we sailed out of the harbor was enlivened by the booming of cannon, and salutes from other ships in honor of the opening of the new line. A small steamer commanded by Jim Fisk, containing friends of those on board our steamer, accompanied us down the bay. The steamer was gracefully decorated with flags of all nations, whilst a band on board discoursed the national airs of England and America. The scene was indeed a lively one, and we carried away pleasant recollections, never to be forgotten.

We were now in deep water, and the little steamer turned toward home, her whistle blowing us a long farewell, and as she sped away in the distance, the commanding form of her gallant Commodore could be seen standing on the pilot house, waving us adieu and wishing us *bon voyage*, whilst wafted over the waves came strains of "Home, Sweet Home," and "Life on the Ocean Wave," one more parting look is taken of our country's shores, and as the land sinks away in the distance, for a moment we are lost in reverie, but the hurry and bustle going on around us, brings us to our senses. Sailors hurrying hither and thither, coiling ropes, taking in anchors, and packing down all movables belonging to the ship, preparing for sea. The pilot leaves us and the captain is in command, we are for ourselves, and before night the ship presents a quiet orderly appearance, the watches are set, and we are ready for war with the elements.

THE DINNER HOUR.

It was unmistakable proven that when dinner time came that our whole ship's company were all sailors, and that no matter how it was with others, that we were to have no sickness. On counting noses not one was missing, neither was there exhibited any undue anxiety to leave the table until all had finished, evidently we were "old sea dogs" to a man. In the evening we put our state rooms in order, walked some on deck and got better acquainted with one another—waving all ceremonious introduction and resolving that for ten days at least we must be friendly to everyone. By nine o'clock all had retired and were soon wrestling with "nature's sweet restorer," dreaming of ships, and waves, and wrecks, and Jim Fisk.

OUT AT SEA.

I rose next morning feeling much refreshed; a few moments on my feet soon dispelled this hallucination, for, alas, we were in rough water, and the wind was blowing a gale, making the old ship plunge and roll tremendously—keeping my feet was out of the question, and I was everywhere, there was not a spot in that state room that I did not get over somehow, and all this time there was the most peculiar and demoralizing feeling creeping over me, and I found myself the most used up sea dog you ever saw; after a dozen or more unsuccessful flying leaps, I managed to gain my berth, which I crawled into feeling the worse for wear. My wife leaped from her berth with cries of what's up? It did not take her as long to find out as it did me, and after several ineffectual attempts to break through the ceiling and partitions with her head, she gave it up and laid down.

If any of my readers have ever been to sea and are subject to these stomachial idiocyncracies they know the feeling, one moment afraid you are going to die, the next afraid you're not.

The storm, for such it was, continued with unabated fury for fifty-eight hours, testing the storm resisting qualities of the *Oceanic*. The 1st Officer was washed off the bridge onto the deck, and was considerably injured, two of the boats were crushed in and the davits badly bent, whilst in many places seams were opened in the deck and bulwarks, wide enough to put your hand in.

Owing to defects in the construction of the ventilators and doors leading from the deck to the saloon, the water poured down these passages, flooding the saloon and steward's rooms, and driving the passengers from their rooms, and compelling them to seek shelter in the saloon, where the carpets being up, the water ran in and out, doing but little damage. The surroundings were anything but pleasant, and with but one dim oil lamp burning, the scene was desolate and gloomy. But not a word of complaint or sign of fear from anyone—resignation had taken the place of fright, and each one of us realized that our safety lay in calmness, and that we were in the hands of the Almighty.

THE STORM PAST.

With the dawn came a moderation in the wind, and the sea during the day became some calmer, my wife ventured on deck, returning every half hour in hopes of alluring me from my comfortable couch, with glowing accounts of the beautiful sea, bracing air, etc. About noon I managed to pluck up strength enough, and on deck I went, and found the remnants of several old sea dogs look ing even worse than I, huddled together about the smoke stack. In the bracing air appetite soon returned, and the unpleasantness of the past few hours were soon forgotten.

Life on board the Atlantic steamers is much the same, time is passed in card playing, singing, deck promenading, and other harmless amusements; on Sunday, divine service in the morning, and sacred music in the evening is the usual thing. Eating also takes an important part, and the oftener the bell rings the better, to the convalescent its sound is joyful.

LAND, HO!

The cry "land" brings us all on deck, glasses are brought to bear on what appears to be land, and every eye is strained in hopes of distinguishing objects, and living things of this, to us, new country. One sees houses, another trees, whilst a keener pair of eyes can see human beings, walking over the hills; after we have all seen, or imagined we saw everything animate and inanimate, the Captain tells us that he has made a slight error in his reckoning, and that land is a little premature. If there was not land there was an innumerable number of small crafts on every side, indicating land not far away. It was quite a sight to see these minature ships ride the heavy sea, which was running at the time. The captain of one signalled us and our steamer was stopped, we soon had a supply of fresh fish, whilst he in exchange received papers and tobacco.

ENDING OF VOYAGE.

The following twenty-four hours was all bustle and confusion, for to-morrow we are to arrive at Liverpool. Baggage is hoisted out of the hold, and got in readiness for the custom officers to examine, and a thousand and one things to do, forgotten until now. Nothing can be found, not even our fellow passengers who had always been on hand before, somehow had most unaccountably disappeared, and such a hurrying and rushing about was never before seen. One wants your autograph, another a few verses in her album, another your London address, another your tooth brush, in fact they all want something, any of which they could have had before, but never thought of till this confusion commenced; and the result is you write your name so that your best friend would not recognize it, manufacture the most trashy, ridiculous verses, and give an address unknown to the earliest inhabitant, besides doing other nonsensical things, without knowing why or wherefore. In the evening a meeting was called, and resolutions passed extolling the officers for their gentlemanly bearing, untiring efforts, and bravery during the storm, taking the sun, promptness at meals; etc. These resolutions appropriately decorated, and signed by all the passengers, were duly presented to the officers, who endured the proceedings with considerable nerve, considering that this same thing takes place on every voyage they make. In fact some of the Atlantic steamers have a separate compartment for resolutions, and these are crowded for space. I would suggest that travelers contemplating inflicting these miseries on the officers of sea going vessels should inaugurate the festivities the first day out, the following day could be devoted to a burial at sea.

THE LAST DAY.

The sail up St. George's channel was delightful, the day was warm and balmly, and we were continually passing steamers and sailing vessels inward and outward bound. As we passed Holyhead light a pilot came on board bringing the latest news. A few hours later and we are in the Mersey, a grand salute bidding us welcome, whilst the steamers dip their colors, and officers and men cheer in response to our greeting. The *Oceanic* swings into her dock, a safe landing is made, our baggage is examined, and after a hurried parting with our ten day friends, many of them congenial, pleasant companions, we are ferried across the river, and after a short drive in a cab, are at the hotel in Liverpool. The first stage of our journey over.

[CONTINUED IN OUR NEXT.]

DRINKING AT MEALS.

The habit of washing down the food interferes with the habit of thorough chewing. It also deluges the stomach with an unnecessary amount of fluid, at least in most cases, since those who drink at all while eating usually indulge the habit immoderately. The animal system requires water in order to carry on its various functions. This must be supplied by drinks, or by eating juicy or semi-fluid food. But only a moderate quantity of liquid should be taken with the food, and for those with good teeth no drinking at all is necessary. The stomach can not work upon the mass introduced into it at one meal, until it has disposed of enough of its fluid contents to leave it in a sufficient dense condition for kneading and churning, and stirring about by the strong muscles of that organ. Too much fluid improperly dilutes the gastric juice which the stomach mixes with the food in order to help its thorough digestion. If the fluid mixed with the food as it is swallowed be very cold, it farther retards digestion by lowering the temperature of the contents of the stomach below the working point, so that digestion can not go forward until the body has sufficiently raised the temperature of the food in the stomach. With warm meals, a moderate amount of cold water (not ice-water) may produce no noticeable result, but the hearty cold water drinks had better be taken when the stomach is empty. Poured into a full stomach they often produce great discomfort, and sometimes result in serious disease. Drinks with meals, especially for persons with defective teeth, had better be warm than very cold. Still, I think that if you teach your growing family to eat their food deliberately with no tumbler or other drinking vessel at all placed habitually besides their plates, so that they naturally learn to moisten the food well with nature's own preparation for that purpose—the saliva, which pours from the glands about the mouth with every motion of chewing—the children will grow up healthier in all respects for the good habit of deliberate and thorough chewing, and of drinking at proper times.

THE BLOOD---THE LIVER---LIFE.

Almost every newspaper in our land far and near herald now preparations for curing "Liver Diseases" and "Purifying the Blood," page after page of our daily and weekly Journals publish all the old and new drinks. "Bitters" of all kinds have posters on the fences and buildings all over our State and Country, for all know that BLOOD IS THE LIFE AGENT and without PURE BLOOD diseases of all kinds are constantly generating.

Our newspapers all are almost daily making records of sudden deaths by *heart disease* and by *apoplexy*, and these are only in truth BLOOD DISEASES, which all the vinous or spirituous stimulants in the world, though they may relieve from pain temporarily, yet can never thoroughly cure of disease.

To perfectly cure, the blood must be made pure and life giving; its diseased condition must be changed, and new vitality must be so infused into it, and with such power as to drive out all the impurities, so that new vitality shall infuse *new life* into its circulation.

Among all the many preparations that have thus far been perfected there has never yet been any equal to DAVID CLARKE'S EUCALYPTUS BLOOD PURIFYING REMEDIALS.

These are entirely free from all mineral or spirit ingredients, nothing but the pure properties of the *combined virtues* of *leaf*, *bark* and *root* of more than fifty varieties of this famed tree are concentrated in this wonderful Blood Purifier and life saving Medicine.

Those who would be saved from sudden death by *heart disease*, *apoplexy*, *diphtheria* and the other fearful diseases which this renowned Medicine cures, should not fail to guard their own lives and that of their kindred and friends by using this *Australian Remedial*, the only pure variety is that of David Clarke, Warwick, in Australia, ask your Apothecary for this Preparation and thus save life.

DEBT.

The present system of shopping and marketing on credit is radically wrong, and an injury to all concerned, and the fault lies about equally with those who buy and those who sell. The merchant likes a running account with his safe customers, because it gives him a hold on their continuance, and makes his sales larger and more profitable. The customer likes it because it evinces his good credit, and enables him to get what he wants without waiting for a full purse. But at length a settlement comes and then the customers is astonished at the size of the bill and his own folly in purchasing things which his family could easily have dispensed with.

If you are wise, and will consult your own comfort and the good of others, you will follow the rule, pay as you go, inflexibly. It does not need the authority of an apostle to establish the wisdom of the proverb, "owe no man anything." Were this sage precept universally obeyed, one of the chief sources of trouble would be taken out of the civilized world. Besides a great gain in public morals; there would be a vast saving in the economy of living. But, if in the management of your property you are sometimes asked to give credit or time for payment, do not fear to scrutinize your debtor closely. A good customer is never disconcerted by it; it is only doubtful and the bad who resent it. Short settlements make long friendships. A very long credit account, like a note, becomes in time invalidated. It dies of old age.

Marriage.

Marriage, or engagements to marry, should not be entered into inconsiderately. If the old axiom that haste makes waste is true as applied to the ordinary affairs of life, it may be said that undue haste often results in unspeakable misery in matrimonial alliances. Love is proverbially blind; he is more—he is willfully blind and should be made to open his eyes. A little common-sense mingles advantageously with everything; so far from being out of place, it is absolutely essential to safety in affairs of the heart. Many a girl has had her whole happiness for life destroyed because she obstinately chose to form her estimate of the character of a suitor exclusively by his behavior towards her, and his professions of love, rather than by his conduct towards others. It is a pretty safe rule that a man whose whole life is but an exemplification of selfishness will not long continue generous in relation to his wife. Character is seldom revolutionized by marriage. There may be a slight reform temporarily; it rarely lasts long. And men suffer as well as women from ill-assorted marriages. Many a towering ambition has been crushed, many a cupful of happiness has been converted into the dregs of bitterness, from the neglect of a young man to become thoroughly acquainted with a girl before engaging himself to her.

A Novel Ornament.

On the last day that he was in London General Grant came into competition with a beetle. It was California scarabœus, and I am bound to say maintained its position with a good measure of success. Most of us who went to Minister Welsh's reception had seen General Grant before, but few, if any, had ever before seen a handsome lady wearing for a decoration a large burnished beetle. The beetle, which was an inch and a half long, was gold rimmed by nature, and around it the jeweler had fastened a gold ring with a chain, at the end of which was a pin. This being attached to a large satin rosette the brilliant creature had a fine little field to wander over and display its coleopterous attractions. The handsome lady—Mrs. Randolph Clay—took it off that it might pass from hand to hand, so that all might know that it was a live beetle. Around this silent Californian there was a larger group than around the silent ex-President. The lady said the scarabœus had been in her possession for six months, and during that time it had neither eaten or drank anything, though refreshment was often offered. It seemed to live on air, and its health was perfect. It may be that the Egyptians, who ascribe so much sanctity to the scarabœus, had observed its ability to live without earthly food.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instrument and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturers of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

LITTLE DAN.

BY MRS. E. Y. HOUSE.

In a lovely home in ————, a little boy of three years was found asleep, with his arms around the necks of his father and mother, who had both died of the yellow fever.

Where the skies of summer, bending
O'er the homes in sunny clime,
All the charms of nature lending
Melody to summer rhyme.
There—the vines of beauty dressing
Bowers of light, and love, and joy—
Lived and loved, in love's caressing,
Little Dan, the Southern boy.

Shadows fall where sunlight lingers,
And the fitful fever king
Chained the lives, with icy fingers,
That to happy childhood cling;
Sealed the lips of mother-blessing,
Stilled the heart of father-care,
Twined his arms in mute caressing—
Little Dan was sleeping there.

Eyes unused to kindly weeping
Turned aside a tear to hide,
As the orphaned boy lay sleeping
By the dear, dead mother's side.
Hands grew gentle as they bore him,
But he wakened with a cry—
"Mamma' papa, have you left me?
Mamma, mamma, did you die?'

Swift the news on wires were flying
From the Southland, stricken sore,
And the heavy air was sighing
With the plaintive tale it bore.
Then 'twas woman heart that answered
Where the Northern rivers ran—
"I will be a mother to him,
I will care for little Dan."

—*The Woman at Work.*

THE CAMEL'S REVENGE.

A few years ago it chanced that a valuable camel, working an oil mill in Africa, was severely beaten by its driver, who, perceiving that the camel had treasured up the injury, and was only waiting a favorable opportunity for revenge, kept a strict watch upon the animal. Time passed away; the camel perceiving that it was watched, was quiet and obedient, and the driver began to think that the beating was forgotten, when one night, after the lapse of several months, the man who slept on a raised platform in the mill, whilst, as is customary, the camel is stalled in a corner, happening to remain awake, observed by the bright moonlight that when all was quiet the animal looked cautiously around, rose softly, and stealing towards a spot where a bundles of clothes and a bernous thrown carelessly on the ground resembled a sleeping figure, cast itself with violence upon them, rolling with all its weight, and tearing them viciously with its teeth. Satisfied that its revenge was complete, the camel was returning to its corner, when the driver sat up and spoke; and at the sound of his voice, and perceiving the mistake it had made, the animal was so mortified at the failure and discovery of its scheme that it dashed its head against the wall and died on the spot.

THE LAUNDRESS.

A husband complained that his shirt bosom and collars were badly done up, and the case was referred to a knowing shirtmaker, and his answer was well worthy the attention of house-keepers:

"Yes," said the man, "the fault is with your laundress. While doing up your collars, she stretches them the wrong way. Damp linen is very pliable, and a good pull will alter a fourteen-inch into a fifteen inch collar in the twinkling of an eye. She ought to stretch them crosswise, and not lengthwise. Then in straightening out your shirt bosom she makes another mistake of the same sort. They also ought to be pulled crosswise instead of lengthwise, particularly in the neighborhood of the neck. A lengthwise pull will draw the front of the neckband somewhat under your chin, where it was never meant to go, and of course it spoils the set of your collar. With the front of your neckband an inch too high, and your collar an inch too long, you have a most undesirable combination."

The necessary changes were made in the methods of the laundry, and all was right with shirts and collars.

WANTED.—The wild rabbit that called himself a "bunny-fied traveler." The March hare that was "cut off with a shilling." The parrot that quoted Macaw-lay. The omniverous ostrich that devoured the "crust of the earth." The horned owl that studied horny-thology. The fish that was weighed in its own scales.—*Funny Folks.*

WANTED.—The dog that barked his own shins. The French warhorse that gave a Martial Neigh. The mouse that kept its own trap. The cow with a "sweet and low" voice. The scornful ox that tossed his head. The pig that fed out of the "trough of the sea." The busy bee that led a "hum"-drum life. The apt that emigrated to the Antipodes.

When little Thomas stoops to toy with berries, jam, and jelly-cake, no art can soothe the chastened boy—no nostrum ease his stomach ache. And if the griping pains defy the medicines prescribed to kill, his parents will do well to try the limpid, liquid castor-oil.

Alcohol will clean out the inside of an inkstand. It will also clean out the inside of a pocketbook a little more thoroughly and quicker than anything on record.

"I say, Jack, which would you rather, that a lion tore you to pieces, or a tiger?" "Why, you goose, of course I'd rather a lion tore a tiger to pieces."

AMERICAN
Berkshire Record.

Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE
FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard o Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol. I. is $3.50, post-paid; that of Vol. II. $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid, the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with stubs for retaining memoranda, price $1.00 per set. These forms are adapted to general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Managment of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven illustration therewith, have been published together in pamphlet form. They will be sent postpaid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

N. B.—These Splendid Volumes can be seen at THE FARMER OFFICE.

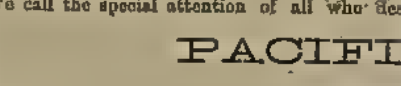
PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make no *charge.*

We also send, *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.



Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, cand find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

Worth a Guinea a Box!

CLARKE'S
Liver and Bilious Pills.

The BEST MEDICINE you can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is

Clarke's
LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, APRIL 21, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills; I thought I would try them." I have only taken three small boxes: the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you. I am, truly yours,
WILLIAM STEWART

PARTICULARLY NOTE THIS.

HARBRIDGE, WARWICK, August 14, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing, tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food. Consulted a Physician in Warwick; was under his treatment four months without improvement. Dissatisfied, went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit. In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.
MICHAEL BYRNE.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed good *health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefited. (Signed)
JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus:

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,
GALEN CLARK.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved an cured from long and great suffering by the use of thes Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you Davi Clarke's Australian Pills—the only genuine.

CASH FOR ADVERTISING:

We desire it to be clearly understood that those who send us ADVERTISEMENTS FROM ABROAD must send the Cash with the advertisements—if they would have them appear.

We have numbers of advertisements sent us from strangers saying, "*Please Insert and Send Bill*" this we cannot do without CASH, or a special understanding before hand.
WARREN & CO.

TO ADVERTISERS ABROAD.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,
TO THE COLUMNS OF THE
CALIFORNIA FARMER!
NOW
Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,
Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *Three or Four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *and Inserted Once; and Fifteen Cents per Line;* each subsequent Insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving to the FARMER does, a wide circulation for its patrons. It is the very best medium to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.
For one-eight of a column, three months.....$15.00 | For one-half of a column, three months..... 50.00
For one-quarter of a column, three months ..... 30.00 | For an entire column, three months 100.00

For a six month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the abov rate

WARREN & CO., Proprietors,
320 CLAY STREET, SAN FRANCISCO.

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, March 20, 1879.

Money and Exchange Tables.

Exc. on England, new style, long and short	4 86 a 4 88½
Gold, at par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	8s10d a 9s 3d.
Value of Club Wheat in Liverpool	9s 2d.a 9s 5d.
Value of Wheat in New York, bushel	1 09 — 1 19
Brewers Barley in New York, bushel	95 — 98

MONEY AND EXCHANGE TABLES.

The money market of San Francisco shows a great abundance on deposit at banks, and capitalists have plenty to let at low interest, there is a great deal more money than trade.

Money everywhere, in all the great marts of trade, is very abundant and rates of interest low, the very great depression in trade stops business, and no one feels like investing either in trade or any manufacturing business, and this state of things will continue till after the Constitution question is decided—if our people reject it "The country is safe," if they accept it, look out for the Porphyry House, and a general stagnation of trade, for our people see danger and trouble in the New Constitution, and its rejection only can give confidence and make trade revive once more.

Money in New York is a drag, as low as 1, 2, 3 per cent per annum on three months' paper

Our bank rates are 7 to 9 and 9 to 12 per cent, according to cases—long loans can be had at 7 per cent and less.

GRAIN AND FLOUR MARKET.

The *Grain Market* has been a very quiet one since this month came in, the blessing of more rain checking business and the little disposition to sell by the holders, and less ships to load has made a quiet market in wheat for March thus far, without much change in values.

The *Flour market* has also been a quiet one with prices about as last quoted—there has been a little export as usual to China.

The *Barley market* has had a severe drop in values, and the price came down to very low figures, there has been some shipments or barley to Australia lately.

The cause of the decline in the barley market is undoubtedly owing to the large stock on hand, and the certainty that there will be a large crop this coming year, with these facts however, it would seem that barley is a good and safe investment at 65 to 70 cents, the present figures offered for barley

The *Market* for *Oats* is also down, and very little trade at present, oats also goes to Australia.

Corn, Rye and *Buckwheat* all partake of the quiet market, with all kinds of merchandise.

The whole class of *Feed Stuffs*, such as *Bran, Middlings, Ground Barley, Corn Meal*, and *Oil Cake Meal* are about as before.

The *Hay Market* is dull and figures a shade lower.

The *Seed Trade* since the rains has been more lively, and a considerable amount of clovers and blue grass have been planted, and as favorable weather continues, much more will be planted all through this month.

The *Hop market* is still as before, and little or no demand with price way down.

The *Potato Market* has received a full supply and prices low—*Sweets* the same—*Onions* advanced in price

The *Honey market* is still full of the sweets and at a low price, our southern counties are sending us sweets abundantly.

By reason of the rains and general dull trade the markets all are very quiet, and what we say one week of many departments is also the condition of another week, this has been so for weeks past, requiring no change in words.

Wheat Hay	13 00 —15 50
Alfalfa Hay	—
Straw per ton	5 00 — 6 00

Retail Prices in the Fruit Market.

Our *Fruit market* changes its features now, Apples are losing their fresh crisp—Pears scarce, all but baking, other kinds getting old and are passing away.

The show feature of our market is our semi-tropical fruits. Oranges are very abundant, but size and appearance not up to former years, this is to over cropping the trees, fruit is too small, peddled round the streets, "Ten cents a dozen" is the cry—Lemons are good, limes also, plenty of Inland fruit, so we have quite a show.

More pains must be taken in pruning our trees, and not to overbear them, then we shall have fine fruit, and such will pay the grower better.

Apples, per box	75 — 1 50
do. do. lb	6 — 8
Pears, per box	2 50 — 3 00
" per lb	10 — 12
Figs, dried, per lb.	12 — 15

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no rain bond, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on the Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1858—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the first and only advocate for the planting of the ALFALFA as a hay plant, and the first to introduce the seed and its culture, as not only this grass, but all other valuable grains and hay plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONE WHEAT, of SUMMER FALLOW, of SUBSOILING, and DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE AGRICULTURE, which such years of labor merit, the JOURNAL sends out NO AGENTS, NO RUNNERS, but only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER are placed at a low price, should induce, as we trust, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price all can have it, we make the following

Terms for the Year 1879

And With Seed Premiums.

Single Copies,	$
Six Copies,	$
Ten Copies,	$
Twenty Copies,	$
Fifty Copies,	$

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer

1879.

EUROPEAN.

From our Special Correspondent.

PARIS, January 30, 1879.

BEEF AND DAIRY STOCK.

In Germany as in France, much attention is being devoted to the relative general values of pure or half-blood Durhams. Opinion is in favor of the latter, as being less delicate, better milkers, and putting up flesh satisfactorily. The great fault found with the herd-book Durhams is, that they exact too much care. Respecting the charge that pure Durhams are more liable to abortion than other breeds, it cannot be sustained on the Continent, for any race abnormally fattened, is liable to the same draw-back. Excessive fat weakens the genital organs and so induces sterility. There is an agitation on foot to induce the authorities connected with cattle shows, to devote more serious attention to the encouraging of good milking cows, not only when in the heifer stage, but between the ages of three and eight years.

Belgian farmers complain this season, that their butter is bitter, and refused by customers. The cause is not so much due to the turnip diet, which ever leaves a taste, but to meadow hay, badly saved. When good, such hay is excellent for milch cows, and consisting of a variety of plants, imparts an agreeable perfume to the butter. Replacing the roots, and changing the hay, remedies the evil, while the bad hay if chopped, sprinkled for some hours with a brine, and then mixed with beet, potatoes, or other sliced roots, can be safely utilised. During the late severe weather many farmers tested the Scandanavian process of making butter at a low temperature, and in several cases with success.

DISEASES AMONG DAIRY STOCK.

Doctors differ; veterinary surgeons in France declare, that there is no danger to be apprehended from the consumption of milk from cows affected with the mouth disease, if the milk be cooked. The Belgians are strongly of the opposite opinion, and quote proofs where individuals have contracted the disease from partaking of cheese and butter, prepared from the milk of affected animals; the virus of the pustules was evidently not destroyed. There is not any difference of opinion as to the non-injurious consequences resulting from eating the flesh of animals so diseased. Fire as usual purifies everything. Dairymen ought to be making rapid fortunes at present in Paris; milk is the favorite food prescribed by doctors wherever it can be taken, and in the unboiled state. There are dairies that will guarantee to supply an invalid with milk constantly from the same cow, binding themselves as far as the season will permit, to supply the cattle with a uniform food. In the apothecaries' shops are notices, setting forth that orders are taken to furnish milk from stated dairies—the latter publishing in the newspapers once a month, the analysis of milk, by chemists of standing.

FREE TRADE IN GRAIN, MEALS, ETC.

Perhaps the most momentous question at this moment with French agriculturists, is that of free trade and protection. There is no unanimity on the subject, though all lean vaguely to the reciprocity solution. Australia and South America, have destroyed our wool clips, say French farmers, and the United States promise to do the same for our cereals and meat. "Manufactured meat," is the cure of free-traders, who, while objecting to any duty being placed on foreign grain, have not the same repulsion to putting a tax on imported meat. But as a large area of France is unsuitable for pasturage, but adapted for wheat, the protectionists insist on a duty of 3 francs per cwt. on American grain, which is about the cost of the transport of that quantity across the Atlantic. The consumer is inclined to wish for a plague on both the houses; for him, life never was so dear as now. One-half of the meat supply of the Paris markets comes from Russia, Austria, and Asia Minor. The average price of wheat here, is 13½ francs per cwt., while bran fetches from 7 to 9 francs. The following are the prices of a few other commodities per cent. and in francs: oats, 9; potatoes, 11; barley the same; hay is 47 the tan; the best butter 4, per lb., cheese 2, ditto, and eggs 2 francs, per dozen. Beef is per lb. 2½; mutton 1½; veal 2, and pork 1½. There is no prospect of the price of meat diminishing, and it has been established, the more the consumption of meat increases, the less is the demand for bread.

M. Stüpp, a German farmer, desiring to test the relative fattening qualities of rice and maize, tied up 18 bullocks in November 1877, three lots of 7, 6 and 5 beasts, respectively, and as nearly as possible under the same conditions as to age, weight, etc. The feeding was the same, save, that the rations of grain, 6½ lbs. daily, and in the form of flour, consisted of maize, oats and rice. He found that 85 lbs. of the latter, exercised the same nutrive effect, as 100 of maize. He recommends great care to be taken in purchasing the rice-meal, as it is extensively falsified.

[TO BE CONTINUED.]

AN EXPERIMENT WITH PEARL MILLET.

Pearl Millet has been cultivated for some years as a forage plant, in some of the Southern States, as "African Cane," "Egyptian Millett," "Japan Millet," and in some places as "Horse Millet," but little was known of it at the North before last year, and then only in such small quantities as to hardly allow of a fair trial. From what we saw of it in 1877, we determined to give it a thorough trial this season. A piece of good strong loamy ground was prepared as if for a beet or turnip crop, by manuring with stable-manure, at the rate of 10 tuns to the acre, plowing 10 inches deep, and thoroughly harrowing. The Millet was then sown in drills 18 inches apart, at the rate of 8 quarts to the acre. We sowed on the 15th of May, about the date we plant corn; in 12 days the plants were up so that a cultivator could be run between the rows, after which no further culture was necessary, for the growth became so rapid and luxuriant as to crowd down every weed that attempted to get a foothold. The first cutting was made July 1st 45 days after sowing; it was then 7 feet high, covering the whole ground, and the crop, cut 3 inches above the ground, weighed, *green*, at the rate of 30 tuns per acre; this, when *dried*, gave 6½ tuns per acre as hay. After cutting, a second growth started, and cut August 15th—45 days from time of the first cutting. Its height was 9 feet; it weighed this time at the rate of 55 tuns to the acre, *green*, and 8 tuns dried. The *third* crop started as rapidly as the second, but the cool September nights lessened its tropical luxuriance, so that this crop, which was cut on October 1st, only weighed 10 tuns green, and 1½ tuns dried. The growth was simply enormous, thus: 1st crop in 45 days, gave 30 tuns green, or 6½ tuns dry; 2d crop in 45 days, gave 55 tuns green, or 8 tuns dry; 3d crop in 45 days, gave 10 tuns green, or 1½ tuns dry. The aggregate weight being 95 tuns of green fodder in 135 days from date of sowing, and 16 tuns when dried to hay. This exceeds the clover meadows of Mid-Lothian, which, when irrigated by the sewerage from the City of Edinburgh, and cut every four weeks, gave an aggregate of 75 tuns of green clover per acre. There is little doubt that Pearl Millet is equally as nutritious as corn-fodder, which it resembles even more than it does any of the other Millets. We found that all our horses and cattle ate it greedily whether green or dry. If sowing in drills is not practicable, it may be sown broadcast, using double the quantity of seed—say 16 quarts per acre. The ground should be smoothed by the harrow, and again lightly harrowed after sowing: if rolled after harrowing, all the better. I know of no farm crop that will better repay high manuring, but so great is its luxuriance, that it will produce a better crop without manure than any other plant I know of. In those parts of the Southern States where hay cannot be raised, this is a substitute of the easiest culture, and being of tropical origin, it will luxuriate in their long hot summers. Even though our Northern seasons may be too short to mature the seeds, our experiments in New Jersey this summer show what abundant crops may be expected if the similar conditions are secured. Pearl Millet as a fodder plant presents a new feature in our agriculture, and I feel sure that within ten years we shall wonder how we ever got on without it. (Besides our own testimony given above, we have received the most satisfactory letters from experienced men in different parts of the country to whom we sent seeds of Pearl Millet for trial, and all are unanimous as to its enormous productiveness and great value. From all we have seen and can learn, we are fully convinced that Pearl Millet is to be one of the great fodder plants of the future. PETER HENDERSON.

A MOST SUCCESSFUL INSTITUTION.

The New Zealand Loan and Mercantile Agency Company may truly be said to be one of the best managed and most successful of the foreign institutions doing business on this coast.

The capital subscribed is £3,000,000, equal to $15,000,000. The head office is No. 1, Victoria Street, London, E. C., with branches in all the cities of Australia and New Zealand. The governing managers everywhere are among the most intelligent and wealthy men of the land, occupying high positions.

As an evidence of the good management and great success of this Institution, we state that the reserve found in 1867 was £5000, in 1872 $40,000, and in 1878 it had reached to £160,000, or nearly a million of dollars, and while the dividends had always been from 10 to 15 per cent. per annum, and often and extra dividend, even with an accumulating reserve fund, as a vote was taken to set aside £5000 ($25,000) for a fund for the officers of the Institution in case of misfortune—a noble act.

As the trade of the Pacific Coast is now rapidly increasing every year, requiring facilities for our merchants doing business with Australia and New Zealand, we take pleasure in presenting the above facts and in commending this Institution and also the NEW ZEALAND INSURANCE COMPANY, as both are important to our citizens in the trade we allude to.

In this connection we also give the very happy, important and pleasing address of the Hon. Mr. Russell in his very able report of the New Zealand Loan and Mercantile Agency, made at the close of the year of 1878, giving the condition of the Institution, its success, and its cheering prospects for the future.

Had we space we would give the whole balance sheet, reports, etc., but our space precludes it—we herewith give the address of Hon. Mr. Russell that speaks for the Institution nobly

The people of the Pacific Coast will please remember that Hugh Craig, Esq., is the agent for these institutions for the Pacific Coast.

We can say that Mr. Craig has been an earnest friend of our State in building up the trade between the Pacific Coast and Australia, and all who wish valuable information relative to Australia and New Zealand, can obtain it of Mr. Craig.

HON. MR. RUSSELL'S ADDRESS.

The CHAIRMAN, in moving the adoption of the report, said: Gentlemen, we meet you on this the Fourteenth Annual General Meeting with very great pleasure, having to place before you the most satisfactory Balance Sheet we have yet had to present for your acceptance. In saying this, I say a great deal, for the career of the Company since its formation has been one of continuous and unbroken success. We have been able to meet you on every occasion with a good Balance Sheet, and to pay a substantial dividend, beginning with 8 per cent., but going on increasing until we have now arrived at what we consider our permanent dividend of 15 per cent. Besides declaring regular dividend, we have always made substantial additions to our Reserve Fund. In the accounts we now ask you to adopt, we maintain the usual dividend of 15 per cent., and that not only on the old but on the new Capital which has been paid up during the past year, and we add to the Reserve Fund the very large sum of £40,000, of which £20,000 has been derived from the premiums on the fourth issue of shares which you authorized at the last Extraordinary General Meeting, but no less than £20,000 we have taken out of the ordinary earnings of the Company. I think I may fairly congratulate you on the achievement of such great success. But there is a class of figures which do not appear on the Balance Sheet or in the report which also indicate great progress in the Company's operations, and I now will take the liberty of referring to a few of these. Take first our debenture increase. On the 31st December, 1877, our debentures amounted to £1,631,321; on the 31st December, 1878, the amount was £2,320,913, showing an increase in round numbers of three-quarters of a million. I think that this, in the face of the times which we have had during 1878, is highly satisfactory, showing, as it does, the great confidence of the debenture holders in the Company and its operations. Our capital has increased in the year £74 622, while our Reserve Fund has been raised from £129 990 to £160,000. There is another set of figures which also indicate the great progress made by the Company—I mean those which show the consignments of wool to this country. In the year 1873, we stood sixth in the list of consignees of Australasian wool; in 1875 we were fourth; in 1877, that is at our last annual meeting we stood third; and now we are in the proud position of being first, and that by many thousands of bales. At the end of 1877 the produce we dealt with during the year amounted to £937,210, but for the year ending 31st December, 1878, the value was £1,352,600. Gentlemen, if you remember that we are not a very old Company, that we have not been many years in existence, I think you will agree with me that the results which we have achieved are highly satisfactory to the shareholders. (Hear, hear.) They have not been achieved without some feeling of envy on the part of others—our rivals in business—who, perhaps, having formerly received a large proportion of the consignments which are now directed to this Company, do not approve the change, and if ever you hear us evil spoken of, I wish you to enquire the source whence the report comes. (Laughter.) Such rapid progress as this, if it stood alone, without consolidation and care, would be cause for apprehension and alarm, but when achieved without any departure from the soundest and strictest business principles, which have been maintained throughout all our operations, this progress must prove a source of pleasure and congratulation. We do not speculate in lands; we are not the owners of a single acre, except that which is necessary for the conduct of our own business, on which stores and premises can be erected. We might have made money otherwise for you; there were many tempting openings, but we felt that it might be earned, perhaps, at the risk of solid credit. We neither buy nor sell goods on our own account, but simply on commission. The money which we lend is advanced on first-class security, with a wide margin. Our consignments of wool and other produce are likewise all based on security by the bills of lading when shipped, and these, on arrival of the shipments in this country, are exchanged for warrants.—Throughout the whole of our business we adopt the principle of no money without complete security, so that I cannot conceive, if these principles be careful maintained, how we can lose money. And while we are thus successful in the conduct of our operations, as I once before told you, it is also a matter of congratulation and pleasure to us to know that the Company's operations are conducted without injury to our constituents; that they are based on such principles and are attended with such results as to afford the greatest satisfaction to an ever increasing circle of clients. We have been instrumental in reducing the heavy charges to which the Colonial wool grower in former days was subject. We have a scale of charges in the Colony, and for the conduct of his business in this country, which, in comparison with that of former days, is very moderate indeed. We have also been instrumental in reducing very much the rate of interest on mortgages in the Colonies. Before this Company was established Colonial rates of interest on mortgages were very high, and an immense benefit on the colonists of mortgages were very high, and an immense benefit on the colonists of New Zealand has been conferred through you by supplying them with New Zealand has been conferred through you by supplying them with money at a more moderate rate of interest. I shall not say anything more on the general subject, but I will now direct your attention to one particular part of the report, which deserves, I think, a little special notice. These results which I have pointed out have not been attained without a great deal of thought on the part of the Directors and the Managers of this Institution, nor without an immense amount of labor performed by a numerous and highly efficient staff. Gentlemen, we wish to make employment on the staff of this Company alike attractive and pleasant, to attract to it and keep in it the best men whom we can get. We think, therefore, that the time has come when we ought to establish a Guarantee and Provident Fund to which the officers of the Company will contribute, and out of which, in the course of time, a fund will be provided for pensions, and also as a guarantee for fidelity. The institution of this fund we consider should be commenced by a donation from the Shareholders, which we feel assured you will make, and in doing so you will regard it as a wise provision to make the service more popular, and to retain in it those officers who are really worth having. With these observations, I beg to submit the following resolutions

1st. "That the Report and Statement of Accounts be adopted and circulated among the proprietors."

2nd. "That a dividend at the rate of 10 per cent. per annum for the half-year ended 31st December, 1878, with a bonus of 5 per cent. for the year, be now declared, which, with the interim dividend at the rate of 10 per cent. paid in July, 1878, will make a distribution at the rate of 15 per cent. per annum for that year; that £20,000 be added to the Reserve Fund, and that the balance of profit, amounting to £3,624 4s. 2d., be carried forward."

3rd. "That the premium on 40,000 Shares, fourth issue, at the rate of ten shillings per share, amounting to £20,000, be added to the Reserve Fund, thereby raising it to £160,000."

4th. "That a Guarantee and Provident Fund be established on behalf of the officers of this Company, and that towards its formation the sum of £5,000 be set apart out of profits, and placed at the disposal of the Directors for the purpose."

Mr. Mundella, M. P.: I simply rise to second the Resolutions which have been moved by Mr. Russell.

Mr. Newman suggested that the Directors should not draw a hard and fast line at 15 per cent. but pay an increased dividend. (Hear, hear.)

THE JERSEY COWS.

[There has been much discussion in times past upon the relative value of the Jersey breed of dairy stock as compared with the larger breeds, taking into consideration their value for beef when they are too old for the dairy.

We have before us a letter from H. G. Abbott, Esq., of Kennebec County, Maine, addressed to the *New England Farmer* last spring, upon the subject which we think is of importance for our dairymen to know, as the figures here made by Mr. Abbott settles the question in favor of the Jerseys quite satisfactorily, and by the dollars and cents, without a reference to the great superiority of the milk, cream and butter, besides the extra price of the butter, and the quality excelled by these we think is 25 per cent.—ED. F.]

Mr Abbott says:—

Much has been said in regard to the Jersey cow, as being too small for beef after becoming too old for milk. Now, let us look at the figures in that matter and see what the real facts are in this case. The majority of farmers, in looking at a Jersey cow, will say—too small for all purposes for us farmers; we want something that will make oxen, and beef, and when a cow is too old to milk, we want something that will make good beef and a lot of it; we want none of your "deer" meat. I think this is a mistaken idea that farmers have fallen into, without looking into the question at all.—Now for the figures—an average Jersey cow will, in one year, make 250 pounds of nice, yellow butter, worth now in the market twenty-five cents a pound, amounting in one year to $62.50, and raise a calf on the skim milk, worth, with us, $15, making the sum of $77.50, without making any charge for the skim milk. After the calf is weaned. Now let us take the average native or common cow and see what she will do. From the best authority I can find, together with my own experience, she will, in one year, make 140 pounds of butter, worth now in our markets twenty-two cents a pound, amounting to the sum of $33, and a calf, fed on skim milk, worth $5, making in all $38. Now, take $38 from $77.50, the amount of the product of the Jersey, and you have $44.50 in favor of the little Jersey cow. Now, multiply $44.50 by ten, the number of years we usually milk a cow before turning her into beef, and you have the nice little sum of $445 in favor of the latter, when you get ready to make beef of her. Now, it does not make much difference about the price of beef in so small amount as there would be between the large cow and small one, compared with large difference in the amount of butter, and in addition to the above, some credit must be given to the Jersey, for a less amount of food consumed, which is about 2½ per cent. of the live weight on the difference of the two cows.

In looking the matter over, I cannot but come to the conclusion that, for dairying purposes, the Jersey cow is the cow for the farmers. There is a great amount of labor in the manufacture of butter, both in doors and out, and a cow that will make only 150 pounds of butter a year is not worth keeping; for butter at twenty-five cents a pound, and hay at twelve dollars a ton, will not more than pay her keeping, so that there is a total loss of the labor employed, whereas a cow that will make 250 pounds a year will afford a good profit over the keep of the cow.

[We think the facts here stated by Mr. Abbott clear and decisive in favor of the little Jersey.—ED. F.]

STOCK WRITINGS, KNOWLEDGE.

There is a growing interest among all Stockraisers to talk, write and confer with one another about Stock, and to communicate this knowledge and it is from these sources of communication that Stock raising is now progressing in all the States of the Union, and we think we in California can boast of as intelligent Stock Raisers and as fine stock in horses, cattle, sheep and swine as any State in the Union, though the numbers owned here by our Stock men may not be as great.

We clip the following articles from our excellent Exchange the *National Live Stock Journal of Chicago* as worthy of note:

PURE-BLOOD—PURE-BLOOD THOROUGHBRED.

Again and again we have been called upon to answer the question: "What is the difference, if any, between full blood, pure-blood, and thoroughbred, as applied to live stock?" and as often we have answered, there is really no difference. All these terms are used to denote purity of blood. When applied to horses, the term thoroughbred, by common consent, has come to be recognized as the name of a particular breed—the English race-horse—and when we speak of a thoroughbred horse, it is understood that we refer to a purely-bred animal of that particular breed. There are, perhaps, pure-bred, or well-bred, or full-blood Clydesdales, English draft horses, Percheron-Normans, Shetland Ponies, etc., but we never speak of them as thoroughbreds. In speaking of the various breeds of cattle we may say, a full-blood Short-horn, a purely-bred Shorthorn, or a thorough Short-horn, all meaning one and the same thing; and so of all the other breeds of cattle, sheep and swine. In some localities an arbitrary distinction has been recognized between thoroughbreds and full bloods. Thus, an animal showing a given number of crosses of a certain breed is classed as a full-blood, although it could not be recognized as a thoroughbred. But such distinctions are merely local, and are not generally recognized by breeders.

AUSTRALIA.

AGRICULTURAL NEWSPAPERS.

Editors, strangers and citizens from the Eastern, the Middle, or Southern States, also Editors over our own Coast who may desire to see or refer to their own Journals, or any Agricultural or Horticultural Journals, will always find them on file in the FARMER READING ROOM, to which they are always bid welcome.

ONE HUNDRED of the leading Journals and Magazines of this class, the best in the United States, are in this collection, giving to those in search of Agricultural knowledge the best Information on this Coast.

A Large Library also, for *General Reference*.

Australia and California

We have full files of Australian Papers from all parts of Australia, showing the great interest they take in this Country, one thing of great moment, is the "Steamship Line," it is of vital importance to the welfare of the Colonies, and so vastly important to the Pacific Coast in the great trade that can be built up between the Colonies and California, if our Merchants do their duty.

These Journals are arranged on file for the convenience of all who may desire to peruse them. We have as follows —

The Sydney Morning Herald, Sydney.
" *Town and Country*, Sporting Paper, Sydney
" *Australasian*, Melbourne.
" *Weekly Times*, "
" *Adelaide Observer*, Adelaide.
" *Queenslander*, Brisbane, Queensland.
" *Week*, " "
" *Capricornian*, Buckhampton, Queensland
" *Port Dennison Times*, Port Dennison.
" *Wide Bay and Burnett News*, Queensland.
" *Darling Downs Gazette*, Toowoomba, "

Many of these Journals are of the largest size, from 20 to 38 pages, several, splendidly illustrated with views of the Public Buildings, Landscapes, Public Men, Stock, etc.

CONTRIBUTIONS FROM QUEENSLAND.

We Invite all our readers and our citizens especially who are interested in our MANUFACTURES and the MECHANIC ARTS, and our AGRICULTURE, to visit the FARMER Office and see the RICH PRODUCTS brought from QUEENSLAND by the Commissioner, they are now on Exhibition open to all, in the READING ROOM and MUSEUM of the CALIFORNIA FARMER OFFICE.

A Pamphlet Free.

THE MURRAY HILL PUBLISHING COMPANY, 129 East 28th St., New York City, will send by mail a large pamphlet entitled EVIDENCES OF DOCTOR FOOTE'S SUCCESS as a writer and practitioner of medicine, and a catalogue of all their publications—reading enough for several weeks—if you will but enclose one letter stamp to their address.

RHYMES OF SCIENCE.—We have a pleasing work finely Illustrated sent to us by the Industrial Publishing Co., of New York—which has much of true interest explained by poesy and by art—shall give from its pages soon.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have GRAIN to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER III.

The next morning the boys were up in good time, and after starting the fire and filling the tea-kettle, were off to the barn, where they finished all the morning chores before breakfast, and were ready directly afterward to give the cattle hay enough to last till night, and harness up the old horse into the old covered wagon, ready for a start as soon as mother and I could clear away the breakfast dishes and get ourselves ready. Luckily, although it was midwinter, it was not very cold, and the ground was nearly bare of snow; so the ride of five miles did not promise to be a very unpleasant one, nor a long one, although old Charley was more famous for his performance at the plow and the team-wagon than upon the road. On, past many small farms, where their owners struggled manfully to wrest a living from rocky soils or sandy hills; with tools fifty years behind the times; with cattle that were worth scarcely more in the spring than the hay that they ate during the winter would have sold for in the fall; with teams that would scarcely draw their own provender for a day's journey; by larger farms, where the owners derived larger incomes from the sale of wood and timber and charcoal; through woods where the ring of the axe could be heard; by the very place where my father had met his death; by the Corners where a horse and a yoke of oxen were waiting for the new shoes that the blacksmith was hammering upon, throwing bright sparks out of doors even as we rode by—up hill and down hill, we rode on.

Let me tell you more about the place we are going to visit and the people we shall see there, rather than of our ride; for you can find such drives anywhere in New England, but not such people as the squire and Aunt Matilda very often, nor such farms as theirs, I fear. The place was a large farm, with a comfortable brick-house standing a little back from the street, and hidden from passers by when in direct front view, or very near, by a thick grove of evergreens, elms, maples, larches, and other trees that I knew not by name then. They were planted out, as I have since learned, by one who was skilled in forest trees, so that the trees stood at irregular distances and apparently in disorder, as they would have grown in the woods from Nature's planting; and yet it was art of the most artistic sort which had dictated the spot for every one. Not a tree grew there, even the white-birch which showed its chalky trunk and pale green leaves among more pretentious trees, but had its effect upon the surrounding trees, and upon the whole landscape, carefully calculated by a master-mind before it was placed where it stood. And yet the man who had done this was said to have been a half-witted sort of a chap, who was good for nothing else; but he had studied the woods, and could place these trees and calculate their effect in masses as easily as a florist would arrange a bouquet. Not one tree overshadowed another, nor seemed out of place—no sameness, but the variety which we see in the wild wood. If it is "the hight of art to conceal art," then this was it. By the side of this grove or plantation of forest trees, a winding road lead from the highway up to the house, and at a certain point, where we emerged from a wood almost as heavy and dark as the thickest pine forest, we came out in full view of the mansion directly in front of us, a few stately elms standing before it upon the lawn, back of it the extensive orchards, and to our left the barns, painted and clapboarded, with ventilated cupola and a vane, and with large sheds enclosing the yards on north and east, which, in their turn, were sheltered from the winds, as also from sight, excepting from the south, by hedges of evergreens. Perhaps it was because everything was neat and tidy about the place, and because the squire's horses and cattle were always smooth and fat and well-cared for, and his tools of the best patterns and in good repair, and well-painted and housed when not in use, that the opinion was so generally entertained that the squire's farm cost more money to carry on than all it brought in. But if the people had known just how much the farm contributed toward a real expensive living; if they could have counted the cost of all the fruit of all sorts, the milk and cream and butter, the eggs and poultry, the vegetables and meat which so bountifully supplied the tables there; and the horses and carriages always ready for use, as I have since seen people count them who have lived in similar style in cities or villages, I think that they might have changed their opinion a little.

But here we are at the door, and the squire comes out to help us out of the wagon, and Aunt Matilda waits at the door to welcome us in, and while the boys, Cousin Henry leading the way, go to the stable to put the horse in, we go into the warm sitting-room, and mingle our tears again at the memory of that sad scene of but a few days ago. There is a little surprise, scarcely concealed, at so early a visit from us, but mother says she "wanted to talk to the squire a little, by and by, about the business," and at once it seems the most natural thing in the world that she should be there. But nothing is said about the nature of the business until the boys come in after a long inspection of the stables and the stock that were in them. Then mother called and led the way into the squire's own room. This room opened out of the sitting-room, and unless the doors were closed between them, which they were not on this occasion, there was not any appearance of secrecy, but I doubt if my mother would have thought the squire's opinion was worth listening to if it had been given in the family sitting-room. At any rate, it would not have had official weight, as it did in that little room. Perhaps the squire himself would not have been able to think as clearly or speak so much like one "clothed in authority" if he were not in that arm-chair in the little room.

But once fairly seated in there, with Clarence at her right hand, mother told her story plainly enough, telling first of Uncle Robert's plans for us, and then of her dislike at the idea of leaving the old farm, and of Clarence's idea and of her doubts and fears in regard to the possibility of his succeeding in making a living and paying interest and taxes, and all that, if he attempted it. Clarence said nothing, but I could see from where I sat how carefully he watched the squire's countenance as the story went on, and I almost thought I could hear his heart beat when the squire glanced at him in astonishment as mother told of his daring to think that he could manage the farm. After my mother had finished, the squire waited a few minutes as if in thought, and I am sure my heart beat loudly, for I felt that in the decision which we should get lay our fate. It rested with this man to say whether we were to remain in our home, which had so long been a happy one to me, or whether we should be banished to Blackington, with all its horrors, known or imaginary. I know now that Blackington is quite a pleasant village when one is in the pleasant part of it, but I had only rode through the streets where shops and factories and tenement-houses most abounded.

"Well, Mrs. Reynolds," said the squire at last—it was another official notion to call her by her title and surname; in the sitting-room he would have called her "Helen." I could not help noticing this in the midst of any anxiety, and it made his words seem to have more weight.—"I do not like the idea of your going to Blackington, anyway. It is not a very good place to bring up the children, I daresay, though under your excellent care and instruction I have no doubt they would turn out well even among greater temptations than they would meet there; but the boys would have their trades all to learn if they went there to work in shop or factory, and would not get much wages at first, nor would you like to board such fellows as work in those shops, though there are some fine young men among them. But if you kept a boarding-house, you must, of necessity, take in some that you would not like to associate with, or have Alice know. But on the farm you are at home; the boys have their trades, the noblest in the world,—the trade of growing food for all mankind, Mrs. Reynolds—almost learned, or, at least, well underway; and although young, they are willing and smart, and I would advise letting them try for a year or two anyway. They may possibly make some blunders, and it is possible that you may fall a little behind the first year or two, unless they work very hard and very steadily, and are very lucky; but they will be growing older and wiser every year, and I feel sure they will succeed finally. If you do not meet your interest every year, I shall not be hard upon you, and could even help you to a little more money if it was needed and I thought you were using it wisely. The farm would stand a much heavier mortgage than I have on it. But I hope that, at the worst, you would not fall behind more than your interest, and a lucky year after the boys get a little older would make that right again. If my advice will do you any good, I tell you I think you had better take this risk than to sell and move, which would be a greater risk, and I will look after Master Clarence a little and give him my advice about anything that he needs it on. If you only had a little more capital, to get better stock and tools, I am sure that the farm would pay well."

And with a sigh, as I thought, at the unfortunate condition of those who had not the better stock and tools, the squire arose, as if he had no more to say. My mother also arose, but, before passing out into the sitting-room again, she replied:—

"More capital, to buy stock and tools, is what I have not got, squire, and I do not mean to put any heavier mortgage on the farm to get it, either. If the boys cannot get along with such as their father had there, and left there, they must earn it for themselves, or they may give it up entirely."

And Clarence added: "I can get along with what is there until I am able to buy better, and I hope, by and by, to be able to buy Jersey cows and mowing-machines and all those things for myself."

So the matter was settled, and we were to stay upon the farm. Those only who have felt the dread of losing a dearly-loved home can realize how the weight was lifted off my heart, and how rapidly the lump in my throat which had so oppressed me for days past, when I had thought of what might be, melted away. I could almost have sung in spite of the black garments which I wore. And shortly after dinner came, we ate, I at least, and I thought the others, with a better appetite than while we were in doubt. And then the squire and Clarence walked out together, in which walk I think Clarence received many hints in regard to the management of the farm, and also was led to advance quite freely his ideas in regard thereto. And Ned and Henry made a tour of the ground and farm buildings again, while mother and I sat and talked with Aunt Matilda and my cousins. There were two girls—Matilda, a beauty of eighteen, and Mary, a little more than a year younger. Henry was but a little younger than Clarence, but in his ways nearer a mate for Ned. Then there was an elder son, Thomas, who was studying law in Boston, and whom I had not seen for many years, though I had heard much praise of him from Aunt Matilda and the girls, who looked upon him as one who was destined for greater things even than being a country squire. I could scarcely conceive of any higher position, but felt that there might be such a thing. And before night we went home, and I felt as if that home was never so precious as now, when we had seemed so near losing it.

[CONTINUED IN OUR NEXT.]

TYPHOID FEVER AMONG HOGS.

WHAT IS THOUGHT OF IT IN ENGLAND—ISOLATION DEMANDED FROM HEALTHY HOGS.

I am pleased to observe that the Privy Council have exercised their powers under the Contagious Diseases (Animals) Act, of dealing with this fatal disease. It always appeared to me an omission that this disease was not specially dealt with in the Act, as there are few diseases of animals which are more generally fatal in their effects, and which can be more easily checked by measures of slaughter and isolation. This disease was fully described some years ago in the Royal Agricultural *Journal*, where it was shown to resemble greatly the disease of the same name in the human subject, and to be communicated in the same manner. The well known dirty habits of pigs, of grovelling in their own ordure, makes the spread of the disease when once introduced upon the premises, to all the pigs, kept a matter of great probability. The majority of the animals affected, after lingering one or more weeks, die, and the few which survive are so much reduced as to be almost worthless.

The temptation has therefore hitherto been great to the owners of pigs where the disease has become introduced, to dispose of pigs that have been in contact with those diseased, and such animals, disposed of in the market by unprincipled dealers, have been the means of introducing the disease to other farms. Although the disease is not now prevalent, as far as I am aware, in the Midland Counties, there have been repeated instances of heavy losses there, plainly traceable to the purchase of an infected pig. The flesh of a pig suffering from the disease even at an early stage, is probably dangerous for human consumption. I therefore trust that the order will be rigorously carried out, and be not merely temporary, but remain in force, to be applied wherever this disease appears. From the report of the proceedings of the Central Chamber of Agriculture, at their meeting on the 11th inst., it appears that the disease is now greatly prevalent in the eastern and south-eastern counties, and that the Privy Council have been memorialized to take action. The prompt action in which the memorial has been complied with, gives us reason to hope that the Privy Council will use energetically the large powers for the repression of disease, whether of home or foreign origin, which were confided to them by recent legislation.—*London Agricultural Gazette.*

[This fever can be stayed and the disease removed by administering "Clarke's Eucalyptus Pills" pulverized and mixed with their scalded meal—a thorough purgative of the fever is the result—a trial on one diseased animal will soon test its efficacy.—ED. F.]

Uses for Horse Chestnuts.

The common horse chestnut is capable of furnishing several useful products which are regularly manufactured in several localities in Europe. The seeds contain over 36 per cent. of starch, which is easily obtained in the same manner as that made from cereals. Two hundred and forty to two hundred and fifty pounds of the seeds yield 100 lbs. of dry starch. Paste made from the latter is extremely adhesive, and is not attacked by insects; it is, therefore, particularly well adapted for the purpose of bookbinders.

This starch is also used for producing certain kinds of distilled liquors. For this purpose, 50 lbs. of the starch are heated for six hours with 2 pounds of sulphuric acid and 150 pounds of water, whereby the starch is converted into sugar; the acid is then naturalized by lime, the liquid decanted, mixed with yeast and fermented, and finally distilled. One hundred lbs. of starch yield 24 lbs. of 55 per cent. spirit.—*New Remedies, from Die Natur.*

[We suggest to those who live where our native *Buckeye* grows to make some experimental trial of it for *starch*, we have no doubt it can be made profitable.—ED. F.]

Why does the eye resemble a school master in the act of flogging? It has a pupil under the lash.

Prentice says that man was the chief consideration at creation. Woman was only "a side issue."

MARBLEHEAD MAMMOTH

CABBAGE.

There being a good deal of seed in the market raised from very poor stock, which must fail to give satisfaction, having been the original introducer of the Giant Cabbage, which when raised from the right strain of seed under proper cultivation, has been grown to weigh *over 60 pounds* to a single plant, and sixty tons to the acre, I now offer seed to the public that has been raised by myself, with peculiar care all of it from extra large, extra solid heads. The Marblehead Mammoth is not only the largest, but is one of the most crisp and sweetest of all varieties of the cabbage family, as will be seen by extracts of letters to be found in my Seed Catalogue, where my customers state that they have raised cabbages from my seed that have weighed 40, 45 and 50 pounds each. Full instructions for cultivation sent with every parcel of seed. Seed per pound, 25 00; per ounce, 50 cts; per half ounce, 25 cts. My large Seed Catalogue sent FREE to all applicants

49:4 tf JAMES J. H. GREGORY, Marblehead, Mass.

VALUABLE INFORMATION FOR THE FARMER.

Next to the system of rotation in crops, the most important discovery yet made in Agriculture. *Without any outlay of money*, an increase of from 25 to 50 per cent. can be obtained in the crop of MARKETABLE

POTATOES

Proved by two years' experience. *Costs nothing* but time during Winter or early Spring to prepare the seed. Full directions sent for $1, payable after trial, at maturity of crop. LEVI T. OLIVER, Quakertown, Bucks Co., Pa.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERLAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

SCAB AND TICKS

IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Price per Gallon:

TOBACCO DIP. ... $2 75

"The desert shall blossom with the rose."

SOUTHERN CALIFORNIA FRUIT REPORT

Gen. Stoneman, from the Committee on Transportation and Market, desired to report progress and ask further time, to perfect a report worthy of publication. He could not make a speech but would give some facts:

Number of boxes oranges shipped from San Gabriel station last season:

October	20
November	58
December	169
January	1690
February	2852
March	4590
April	3102
May	524

The lesson of these figures was, that the shipments should be distributed more evenly—more in the early months and more quite late. Thus we should find a more even market. Divide your orchards into halves. Pick one half early, but let the oranges on the other half hang late. This, it is true, will injure the next year's crop, but never mind. Let the trees have a rest.

TRANSPORTATION OF PERISHABLE FRUIT

Out of 131,558,970 imported oranges, 32,000,000 perished on the way. From Tahiti, an average of 66 per cent perish before arriving in San Francisco. Fresh grapes imported, 60 per cent rotted, bananas, 22 per cent; pineapples, 30 per cent; limes, 30 per cent; plantains, 32 per cent. For transportation, steamers are the best, for although they are of higher temperature they are most rapid. To send our oranges East we have to contend against cold, not heat. This was a large subject. A Board of Transportation Commissioners is to be organized under the new constitution. Better do nothing more till that is settled. The General said he had corraled another idea—a good article will sell. Don't overload your trees. Instead of propping the trees (as is customary) pick off till the branches will support the weight. The remainder will pay better than the whole crop. He will use no props hereafter.

Outdoor Camellias.

Mr. Groom informs us *(Garden)* that Camellias growing at Linton Park, Maidstone, in an exposed situation, have passed so far through the winter unprotected without apparently sustaining the least injury. The flower buds remain plump and sound, and promise to open freely. The climate of Kent may be considered a very favorable one, but it is nevertheless evident that the camellia might be planted out of doors in many places much more extensively than it is. It is even hardier than the laurustinus, and, therefore, wherever that will succeed, so likewise will the camellia [illegible], provided the soil be such as it requires. Good loam, road sand, well decayed cow manure, or leaf mould suit it admirably; a mulching of half rotted leaves or manure during hot weather will also greatly benefit it.

A Monster Pear Tree.

A correspondent writing to the *Journal of Forestry* gives the following description of a giant and very productive pear tree growing on the side of the turnpike road between Worcester and Tenbury, quite close to the rural village of Eardiston. The tree, which is the Oldfield variety, a perry pear, is, he states, in fine health and still growing and bearing freely, with no symptoms of decay. Its dimensions are as follows:—Height, 56 feet; girth of stem at ground level, 14 feet; girth at 5 feet up, 12 feet; height of stem to first large branch, 11 feet; diameter of spread of branches, 62 feet, giving a circumference of head of branches of about 182 feet. In a good fruit season this tree has been known to produce a crop of pears sufficient to make three hogsheads of excellent perry. It is a small pear, and the number of such a crop could only be guessed at, as no Worcestershire man would ever attempt the serious task of enumerating them. He further states that many other grand old specimens of the Barland, Huffcap, and other old varieties of perry pears are to be found in the orchards or about the homesteads of this district, some of which if measured might be found to exceed in size even this grand "monarch" of fruit trees.

A Reminiscence of the Tulip Mania.

At the end of last December, says the *Deutsche Gartner-Zeitung*, two houses in the main street of Hoorn, about twenty miles from Amsterdam, were offered for sale for demolition. These houses were purchased during the tulip trade which flourished from 1634 to 1637 with the proceeds of three tulip bulbs. The record of this remarkable purchase was preserved in a stone inserted in the gable of one of the houses.

A Magnificent Estate.

A large and very fine estate of some THREE HUNDRED ACRES with a fine Orchard of the very choicest fruit; a large Vineyard, very productive; a large number of Fig Trees, great bearers.

ORANGE, LEMON, OLIVE, and choice EXOTIC FRUITS of all kind.

This estate is located in one of the "Beauty Spots" of our State, a retired, healthy and delightful spot.

The estate will be sold at a great bargain by reason of declining health of the present owner.

Particulars can be had from EDITOR FARMER.

First Eve angelical Alliance: In the garden of Salem.

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, APRIL 3, 1879.

THE CALIFORNIA FARMER READING ROOM, AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞ Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

Bills Sent Out.

We would hope that those of our patrons to whom we have sent bills, will kindly remember that a good many *little sums from each* would be of great advantage in times when money is of value.

Home.—Our Poets' corner offers a Gem from "Longfellow" that will be read with great interest. "Little Girlie" and "Twixt Leaf and the Lace," and "New Year's Eve," are also happy poems, "True Courage and Self-Control," by Mrs. Henry Ward Beecher, is worthy the special reading of *all mothers* who control and influence their daughters. "Why Men grow Rich" "Romance of Pearls" "Spare the Children," will all be found sketches of value, "Domestic Recipes" valuable to every good housewife.

Horticulture.—We give a brief sketch from *Southern Horticulturist* from Gen. Stoneman's Address at the late Fruit Fair at San Buenaventura upon the "Orange Crop," the General's report is a valuable one.

"Out-door Camellias," "Monster Pear Tree" and "The Tulip Mania" are valuable items for Horticulture.

Miscellany.—"Emma's Album," should be read carefully by all album owners and album writers—the great mass of young ladies album's especially, are apt to be more or less defiled with foolish, weakly, sentimental trash, instead of that which elevates.

Agriculture.—"How we saved the Old Farm," we continue this week; we are sure our readers will peruse it with interest and commend it to their friends—it is one of the most instructive stories upon *farm interests* ever written, we copy it from the book written by "A Young Man" and published by Loring & Co., Boston.

"Typhoid Fever among the Hogs," our Hog raisers can always keep their Hogs free from this very fatal disease if they will adopt our recommendation and use the remedy we propose.

Our Front Page.—We give a valuable Letter from Paris this week that all should read.

"Gen. Grant our next President."—We invite attention to what the Farmer said of Gen. Grant nearly *a year ago*.

"The New Zealand Loan Co."—We hope all will read our condensed report of that most admirably managed Institution, it would be a good thing if all our Institutions were as ably managed and paid as well.

Agriculture at Massachusetts.—If there is one great leading interest in old Massachusetts (God Bless Her), it is Agriculture, and it is made so by the deep interest given to it by all, from the Governor, Senator, Representatives and all the leading public men, to the merchants, manufacturers and all who have influence, in Massachusetts they believe that Agriculture is the basis of all prosperity.

We have before us just received, the handsome bound Volume of Reports upon this interest so well and carefully compiled by C. L. Flint, Esq., whose life almost has been given to this cause, and whose able Reports, Lectures and published books have made him known and honored world wide.

The present Volume received is over 500 pages and has numerous valuable Essays, which we shall soon give in whole or part.

We return thanks for the work to Mr. Flint.

A Magnificent Estate.

A large and very fine estate of some THREE HUNDRED ACRES with a fine Orchard of the very choicest fruit; a large Vineyard, very productive, a large number of Fig Trees, great bearers.

ORANGE, LEMON, OLIVE, and choice EXOTIC FRUITS of all kind.

This estate is located in one of the "Beauty Spots" of our State, a retired, healthy and delightful spot.

This estate will be sold at a great bargain by reason of ailing health of the present owner.

Particulars can be had from EDITOR FARMER.

THE SEASONS, PROSPECTS, ETC.

Rarely have we had a more gratifying prospect after so many doubts of the rains, and so much of misgiving as to crop prospects; but now we think all doubt has vanished, and there is a general cheerfulness all over the State.

There may be some places where rains have not been so plentiful or where the frosts have nipped some gems, and our Orange growers had fears, but now the recuperating power of Nature has made everything smile and bright hope gives an assurance of goodly crops everywhere.

The sale of Agricultural Implements has been much less this year than usual or was expected or hoped for, but this has resulted from the resolution of our farmers to repair the machinery on hand and thus economize, as the state of trade, credit and finances demanded it.

The Wool Clip is now coming in and promises a fair Clip, but at low prices.

The Fruit Crop will be more abundant than ever, already Strawberries flow into market very freely, and Oranges come abundantly—other Fruits show a great promise.

The Vineyardist is sure of large sales of Wine at home and abroad, the credit of California Wines is rapidly winning *golden* rewards.

The Hop Crop will not be large nor profitable, as this product is now selling at less than cost of raising it.

The Great Crop of our State, our Grain Crop shows most promisingly, and there is no doubt now but that the Crop of 1879 will give us at least 450,000 tuns for export and may swell up to 550,000 tuns.

The Live Stock interest is rapidly improving and brings a fair reward to the raiser.

The Great Vegetable interest, our market gardens are hopeful, the exports of these products over the Railway being very large these and Fruits exported now are a very large interest.

The Honey Trade of this State in 1879 will reach the enormous amount of *one thousand tuns*, here is a *sweet* interest to build up our State.

The increase of Nut trees gives a very large amount now of marketable Nuts so that we have this *home product* to check foreign importations and save our gold for home use.

The whole outlook is a good one for which we all should be very thankful when there is so much to disturb the business and current of public interests—but let all work manfully to do our duty to the State's great interests, and use kindness and forbearance in times of trial and trouble, and soon the sun of joy, hope and prosperity will come upon all, and our State and our people again be on the high road to an enduring prosperity.

Complaint of Dirty Wool.

Wool growers and wool dealers generally have but little conception of the great loss in weight that is made by the dirt that is found in the wool when it undergoes the washing process at the mills, one, two and three washings in suds is required to abstract the dust.

In a visit at the Mission Woolen Mills recently, Mr. Roberts kindly explained the process and the various losses; coarse wool that costs only 9 cents is so dirty that when cleaned it costs 45 cents—while better grades that costs 17½ cents, when cleaned costs only 34 to 38 cents.

Coarse wool from common sheep receives less care, getting more dirt and therefore less in value, the fine wools of high grade of Spanish when cleaned costs 60 cents per pound.

Our sheep raisers, if more care was taken of their sheep, keeping them from scab, burr fields and from dirt would realize a better price for their wool, but but the best sheep pay best.

Farmers and the Constitution.

Farmers, do not make a mistake on this great question.

The New Constitution will work *against all your vital interests*.

Vote solid the great word—NO—and save your farms and your labors.

There may be good things on *Land Monopolies* in it—but all these will be remedied by the *incoming Legislature*—and all needed *amendments* to our Constitution will then be made.

Elect good men to the next Legislature, then all needed reforms can be had—but for the presented New Constitution, every farmer should vote, No! No!! No!!!

For our Boys.

This is an *Appeal Book*, an appeal in behalf of many of our best literary writers, at home and abroad who have contributed to this Volume to make a valuable and interesting book, which has been published and is for sale, the proceeds to be devoted to the Youth's Directory, an Institution built up and sustained by the liberality of our citizens for the friendless youth of our City.

The Book is a most excellent one, edited by A. Dietz, Esq., A. M., and published by A. L. Bancroft & Co., who have it on sale—we hope the work will receive the patronage of all the liberal hearted—it is intrinsically a valuable work.

Hittell's History of San Francisco.

This is a work of 500 pages, giving a history of the Indian Era, Mission Era, Village Era, Golden Era, Golden Era in decline—Silver Era, and generalities of the History of California.

There is an amount of valuable history in this work not found in any other record, and a Book that should be in every library.

The Volume has been prepared with great labor by John S. Hittell, Esq., and is dedicated to the Pioneers—published in handsome style by A. L. Bancroft & Co., and for sale by them, we shall sketch from it soon.

A Free Book of nearly 100 large octavo pages for the sick. Full of valuable notes on Scrofula; Diseases of Women; Aches and Pains; Heart Troubles and a great variety of Chronic Diseases, with evidence that in most cases, these diseases are curable. Sent for one stamp.

GENERAL GRANT.

[REPUBLISHED BY REQUEST FROM THE CALIFORNIA FARMER OF JUNE 13, 1878.]

General Grant, Ex-President of the United States, now travelling in Europe sends a very appropriate Letter in reply to an invitation to him to visit Ohio and take part in the celebration of decorating the graves of the patriot soldiers who fell in defence of our Country in the late war.

General Grant in his present tour of Europe, has received more personal attention and honors from the Crowned Heads of Europe than ever fell to the lot of one man before.

In this most remarkable tour of Gen. Grant we think we see more than meets the eye of a casual observer; Gen. Grant has been and is now in a situation to study well the condition, character, and situation of all the European Nations, and he will return well prepared to act a very important part in the history of our Country in the near coming years.

The present political aspect of our Country tends to a great contention and a strife of parties; Communism with its Hydra head, religious, sectarian and political fires will be kindled, old parties will fade away and new parties will be formed; the old feuds of the North and South are not yet dead as is seen by Congressional feuds upon the Presidential question, and in the great whirlpool of party strife there will be more or less danger to our Country, there will of necessity be needed some *one great mind*, who "Napoleon" like can direct the masses when the storm is at its height, for the day is near when this storm must come and when we shall need a mind cool, calm, firm, and brave enough "to ride upon a whirlwind and to direct the storm," and that Mind, Character and man we think we see in General Grant. He is now preparing himself by that knowledge of the world, which will fit him to act the part he will be called upon to act when he returns to the United States; for we are fully convinced that, as "coming events cast their shadows before" so Gen. Grant is surely destined to act a great and important part in our Country's history in early coming years.

We believe that events are ripening that will so revolutionize our political and social government that by the next Presidential election Gen. Grant will be called to act a very important part for the welfare of our Country, and undoubtedly be once more called to the President Chair.

We append the Letter alluded to above:

Milan, Italy, April 27, 1878.

Maj. Charles D. Miller, Secretary Society of the Soldiers and Sailors of Licking County, Ohio.

Dear Major—Your cordial invitation for me to attend a general reunion of the veterans of Ohio, to be held under the auspices of the Society of the Soldiers and Sailors of Licking County, at Newark, on the 22d of July, is this day received. It always affords me pleasure to meet at the gatherings of the soldiers and sailors who patriotically risked their lives for the preservation of the country, and it would afford me special pleasure to meet with those hailing from my native State. But the Atlantic will be between us at the time of your proposed reunion.

This is the first opportunity of my life to visit Europe, and will likely be my last. There is much here to see which I have not seen, and I desire to remain to partly accomplish the tour which I had marked out for myself. I trust the veterans of Ohio may have a most auspicious reunion on the coming occasion, and that none of them will ever feel a disposition to apologize for the part they took in the late struggle for national existence, nor for the cause for which they fought.

With great respect, your old companion

U. S. Grant.

We have *republished* the above sketch of Gen. Grant on his European tour which appeared in the Farmer nearly *a year ago*, and we believe it was the *first suggestion* made in any Journal for Gen. Grant as a Candidate for the Presidency in 1880.

From the commencement of the remarkable tour of Pres. Grant among the Crowned Heads of Europe, which we watched with a deep interest, we felt convinced that there was in that tour a very remarkable *Providence*, as if fitting and preparing a way for the events which were to follow, and these events are near at hand.

Gen. Grant will soon return to the United States and his reception will be such as to convince all that he has been Providentially fitted to be called once more to the Presidency, and we are sure that he will be welcomed home by such an enthusiastic welcome as was never accorded to a citizen of the United States since the days of Washington, and this reception will be a convincing proof that Gen. Grant will be nominated as the Candidate for President, and being nominated he will most assuredly be elected President of the United States in 1880—to our minds this is as certain as that an election shall take place.

Death of a San Francisco Lady in England.

Died at Tunbridge Wells, England, Mrs. Mary Whitney Stanford, the beloved wife of A. P. Stanford formerly of this City, but recently a resident in England;—Mrs. Stanford's age was 55 years 11 months.

This will be sad news to a very large circle of kindred and friends to whom she was warmly attached, and by whom she was ever loved and honored, her character and inner life was beautiful, gentle, loving and kind; a devoted wife, a loving mother, a noble woman; her loss will be deeply deplored, but her memory will long be cherished.

The husband of Mrs. Stanford was in this City when the sad news reached him by telegraph, Mr. Stanford left for England immediately to bring the body back to New York to be buried in the Family tomb.

Our sympathies are tendered to the afflicted husband and children who are thus suddenly bereft of one so good and noble.

THE GREAT QUESTION NOW.

The great question now is among all classes What shall we do about business? at the present time there is *no business*, and this stagnation is not confined to any one class of business or any one kind of trade—the *blight* is upon all, and it will remain until the now absorbing question The Constitution, is settled.

If any of our citizens will take the time to ride through the length of our leading streets and count the houses and stores now "To Let" they would be almost confounded, they count in *hundreds* and *thousands*, and will increase until landlords shall learn that their own interests are best advanced by liberality towards their tenants.

In our last issue we gave our views of the *New Constitution* and urged our farmers one and all to oppose it, as it was against all the interests of the Farmer, we also find it opposed to the best interests of the Manufacturer and the Mechanic, and in despite of all the hue and cry of the W. P. C.'s they too will find if the New Constitution should be adopted that their labors will be taxed greater than ever before, all the talk about cutting down *salaries of officers*, and other *reforms* is all moonshine.

All the needed reforms in our Constitution can best be made by the *next Legislature*, and the way to secure a Good Constitution will be to reject the New, first, then elect good and true men to the next Legislature, and thus by a wise and careful examination of all the good things in the New Constitution secure all the *good* and reject all that is *bad*, and then we can have a Constitution that will be worthy to live under.

It is one of the strangest things in our political horizon that was ever yet seen, that here in America the "Land of Freedom" our own American citizens seem to have but little to do in *making our laws*, the foreign born, the ignorant, unlettered class who can neither read or write seem to be the dictators of our public meetings, and seem to direct how our laws shall be made.

We attribute the present condition of trade and the general fears of greater troubles to have all been caused by the neglect of that duty which every true American owes to his country in permitting the alien interests to usurp the rights of Americans, and we can never see peace and prosperity until we perform our whole duty to our Country by a faithful and earnest use by every citizen of the sacred right of Ballot; and when this is faithfully used we shall *only* elect good men as Senators and Representatives, and then they will form a Constitution without great defects and the people will accept it, adopt it and say

Amen to it.

RAILROAD AND STEAMSHIP TRAVEL.

Now that the Travelling Season is about to commence we will give some of the *Distances* of the Great Routes over the world, all intermediate distances are furnished in the excellent "Rail Road Guides" furnished by all the routes now travelled.

The vastly increased travel now between the "Australian Colonies" New Zealand and New South Wales and the Pacific Coast makes these reports very important.

	miles.
From Sydney by steamer to San Francisco	7,200
" San Francisco to New York by railroad	3,370
" New York to Southampton, England	3,200
Entire round trip from Sydney to Europe	$13,220
From Sydney to Southampton by steamer	11,000

For European travellers we give some of the noted Ocean Routes.

OCEAN ROUTES.

From New York to Hamburg, per steamer	3,493
" " " Bremen	31,78
" " " Havre	20,28
" " " Brest	29,62
" " " Plymouth	29,68
" " " Bristol	3,010
" " " Banks of New Foundland	0,80
From Boston to Cape Race	8,20
From Philadelphia to New York	2,49

SEA ROUTES.

London to Antwerp	2,10
" " Rotterdam	2,30
" " Hamburg	1,80
Dover to Calais	24
" " Ostend	63
Folkestone to Bologne	30
New Haven to Dieppe	64
Southampton to Havre	120

As these are much travelled and important routes for travelers abroad it will be well for them to note down these facts, and for our Australian friends they will find the route from *Sydney to Europe* via San Francisco by our splendid Mail Steamers, our Central Pacific Railroad and the splendid Pullman Cars to New York and thence by the Cunard Steamers, *the finest* routes for travelers in the world.

STAGNATION IN TRADE.

It is seldom that we are called upon to record such uniform dullness and depression in trade circles as meets us and stares us in the face whenever we take our morning stroll through Battery, Sansome, Bush, Pine, Front and California Streets, extending to Market and other business thoroughfares, where are to be found leading houses in Dry Goods, Groceries, Fancy Goods, Hardware, and even in the Agricultural line where business ought now to be very active and stirring, but no, there seems to be a pall thrown over the face of all business interests—and wherefore? Upon inquiry the answer is universal. It is the *fear* that the proposed new Constitution that is to be presented to the people of this State for their suffrage, May 7th, will be adopted and become the law of the land. Our people seem to be aroused upon this vital subject, and well they may be, for should the instrument receive the vote of the people, it will cause a perfect revolution in our commercial, agricultural and business affairs generally, and call forth such changes in the administration of affairs generally, and call forth such changes in the administration of affairs that will disturb all material interests that effect the general welfare of the people of California.—*Market Review.*

Good books are like good seed, sure to produce good deeds if the soil of the mind is good.

AUSTRALIAN EXPOSITION.

We are informed that arrangements are in contemplation with several of the leading manufacturers in the East of agricultural machinery, to send a well arranged assortment of their manufactures to the Australian Exposition. And that the medium through which these several interests are to be represented, will be a well known gentleman of this city, who has had great experience in every department of agricultural machinery, both as an extensive manufacturer, user, and vendor of the same.

His commercial education, business knowledge, great experience, commanding ability and address as a salesman, fit him in an eminent degree to represent most efficiently and ably the important interests to be confided to his care.

We suggest in this connection that such manufacturers in this city (of whom there ought to be scores, if not hundreds), as contemplate sending samples of their wares to this Exhibition avail themselves of this same medium, by means of which their expenses will be greatly lessened, and their several interests ably represented. The time for opening the Exposition has been extended from August 1st to September 1st, by reason of which ample time is given all to make the necessary preparations and shipments.

Knowing the gentleman who intends going to the Exposition, we can most earnestly recommend all who desire to exhibit there to give their interests under his charge as the best man to represent them carefully.

RECEIVED AT READING ROOMS:

We have from that inexhaustible fountain that sends forth a constant stream of the most valuable agricultural lore, we mean the Book Publishing House of Orange Judd & Co., of New York, a new and very valuable Book named, *Farmers' Implements and Machinery.*

The object of this book is to present to the minds of our farmers in a simple and intelligent manner the great leading principles of mechanical science applied directly to the farmer's every day labors—in fact, when speaking of *implements for the farm;* this book is very fully illustrated by over 300 engravings of almost every farming implement in use, it may be said truly to teach how to use these implements to the best purpose, and to teach "the science of farmers forces" a very capital Book costing but $1.50, this excellent work is compiled by John J. Thomas, Esq., a new edition reviewed and improved.—Orange Judd & Co., are Publishers—for sale by Bookstores generally.

New Flouring Mill.—We have the Pamphlet before us of the "Cosmopolitan Milling Company" giving a full description of the "New Process" by D. Bequette, inventor, it is a new process of milling and a new style of building, also represented in the illustration, like a "Chess Board" for the ground plan, each of the *ten stories* above the ground floor being one square of the chess board narrower than the last—thus making the building as it rises gradually taper to a point, yet the plan and style of the building is excellent, and must become popular.

The Silk Worm.—We have received from the Department of Agriculture at Washington, the special Report on the "Silk Worm" or manual of instruction for the production of Silk, with illustrations of the silk worm in all stages from the egg, onwards the millar-worm in every stage of growth, a valuable work by Charles V. Riley, Esq., Entomologist.

New Music.—One of the sweetest Songs that has been sent out for a long time is one just issued by S. Brainard & Sons, of Cincinnati, Ohio, this piece is entitled the pleasing name of *Brown Eyes close to the Window*, and is illustrated with a Frontispiece of a sweet young maiden peering from the window, and in the language of the song singing happily:

"Brown eyes watching, watching for papa
Smiling sweet welcome for me;
Open the window and fling wide the door,
Papa is coming, bright eyes to see."

Everybody that loves sweet music should have this Song.

A SUDDEN DEATH.

A GOOD MAN GONE.

E. J. Kirch, formerly in Cole's drug store, but more recently a student with Dr. Bronson, was found in the Doctor's library reclining in a chair, clad in his night-clothes and perfectly unconscious. He has been a very close student, and was accustomed to be up till a late hour at his studies. Evening before last he was up with a party writing letters to friends in Germany till 1 o'clock. The bed showed that he had retired and got up after the *Enterprise* was delivered, as a copy of that paper was found still folded and lying on his bed. It is supposed that after arising he had been taken either with apoplexy or congestion of the brain. He was attended by a number of physicians, who did for his relief and recovery everything their medical knowledge suggested, but he remained unconscious until his death, which occurred at 20 minutes before 8 o'clock last evening. His mind was completely absorbed in the study of medicine. He could hardly think or talk of anything else, and seemed to think the time lost that was given to anything else. Had he lived he would undoubtedly have made a great name in the profession he had chosen. He was a young man very highly esteemed by all who knew him, and when it was known he was dead expressions of sorrow were universal.

The *Senatorial Enterprise*, of Nevada, a few weeks ago announces the above—Mr. Kirch passed away thus calmly on the 20th of February.

It was a pleasure to know Mr. Kirch, in our visit to Mount Davidson in the spring of 1877—and the memory of his genial and cultivated mind will long be remembered—a few days spent in his company were a refreshing, those days and his intelligent and friendly conduct will long be in memory—his body sleeps, but his spirit lives and will come to us often as a reminder of his great worth and our loss.

Home is the happy place when all are there.

Litolff's Musical World.

This is an excellent monthly magazine of new compositions for the piano forte. Edited by Clemens Schultz, Esq., and published by Arthur Schmidtz, Esq., at 40 Winter Street, Boston.

This magazine comprises 20 pages music monthly, the music is from such eminent composers as "Abt," "Behr," "Loescherie," "Brambsman," "Magnes," "Reinlander," "Kublu," "Kong," and "Abrasor," and are songs, serenades, chimes and greetings, and very select. The list of music sent us contains the rarest collection of music extant—we return thanks for this music.

Vermont Merino Sheep Breeders' Association

First Vol. Register, 305 pages, 22 plates, substantial leather binding, contains history of importation and improvement of Merino Sheep, register and pedigrees of 572 stock rams, with pedigree and history of over 200 flocks, pure bred, improved Spanish Merino Sheep. Sent postpaid on receipt of $2.00. ALBERT CHAPMAN, Sec., Middleburg, Vt.

Albert Chapman, Middleburg, Vt.

Large experience in purchasing and shipping Merino Sheep, and an intimate acquaintance with all the recorded flocks in Vermont. Will carefully select and forward for reasonable commissions large or small numbers.

NURSERYMEN AND FLORISTS ABROAD

Nurserymen and Florists abroad who desire to make their business widely known on the Pacific Coast; those Nurserymen, especially, who have NEW and RARE kinds of Trees, Plants, Shrubs, or Seeds, should remember that by advertising with us and making their business known in our columns, they can secure an extensive trade from our Golden Land, and at the same time make their business known over the whole Union, and also in Europe and over all Australia, as our JOURNAL circulates there to a large extent.

This is the season when Nurserymen should make known what they have for sale.

THE AUSTRALIAN GUM TREE.

The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

☞Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the back bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach o Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

TESTIMONIALS.

The manufacturer of these Pills has a great objection to the "wholesale" publication of testimonials, which in many cases are fictitious, and are only intended to mislead. Yet, for the satisfaction of those who are suffering, and have not yet used his medicines, he selects a few, who are best known in the colony and in the town he lives, and their *personal testimony* will satisfy the most sceptical.

These testimonials above named with many from California, since their recent introduction, will quickly show that the

Eucalyptus Remedials

are the best ever yet introduced. Full and ample testimonial accompany all parcels.

MANUFACTURED ONLY BY

DAVID CLARKE,
Wholesale and Manufacturing Chemist,
AT HIS LABORATORY,
WARWICK, QUEENSLAND.

N B.—These Preparations are only manufactured by me, at my Laboratory, Warwick, Queensland, and none genuine without my signature on each bottle or box.

Home Miscellany.

"There is no place like HOME.
Home! It should be Heaven on Earth

LITTLE GIRLIE.

Little girlie's three years old;
Baby's just a week.
Little girlie thinks it queer
Baby can not speak.

Little girlie, wondering, asks,
Whence did baby come?
Mother says, "God sent him here
From his heavenly home."

Little girlie ope's her eyes;
Does not understand.
Mother tells her lovely things
Of the Happy Land.

Little girlie hops away,
To the cradle creeps;
Softly lifts the curtain up,
To see if baby sleeps.

Then, in her most winning tones,
Soft we heard her say,
"Baby, was God pitty well,
When you came away?"

—*The Youth's Companion.*

FROM MY ARMCHAIR.

HENRY W. LONGFELLOW.

To the children of Cambridge, who presented to me on my seventy-second birthday, February 27, 1879, this chair, made from the wood of the village blacksmith's chestnut tree.

Am I a king, that I should call my own
This splendid ebon throne?
Or by what reason, or what right divine,
Can I proclaim it mine?

Only, perhaps, by right divine of song
It may to me belong;
Only because the spreading chestnut tree
Of old was sung by me.

Well I remember it in all its prime,
When in the summer time
The affluent foliage of its branches made
A cavern of cool shade.

There by the blacksmith's forge, beside the street,
Its blossoms white and sweet
Enticed the bees, until it seemed alive
And murmured like a hive.

And when the winds of autumn, with a shout,
Tossed its great arms about,
The shining chestnuts, bursting from the sheath,
Dropped to the ground beneath.

And now some fragments of its branches bare,
Shaped as a stately chair,
Have by my hearthstone found a home at last,
And whisper of the Past.

The Danish King could not, in all his pride,
Repel the ocean tide,
But, seated in this chair, I can in rhyme
Roll back the tide of Time.

I see again, as one in vision sees,
The blossoms and the bees,
And hear the children's voices shout and call,
And the brown chestnuts fall.

I see the smithy with its fires aglow,
I hear the bellows blow,
And the shrill hammers on the anvil beat
The iron white with heat!

And thus, dear children, have ye made for me
This day a jubilee,
And to my more than three score years and ten
Brought back my youth again.

The heart hath its own memory, like the mind,
And in it are enshrined
The precious keepsakes, into which are wrought
The giver's loving thought.

Only your love and your remembrance could
Give life to this dead wood,
And make these branches, leafless now so long,
Blossom again in song.

'TWIXT THE LEAF AND THE LACE.

D. F. TAYLOR.

When the leaf of the mulberry is spun into thread,
Then the spinner is shrouded and the weaver is dead;
And that shroud is unwound by the fingers of girls,
And the films of pale gold clasp the spool as it whirls.

As it ripens and rounds,
Like some exquisite fruit
In the tropical bounds,
In air sweet as a lute,
Till the shroud and the tomb,
Dyed in rainbow and bloom,
Glisten forth from the loom
Into garments of pride,
Into robes for a bride,
Into lace woven air
That an angel might wear
Ah! marvelous space
'Twixt the leaf and the lace,
From the mulberry worm
To the magical grace
Of the fabric and form!
Oh, imperial state,
Splendid empire in leaf,
That grows grand on the way
To the sky and the day.
Like the corralline reef
To be royally great.
Dead gold is barbaric, but its threads can be woven
Into harmonies fine, like the tones of Beethoven,
Can be raveled and wrought
Into love-knots of faith
For the daughters of ruth—
Into garments of thought,
Into pinions for truth—
And be turned from the wrath
Of a misty ideal
That may vanish in night,
To things royal and real
That shall live out the light.

"When a stranger treats me with want of proper respect," said a philosophic poor man, "I comfort myself with the reflection that it is not myself he slights, but my old shabby coat and hat, which, to say the truth, have no particular claims to admiration. So if my hat and coat choose to fret about it, let them; it is nothing to me."

TRUE COURAGE AND SELF-CONTROL.

With some, real courage and self-control are natural; almost, if not quite, instinctive. They do not appear to know what fear is. Still, every parent knows the great difference that is seen in the same family. One child rushes into all kinds of danger apparently without any fear, yet will be greatly excited, and manifest no self-control; while another shrinks from danger, but, if it comes, will be far more self-possessed than the fearless one, making no out-cry, and openly manifesting no agitation. This last characteristic is perhaps less frequently shown in young children than the bold, courageous, almost aggressive bearing.

We doubt if true courage can be as successfully cultivated as self-control. A man is expected to be courageous, and, if he fails, sinks greatly in the world's estimation. Women, unless of a morbidly sensitive temperament, have more self-control than men. If it is not natural, few reach mature age without seeing that the necessity for self-possession is important and necessary. It usually comes through experience and often repeated failures or great suffering. Perhaps it would be wiser to call it endurance rather than self-control; yet are they not nearly akin? To endure is to exercise self-command under suffering or trial. And our object is to impress upon our readers, especially mothers, the value of these two most important traits of character. Few understand or more than half comprehend the treasure they possess if they are gifted with either of these admirable qualities; but if the two are found in one person they give their possessor a power which can only be sufficiently estimated when brought into full object by some unforseen circumstance which calls for their prompt and effective exhibition. A vast amount of property is destroyed, or it may be life itself put in jeopardy for the lack of this most desirable combination. Those who are naturally thus endowed should guard this valuable possession with unceasing care; and mothers, seeing that any of their children are deficient in either qualification, should spare no effort to cultivate it carefully in those committed to their care.

For the lack of a fair portion of courage and self-possession quite as many lives are lost as through the threatened calamity. Not holding themselves under control they lose all power of acting reasonably, and often rush blindly into the danger they seek to avoid.

When we say that with some; courage and self control are found from earliest childhood, we don't mean that this development, while a child is very young, is apparent in any remarkable degree; but all know that in large families, or in a village where many children are thrown together, they soon, and perhaps without any words, recognize their leader; and in times of trouble or danger look instinctively to that one. It may be that he—or she—as keenly realizes the danger as any of the party, but in spite of fear they do not lose self-possession or the power to face whatever has made the others wild with fear.

We have no doubt, that in many children this trait has been buried or destroyed by injudicious parents, or, worse, by unscrupulous servants. If parents are naturally timid themselves, and have allowed this weakness to master them until incapable of exercising the slightest self-control, it would be singular if their children did not grow up weak and irresolute—unable to keep calm or act judiciously at the very moment when their own comfort and safety and that of those depending on them is in jeopardy. If parents could realize how the young are moulded and governed by their own conduct they would labor hard to secure at least the semblance of self-government when in their children's presence.

We have known ladies scream, or become almost convulsed, if a bug or worm was found on or near them; or lose half the pleasure of a summer in the country through such weakness because of the busy insect life all about them; afraid to touch a rose leaf a tiny, neat little worm or a rose-bug should have sought food and shelter among the leaves.

When mothers betray such weakness it is not necessary to see their children to understand that it will be their tendency to be equally foolish.—Now and then one more sensible may be found in a family where the children are brought up to see such weakness daily manifested by the mothers. Or, on reaching the years of maturity, the germs of self-control or true presence of mind, that have been choked and dwarfed by the mother's weakness, but fortunately, perhaps, kept alive by the father's teachings or their own inherent strength, may develop all the nerve and self-control necessary to make a noble character.

We have been led into this train of thought by an account of the courage and self-possession of a lady in New Orleans under circumstances of the most startling character, when a moment's wavering or weakness manifested would have cost her her life. She was a woman of wealth, with rich surroundings and costly adornments. She was that evening alone, with only one servant in the house, and laying aside some articles of jewelry and replacing them in their appropriate cases in her bureau she chanced to raise her eyes to a mirror opposite. From a night-lamp standing on a table in the opposite corner she caught in the mirror a reflection of a figure of a man curled up under a center table, but hidden from all sight save what was gained by the reflection cast in the mirror from the lamp on the floor. In this way she saw one of the hands resting on the floor. This hand lacked two fingers, and she at once suspected that close by her was a most notorious character, whose crimes and depredations had been the terror of the neighborhood. Suppose she had screamed or made a hurried effort to reach the door?—That would have sealed her fate. But forcing herself to be calm she finished what she was doing at her bureau and then quietly stepping to the bell rang for the one servant, then in the house.

When the girl appeared she said "Jane, I wish you would step round to Mr. ——— (naming a jeweler in the neighborhood) and tell him I wish he would send me back immediately the diamonds he has been resetting. They are the most valuable of all I have, and I feel uneasy to have them out of the house and not under my own care another night. Tell him to send them to-night, even if not done. Wait, I'll write him a note."

So this brave lady seated herself with apparently the greatest composure by the very table where the ruffian was concealed, and wrote. We can readily imagine that she wrote not for her diamonds but for help. The girl took the note, and alone, absolutely alone in the house, save with the fearful object concealed under the table, this lady waited. To avoid awakening the least suspicion she busied herself in putting various articles away in different parts of the room, even humming a tune or little snatches from some opera. We can well imagine that she dared not attempt to sing lest her voice would betray her. How fearful must have been that waiting! How full of joy and safety the sound of the bell when the girl returned! But she came not alone. Her friend promptly answered her appeal for help, and, bringing with him the police, the man was captured before he had a moment's time to defend himself.

The story speaks for itself, and more forcibly than anything we could say teaches the importance of cultivating courage, governed and held firmly by self-control or presence of mind.—MRS. HENRY WARD BEECHER, in *Christian Union*.

WHEN MEN GROW RICH.

It is not true that the great victories of life are to the sharp and immoral man, as a rule. Here and there by sharpness and cunning, men rise into wealth, but that wealth is not of a kind to remain. It takes a certain amount of virture, of self-denial, of morality, to lay up and to keep money. In the lives of nearly all rich men there have been periods of heroic self-denial, of patient industry, of Christian prudence. Circumstance did not make these men rich. The highest moral prudence made them rich. While their companions were dancing away their youth, or drinking away their middle age, these men were devoted to small economies—putting self-indulgence entirely aside. If our correspondent or our readers will recall their companions, we think the first fact they will be impressed with is the measure of equality with which they started in the race for competence or wealth. The next fact they will be impressed with is the irregularity of the end. Then, if they make an inquisition into the causes of the widely-varying results, they will be profoundly impressed with the insignificant part "circumstances" have played in those results. Circumstances? Why, the rich man's son who had all the "circumstances" of the town has become a beggar. The poor, quiet lad, the only son of his mother, and she a widow, who could only earn money enough to procure for her boy the commonest education, is a man of wealth, and has become a patron of his native village. The man who possesses and practices virtue makes his own circumstances. The self-denying, prudent man creates around himself an atmosphere of safety where wealth naturally takes refuge—provided, of course, that the man has the power to earn it, either in production, or exchange, or any kind of manual or intellectual service.—*Scribner*.

Romance of Pearls.

I will tell you a circumstance that happened twenty-five or thirty years ago, when I was residing in Calcutta. One morning our friend, the late Dr. Vass, Surgeon of the Royal Army, brought to my husband, Dr. John Grant, a box containing twelve or thirteen pearls of various sizes, saying: "Grant, you are a well known man in Calcutta, and I want you to hear the curious account of these pearls, and to take charge of the box, and let me know any change you may see in them. Their history is as follows: About forty years ago a lady at Amboyna gave a pearl to each of the two sisters, saying: "These are breeding pearls; take good care of them; never touch them with the hand, as heat injures them, and feed them on rice.' One of these sisters has just come to Calcutta, and she has lent the box to me to show you. In the forty years she has had it, this is the result—twelve or thirteen young ones." The box was opened, and there lay on cotton the mother pearl, a rather large but ill-shaped individual. The eldest daughter, as I called it, was a lovely pearl about the size that jewelers generally set three in a ring. The others were perfect in shape, but gradually decreased in size; two very small I called the twins, as they stuck together, and the last was a very wee seed pearl. According to instructions, rice was put into the box, which was locked in a secret drawer in the cabinet, of which my husband alone kept the key. After some days we opened the box, and to our astonishment we found that every grain had been nibbled. I cannot think of a better word. How nibbled I cannot imagine, but that one fact I can vouch for. A few weeks after we had to leave Calcutta. The box was returned to Dr. Vass, and what became of it I knew not. I have often mentioned it to my friends, and some years ago I saw in a book that lay upon my friend's table, that people in the East believe in breeding pearls.—*London Land and Water*.

Philomene's Marriages.

A French society novel. By Henry Greville. With a preface to her American readers. This is the last novel of this popular and fascinating writer, just written, and translated in Paris by Miss Helen Stanley, under the author's supervision, and published in this country by T. B. Peterson & Brothers, simultaneously with the publication of the work in Paris, being printed here from the advance manuscript of the work just received from the author, from France. "Philomene's Marriages" is a charming story of French life, located in Normandy, and also in Paris, and the heroine's life is one of every-day occurrences, made up of the never-ending round of country pleasures and duties, narrated in a most fascinating manner, and is an admirable picture of home-life, being a comedy of life, full of cleverness and wit, while the book is commendable for its high moral tone, as well as its interest, which is preserved throughout. It also contains a preface to the work, written by Henry Greville to her American readers, which preface is only published in the American edition of this, her new story of French life. Philomene's Marriages is published in a large square duodecimo volume, paper cover, price 75 cents, in uniform style with Petersons' editions of "Dosia," "Savelli's Expiation," "Marrying off a Daughter," "Pretty Little Countess Zina," "Sonia," "Gabrielle," and "A Friend," by Henry Greville, and will be found for sale by all booksellers and news agents, and on all railroad trains, or copies of it will be sent to any place, at once, on their remitting the price in a letter to the publishers, T. B. Peterson & Brothers, Philadelphia, Pa

Flags of all nations—paving stones.

NEW YEAR'S EVE.

Speak gently darling Hush! the hour is holy,
Too sad and solemn for unbridled mirth,
Draw near and watch, with chastened gaze and lowly,
The Old Year dies, the New Year springs to birth

Stand close, my darling, mother's arm is round thee,
And she will shield thee from the chill night air,
While saints and angels, all unseen, surround thee,
Who bid thee join them in the midnight prayer.

The Old Year dies; behold it calmly,
Prepared to take its everlasting flight;
While gentle earth, in silent grief complying,
Spreads out a winding sheet of black and white.

The far-off stars look down in silent wonder,
And shed unconscious lustre o'er the gloom,
As children learning in their youth to ponder
The unseen things which lie beyond the tomb.

From out the tried tower a muffled knelling
Warns that the year is sinking to its rest;
While hearts bereaved in many a lonely dwelling,
Are mourning o'er their dearest-loved and best.

The Old Year sleeps! Then tranquil be its slumber,
And calm their sleep who on its breast repose,
Who willeth all the days of man to number,
Hhath called them to their rest when best he knows.

The Old Year dies! Yet in His sight it liveth,
With whom all seasons and all years are one;
To His beloved ones such sleep He giveth,
Reward of faithful toil and duty done.

* * * * *

Seen o'er the distant east the morning breaking,
Will flush with rosy tints the snow-clad earth;
Then sleep, my darling, till the New Year waking,
Arouse thee with a kiss to greet its birth.

—*Sunday Magazine*.

Spare the Children.

An indignant parent lately complained of the severe tasks which school children are compelled to accomplish. The complaint is well founded. Whether education or mere discipline is the object of attendance at school, neither justifies the physical constraint and mental exertion to which hundreds of thousands of children are subjected every day. Few soldiers are as severely taxed on the drill ground as many children are in our show schools and others which aspire to high reputations for order; but, as if this cruel training were not destructive enough of health and spirit, the custom grows more and more popular with teachers to make school hours merely the time for recitation, the lessons to be studied at home. After six hours spent in the school-room, and from four to six spent at study at home, how much time and inclination has a child for recitation? Parents should remember that rightfully they have a voice upon the course of studies to be followed by their children, and should refuse to allow home to be turned into a school-room unless they are themselves going to officiate as teachers and save their children from double restraint and double duty.

[The *New York Herald* speaks well in defence of overtaxing the energies and brains of children—the school room is the place for study—home for social life and happy recreation.—ED. F.]

DOMESTIC RECEIPES.

A RECIPE WORTH ONE THOUSAND DOLLARS.—The Ohio *Cultivator* says the following recipe is worth a thousand dollars to every house keeper: "Take one pound of sal soda and half a pound of unslacked lime and put them in a gallon of water; boil twenty minutes; let it stand till cool, then drain off and put in a small jug or jar. Soak all your dirty clothes over night, or until they are wet through, then wring them out and rub on plenty of soap, and in one boiler of clothes well covered with water, add one teacupful of the washing fluid, boil half an hour briskly, then wash them thoroughly with some suds, then rinse, and your clothes will look better than by the old way of washing twice before boiling. This is an invaluable receipt, and every poor, tired woman should try it."

CORN DODGERS.—One quart of corn-meal a tablespoonful of lard, two eggs, a tablespoonful of salt; scald the meal, with the lard in it, with boiling water; cool with a little milk; add the eggs beaten light; beat very hard for ten minutes; make them thin enough with cold milk to drop off the spoon and retain their shape in boiling lard; serve hot, have the lard boiling hot when you drop them in.

Every housekeeper should have "a place for everything and everything in its place," framed and hung in a conspicuous place and follow the directions.

BOILED APPLES.—Place a layer of fair-skinned Baldwins—or any nice variety—in the stew-pan, with about a quarter of an inch of water. Throw on about one-half cup of sugar to six good-sized apples, and boil until the apples are thoroughly cooked and the syrup nearly thick enough for jelly.

JELLY CAKE.—Three eggs, one cup sugar, one cup flour, one teaspoonful of cream tartar, one-half teaspoonful of soda, three tablespoonfuls of sweet milk; bake in jelly tins.

A NEW ART INDUSTRY FOR LADIES.—Amongst the latest novelties in fashion are buttons made of the red Watcombe Terra Cotta, adorned with paintings of favorite views in England, Scotland, and Ireland. They are about the size of a half-crown, and the views are painted by an Irish lady.

Excursion to Europe.

Mon. Eben Lowyer, of Boston, Mass., has now in preparation his "Second Grand Educational European Tour of Europe" for the summer of 1879.

The plan is to visit England, Scotland Ireland, Belgium, Germany, (up the Rhine,) Austria and the Tyrol, Italy, Switzerland and France.

This plan is a grand one and to the wealthy who search for knowledge, health and pleasure in life, this is one of the grandest enterprises of the age.

James Auchard Wanted.

A correspondent writes us to spread the information that JAMES AUCHARD, a native of Kilkenny Co., Ireland, and in California in 1866.

Any information about him if living or of his decease should be sent to this office, or to John B. Winder, Esq., Attorney at Law, Homins, Louisiana, will be gladly received.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instrument and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

$350.00.

Miscellany.

Gatherings along the way side,
Floating gems by every tide.

FOR EMMA'S ALBUM.

BY HALLEY H. HEWITT.

I.

An album is a casket where
A lady treasures thoughts of friends,
O'er which to read and sigh whene'er
Her heart with their remembrance bleeds.

And he who is allowed to write
Within a lady's treasure-book,
Is honored with a task not slight,—
A privilege not to o'erlook.

II.

'Tis for the first time now, to-night,
That I've been ever asked to write
An Album-poem, which with me,
A failure I'm afraid will be;
For I've no sentiment, I know,
Of graceful thoughts no easy flow,
And to stain this spotless page
Seems almost like a sacrilege.

III

An easy matter it may be
To scribble copied poetry,
But write something as a friend,
Some lines to please and not offend;
That will a tender thought engage,
And worthy be to fill a page
In a young lady's album, where
With other's thoughts it must compare;
Something pretty, "short and sweet,"
Free from flattery,—well, just neat;
Thoughts that will in future years,
Be read with neither smiles nor sneers,
But to the recollection bring
The writer's self and everything
Connected with th' acquaintance then;
Which will be read with pleasure when
With sweet remembrance the mind
Looks back on years left far behind,
Is not an easy task. Still, I,
To do as you desire, will try,
Though I am poor at poetry,
And have no doubt but this will be
The poorest that was ever penned
In any album by a friend.

When in some idle, listless hour
You turn these pages dreamily,
And read what each has written here,
Devote a careless thought to me.

Think: "He, too, was a friend of mine,
Whose friendship was, I am sure, sincere;
He doubtless often thinks of me,
So I'll respect his verses here."

Remember me as one who owes
To your refined society,
A purer love to all your sex,
For which he e'er must grateful be.

Your friendship forms a golden chain
So pure and delicately wrought,—
Since it encircled round your heart,—
It may be broken by a thought,
One of the links let me remain,
Though strained, I know 'twill never part.

THE LATE SAM PATCH.

Some one inquired of the *Batavian* what he knew of "Sam Patch" and what was his real name. The editor interviewed an old citizen of Genesee county, and answered: "Sam Patch's" real name was Samuel Patch, but by consent the uel was torn off in boyhood, and was never afterward patched on. Sam was first discovered in or about Paterson, N. J. He didn't develop well as boy or man. He was good-natured as the day was long, and as shiftless and dissipated as he was good-natured. His surname was placarded all over his clothes by a careful mother, and all over his face by the effects of the "water he took in hizen." He had, occasionally, lucid intervals. In on of these he determined to be a blotch on the face of creation no longer, and so he hurried to the Passaic river, with suicidal intent, and with a mighty leap went over its beautiful falls and into its seething waters below. But, as the lamented Greeley had it, "though he tried to give up the ghost, the ghost refused to be given up," an Sam came out alive and well. An idea struck him. He had a new way for a lazy man to make a living. He'd jump; the crowds would pay. He utilized his idea—jumped falls here and there all over the country; Went to Niagara falls and leaped safely down that tremendous cataract; went to Rochester, N. Y., leaped there once in safety, tried it again, was drunk at that time and did not maintain his perpendicularity in descent, and, striking the water a little angling, was probably killed by the collision. His body was never found. This, his last jump, he made about forty-five years ago.

A Special Offer to the Readers of this Paper.

$7.00 FOR 63 CENTS.

The American Diamond Dictionary, containing 30,000 words, orthography, pronunciation and definitions according to the best English and American Lexicographers, illustrated with nearly 200 engravings; satisfies the wants of the scholar at the same time is just what a plain learned person needs. It is decidedly the best dictionary ever printed. Contains 700 double column pages. Superbly bound in cloth and gilt. Type clear and handsome. *Sent free* to any reader of this paper upon receipt of 63 cents, to pay actual postage and packing charges. This great offer is good for thirty days only, and is made solely for the purpose of introduction. But two dictionaries will be sent to one address. This appears but once. *Order now.* Send silver, currency or 3 cent postage stamps. Address at once *National Book Company, Rockland, Mass.*

AMERICAN Berkshire Record.

Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE

FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard o Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol I. is $3.50, post-paid; that of Vol. II. $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid, the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with stubs for retaining memoranda, price $1.00 per set. These forms are adapted to general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Management of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven illustration therewith, have been published together in pamphlet form. They will be sent postpaid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

N. B.—These Splendid Volumes can be seen at THE FARMER OFFICE.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make *no charge.*

We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, cand find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

CLARKE'S

Liver and Bilious Pills.

The BEST MEDICINE you can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is

Clarke's LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, April 21, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills; I thought I would try them. I have only taken three small boxes: the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you.

I am, truly yours,
WILLIAM STEWART

PARTICULARLY NOTE THIS.

HERMITAGE, WARWICK, August 14, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food. Consulted a Physician in Warwick; was under his treatment four months without improvement. Dissatisfied, went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit. In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.

MICHAEL BYRNE.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed *good health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)

JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved an cured from long and great suffering by the use of thes Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you Davi Clarke's Australian Pills—the only genuine

AGENTS FOR DAVID CLARKE'S REMEDIALS.

CASH FOR ADVERTISING.

We desire it to be clearly understood that those who send us ADVERTISEMENTS FROM ABROAD must send the Cash with the advertisements—if they would have them appear.

We have numbers of advertisements sent us from strangers saying, "*Please Insert and Send Bill*" this we cannot do without CASH, or a special understanding before hand.

WARREN & CO.

ADVERTISERS ABROAD AND AT HOME.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion;* larger space, *Fifteen Cents per Line;* each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months..... $15.00 | For one-half of a column, three months 50.00
For one-quarter of a column, three months ..... 30.00 | For an entire column, three months 100.00

For a six months, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra It must be specially understood that these rates are invariable—unchangeable: the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the abov rate

MONEY AND EXCHANGE TABLES.

As an evidence of the panic which has taken possession of capitalists because of doubt as to to the fate of the new Constitution, a number of them have withdrawn their deposits from banks, and placed them in the vaults of the Safe Deposit Company until the question shall have been disposed of. Several large sums have been withdrawn from the reach of business within the past three days. In the meantime our money market hes under the cloud, and is characterized only by an abnormal sluggishness. There is no apparent change in rates from 9 to 12 per cent.—*Market Review.*

Money everywhere, in all the great marts of trade, is very abundant and rates of interest low, the very great depression in trade stops business, and no one feels like investing either in trade or any manufactoring business, and this state of things will continue till after the Constitution question is decided—if our people *reject* it "The country is safe," if they accept it, look out for the Porphyry Horse, and a general stagnation of trade, for our people see danger and trouble in the New Constitution, and its rejection only can give confidence and make trade revive once more.

Money in New York is a drug, as low as 1, ½, 3 per cent per annum on three months' paper.

Our bank rates are 7 to 9 and 9 to 12 per cent, according to cases—long loans can be had at 7 per cent and less.

GRAIN AND FLOUR MARKET.

The *Grain market* shows a remarkable firmness even with the dullness of trade, and with quite unfavorable reports from Europe, very steady rates are held too, for *Wheat*, other grains are dull and prices all recede.

The effect of firm rates for wheat and holding back stops export to some degree, and freight rates to Europe are reduced to 22 5s., this may move wheat.

We quote the following from our excellent contemporary the *Commercial Herald and Market Review*, that journal being very reliable, H. C. Beales, Esq., the editor is certainly on the *qui vive* to learn the markets thoroughly, always.

"With us the unexpected firmness of the wheat market has a tendency to weaken the freight market, causing few grain charters to be written. The disengaged fleet suited to the grain carrying trade seems to be quite ample for the present trade requirement—there being still a good number of ships now on the berth waiting cargoes of breadstuffs. The condition of the Eastern wheat market, ample stocks, and the early opening of land navigation, all tend to keep the European market down to low figures during the summer months. The present freight market is sluggish at 55s. to a direct European port."

Wheat shipments—

	Centals.	Value.
Totals since Jan. 1, 1879	42 vessels 1,768,701	$2,079,226
Previously since July 1st	180 vessels. 6,473,805	11,130,903
Totals since July 1, 1878	222 vessels 8,242,506	$14,210,182
Totals since July 1, 1877	90 vessels. 3,471,142	7,028,369
Totals since July 1, 1876	289 vessels. 10,100,458	18,825,248

Our exports of barley by sea has been as follows:

	Centals.	Value.
From July 1, 1878, to April 2, 1879	575,216	$475 452
Same period 1877-8	60,140	158,407
Same period 1876-7	79,701	220,791
Same period 1875-6	159,426	260,273

OVERLAND SHIPMENTS.

In August	66,610 centals.
In September	90,862 "
In October	27 004 "
In November	43,060 "
In December	2,543 "
In January 1879	25,418 "
In February	22,144 "
Total	251,642 centals.

The *Flour* exports for March were about 50,000 barrels, we are receiving quite large lots of flour from Oregon, and exports may be better this month, prices of flour are quite steady.

The *markets* for *Barley Oats, Corn, Rye*, and *Buckwheat* are all very dull, and prices range lower, in fact the prices are nominal, and demand very small as there is a general stagnatiotion in trade.

The rates of all *Feed stuff* is lower—the rapid advance in growth of grain and grass, and cutting of some early grain, short haying, causes the lower rates of these articles, and *Bran, Middlings, Ground Barley, Corn Meal*, and all lower in price—*Oil Cake Meal* is the same, there is a good demand for this article now for Australia and other places abroad.

The *market* for *Hops* is *nil*, customers for this product have hopped out and many growers are quite discouraged.

The *Seed Trade* since the rains has been more lively, and a considerable amount of clovers and blue grass have been planted, and as favorable weather continues, much more will be planted all through this month of April.

The sweet food of California, our *Honey market* is abundantly supplied, even white we are shipping hundreds of tons abroad, and astonishing the world at the abundance of our honey crop, we indeed live in "A land flowing with milk and honey."

Choice white comb in quick demand—common honey is plenty—*Beeswax* in demand for export and price advanced.

The *Market* for *Potatoes* is without much change—receipts equal to demand, and price seems to tend downward—*Sweets* plenty—*Onions* way up, higher than ever—rarely equal to present rates, 12½ to 13 cents.

The *market* for *Beans* remains as per last report.

Wholesale Grain Report.

Wheat California, per 100 lbs. Common	1 45 — 1 50

8:30 A. M., Daily for San Jose, Gilroy Hollister Tres Pinos, Pajaro, Salinas, Soledad and all Way Stations.

AT PAJARO connects with the SANTA CRUZ, R. R. for Aptos and Santa Cruz.

At Salinas connects with the M. & S. V. R. R. for Monterey.

Stage connections made with this train.

10:40 A. M., Daily for San Jose and Way Stations.

3:30 P. M., Daily, (Sundays Excepted,) for Gilroy.

4:40 P. M., Daily for San Jose and Way Stations.

6:30 P. M., Daily for Menlo Park and Way Stations.

The extra Sunday train to San Jose and Way Stations is discontinued for the Winter season.

EXCURSION TICKETS to San Jose and intermediate points and return sold on Saturdays and Sunday mornings—good for return until following Monday mornings.

A. C. BASSETT, Superintendent. H. R. JUDAH, Ass't Passenger and Ticket Agent.

SOUTHERN DIVISIONS.

Passengers for points on the Southern Divisions of the road will take the cars of the Central Pacific Railroad via OAKLAND, leaving SAN FRANCISCO, via Ferry Landing, Market street, at 4:00 P. M. daily, and making close connection at GOSHEN for Bunnar, Mojave, LOS ANGELES, Wilmington, Anaheim, Colton Colorado, River and YUMA.

S. P. R. R.

(NORTHERN DIVISION.)

SPECIAL ANNOUNCEMENT.

Commencing Saturday, July 13, 1878.

EXCURSION TICKETS

Will be sold by this Company from

SAN FRANCISCO

—TO—

San Jose and other Points and Return,

At Greatly Reduced Rates.

Tickets to San Jose, good for Return by either the Southern or Central Pacific Railroads.

These tickets will be sold ONLY on SATURDAYS and SUNDAY MORNINGS.

The RETURN TRIP Ticket will not be good for passage after the MONDAY following the date of purchase.

Ticket Offices—Passengers Depot, Townsend Street and at Valencia Street Station.

A. C. BASSETT, Superintendent. H. R. JUDAH, Ass't Passenger and Tk't Agent.

NOTICE—SAN JOSE Excursion Tickets (via C. P. R. R.) can be purchased at the Offices of the Central Pacific Rail Road, Oakland Ferry, foot of Market Street, San Francisco, also, at the several Ticket Offices in Oakland. 45 8

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its twenty-fifth year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on the Coast—this was at Sacramento in the year of 1852, and the the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the first and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONED WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER being placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 00
Six Copies,	5 00
Ten Copies,	8 00
Twenty Copies,	15 00
Fifty Copies,	35 00

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer, 1879.

OUR NEW CLUBBING LIST.

We propose for the year of 1879 to offer to our Patrons the following valuable JOURNALS in connection with our own, all at reduced rates, so as to give them the best works at low rate—(all postpaid). Price per year.

The FARMER and VICK'S MONTHLY MAGAZINE	$1 50
The FARMER and AMERICAN AGRICULTURIST	3 00
The FARMER and POULTRY JOURNAL	1 50
The FARMER and RURAL NEW-YORKER	4 00
The FARMER and PHRENOLOGICAL JOURNAL	3
The FARMER and AMERICAN BEE MAGAZINE	1 50
The FARMER and SCIENTIFIC AMERICAN	4 00
The FARMER and HARPER'S MONTHLY	7
The FARMER and HARPER'S WEEKLY	
The FARMER and HARPER'S BAZAR	
The FARMER and HARPER'S THREE WORKS	

[Others to be added.]

VOL. XLIX. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, APRIL 17, 1879. NO. 7.

The California Farmer.

—AND—

JOURNAL OF USEFUL SCIENCES.

Published every Thursday Evening

BY WARREN & CO.

No. 320 Clay St., (up Stairs) Below Battery,

SAN FRANCISCO.

TERMS OF SUBSCRIPTION:

BY MAIL FOR ONE YEAR, $4; FOR SIX MONTHS, $2. For a Club of Five new Subscribers, a Sixth copy will be sent gratis. When payments are delayed six months, $1 additional per year will be charged, and $1 each year also, for every year delayed thereafter.

City Subscribers, delivered through the Post Office. All papers from this office are sent free of postage.

REMITTING MONEY.

Our Subscribers can always send Money BY MAIL safely. Register at the Post Office and the money will come direct and sure and AT OUR RISK.

LIST OF AGENTS:

WELLS, FARGO & CO., at all their Offices in this State.
POSTMASTERS in all places, are requested to act for us.
WHITE & BAUER, Washington Street, San Francisco.
WAITE, BURNNELL & CO., Seedmen, High Holborn, London.
FREDERIC CONNER, Esq., News Agency, Paris.
BRYDON & CO., Brisbane, Australia.
DAVID CLARKE, Chemist, Warwick, Queensland.

TERMS OF PAYMENT.

☞ Advertisements and Subscriptions are all payable in Advance.

☞ Our full ADVERTISING RATES will be found on the SEVENTH PAGE.

All Letters on Editorial Matters to be addressed to COL. WARREN, EDITOR.

☞ All Letters on Business connected with the Office should be addressed to

WARREN & CO., Publishers.

EUROPEAN.

From our Special Correspondent.

PARIS, January 30, 1879.

PRESERVING GRAIN IN THE SOIL.

In Algeria, the Arabs preserve their grain in hermetically closed furrows in the soil. The late M. Doyere, introduced the principle into France, by employing oblong cases in iron, placed in the soil, but in a position to allow of the grain having a fall to run out. In these longitudinal cisterns, there are two "man holes," to fill and empty, respectively; the grain must be matured and dry before being stored, and it will keep for years, unaltered by evaporation or insects, if the external air be excluded. M. Velter, of the Central School of Arts and Manufactures, estimates at 5 per cent, the material loss resulting per year, from grain as ordinarily magazined. M. Bella extends the plan, to fitting up ground floors, and cellars of out-offices, with rectangular and sheet iron reservoirs, while securing the grain from atmospheric and other injuries.

URINARY FERTILIZERS.

The experiments of Boussingault, Stohman, etc. have demonstrated, that while the urine of carnivorous animals is rich in phosphoric acid, that of herbiverous animals has rarely any. Liebeg accounted for the absence, by the alkalis of the urine being unable to dissolve the phosphates of lime and magnesia. At the university of Leipsic, some experiments were recently executed to call in question Liebeg's explanation; from where it follows, that when an herbiverous animal is submitted to its ordinary dietary, the liberated phosphoric acid, is eliminated, not in the liquid, but in the solid excrements. Vegetables are very rich in alkalis, united with carbonic acid, which cannot dissolve the lime phosphates, and so allow its acid to pass off; but if phosphates of potassium be added to the forage, the phosphoric will be eliminated freely in the urine.

LIGHT—IS PLANT LIFE.

Since ages it is known, that solar light is indispensable to vegetation, and efforts have been several times attempted to secure the best conditions for plants exposed to solar action. The colors of plants have been modified, by moderating the intensity of the light to which they have been subjected; hence, resulted the experiments, to determine, what were the exact rays of light most directly beneficial to vegetation; as revealed, by placing plants under glass of various colors. M. Paul Bert has continued experiments on this subject, and while the problem is not exactly solved, he has demonstrated, that they are the red rays which form the basis of the phenomena of vegetable life-transforming food, building tissue, while the united rays, that constitute white light, are not less essential for the healthy existence of the plant.

CHEMICAL MANURES.

A. M. Lacroix raises some very sensible reflections by his manner of treating chemical manures. He lays down, that the farmer himself is the most reliable chemist for his soil's composition and of the manures requisite to ameliorate them. He does not deny, that a chemist can indicate the absence of potash and phosphoric acid in the soil; he insists that manufacturers of fertilizers can only prepare the raw materials, their mixture ought to devolve on the cultivator himself. It is rarely that an ordinary farm has great diversities of soil, so M. Lacroix's plan consists, in staking off a few yards of a field, applying specimens of chemical manures under common conditions, and acting on the patent results. Failure will thus be obviated. He has by this means found out exactly what his meadows required, and has had a net increase on his expenditure in fertilizers, equal to 50 francs per acre. His experience in applying the chemical manures is, to scatter ⅔ of the quantity in April, for the first cutting of forage, and the remaining ⅓ ten days after that cutting has taken place.

PHYLLOXERA, BEET SUGAR, ETC.

Taking advantage likely of the sleep of the phylloxera, may account for the industry in the matter of cures. The main point is, to destroy the bugs in the soil, that eat the roots of the vines. Only sulphuret of carbon and inundation, effect this desideratum so far. In the department of Herault 30,000 acres of diseased vines have been treated with sulpho-carbonates but without success. In that same region, and also in the South of France generally, sufferers have great confidence in the resistance of American stocks.

The beet sugar making season is terminated, and has not been satisfactory. In 1877, the mean average richness of the juice was 3·9; for the year just closed, it was 3·6. The year 1879, in point of agricultural prosperity, cannot have much difficulty to surpass its predecessor; it will witness important studies in the system of agricultural education, and also in the opening up of internal routes of communication, and the extension of a net-work of canals, ostensibly for irrigating purposes. As for enhanced prices for agricultural produce, these will be largely influenced by the treaties of Commerce down for execution. French farmers on the whole do not make more than 5 or 7 per cent. if so much, on the capital invested in their undertakings.

[CONCLUDED]

[EDITORIAL.]

WEALTH OF OUR COUNTRY.

The rapid accumulation of gold in the Treasury of the United States now estimated at $400,000,000 with the steady and immense sales of the 4 per cent U. S. Bonds is a clear proof of the rapidly increasing wealth of our Country, in spite of all the cry of "stagnation of trade" "hard times" bankruptcies, etc.

The great facts before us that our *Exports* were *Three Hundred Millions of Dollars* more than our *Imports* for 1878, and the almost certainty of their being much larger in 1879, shows the sources whence comes the gold that purchases the U. S. Bonds, which formerly was sent to Europe for sale.

This vast increase as is shown in two years of over *Six Hundred Millions of Dollars* to our National wealth, is rapidly being felt in the reduced rates of interest, which will soon be shown by an increased desire for investments that will pay more than 4 per cent. This it is hoped will lead our capitalists to turn their attention to our manufacturing interests, ship building, mechanical inventions, Railroads and other internal improvements, for this now very rapidly increasing wealth of the country must be employed, and so great is it that all the Bonds that the United States can offer will be taken, and even then, millions will be left seeking other investments.

A little reflection will readily prove this; the next *three years* our *Exports* will exceed our *Imports* by more than *One Thousand Millions of Dollars*, and the greater portion of this will seek investment, and this is *independent* of the other sources of wealth and increase of capital in our Country by manufactures, trade, commerce and home prosperity, therefore we can safely say that as the people of England and France purchase and hold all the "Consols" of their own countries, so the people of the United States will soon hold and control in our own country all the "Bonds of the United States" as the safest, best and most certain investment of capital that can be made—and we venture the assertion that within ten years, and even less, *United States Bonds* will command a higher premium than any other Bonds in the world.

Railroad and Canal Freights.

We have received from the Scientific American Agency a full series of the discussions before the New York "Board of Trade" upon the subject of the "Tariff of Freights" upon the Railroad and Canals of our Country, this series of discussions are from the leading men of our Country and are most ably presented, every argument is presented in a most exhaustive manner, and all for the Regulation of a Tariff by Law—at early day we shall discuss the subject.

Thanks to Messrs. Munn & Co., and the N. Y. Board of Trade for these documents.

OUR STATE IN DANGER.

TO THE RESCUE.

The "Golden State" is in danger, and the watchword of every man who values his "Birthright" or who would battle for his "Home" must now awake to his duty and come to the rescue, for the *danger* is immediate and the *perils* many and near at hand.

SAVE THE SHIP.

Our "Ship of State" is among the "Breakers" and upon a "Piratical Coast," and it is now surrounded by ten thousand "Wreckers," ready with *false lights* to lure the ship upon the rocks, so they may destroy it and seize the cargo as their spoils.

FARMERS, TO THE RESCUE!

It is our special duty to send out a warning voice to our FARMERS that they may save their "Homesteads" from the pirates of our land, who would take from them—their "Homes"—pirates that would wrest from them the fruit of their labors of long, long years, and it is for this reason, in this "Hour of Danger," that we send out a warning voice to the *farmers of our State*, and say to them,

TO THE RESCUE! TO THE RESCUE!!

Farmers, remember that however many long years you have labored and toiled to build up a home for your wife and children, now in this "Hour of Peril," your "Homes" which are your "Birthright" are in danger. Every vote tells, and remember also that there are thousands everywhere, who are ignorant, who cannot read or write, and who pay no taxes, own no homes, and yet *whose votes* tell equally with your own—now it is your *duty* and your *opportunity* to win such unfortunates from error, and lead misguided men to help you in this great work.

FARMERS, TO THE RESCUE!

Plead with the ignorant, instruct, lead, guide them in the right way, and win them to help you in the great and important duty that is now of so much moment in this "Hour of Peril" to our State.

WE ARE NO POLITICIAN,

We plead for no party, sect or creed, we plead to save our "Farmers' Homes," to save their lands from unjust and double taxation, we plead to save our farmers from falling into the hands of designing and corrupt politicians who would destroy the bright hopes ever vouchsafed to the *laboring man*, and that too, when the *Spring time* opens up to them the most cheering prospects of a bountiful year ever yet presented to our State.

FARMERS, TO THE RESCUE, AGAIN!

We have never taken part in any political warfare yet, because it is not our province to do so—but we do not look upon the present great warfare as a mere *political fight*, we esteem it a war of designing persons who are about to wrest from us our "Birthright."

Our present Constitution which is safe and sure, and which has stood the winds and storms of nearly thirty years and carried us safely onward, and to give us instead, a "Ship of State" that has many a worm eaten plank from the deck to the keel, that will surely founder our ship and wreck us upon the rocks of ruin upon a lee shore.

Farmers, read the article in another column upon the matter of "Double Taxation Upon Your Lands," which is all important for you to know—and once more we say to you,

FARMERS, TO THE RESCUE.

☞ SEND THE FARMER ABROAD. ☜

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, to send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a JOURNAL as the CALIFORNIA FARMER. We know our JOURNAL is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the HOME CIRCLE everywhere, as a JOURNAL free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, SPECIAL PREMIUMS OF SEEDS are donated with the paper, to benefit our State.

BLIGHT UPON OUR FARMERS.

Every year our farmers have been more or less the sufferers from some blight upon their grain or other crops, and their orchards and vineyards have suffered by some *insectioverous pest*.

THE BLIGHT OF 1879.

At the present time we think we see a NEW BLIGHT that now threatens them unless prompt measures are adopted to remove the threatened blight, and crush the *eggs* of the insidious insect before they can come into life.

The *blight* that now threatens all the interests of our *farmers* and we can add all the *industrial interests* of our State, comes from the attempt of interested parties to force upon the people of our State a

NEW CONSTITUTION.

The advocates of the *new Constitution* cannot show to our people that it is superior to the old Constitution, even with some few things which the incoming Legislature could add to the old, while the new Constitution contains many sections which would work great and lasting injury to our farmers, and to all the best interests of our State, in another column of this paper we have shown how the new Constitution *doubly taxes* the farmer for his lands, we have also shown how it deprives all the great *Industrial Societies*, our State, and District Agricultural Societies of all aid and encouragement, which all other States accord to such Institutions, we have also shown that all benevolent and charitable Institutions are shut out from that parental aid and fostering care which it should be the duty and glory of our State to give, these are the reasons why we say that there is and will be

BLIGHT UPON OUR FARMERS.

Yes! if our farmers are neglectful of their high duty to examine well the great evils that threaten them now, if they fail to see these evils and fail to labor to avert them, by an earnest and united effort in every farming district, to come together one and all and put their seal of condemnation upon the NEW CONSTITUTION by that great emphatic word NO! openly, boldly and everywhere NO. If they fail in this duty they may prepare to see around them, even with all Nature's glorious promises of a most bounteous harvest everywhere, a blight and a mildew that shall destroy the most glorious promises that was ever yet accorded to them in this State.

We have conferred with hundreds and thousands over our State, and we have no hesitancy in saying that such is the fear and dread of the future if the new Constitution should be adopted that hundreds and thousands who are now *here* would leave our State to find a place free from *misrule*.

Should the new Constitution be forced upon the people a *blight* would strike every interest, from which our State would not recover in TEN YEARS; and the greatest evil would fall upon our FARMERS, and it is to them we now appeal, and ask them in all earnestness *for their own good* to come to the rescue from this impending blight.

We name this evil at the head of this article "A blight upon our farmers" and we feel sure that if what we esteem would be a great calamity, the adoption of the *New Constitution* should take place it would so fearfully effect the farmers' interests that it would be worse than the "Rust in our grainfields" the "smut in our cornfields" the "rot among our potatoes, the canker worm and the caterpillar upon our fruit trees," "the Phylloxera in our vineyards," "the worm in our hop fields," "the scab in the sheep fold" "the distemper among our horses, cattle and swine" some of these evils are occasionally blights upon the hopes of many a farmer—but these evils come singly, and farmers can bear them singly, but if this NEW CONSTITUTION should most unfortunately be forced upon our people our farmers would find the combination of evils so great that it would be like having all the fearful evils we *have named* fall upon them at once, and crush out all hope of a recuperation.

For the reasons we have given in several other articles relative to the injury the *new Constitution* would inflict upon our farmers, we appeal to them earnestly to defeat it, and pray they may, boldly, unitedly, and nobly, every man vote—NO!

The Great Agitation.

For the NEXT THREE WEEKS our whole State must be agitated more or less from one end of the State to the other, during this time nearly all business will be laid aside, ordinary pursuits dropped, and many of the comforts and enjoyments of social life neglected, so that discussions on the CONSTITUTION, Registration, and political labors may be attended to.

So great has the excitement become, and so absorbed is the public mind now enrapt in this great question of the CONSTITUTION, that it is indeed a mania, and perhaps rightly too, for there can be no question but that the very PROSPERITY OF THE STATE depends now upon it.

When we look at it, the more we review it, as we see who are battling we feel sure that all the great and vital interests of our State *demands* that the OLD CONSTITUTION should be preserved and the *new* defeated.

We call special attention to the several articles upon this question, in other Columns this week.

Walter Brown & Son's Monthly Wool Circular.

NEW YORK, April 1, 1879.

As indicated in our last circular, the wool market has run an even course through the month just closed, with little animation except in the middle grades of wool, which have been much sought after, and are consequently at present in very light stock and held at full market rates. Holders of other grades and descriptions of wool, who with considerable tenacity and persistence have carried their wool rather than sell them at losing prices, have been induced to meet the views of buyers, preferring, at whatever loss, to enter the approaching wool season with empty lofts, thereby implying their belief in low ruling prices for the coming year. Consignors, also, whose accounts have been carried along through the year,, are wishing to see their balance-sheets, of the tenor of which they may very naturally have serious forebodings. As the wool markets have been for the past two years, and are likely to be for the future, wools which are consigned should be promptly sold, for by speedy returns only can the commission business in wools be made satisfactory to shippers.—There is no probability that wools for the future will pay for carrying any longer than is necessary to place them favorably on the market and obtain fair current value; consequently, wool should be purchased in the country at prices which show a margin on its value in the Eastern markets, and should be turned into cash as nearly as possible on arrival—thus avoiding loss in interest, insurance and other incidental expenses. Wool dealers East and West are beginning to realize the importance of making quick turns in order to secure even small profits, and that the days of large percentages in the wool trade are already becoming matters of record. There are also strong indications that the growers, especially those who are careful in putting up their fleeces, will ship their clips of wool to market to be sold direct to consumers. It is evident that the new clip of wool should open at considerably lower prices than last year to make it profitable or even safe to handle, and if it is not bought with great caution and at low figures, it is probable that we shall again see a repetition of the losses of the past year.

PULLED WOOLS.—Good conditioned and well graded lots of super pulled wool have met with ready sale without material change in prices, and most desirable pullings are closely sold up.

CALIFORNIA WOOLS.—As we are on the eve of the new clip of these wools, holders have been particularly desirous to close out old stock, and have pressed sales of wools on hand. The stock is now limited, and the market in good shape to receive the new wools. Considerable sales have also been effected in Oregon wools at reduced prices.

TEXAS WOOLS.—The assortment of these wools is mostly of an undesirable character, and is held relatively above its value.

And you shall have GRAIN to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER IV.

And now let me give you some description of this farm, which was of so much importance to us. Imagine an old-fashioned two-story house, that had once been painted red and now was sadly in need of painting again, standing a little back from the road. No blinds, no piazza, the windows small, and with small glass. The massive chimney in the centre, two front rooms facing the west, one each side of the front door, opening out of it into each front room, a bedroom at one end of the kitchen, a pantry at the other, and the chamber stairway by the side of the pantry, while the cellar-stairs went down under them, from a door opening out of the porch. The porch was on the north-east corner of the house, and contained a wash-room and a wood-room. There was a corn-barn a little way from the house, and another building, in one end of which was a piggery, and in the other a small hen-house. Beyond these, the barn, low, unpainted, about thirty feet long and twenty-eight feet wide. The great doors opening to the west—the buildings all stood upon the east side of the road—a small door at the south-west corner, giving entrance to the horse-stall, and one at the south-east, opening into the cattle stables. At the south side was the barn-yard, surrounded by a high board fence; no shed, no cellar, and no watering-place. The cattle and horses were turned into the pasture twice every day to drink from a brook a few rods away, unless it was such bad weather that it was better to bring water from the well at the house. Around the buildings were a number of apple trees that stood where they stood in the days of my grandfather, though many of them had long been so much decayed at the heart that the hens had stolen their nests and reared broods of chickens in their capacious trunks, gaining entrance where large limbs had been cut off near the ground. As for the land, I can give you no better idea than by reproducing here a sketch of the fields, which Clarence made a short time after he took charge of the farm. I know not whether he took the idea from something he had read, or from his talk with the squire, but I give it, as I found it a short time ago, in an old ledger which had been my father's and his father's before him, but which their scanty accounts had never filled:—

"Field No. 1, around the house, called Six Acres, but as the buildings take up some room, the yards more, upon which we get no grass, I shall call it Five Acres, from which we got last year four loads of hay that father called four tons. Slopes to the west; has not been ploughed for many years. There are twenty apple trees, which are all old and do not bear much. I must trim them up and try to make them last until I get a new orchard bearing.

"Field No. 2, back or east of the barn; about four acres, very rocky, sloping to the north and west. Here I mean to put the new orchard. We cut two tons of hay last year on this field. I don't know when it was ploughed last.

"Field No. 3, side of road, north of barn; about two acres, runs down to the river. Was sowed to grass two years ago, after raising potatoes and corn, and cut last year two large loads of hay, part clover. Between this and No. 2 is a lane which goes from barn-yard to pasture. No. 2 does not go quite to the river, and the cows go on the north and east of it, and No. 1 and No. 4.

"Field No. 4, south of Field No. 1, eight acres, runs from road back to pasture; slopes to south-west. Father had corn there last year, and we got two hundred and sixty baskets of ears of good corn, besides the small corn that we fatted the cows and pigs on. East end is sandy, but the squire said it was good land if it only had manure. It is now in rye, which father sowed among the corn.

"Field No. 5, across the road from barn, between pond and road, about two acres, but the side next the pond is too wet to plough. Father has always had a garden of about an acre next the road, and the rest cuts about a tun of rather poor hay. Father used to wish the rocks in field No. 2 were built into a wall along the side of the pond, and some of the gravel from the hill in the pasture was put on the land below the garden, but he never began it and I don't know as I ever shall. I suppose it would take many loads of gravel and a great deal of work to build the wall.

"Field No. 6, twelve acres, south of No. 5; north end slopes to the south, but most of it is nearly level; a wet, miry place in the middle, which I never knew to be ploughed, running from road to pond. Father had about two acres in north-east corner and three on south edge, being the two driest parts of it, planted to potatoes, and we had about three hundred bushels of good ones. On the rest we cut six loads of hay, what we call 'Deacon English.' If it were drained, the squire says, it would cut more grass than all we cut now, and I mean to do it if I live.

"Field No. 7 is properly a part of the pasture, being a three-acre lot of bog meadow, lying by the side of the river, a quarter of a mile north-east of the house, on a little brook that runs out of the woodland. I think the mud is very much like the meadow-muck, or peat, that I read of in the papers as being so good to put into the manure heap. I shall ask the squire about it, and if it is I shall draw out a lot of it when I get a chance. The cows go in there and eat a little when the grass first starts in the spring, and again after we have moved it; but it is so coarse they do not like it very well. We cut four or five loads of bog hay, which we mostly use for bedding. Do not always mow the farther end of it, as it is more work to pole it to shore than it is worth. I wonder if it is possible to do anything with it but to dig mud out of it to put into the barn-yard, and cut bedding off of it? Must ask the squire about that, and about cranberries. And I must read all I can about the cranberry business, for I think it pays great profits, and I may have a chance on some of these lots to try it.

"Field No. 8, pasture and woodland, east of all the rest. There ought to be eighty-three acres in all, of which thirty or forty may be covered with wood, and the rest very poor pasture. It is much larger than the squire's pasture, and he keeps about twenty cows, while here four have hard work to find enough to eat. It does not do to turn the oxen in with the cows, but we have to put them into the mowing fields after haying, and have to put the cows into them, too, as soon as we ——

"We cut then what we called fifteen tuns of hay, besides the bog in the pasture, and with that and the corn-fodder we make out to keep the horse, yoke of steers, and four cows. Ten years from now I mean to tell a different story, if I live and do well."

Now you see what a task this boy had placed before himself, and, in part, how far his ambition reached ahead.

[CONTINUED IN OUR NEXT.]

An Asparagus Bed.

[Asparagus is now becoming very plentiful in our markets, the price ranging very low, selling at 75c. to $1 the box of about 60, 75 lbs. the quality is excellent, large and fine, it must be borne in mind that the full tender *green* asparagus is the only kind that should be eaten, the *white* asparagus is more or less poisonous and should never be eaten.

E. P. Roe, a skillful cultivator and nurseryman as well as a good writer on gardening subjects lately gave his views on asparagus, the manner of preparing the beds, the planting and culture, which were published in *Harper's Magazine* for this Month, which we herewith give, as it is valuable teaching, there is no one vegetable eaten that contains more nutriment or is more healthy than Asparagus.—Ed. F.]

He who lives in the country and has no asparagus bed has at least one heavy sin of omission on his conscience for which he never can give an adequate ex- —— If the man who does "not provide for his own household is worse than an infidel," he that will not "bother" with an asparagus bed is anything but orthodox, and yet can not call himself a rationalist. Some are under the delusion that an asparagus bed is an abstruse garden problem and an expensive luxury. Far from it. The plants of Conover's Colossal (the best variety) can be obtained of any seedsman at slight cost. I have one large bed that yields almost a daily supply from the middle of April till late in June, and I shall make another bed next spring in this simple way: As early in April as the ground is dry enough—the sooner the better—I shall choose some warm, early, but deep soil, enrich it well, and then on one side of the plot open a furrow or trench eight inches deep. Down this furrow I shall scatter a heavy coat of rotted compost, and then run a plow or pointed hoe through it again. By this process the earth and compost are mingled, and the furrow rendered about six inches deep. Along its side, one foot apart, I will place one-year-old plants, spreading out the roots, and taking care to keep the crown or top of the plant five inches below the surface when level; then half fill the furrow over the plants, and when the young shoots are well up, fill the furrow even. I shall make the furrows two feet apart, and after planting as much space as I wish, the bed is made for the next fifty years. In my father's garden there was a good bed over fifty years old. The young shoots should not be cut for the first two years, and only sparingly the third year, on the same principle that we do not put young colts at work. The asparagus is a marine plant, and dustings of salt sufficient to kill the weeds will promote its growth.

WHERE OUR GRAIN AND FERTILITY GO.

Of the 42,182,102 hundred weight of grain imported into Great Britain during the nine months ending Oct. 1, 1878, nearly sixty per cent. came from the United States. This is a grand market, it is true, and has apparently added much to our wealth. But in reckoning up the millions of dollars brought in the country from this source, let us not forget what it has cost. Have we a full equivalent for the departed fertility of the millions of acres of grain land of Ohio, Illinois, and others of our once great grain producing States? What has become of that fertility? It has gone out in these same cargoes of wheat that figure up so beautifully in the columns of the commercial papers. But what is to become of the golden eggs when we sell the goose that laid them? We do not wish to be classed as croakers; but when we see the wheat-yield of a section drop from an average of 25 bushels to the acre down to 10 bushels per acre, and the farmers crying to the government to help them by new laws on finance, the time has come when the cause of agricultural depression should be pointed out and a remedy suggested as we have several times tried to do, by showing that we should pay more attention to cattle feeding and meat production, thus consuming the crops on the land. And this can be done without lessening the grain product; indeed, as was found from the "wheat reports" published last month, cattle-raising in connection with grain-growing will greatly increase the yield of wheat and corn, greatly to the pecuniar advantage of the farmer. This course was the means of placing English and French farming so far ahead of ours in proportionate products, and if generally adopted here, as the present and prospective demand for cattle for exportation permits, it will do as much for American agriculture as it has done for that of Europe.

Albert Chapman, Middleburg, Vt.

Large experience in purchasing and shipping Merino Sheep, and an intimate acquaintance with all the recorded flocks in Vermont. Will carefully select and forward for reasonable commissions large or small numbers.

REAPER AND BINDER TRIAL.

A large number of farmers and others interested in farming pursuits visited Mr. Nicholas's paddock at Barnedown, about three miles from the Goornong railway station, on Wednesday, the 4th inst., for the purpose of witnessing a trial of reapers and binders, exhibited at the late Bendigo Agricultural Society's show. The day was fine, though a very strong wind was blowing, and the crop selected for the trial was in first-rate condition, affording a better and fairer chance to each machine than did the crop at the last trial at Woodstock on London. As regards the site on this occasion, however, no one could complain, the ground being beautifully level, and the crop first-rate, albeit rather favored with thistles. Four machines were on the ground, Mr. W. A. Wood's, M'Cormick's, W. Watson's, of Corop (entered and worked by maker and exhibitor), and Osborne's. Each machine had five acres allotted to it, and the work commenced at half-past eleven o'clock. At first sight, to a superficial observer, the M'Cormick machine was the best; but on close examination that of Wood's was far superior to any on the ground as regards lightness of draught, simplicity of mechanism; the cost of renewing the apparatus for cutting, twisting, and binding being something under thirteen shillings. Wood's did its work to perfection, the ground being left remarkably clean, while the sheaves were well and regularly bound and delivered. M'Cormick's machine, although it did its work well, is in no way to be compared to Wood's machine as regards simplicity of construction, and this is an undoubted fact and one that should have great weight with intending purchasers of reaping machines, because a reaping machine out of a place where no competent person is at hand to remedy the evil would be as much use to a farmer as would a breech-loader without cartridges. The next machine worthy of note was that of Mr. Watson, of Corop. This machine was made by Mr. Watson, after a model of Mr. Wood's, which it resembles closely, the delivery not being so strong as Wood's. Osborne's machine was a new one, and worked for the first time, having been put together on the ground on the morning of the trial. It was worked by, comparatively speaking, an amateur, and although it did its work well, was apparently not in favor, and this again was doubtless owing, like M'Cormick's machine, to its cumbersome nature and intricate machinery. One thing we can say in its favor, it bound very fairly. A little before four o'clock the trial finished, and the judges arrived at the following result, the award being given by the point system:—Wood's, 275 points; M'Cormick's, 257 points; Watson's, 230 points; and Osborne's, 164 points. The president then announced that Wood's machine had gained the first prize, a gold medal, and M'Cormick's the second prize, a silver medal.

At the trial of binders, at Inverell, New South Wales, November 30, the first prize was awarded to Walter A. Wood's binder, which obtained 56 points, the M'Cormick which competed obtained only 43.—*Bendigo Evening News, December 4, 1878.*

WHAT A PERFECT ANIMAL SHOULD BE.

A perfect breeding or feeding animal should have a fine expression of countenance. It should be mild, serene and expressive. The animal should be fine in the bone, with clean muzzle, a tail like a rat's, and not ewe-necked, short in the leg. He should have a small, well put-on head, prominent eye, a skin not too thick nor too thin; should be covered with fine silky hair—to the touch like a lady's glove; should have a good belly to hold his meat, should be straight-backed, well ribbed up, and well ribbed home; his hook bones should not be too wide apart. A wide hooked animal, especially a cow after calving, always has a vacancy between the hook-bone and the tail, and a want of the most valuable part of the carcass. I detest to see hooks too wide apart; they should correspond with the other proportions of the body. A level line should run from the hook to the tail. He should be well set in at the tail, free of patchiness there and all over, with deep thighs, that the butcher may get his second round and prominent briskt deep in the fore-rib; well-fleshed in the fore breast, with equal covering of fine flesh all over his carcass so valuable to the butcher. His outline ought to be such that if a tape is stretched from the shoulder to the thigh, and from the shoulder along the back to the extremity there, the line should lie close, with no vacancies; and without a void the line should fill from the hook to the tail. From the shoulder blade to the head should be well-filled up—as we say, good in the neck-vein. Thick legs, thick tails, sunken eyes, and deep necks, with thick skin and bristly hair, always point to sluggish feeders. In cold weather in the month of May, the old silky coat of the straw-yard bullock is of great advantage. If we could get the qualities and proportions I have specified in animals it would not be difficult to make them fat. It would be difficult only to make them lean, when once in good condition. A high-standing, want of ribbing up and ribbing home, with tucked-up flank, always denote a worthless feeder. You must all have observed how difficult it is to bring such cattle into a state for killing. It will take a deal of cake and corn to make them ripe. A great many can never be made more than fresh; it is only a waste of time and money to keep them on.—*M'Combie's Cattle and Cattle Breeders.*

For Farmers' Boys in York County.

By the liberality of Stillman B. Allen, Esq., of Boston, the sum of $200 has been placed in the hands of N. Dane, Jr., of Kennebunk, President of the York County Agricultural Society, to be awarded in premiums as follows: To the boy in York County, not more than seventeen years old, May 1, 1879, $100; to the boy raising the next largest quantity, $50, and to the five boys raising the next largest quantity, $10 each. Entries are to be made with the President of the York County Agricultural Society as above, who has full control of the matter as to conditions, etc. Mr. Allen is a native of Maine who has been successful in business in Boston, and the boys of York county will appreciate this evidence of his interest in their work and success. Now boys, sons of the farmers of old York, go in for the liberal and judiciously distributed prizes.

[We ask the attention of our wealthy citizens to the noble proposition of Mr. Allen, announced above—how much our rich men could do to promote the great interests of our State in this way, who will begin this great work?—Ed. F.]

For Sale.

A special bargain will be offered in the splendid new pattern Farm Wagons and Buggies now on exhibition and sale at the agricultural warehouse of G. A. Davis, 327 Market Street, S. F.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth any $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13, for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!

Manufactured by

S. H KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Price per Gallon:

TOBACCO DIP	$2 75
HEMLOCK DIP	2 25

Horticulture.

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

NEW OR RARE PLANTS.

VARIEGATED ORANGE TREE.

At a recent meeting of the Florida State Agricultural Society, Mr. I. Bidwell, of the Arlington nurseries, exhibited a noble specimen of the variegated orange, which had the fruit as well as the leaves of various colors. It was good to eat and beautiful to look upon.

GERANIUM, ESTHER LEE.

This is an American seedling. The peculiar merit lies in the peculiarity of the leaf which belongs to the zonale class. Instead of the usual brown zonale markings the leaf is made distinct from any other variety by the dark zone being wider and almost jet black, giving the plant a most interesting and unique appearance.

A NEW RACE OF FUCHSIAS.

In Mr. H. Cannell's *Illustrated Floral Guide*, just received, we find among many very interesting things, an account of Fuchsia "Erecta Von Novely," the flowers of which are erect instead of pendulous as generally seen. It is thus described: "Remarkably novel and distinct variety, tube and sepals stained with white, sepals broad and well reflexed, corolla light pink, margined with rose; free bloomer, habit strong and branching; flowers erect and well above the foliage."

THE AMERICAN BANNER TEA ROSE.

This is a striped rose, and is a sport from Bon Silene. It originated with Cartwright, of Dedham, Mass. The Isabella Sprunt which was a sport from Safrano, and the white Bonvardia which was a sport from the red one, have proved very constant under culture, but in the case of the sport Beauty of Glazenwood rose, there was a sad desertion of its true colors in so many cases that it became worthless. How far this may stand has to be tested, but we see that some sports of popular plants have been constant.—*Gardener's Monthly.*

FOLIAGE PLANTS.

EGYPTIAN, CAT-TAIL, EAST INDIA, OR PEARL MILLET.

The best green soiling plant known to the South, from which three to four cuttings can be obtained on good soils. Am now (15th October) making my fourth cutting. These seed were sold in Northern and Western States, last year, at almost fabulous prices, where they cannot be matured, showing how much this plant is appreciated there for soiling and hay purposes. Two pounds of seed will plant an acre.

Price per pound, 50 cents; per mail.

CALIFORNIA, OR BURR CLOVER.

An annual winter plant of the Lucerne family, yielding, on good soil, a most remarkable quantity of earliest green forage; eaten with avidity by hogs and cattle; can be cut as early as the middle of March, land once seeded with this clover need only be broken or flushed every two or three years to retain a perfect stand.

Price per pound (seed in burr), 50 cents, per mail.

LUCERNE, ALFALFA.

The prince of clovers for the south; eaten greedily by all stock; succeeds well on rich, sandy soils, from which three to four cuttings can be obtained annually.

Price per pound, 50 cents.

Strawberries on our House Tops.

Every family that love this goodly fruit can raise their own, if they will but give a little time to the culture of this luxury.

Many an apple box that is so readily converted into fire wood, can be filled with the rich scrapings of the street, and first boring a few holes in the bottom of the box for draining, they can plant six good plants in each box, filling the box two-thirds full of earth and then carefully planting the vines, spreading the roots of each vine star like, so as to allow them to bud upon the soil.

One dozen boxes of this kind upon the roof or balcony of a house, would give a luxurious dish often to a family, and from the new kinds of strawberries with proper care we believe every person can raise specimens of this fruit that would astonish every grower, the new kinds now offered are said to produce fruit from 8 to 12 inches in circumference. Those that feel interested in this system of culture, if they will call at the FARMER office we will lead them to a very successful experiment of this plan, where this fruit is now in bloom, giving great promise of paying well for all care and trouble.

NOW IS THE TIME TO PLANT.

Transplanting Trees.

People who transplant trees are advised to mark the north side of each tree with chalk before it is taken up, and replace it in its natural position. A large proportion will then live since by ignoring this in transplanting, many young trees perish.

Everything that tends to increase the yield of any crop is specially interesting to farmers. Mr. Isaiah T. Clymer, a practical Pennsylvania farmer, claims to have made a discovery by which from 25 to 50 per cent. may be gained in the yield of marketable potatoes. His offer in our advertising columns is therefore worthy of consideration, showing, as it does, his entire confidence both in the value of his system and in the integrity of his fellow farmers, which we are sure they can not but appreciate.

VICK'S ILLUSTRATED MONTHLY MAGAZINE

Each Number contains THIRTY-TWO PAGES of reading, many fine Wood Cut Illustrations, and one COLORED PLATE. A beautiful Garden Magazine, printed on elegant paper, and full of information. In English and German. Price, $1.25 a year; Five copies $5.00.

Vick's Flower and Vegetable Garden, 50 cents in paper covers; in elegant cloth covers $1.00.

Vick's Catalogue,—300 Illustrations, only 2 cents.

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, APRIL 17, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street Marble Building Up Stairs

FARMER HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, TWO DOLLARS for five lines or less of space in Nonpareil type, for ONE insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

Editor's Chair.

Old and New Constitution.

We invite the attention of all our farmers especially and all who may read this number of our Journal, to the various arguments we have presented: these are our own unbiased opinions offered earnestly and as a FREE WILL OFFERING, hoping and believing they will convince the wavering, encourage the doubting, and help all to come up to the work, and defeat the new Constitution and save the old.

We hope those who thus desire, will send our Journal far and wide and work with us in this Cause.

Bills Sent Out.

We would hope that those of our patrons to whom we have sent bills, will kindly remember that a good many *little sums from each* would be of great advantage in times when money is of value.

HOME.—Our Poets' Column this week gives our readers an original Poem from our Correspondent "Philmore" "The Miners' Dream" that shows the writer to be gifted in the dreams of poesy, the other poems we know will please and instruct.

"Idle Hands."—We hope this story will interest *mothers* and *daughters*, it is a valuable sermon.

We call special attention to the "Grand Triumph for the Eucalyptus" on Home page—as worthy special attention of all who suffer—it comes from high authority.

HORTICULTURE.—"New and rare plants," "Foliage Plants," etc., on page 51 will interest.

MISCELLANY.—In these dull times when so few laugh or find time to be merry, we offer them a "Josh Billings' Column" from *his Almanac*, and if it don't help kill the blues nothing will.

AGRICULTURE.—We give another chapter from that most excellent book "How we Saved the Old Farm," we know our farmers and their children will read it with a pleasurable and instructive interest.

"Reaper and Binder Trial," from Australian reports, "What a perfect Animal should be," "Where our Grain and Fertility Goes," "Farmer boys in York county, Maine," these are all of interest to our farmers.

OUR FRONT PAGE.—Our European Letter will give our readers very important news upon the agriculture of France and Europe.

The Wool market of New York as reported by the well known House of "Walter Brown, Sons" must interest our Sheep Raisers and our Wool Growers, this report is worthy their special reading.

A Magnificent Estate.

A large and very fine estate of some THREE HUNDRED ACRES with a fine Orchard of the very choicest fruit; a large Vineyard, very productive; a large number of Fig Trees, great bearers.

ORANGE, LEMON, OLIVE, and choice EXOTIC FRUITS of all kind.

This estate is located in one of the "Beauty Spots" of our State, a retired, healthy and delightful spot.

This estate will be sold at a great bargain by reason of declining health of the present owner.

Particulars can be had from EDITOR FARMER

A FREE BOOK of nearly 100 large octavo pages for the sick. Full of valuable notes on Scrofula; Diseases of Women; Aches and Pains; Heart Troubles and a great variety of CHRONIC DISEASES, with evidence that in most cases, these diseases are curable. Sent for one stamp.

Address MURRAY HILL PUB. CO.,

VALUABLE INFORMATION FOR THE FARMER.

Next to the system of irrigation in crops, the most important discovery yet made in Agriculture. By it any quality of manure is increased from 25 to 50 per cent. can be obtained in the crop of

REAL ESTATE

POTATOES

Proved by two years' experience of many of our first citizens during Winter or early Spring to prepare the seed. Full directions sent for $1, payable after trial, at maturity of crop. ISAIAH T. OLTMER, Quakertown, Bucks Co., Pa.

4-3

THE SEASON AND CROPS.

If ever there seemed a special providence to benefit our farmers, there seems to have been opened to them this year that grateful boon, for here in California, at this late date, comes fine April showers to bless the earth and give to growing crops an unusual aid: so repeated and so late refreshings are unusual, and from all sections of our State we have cheering words and strong assurances of a promising year.

We append an extract from a rich cultivator in Contra Costa County which speaks hopefully:—

"The new Constitution must go overboard, but the old one amended at once, and not so much amended as its good provisions strictly enforced.

The prospects for a crop were never better. Every weed and pasture plants growing—every grain is fairly forced in its upright shoot by an internal spiral power—fruit trees and vines overburdened with blossoms, some varieties already plastered over with fruit, its thinning out is a heavy tax on the orchardist.

The ground is in the best condition for immense crops, the practice of a naked "Summer Fallow" should be improved upon by shading, covering and providing additional plant food during the term of so called rest, but such catch crops should be pastured off on the ground, then the "Fallow" would be a rational operation and most beneficial."

We have a letter from one of the pioneer farmers of Alameda County, who writes thus:—

"We have an extra promise of good crops in this neighborhood this year, in fact, we are having one of the best growing Springs I ever knew."

There never has been a more timely aid than these late rains, and in proof of this the fruit that is now coming to market—the great quantities of asparagus of extra quality is a particular evidence of a rapid and strong vegetable growth.

Our grain growers write and tell us of the remarkable growth and cheering prospects of the grain crop. Haying too has begun, and this may also account for the rains, for it is the fashion to have rains when haying begins, although this is very early.

Our orchardists tells us the trees are overloaded and the thinning out process must be attended to now, to save the trees from breaking down. Our vineyards too are giving an unusual promise to their growth, and sett for a great crop of grapes and wine presses to overflowing.

Soon the air will be made fragrant with new mown hay, while every hill, mountain and valley is bright and beautiful with spring flowers—soon our markets will be full of luscious cherries, apricots, and small fruits to feast our people, these blessings ought to drive out of mind the fret of political turmoil and battle of party—but we know until "After Election," mortal eyes are apt to look after the "Nearer Chance," so after the 7th of May, our beautiful country, its flowers and fruits and the manifold bounties of a kind Providence will be more esteemed, and poor mortals enjoy more of life with grateful recognitions of a kind beneficent nature.

THE LATE RAINS.

These have been a great "God send" to our farmers, as these rains have come at a most propitious moment when they were greatly needed; nothing could happen to our farmer that could have done them so much good as the copious and repeated showers that have so lately blessed the earth.

The blessed rains are our farmers gains,
Crowning the mountains, hills and plains
With bud, and blossom, everywhere,
Sweeting the winds with a fragrant air,
While the wind their choral anthems sing,
The opening season, Beautiful Spring,

Shall mortal man be less grateful or joyous than the birds? a song of praise should go up from all.

Bless God for the rains this beautiful spring.

The Haying Season.

The hay cutting season has come again, even now we hear of some places where Hay has been cut—and it may be *that* was the cause of the late rains—even now rain clouds are about, and Haymakers are making preparations for the coming work.

The work to be successful, to make a profitable crop, the Haymaker should have the best implements, and cure his hay *green*, that always commands the highest price.

While speaking of *making Hay* we remind our readers that they can find the *best Hay Rake* ever made, advertised in our Columns by G. A. Davis, 327 Market street, to which we call special attention.

Our Dairy Salt.

Good pure *salt* is one of the great essentials for the making and preserving of the *Butter* in our dairies—a large part of the spoiled butter that is found in our markets, and a large part of the butter that is now being packed down would keep better and sweeter and command a higher price if more care was paid to the kind of *salt* used.

True economy demands that only the purest and best salt should ever be used in the dairy—it is poor economy to use *any salt* because it could be *bought cheap*, the very best *Dairy Salt* that can be found according to the experience of the *best Dairymen* is the LIVERPOOL FINE SALT, this kind is approved by the most noted Dairymen in all the great Dairies of the Eastern States, and should be well known by the Dairymen of California, and this only should be used.

Messrs. Williams, Blanchard & Co., are the Wholesale Agents for this Salt, and Butter makers should use this and no other.

Eucalyptus Hop Poles.

We would suggest to our Hop growers the plan of growing the Eucalyptus trees as an economical way of supplying themselves with *Hop poles*, that would be cheaper than any other kind and at same time not liable to rot.

The Eucalyptus trees if planted thickly, the right variety will grow rapidly, 12, 15, even 20 feet in a single year, and a two year's growth would make good Hop poles, and these when cut now once would spring from the roots, thus furnishing a perpetual supply—we can commend the culture of this tree for this purpose, for in addition to their quick growth and cheap cost, the oil in the bark would be an antidote against worms or insects that sometimes affect the Hop.

AGRICULTURE AND THE NEW CONSTITUTION.

The agricultural interests of our State are unvariably admitted to be the *basis of all our prosperity*, this is clearly proved by the great anxiety shown by all classes when the *rains are delayed*, or any blight touches our great grain crops, for upon these the masses are dependent and all business operations are based.

And yet with such mighty interests at stake, the *new Constitution* has stricken out all appropriations to this great interest, it has blotted out the appropriations which were made to the STATE AGRICULTURAL SOCIETY, to all the DISTRICT AGRICULTURAL SOCIETIES, and the MECHANICAL INSTITUTES, and ignored all that wise and paternal aid which every other State always give with a liberal hand to these great interests.

We are confident that our farmers, orchardists, vineyardists and stock raisers, the great mass of our agriculturists who pay the largest amount of taxes, have not yet noted these facts, that all aid to these *Industrial Institutions* are *completely cut off* in the *new Constitution*, and as with these, so will it be in regard to the aid for our *Agricultural College*, which is the recipient of a large bounty from the State.

Our farmers who are ever among the liberal minded for *charity* and *benevolent enterprises* will see that not only is all aid to the cause of AGRICULTURE and the MECHANIC ARTS stricken out of the *new Constitution*—but all aid to the *unfortunate*, all *benevolent aids*, as we show in another column, and thus every community must bear the costs of these, instead of the State Treasury—let a just thought be given to these matters and our farmers will reject the new Constitution by the ballot of—NO.

THE NEW CONSTITUTION.

DOUBLE TAXATION.

HOW IT WILL WORK AGAINST THE FARMERS.

The clause in the new Constitution relative to the assessment of land will work peculiar hardship in the foothills. Section 2 of Article 13 says:

"Cultivated and uncultivated land, of the same quality and similarly situated, shall be assessed at the same value."

Now let us see how that will work among the small farmers of the foot-hill section. When the Assessor comes around the conversation will be about like this:

Assessor—How much land have you, Mr. Granger?

Granger—Three hundred and twenty acres.

Assessor—It is all about of the same quality, isn't it?

Granger—Yes; there is no essential difference in the quality of the land that I am aware of.

Assessor—All under cultivation?

Granger—No, sir; there are but fifty acres cultivated at present.

Assessor—What do you value your cultivated land at, Mr. Granger?

Granger—Well, I hardly know. I don't wish to sell, and have never given the subject much consideration.

Assessor—I am assessing cultivated land in this vicinity at $25 an acre; do you consider that an excessive valuation?

Granger—No. I think my cultivated land is worth $25. I wouldn't take that for it.

Assessor (figuring)—Very well, then, Mr. Granger, I value your land at $8,000; the buildings and other improvements I shall assess separately.

Granger—What! eight thousand dollars! Are you crazy? Why, sir, I only paid $1.25 an acre for this land, and 270 acres of it has not been improved or cultivated in any way, and isn't worth a picayune more to-day than it was when I preempted. What do you mean? Fifty acres, at $25, would be $1,250. I am willing you should put down the remaining 270 acres of my claim at $2 per acre—certainly not above that; 270 acres of my claim at $2 would be $540, which added to the value of my cultivated land, makes a total of $1,700 for the whole ranch—every dollar it is worth. Why, sir, every dollar I can produce and earn in a year, over and above a bare living for my family, would not suffice to pay the tax on $8,000.

Assessor—I can't help that. The new Constitution says that cultivated and uncultivated land, of the same quality, shall be assessed at the same value; and I am consequently compelled to assess you $25 an acre for all your land. You can apply to the Board of Equalization, Mr. Granger, but as the clause in the Constitution I have referred to is mandatory, I don't think you stand any chance of getting a reduction.

[The *Calaveras Chronicle* presents the above statement of *facts*, of how the NEW CONSTITUTION will affect our farmers in the way of taxation upon their lands—to this statement we call the particular attention of all farmers, for they already have a load of taxes as heavy as they can bear.—ED. F.]

Robbing the Orphans and Homeless.

One of the great wrongs the *new Constitution* would inflict upon the community is, that it shuts up the great heart of charity and humanity by cutting off all support to our *Orphan Asylums*, our *Aid Societies* and *all* our *Charitable Institutions*.

Charity is a GOD-LIKE ATTRIBUTE, and it has always been the boast of the citizens of our "Golden State" that California from the advent of the "Sanitarian Commission" to the present time, has ever been ready to aid with a liberal hand every call or claim of the unfortunate abroad or at home; our great liberality to the suffering South in her recent hour of need, the "Yellow Fever Plague" bore evidence of this.

Every Orphan Asylum of every creed; every Widows' Society and Children's Aid Societies have always had a helping hand, but now, the *new Constitution* if it were adopted would *strike out* this *golden link* of charity, and cast orphans, widows, and homeless children upon a cold world for what aid they could crave and beg.

The voice of humanity cries aloud for these that we should save them from suffering, and to do this we must reject the *new Constitution* by the emphatic vote—NO!

STOPPING EMIGRATION TO OUR STATE.

The adoption of the NEW CONSTITUTION will assuredly check emigration to our State more than any measure that its bitterest enemies could possibly devise, already the news has gone abroad East that capital to a very large amount that was intended to be invested in manufactures and new buildings and improvements has been turned from these enterprises and sent abroad, and that many large improvements in view have been abandoned, by reason of the fear that the *new Constitution* would be adopted, which by reason of heavy and *unjust taxation* would cripple all our industries.

A very large, an immense amount of capital that would have been invested in *Industrial Enterprises* has been changed into our U. S. Bonds, and the gold paid for them sent East to "Uncle Sam's Treasury" where now there is nearly $400,000,000 locked up, doing no one good, while our mechanics and working men go about our streets seeking employment.

MECHANICS AND WORKINGMEN!

look to it, if you want work now, what will you do if the NEW CONSTITUTION *should be adopted?* just as sure as this is done for every *day* you stand idle now, you would be out of employ for a *month* then.

Look to your votes! your Labor, your Bread, your Homes, depends upon your own action now.

THE RAILROAD INTERESTS.

During the present hotly and we say furiously contested elections, the bitterest party feeling will be drawn out, and, as is well known the bitterness and spite so long and so constantly hurled against the *Railroad Interest* will necessarily be kept up virulently—even to the bitter end.

We would ask our farmers and producers seriously to consider what would be their condition, and how could they market their Grain, Hay, Wool, Fruit, Wine and other products were there NO RAILROADS?

The price of shipment of all these products are not one quarter of what they were *Ten years ago*, and every year less and less, and yet some will complain.

Yes, there would be grumblers even were the cost *half* what it is now—yet we ask in all earnestness for TRUTH and JUSTICE sake, why not give *due credit* for the reduction of the cost of transportation of our products to the *Railroad*, for what they have already done, instead of the bitter tirade against them now for what they can not do—farmers be *just* in this matter, and you will then find your reward in it.

Nothing Safe, Nothing Hopeful.

Every industry of our State, every future prospect, the hope of coming years, FOR THIS STATE, is now depending upon the action of the citizens of California, in the next few weeks.

The cloud that now rests like a pall upon the vital interests of California will not be lifted save by the UNITED, ENERGETIC ACTION of her own best citizens.

Those citizens who have SHIPS, WAREHOUSES, STORES, MANUFACTORIES, WORKSHOPS, FARMS and other great interests, must now see all these endangered by the threatening cloud that hangs over all these interests, and it must depend upon their united and strong action alone, to lift this cloud and avert the threatened danger, unless this danger is averted, unless the NEW CONSTITUTION is DEFEATED, our Ships will lie at our wharves idle, our Warehouses will hold their merchandize unsold, our manufacturers will have no demand for their goods, workshops will close; our farms will be sold and our farmers feel the blow as heavy as any other interest, for all must suffer.

The danger is great, it is near, it is imminent, and it behooves all to be awake and alive to duty.

Let the watchword be—*Ready! Ready!! Ready!!!*

WIRE BAILING FOR HAY.

The firmer fashion in bailing Hay or Grain was to use *Rope* as binders—recently wire has been introduced as a more compact and stronger article, and it has been used to a considerable extent

There has however been some serious objections made to wire from the fact that by reason of the coils and the kinks in the wire it has occasionally been caught into the machinery of the Mower or Reaper and has done serious injury to the machines.

This objection has not been duly considered by our Haymakers and Grain Growers.

While some say there is a compactness and an economy in the wire they forget the danger and risk to a valuable Mower or Reaper, this view should not be lost sight of.

Another item to remember, the wire when once used is done with, and of no more account, while the *Bailing Rope* can be used again when duly saved, for many purposes, even to *one-half* its original cost, and "economy is wealth."

We are induced to make these suggestions to our *farmers* note for as the times are, every *penny saved* is as good as a shilling earned, therefore we say to our "Haymakers" and our "Grain Growers" who use the machines that cut and "bale on the field" do not use *wire bailing*, but use good Bailing Rope, and you will be largely the gainers.

There is another danger arising from the use of wire for bailing, when the bales are broken the wire is often carelessly thrown aside in the stable or stock yard, and thus exposes the stock to being caught by the feet, resulting in more or less injury, and sometimes to the loss of valuable animals, nothing more dangerous in a stock yard or stable than bailing wire, and when Bailing Rope is used there is no danger whatever.

Diphtheria.

This fearful disease is now doing its terrible work of death among the children of our State and the ordinary remedies fail to arrest it.

If parents would but try the great Remedial Agency of the Eucalyptus, they could save their children from this direful death dealing scourge.

Be sure and obtain the true Medicine, *David Clarke's Australian Remedials.*

AUSTRALIA.

AGRICULTURAL NEWSPAPERS.

Editors, strangers and citizens from the Eastern, the Middle, or Southern States, also Editors over our own Coast who may desire to see or refer to their own Journals, or any Agricultural or Horticultural Journals, will always find them on file in the FARMER READING ROOM, to which they are always bid welcome.

ONE HUNDRED of the leading Journals and Magazines of this class, the best in the United States, are in this collection, giving to those in search of Agricultural knowledge the best Information on this Coast

A Large Library also, for *General Reference.*

Australia and California

We have full files of Australian Papers from all parts of Australia, showing the great interest they take in this Country, one thing of great moment, is the "Steamship Line," it is of vital importance to the welfare of the Colonies, and so vastly important to the Pacific Coast in the great trade that can be built up between the Colonies and California, if our Merchants do their duty.

These Journals are arranged on file for the convenience of all who may desire to peruse them. We have as follows:—

The Sydney Morning Herald, Sydney.
" *Town and Country*, Sporting Paper, Sydney
" *Australasian*, Melbourne.
" *Weekly Times*, "
" *Adelaide Observer*, Adelaide
" *Queenslander*, Brisbane, Queensland.
" *Week*, " "
" *Capricornian*, Buckhampton, Queensland.
" *Port Dennison Times*, Port Dennison.
" *Wide Bay and Burnett News*, Queensland.
" *Darling Downs Gazette*, Toowoomba, "

Many of these Journals are of the largest size, from 20 to 38 pages, several splendidly illustrated with views of the Public Buildings, Landscapes, Public Men, Stock, etc.

CONTRIBUTIONS FROM QUEENSLAND

We Invite all our readers and our citizens especially who are interested in our MANUFACTURES and the MECHANIC ARTS, and our AGRICULTURE, to visit the FARMER Office and see the RICH PRODUCTS brought from QUEENSLAND by the Commissioner, they are now on Exhibition open to all, in the READING ROOM and MUSEUM of the CALIFORNIA FARMER OFFICE.

FLUCTUATIONS IN VALUES.

The violent fluctuations in the values of grain and provisions continue. Nor do they appear called for by any known marked changes of consumptive demand or supply. Last week the grain markets of the entire country were thrown into spasms by a fiasco, in connection with the Keene wheat stocks held principally in Chicago. It is asserted by Mr. Keene that some parties in Chicago caused a forged dispatch to be sent from New York to the firm of Messrs. J. K. Fisher & Co., who are Mr. Keene's brokers in Chicago, directing them to sell two million bushels of wheat, unless the market receded three cents per bushel from its opening figures on that particular day (Friday). The dispatch was a night telegram; but, notwithstanding, the agents acted upon it, without causing it to be repeated, and without making further inquiries of Mr Keene. The effect of throwing so much wheat upon the market was, of course, disastrous; values receded some five to six cents per bushel in a comparatively short space of time; and a large number of holders lost heavily, while more than one were virtually bankrupted

The whole affair was, to say the least, a most unfortunate occurrence, especially in view of the fact that Mr. Keene is a large holder of grain, and also that the impression has got abroad that certain parties are introducing the methods practiced on the California mining exchanges into the produce exchanges of the Eastern States.

Nor do the late violent fluctuations in the stock, as well as produce markets of the past few months tend to allay this growing impression. It cannot be denied that both markets have, of late, been depleted, on the contrary, by operators having large amounts of capital and credit at their disposal.

We can only repeat our previous warnings. We consider it in the highest degree injudicious, and we may add, ruinous, that such palpably gambling operations as those which have taken place upon many of our boards of trade during the past month or two should become permanent; for the reason that, sooner or later, their effects can scarcely prove less than disastrous, not only to their promoters, but to the legitimate trade of the country.—*Commercial Chronicle, March* 13, 1879.

It is a question with many grain operators whether Mr. Keene sold the wheat held by him. But it is unquestioned that the "forged dispatch" affair has hurt holders of wheat fully as badly as if Mr. Keene had sold. The majority reason that if the throwing of 2,000,000 bushels of wheat upon the market put it down from 5 to 6 cents, what would be the price after the larger share of the immense stock in store had been realized upon? The fact is that the Keene fiasco has badly damaged the market generally.

A Pamphlet Free.

THE MURRAY HILL PUBLISHING COMPANY, 129 East 28th St., New York City, will send by mail a large pamphlet entitled EVIDENCES OF DOCTOR FOOTE'S SUCCESS as a writer and practitioner of medicine, and a catalogue of all their publications—reading enough for several weeks—if you will but enclose one letter stamp to their address.

WARD'S FERTILIZERS.—These very superior kinds of *Fertilizers* and also *Insect destroyers* should be universally used upon plants and flowers

FURST & BRADLEY'S
SELF-DUMP SULKY RAKE.

The Attention of Farmers is called to the merits of this Rake, and its great superiority over all Self-Dump Rakes heretofore brought to the notice of the public. The Dumping is done by friction bands around the ends of the hubs giving full control of the Rake to the operator, so as to be able to carry the teeth clear of the windrow. This does away the necessity of ratchets and pawls which is so objectionable in all other Self-Dump Rakes. The teeth are of the BEST CAST STEEL and have a double coil which renders them capable of the most severe work.

THE AUSTRALIAN
GUM TREE.
The Great Remedy

The Eucalyptus Cure!

DAVID CLARKE'S

Liver and Bilious Pills.

☞Full Directions for Use Accompany every Box.

—ALSO—

CLARKE'S

Concentrated Compound Fluid Extract

—OF—

EUCALYPTUS

(AUSTRALIAN GUM TREE).

THERE is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the back bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague it is marvelous. It is equally valuable in all diseases of the Liver.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach o Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

Best Fruit Dryer in the World.

HAMPTON & KELLY

—AND—

KELLY & COLE'S

FRUIT DRYER.

THIS MACHINE DRIES BY STEAM HEAT AND DOES not burn the fruit. It is very economical in its working machinery, and so perfectly simple that every family can use it in their homes, it is also perfectly safe.

In connection with this machine is an admirable GRINDER capable of grinding one bushel fruit per minute.

The capacity of drying of the SINGLE DRYERS are from 20 to 30 bushels in 10 hours for each machine. Large machines will dry from 50 to 100 bushels in 10 hours.

Orders for these machines, for the present should be sent to Messrs. Kelly & Cole, First and Salmon Streets, Portland, Oregon.

A manufactory of these Dryers will soon be established here, and will be under the superintendance and management of **ALFRED B. COLLVER**, who is the General and Traveling Agent of all these Inventions.

Mr. Collver will have his office in this City early day—all letters for him can be addressed through the Express or Postoffice to the undersigned, and they will have prompt attention.

ALFRED B. COLLVER.

N. B.—Letters can be directed to me care of EDITOR FARMER, to whom we are permitted to refer for the excellent quality of our Fruit Dryer A. B. C.

Home Miscellany.

"There is no place like HOME.
Home! It should be Heaven on Earth

THE MINER'S DREAM.

BY PHILMORE.

The sun that shone so brightly o'er the gorge
Had scaled the hilly barriers in the west,
The burnished peak flung back his dying rays,
And darkness gathered o'er the miner's rest.

His evening meal was done, his blankets spread,
And he in revery sat him down alone;
The blackening faggot dim and dimmer grew,
The miner slept and dreamed a dream of home.

Albeit substanceless, he backward sped,
To life's beginning, when saw he true
What fleeting years had never proved,
How little real his early childhood knew.

A gauzy ladder reached him dimly then,
Upon the topmost round was seen
With dower of beauty a being crowned,
And spirit forms, air clad, moved in between.

On noiseless wings they neared the earth
And hovered o'er, by fond affection led,
Hosts numberless were there and mingling all,
Concentrated round his bed

Eternal thus, the miner fain would sleep
And live as there within the spirit's sphere;
But morn shall with it bring its work and care,
That proves how vain the joys we strive for here.

THE FARMER.

BY A W MIX.

While poets slog, and laurels bring
To deck the warrior's brow,
My wreath shall be, all green and free,
For him that holds the plow.

All hail the hand that tills the land—
A noble work to do,
By God designed to raise the mind
And make it happy too.

'Twas Heaven's will that man should till
The soil on which he stood—
Plant earth's broad field, that it might yield
A harvest rich and good.

Then why should man dislike the plan
Which the Eternal made?
Quit the plow, and meanly bow
To some low humble trade!

All farmers good have long withstood
The sneers of fools and fops—
Whose use on earth, e'er since their birth,
Has been—to eat his crops!

In rosy morn, at day's first dawn,
He's up for labor's wreath,
To breathe the air, so pure and fair,
Which gives him perfect health.

Throughout the day, without delay.
He labors, fresh and strong
Arranging crops, as best he may—
Nor thinks the hours too long.

His manly form doth breast the storm,
Nor dread the winter cold,
Nor Sol's hot rays, in summer days—
For labor makes him bold.

He ever stands with open hands,
To feed the needy poor;
A steward true, o'er all his lands,
And keeps an open door.

Then hail the hand that tills the land,
A noble work to do—
By God designed, to raise the mind
And make it happy too.

TO PARENTS.

He who checks a child with terror,
Stops its play and stills its song,
Not alone commits an error,
But a great and moral wrong.

Give it play and never fear it,
Active life is no defect;
Never, never break its spirit,
Curb it only to direct.

Would you stop the flowing river,
Thinking it would cease to flow?
Onward it must flow forever;
Better teach it where to go.

DON'T KILL THE BIRDS.

Don't kill the birds!—the little birds,
That sing about your door,
Soon as the joyous spring has come,
And chilling storms are o'er.

The little birds!—how sweet they sing!
Oh! let them joyous live,
And do not seek to take the life
Which you can never give.

Don't kill the birds!—the pretty birds
That play among the trees!
'Twould make the earth a cheerless place,
Should we dispense with these.

Don't kill the birds!—the happy birds
That bless the field and grove;
So innocent to look upon,
They claim our warmest love.

A good word is an easy obligation, but not to speak ill requires only our silence, which costs us nothing.

"There now," exclaimed a little girl, while rummaging a drawer in the bureau, "grandpa has gone to heaven without his spectacles."

A married lady lately consulted her lawyer on the following question, namely, "Am I wedded Mr. Smith for his wealth, and that wealth is now spent, am I not, to all intents and purposes a widow, and at liberty to marry again?"

Infant Prodigy: "Why is your hair so gray, mamma?" Mamma: "Well, because you're such a naughty child sometimes." I. P.: "What a naughty child you must have been! Poor grandma's hair is quite white!"

A Miss Wheat, down in Indiana, was thrashed the other day by a lover whose Wheat heart she'd ceased to be.

IDLE HANDS.

Mr. Thornton returned home at his usual midday hour, and as he passed by the parlor door, he saw his daughter, a young lady of nineteen, lounging on the sofa with a book in her hand. The whirr of his wife's sewing-machine struck on his ear at the same moment. Without pausing at the parlor door, he kept on to the room from which came the sound of industry.

Mrs. Thornton did not observe the entrance of her husband. She was bending close down over her work, and the noise of her machine was louder than his footsteps on the floor. Mr. Thornton stood looking at her for some time without speaking.

"Oh, dear!" exclaimed the tired woman, letting her foot rest upon the treadle, and straightening herself up, "this pain in my side is almost beyond endurance."

"Then why do you sit killing yourself there?" said Mr. Thornton.

Mr. Thornton's aspect was unusually sober.

"What's the matter? Why do you look so serious?" asked his wife.

"Has anything gone wrong?" Mrs. Thornton's countenance grew slightly troubled. Things had gone wrong in her husband's business more than once, and she had learned the occurrence of disaster.

"Things are wrong all the time," he replied, in some impatience of manner.

"In your business?" Mrs. Thornton spoke a little faintly.

"No, nothing especially out of the way there, but it's wrong at home."

"I don't understand you, Harvey—what is wrong at home, pray?"

"Wrong for you to sit in pain and exhaustion over that sewing machine while an idle daughter lounges over a novel in the parlor. That's what I wish to say."

"It isn't Effie's fault. She often asks to help me. But I can't see the child put down to household drudgery. Her time will come soon enough. Let her have a little ease and comfort while she may."

"If we said that of our sons," replied Mr. Thornton, "and acted on the word, what efficient men they would make for life's trials and duties!"

"You are wrong in this thing—all wrong," continued the husband. "And if Effie is a right-minded girl, she will have more true enjoyment in the consciousness that she is lightening her mother's burdens than it is possible to obtain from the finest novel ever written. Excitement for the imagination is no substitute for that deep peace of mind that ever accompanies and succeeds the right discharge of daily duties. It is a poor compliment to Effie's moral sense to suppose that she can be content to sit with idle hands, or to employ them in light frivolities, while her mother is worn down with toil beyond her strength. Hester, it should not be!"

"And it shall not be!" said a quick, firm voice.

Mr. Thornton and his wife started, and turned to the speaker, who had entered the room unobserved, and been a listener to nearly all the conversation we have recorded.

"It shall not be!" And Effie came and stood by Mr. Thornton. Her face was crimson; her eyes flooded with tears, through which light was flashing; her form drawn up erectly; her manner resolute.

"It isn't all my fault," she said, as she laid her hand on her father's arm. "I've asked mother a great many times to let me help her, but she always puts me off, and says it's easier to do a thing herself than to show another. Maybe I am a little dull—but every one has to learn, you know. Mother didn't get her hand in fairly with that sewing-machine for two or three weeks; I am certain it won't take me any longer. If she'd only teach me how to use it, I could help her a great deal. And, indeed, father, I am willing."

"Spoken in right spirit, my daughter," said Mr. Thornton, approvingly. "Girls should be as usefully employed as boys, and in the very things most likely to be required of them when they become women in the responsible positions of wives and mothers. Depend upon it, Effie, an idle girlhood is not the way to a cheerful womanhood. Learn and do now, the things that will be required of you in after years, and then you will have an acquired facility. Habit and skill will make easy what might come hard, and be felt as very burdensome."

"And you would have her abandon all self-improvement," said Mrs. Thornton. "Give up music, reading, society——"

"There are," said Mr. Thornton, as his wife paused for another word, "some fifteen or sixteen hours of each day, in which mind or hands should be rightly employed. Now, let us see how Effie is spending these long and ever recurring periods of time. Come, my daughter, sit down; we have this subject fairly before us. It is one of great importance to you, and should be well considered. How is it in regard to the employment of your time? Take yesterday, for instance. The records of the work of a day will help us to get towards the result after which we are now searching."

Effie sat down, and Mr. Thornton drew a chair in front of his wife and daughter.

"Take yesterday, for instance," said the father, how was it spent? You rose at seven, I think?"

"Yes, sir; I came down just as the breakfast-bell was rung," replied Effie.

"And your mother was up at half-past five, I know, and complained of feeling so weak that she could hardly dress herself. But, for all this, she was at work until breakfast time. Now, if you had risen at six, and shared your mother's work until seven, you would have taken an hour from her day's burdens, and certainly lost nothing from your music, self-improvement or social intercourse. How was it after breakfast? How was the morning spent?"

"I practiced an hour on the piano after breakfast."

"So far so good. What then?"

"I read the 'Cavalier' till eleven."

Mr. Thornton shook his head and asked:

"After eleven how was the time spent?"

"I dressed myself and went out a little after twelve o'clock."

"An hour was spent in dressing?"

"Yes, sir."

"Where did you go?"

"I called on Helen Boyd, and we took a walk down Broadway."

"And came home just in time for dinner? I think I met you at the door?"

"Yes, sir."

"How was it after dinner?"

"I slept from three until five, and then took a bath and dressed myself. From six until ten-time I sat at the parlor window?"

"And tea?"

Read the 'Cavalier' till I went to bed."

"At what hour?"

"Eleven o'clock."

"Now, we can make up the account," said Mr. Thornton. "You rose at seven and retired at eleven—sixteen hours. And from your own account of the day, but a single hour was spent in anything useful—that was the hour at the piano. Now, your mother was up at half-past five, and went to bed, from her sheer inability to sit at her work any longer, at half-past nine. Sixteen hours for her also. How much reading did you do in that time?"

And Mr. Thornton looked at his wife.

"Don't talk to me of reading!" I've no time to read," Mrs. Thornton answered a little impatiently. The contrast of her daughter's idle hours with her own life of exhausting toil did not affect her mind very pleasantly.

"And yet," said Mr. Thornton, "you were always fond of reading, and I can remember when no day went by without an hour or two passed with your books. Did you lie down after dinner?"

"Of course not."

"And didn't you take a pleasant walk down Broadway? Nor sit at the parlor window with Effie. How about that?"

There was no reply.

"Now, the case is a very plain one," continued Mr. Thornton. "In fact, nothing could be plainer. You spend from fourteen to sixteen hours in hard work, while Effie, taking yesterday as a sample, spends about the same time in what is a little better than idleness. Suppose a new adjustment were to take place, and Effie were to be usefully employed in helping you eight hours of each day, she would still have eight hours left for self-improvement and recreation; and you, relieved from your present overtasked condition, might get back a portion of your health and spirits, of which these two heavy household duties have robbed you."

"Father," said Effie, speaking through her tears that were falling over her face. "I never saw things in this light. Why haven't you talked to me before? I've often felt as if I'd like to help her; she says, that 'You can't do it,' I'd rather do it myself.' Indeed it isn't all my fault!"

"It may not have been in the past, Effie," replied Mr. Thornton. "But it certainly will be in the future, unless there is a new arrangement of things. It is a false social sentiment that lets daughters become idlers, while mothers, fathers, and sons take up the daily burden of work and bear it through all the business hours."

Mrs. Thornton did not come gracefully into the new order of things proposed by her husband and accepted by Effie. False pride in her daughter, that future lady ideal, and an inclination to do herself, rather than take the trouble to teach another, were all so many impediments. But Effie and her father were both earnest, and it was not long before the overtasked mother's weary face began to lose its look of weariness, and her languid frame to come up to an erect bearing. She could find time for the old pleasure in books, now and then for a healthy walk in the streets, and a call on some valued friend.—*Wood's Household Magazine.*

A New Book by Henri Greville.

Still another novel by Henri Greville, says a letter from Paris. "Bonne-Marie" is its title, and the scenes are laid in Normandy and Paris, and its translation from the advance French sheets into English for American publication has been made by Mary Neal Sherwood, whose translation makes it seem almost incredible that it could have been written originally other than in English. It will be published in a few days by T. B. Peterson & Brothers, in uniform style with the other works by Henri Greville issued by them.

The Art Association.

The Art Association of San Francisco has again opened its doors to the public to win its attention to the "Love of the Beautiful."

The present opening shows some 200 fine paintings, principally or wholly the works of our own artists and most noble and meritorious, and by those who have done so much to elevate the public taste, among them will be found several by San Francisco's returned artist, "Toby Rosenthal," who has won fame abroad and at home.

Our citizens should give to the Art Union their most kindly aid and encouragement—the admission is only *twenty-five cents*, and surely there can be no more agreeable or economical place for spare hours than the Art Union.

Art Institute in Peru.

A recent act of the Administration in Peru has been the issuing of a decree ordering the foundation of a Fine Arts Institution, for the teaching of painting, sculpture, music, declamation and architecture. The purpose of the Government in creating an institution of this kind is to offer a new field to young men, who will thus have the opportunity afforded them of acquiring such knowledge as may open to them a new career. This measure has met with general favor, and if properly carried out, is expected to prove of great benefit in the work of social improvement in the country.

There is to be a grand National Exhibition held in Moscow, Russia, in 1880, which will be accompanied by festivities of no ordinary kind. It coincides in point of time with the 25th anniversary of the Emperor Alexander's accession to the throne

GRAND TRIUMPH FOR EUCALYPTUS.

EUCALYPTUS WILL CONQUER DISEASE.

We publish the following strong TESTIMONIAL in favor of the GRAND REMEDIAL POWER of the Eucalpytus, prepared by DAVID CLARKE, CHEMIST, of Australia.

This Testimonial comes from a prominent Merchant of this City, whose name is with us for reference for all who suffer and would be relieved.

SAN FRANCISCO, April 7, 1879.

EDITOR CALIFORNIA FARMER—*Dear Sir.*

Some time ago I had the misfortune to sustain a dislocation of the shoulder received from a fall, and while I was suffering the most acute pain as the effect of it, so much so as to be deprived of my sleep nights, I met my old friend, Col. Warren, who presented me with a bottle of "Eucalyptus Oil" saying as he did so, "try it." "bathe the shoulder and arm well, and on retiring saturate a cloth with the oil, and bind it to your shoulder, and you will have no more sleepless nights on account of pain from that." I followed the Colonel's directions, and must say that the Eucalyptus Oil will do all that is claimed for it as an alleviator of pain (rheumatic and otherwise) and more too.

A preparation made from the Eucalyptus Trees, by frequent ablutions of the eyes will restore weak eyes to strong ones and positively restore the sight as good as ever to people whose eyes are failing, if they will keep their body in good condition by the use of Eucalyptus Pills—while using the eye wash. Yours truly, G. H. B.

N. B.—There are many compounds made in this State, yet however good, the *genuine* Remedials are those prepared by David Clarke, Warwick, Australia, for sale by Warren & Co., Agents.

THE BLOOD---THE LIVER---LIFE.

Almost every newspaper in our land far and near herald new preparations for curing "Liver Diseases" and "Purifying the Blood," page after page of our daily and weekly Journals publish all the old and new drinks. "Bitters" of all kinds have posters on the fences and buildings all over our State and Country, for all know that BLOOD IS THE LIFE AGENT and without PURE BLOOD diseases of all kinds are constantly generating.

Our newspapers all are almost daily making records of sudden deaths by *heart disease* and by *apoplexy*, and these are only in truth BLOOD DISEASES, which all the vinous or spirituous stimulants in the world, though they may relieve from pain temporarily, yet can never thoroughly cure of disease.

To perfectly cure, the blood must be made pure and life giving; its diseased condition must be changed, and new vitality must be so infused into it, and with such power as to drive out all the impurities, so that new vitality shall infuse *new life* into its circulation.

Among all the many preparations that have thus far been perfected there has never yet been any equal to DAVID CLARKE'S EUCALYPTUS BLOOD PURIFYING REMEDIALS.

These are entirely free from all mineral or spirit ingredients, nothing but the pure properties of the *combined virtues* of *leaf*, *bark* and *root* of more than fifty varieties of this famed tree are concentrated in this wonderful Blood Purifier and life saving Medicine.

Those who would be saved from sudden death by *heart disease*, *apoplexy*, *diphtheria* and the other fearful diseases which this renowned Medicine cures, should not fail to guard their own lives and that of their kindred and friends by using this *Australian Remedial*, the only pure variety is that of David Clarke, Warwick, in Australia, ask your Apothecary for this Preparation and thus save life.

Popular New Song and Chorus.

"Brown Eyes Close to the Window," a new song and chorus by Rosabel; words by James C. Macy, is one of the sweetest and most attractive songs published in years. The melody is one that will haunt you after once hearing it and the chorus is beautifully harmonized for four voices. The title page is embellished with an elegant picture and altogether "Brown Eyes Close to the Window" is the most pleasing song we have seen in years. It can be obtained of any music dealer or on receipt of 40 cents it will be mailed postpaid to any address by the publisher, S. BRAINARD'S SONS, Cleveland, O.

Diphtheria.

This fearful disease is now doing its terrible work of death among the children of our State and the ordinary remedies fail to arrest it.

If parents would but try the great Remedial Agency of the Eucalyptus, they could save their children from this direful death dealing scourge.

Be sure and obtain the true Medicine, *David Clarke's Australian Remedials.*

WARD'S FERTILIZERS.—These very superior kinds of *Fertilizers* and also *Insect destroyers* should be universally used upon plants and flowers

Not long since a lady of this town called upon a friend, and before leaving, patted her friend's little four-year-old boy upon the head, remarking, "I should like to have such a little boy as you are." Looking up into her face the little fellow replied, "Well, I guess you can. I don't believe God's lost the pattern of me."—*Tuscarora Times-Review.*

SEND THE FARMER ABROAD.

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, if they send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a JOURNAL as the CALIFORNIA FARMER. We know our JOURNAL is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the HOME CIRCLE everywhere, as a JOURNAL free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, SPECIAL PREMIUMS OF SEEDS are donated with the paper, to benefit our State.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your Instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own home.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

JOSH BILLINGS' COLUMN.

Truth is sed to be stranger than fickshun, it is, to most pholks.

Gamblers, nor infidels, havn't faith enuff in their professhuns to teach it to their children.

The world all praze the philosophers, but toss their essays into the caps ov the monkeys.

The best thing I kno ov is a fust rate wife, and the next best thing is a sekond-rate one

There is nothing so skarse as originality, even an original phool would be a great relief just now.

I never tri to settle other people's quarrels, I hav seen men tri to do this, and get badly whipt bi both partys.

The man who knos a thing, and kan tell it in the plawest words, is the hardest kind of a man to beat in a kross examinashun.

Whenever you cum akrost a man who distrusts everyboddy, yu hav found one whom it is safe for everyboddy to distrust.

I hav lived just long enuff to find out how little I kno, and no man who throws away his faith, is ever going to be very wize.

If yu undertake to hire a man to be honest, yu will hav to raize his wages every morning and watch him dredphull close besides.

Q.—What three things hav dun the most to civilize the world?

A.—The Bible, the looking-glass, and the muskett.

Yung man studdy politeness, even if yu ask a man for his toothpik, after he haz got dun using it, dont fale to thank him politely for it.

Q.—Whitch is the most reddy animile?

A.—The mule—they allwus sleep standing, so to be on hand when the kiking begins to flow.

I hav finally cum to the konklushin that if I kant prove a thing without betting 5 dollars on it, the thing haz got a dredphull weak spot sumwhare.

If yu want to find out a man's true karakter exsamin him at home bi the fire side, here he is the hero ov the occasion, and is angelick, or devlish, in spite ov himself.

Q.—Will yu pleze define an Enthuziast?

A.—An Enthuziast is a party who beleaves about 4 times as much as he kan prove, and who kan prove about 4 times as much as ennyboddy else believes.

The things that I kant prove I believe the most, I believe that one apple is sour, and another one sweet, but I will giv enny highly eddikated man a span ov matched mules, who will tell me what them so.

Q.—What is the best religious kreed to hav? A.—Charity. If a man will swop off all the religious kreed he haz got on hand, and invest the proceeds in charity, he will allwus be proud of the job.—*From Josh Billings' Almanac.*

Mercantile Library of Philadelphia.

This most excellent Institution has just sent forth its *Fifty-sixth Annual Report*, showing its rapid progress and its present prosperity.

The handsome illustrations showing the interior of the Library is proof of the excellence of the Library Rooms.

This showing is a gratifying one and reflects great credit upon the President and Directors of this Institution.

A MAGNIFICENT CAVE.—Pima county, Arizona, is in possession of a wonderful subterranean vault, which bids fair to eclipse the celebrated Mammoth Cave of Kentucky or the grand cavern near Fort Stanton, New Mexico, in which are found lakes, rivulets and large rooms containing many curious things. Explorers of the New Mexico cave found, one mile from the entrance, a lake to which they found no bottom, and to pass over which a small boat was constructed and put thereon. The rooms, many of them, are described as beautiful beyond description. From the ceilings thousands of stalactites are suspended, the rays from the burning torches giving to them the appearance of mansions lined with diamonds and precious stones.—*Arizona Miner, Feb. 7.*

MORE WANTED.—A record of the various penal convictions undergone by "Procrastination, the thief of time." A nail from the "finger of scorn." A hammer for "breaking" bad news. A saucer for the cup of misery." A plaster for "wounded feelings." A cement for mending "broken accents." A receipt for the wages paid when "good digestion *waits* on appetite." The title-page of the "book of Nature." The (circular) saw with which a noted orator *rounded* his periods. The tree that was cut down by *axe-ident*. The regal insignia with "the end *crowns* the work."—*Funny Folks Annual.*

Black Ink.

Bruised galls, one pound; logwood, copperas and gum arabic, half a pound each; water, three gallons. Boil all in the water an hour then strain.

"Do fishes go crazy?" is a conundrum proposed by Seth Green. Sometimes they get in seine.

If you turn an American "State" upside down you will find the *Etats* of the French Republic.

AMERICAN Berkshire Record.

Authentic and Reliable Pedigrees

Of the principal families of Berkshire Swine, with dates of farrow, addresses of breeders, etc.,

PATRONIZED BY THE

FOREMOST BREEDERS IN ENGLAND AND AMERICA.

Volume I. contains the standard of Characteristics and Marks of Berkshire Swine, adopted by the National Convention in 1872; and Volume II. the STANDARD OF EXCELLENCE, more recently adopted by the AMERICAN BERKSHIRE ASSOCIATION. In each will be found

Also Valuable Treatises on Swine

The price of Vol. I. is $3.50, post-paid; that of Vol. II. $5.00, post-paid. Volume I. and II. will be sent, if ordered at same time, (although both need not go the same address) for $8.00, post-paid, the money to accompany the order.

BLANK FORMS FOR PEDIGREES,

Bound in sets of one hundred, with stubs for retaining memoranda, for $1.00 per set. These forms are adapted to general use by breeders of all kinds of farm and domestic animals, and are designed to aid in the systematic preservation of pedigrees.

PREMIUM ESSAYS.

I. The Origin, Breeding and Management of Berkshire Swine.

II. The Diseases of Swine, their Causes, Symptoms and Remedies.

These two Essays, for which the Association paid $100 each, and the seven illustrations therewith, have been published together in pamphlet form. They will be sent post-paid on receipt of 25 cents.

For further information, read carefully the Third Annual Report of the Association, and the Suggestions, Instruction and Rules therewith, or Address,

N. B. These Splendid Volumes can be seen at THE FARMER OFFICE.

PHIL. M. SPRINGER, Sec'y,
Springfield, Ill.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents, Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American*. This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea*. We will immediately answer, and give the necessary instructions. For this advice we make *no charge.*

We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, can find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

ADVERTISERS ABROAD AND AT HOME.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the best, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows.—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion*; larger space, *Fifteen Cents per Line*; each subsequent insertion, *Ten Cents per Line*. This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $30.00.

For one-eight of a column, three months	$16.00	For one-half of a column, three months	60.00
For one-quarter of a column, three months	30.00	For an entire column, three months	100.00

For a six le month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable: the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the above rate

WARREN & CO., Proprietors,
320 CLAY STREET, SAN FRANCISCO.

Worth a Guinea a Box!

CLARKE'S

Liver and Bilious Pills.

The BEST MEDICINE you can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is

Clarke's

LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

TESTIMONIALS:

WONDERFUL!

WARWICK, QUEENSLAND, APRIL 21, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—I think it my duty to you, and for the benefit of others, to state, that for the past two years I have been troubled with a pain in my left side, I think through a hurt. I have been under the treatment of two medical men here. One told me I had heart disease; another, disease of the lungs. I went to Brisbane and consulted one of the leading Physicians there. I spent thirty pounds with doctors for medicine, and was worse than when I commenced. I could scarcely breathe for pain, and had given up hope that I was ever to be better. I heard of many cures by your Liver and Bilious Pills; I thought I would try them. I have only taken three small boxes: the pain is gone, my general health is improved, and now I can work as well as ever I have done. I have been working on the roads. My case has been well known here, and my wonderful recovery. Being for ever thankful to you. I am, truly yours,
WILLIAM STEWART.

PARTICULARLY NOTE THIS.

HERMITAGE, WARWICK, August 14, 1877.

MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR,—Four years ago I was sluicing tin at the Tin Mines. With standing in the water I took cold shiverings with night sweats—lost all desire for food. Consulted a Physician in Warwick, was under his treatment four months without improvement. Dissatisfied went to another, who gave me no hope of recovery, but improved a little under his treatment. One day, being very warm, I bathed in the river, and coming out of the water felt very ill. Went back to the doctor, who renewed the medicine without any benefit. In addition to the weakness and night sweats I had intense pain through my body, especially in my left side. My breathing was so painful and difficult, I thought I would be suffocated. I was five months, after the relapse, under the Doctor's treatment, getting worse every day, till the Doctor told me to go home, that I could not possibly live a week. I went home very sad. My wife persuaded me to try your Liver and Bilious Pills. I did. Before I used one box the night sweats were gone, the pain in my side better, my appetite improving. Got another box, and before it was finished, the pains were all gone, my breathing improved, and now, two months after, I never enjoyed better health, can do my work as well as I ever did. I can thoroughly recommend your Pills as having saved my life.
MICHAEL BYRNE.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR.—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed good *health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR.—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)
JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus:

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Farco & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it but if I must take it give me the Eucalyptus above all others. Yours sincerely,
GALEN CLARK.

We have the names of scores of well known citizens at our office, from all over the State, who have been relieved and cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you David Clarke's Australian Pills—the only genuine.

MANUFACTURED ONLY BY

COMMISSION SALES-ROOM, —AND— Purchasing Agency.

HAVING HAD THE EXPERIENCE OF OVER THIRTY years in dealing in TREES, PLANTS, SEEDS, and AGRICULTURAL IMPLEMENTS, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from fifteen to twenty-five per cent. for the great mass of purchasers. We would therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of MERCHANDISE for our FARMERS or RANCHMEN, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing their wants as minutely as they can; and when they desire our judgment we will do our best to suit them.

Our charge will be Five per cent., together with the cost of packing, freight, drayage, etc. Orders should inclose a satisfactory REFERENCE or the CASH; or bill could be sent by EXPRESS, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of TREES, SEEDS, PLANTS, etc., as this is our especial business, and we know we can satisfy all who may entrust us with their favors.

Gardens and Grounds designed and put in order, and every article furnished for the same.

Any one desirous of having their Gardens look gay throughout the season, can be furnished with the plants at a reasonable rate, by applying at this office.

Every information given as to the cultivation of Plants and raising of Seeds, etc. Also respecting the mode and the system of Pruning all varieties of Trees, etc.

A large Library of Floral Works can always be found at the Reading Room and Museum, which are free to all for reference.

BOOKS---SEEDS---TREES

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, April 17, 1879.

Money and Exchange Tables.

Exc. on England, new style, long and short	4 87½ a 4 88
Gold, at par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	8s 9d a 9s 2d.
Value of Club Wheat in Liverpool	9s 3d a 9s 6d.
Value of Wheat in New York, bushel	1 09 — 1 12
Brewers Barley in New York, bushel	90 — 1 10

MONEY AND EXCHANGE TABLES.

The immense sale of U. S. Bonds shows plent of money yet—it accumulates in Washington, while business men need it.

We repeat what we said in our last issue, true then, it is more true now.

Money everywhere, in all the great marts of trade, is very abundant and rates of interest low, the very great depression in trade stops business, and no one feels like investing either in trade or any manufacturing business, and this state of things will continue till after the Constitution question is decided—if our people *reject it* "The country is safe," if they accept it, look out for the Porphyry House, and a general stagnation of trade, for our people see danger and trouble in the New Constitution, and its rejection only can give confidence and make trade revive once more.

Money in New York is a drug, as low as 1, 2, 3 per cent per annum on three months' paper.

Our bank rates are 7 to 9 and 9 to 12 per cent, according to cases—long loans can be had at 7 per cent and less.

There is now more coin in the vaults of the U. S. Treasury than in both the Banks of England and France.

GRAIN AND FLOUR MARKET.

The *Grain* and *Flour Market* can be said to be in a peculiar condition, for while there is a very large surplus of grain for export on hand it may be difficult to send it forward for want of ships, as there is a growing scarcity of good seamen—a thing rarely if ever known before.

By reason of continued late rains and so copiously, all fears about the crops are over, and from present appearances we shall have a most abundant season in grain crops of all kinds.

Had we ships ready manned now, there would be large shipments of flour and grain abroad, not that the market offers good prices but from a desire of holders here to sell.

Our grain holders we think are now ready to meet the market and sell, and so of our millers. Flour has fallen in price and will go lower, and this will induce very large shipments as soon as the ships are ready.

The *Wheat market* has now been checked and prices must rule lower—in spite of the "say so" of would be dictators of the markets, wheat and other grains will make lower figures and this by reason of the European markets, which are not so favorable just now, and also, our ships will soon be tied up here.

The wheat market is really from 5 to 10 cents lower, even with our efforts at export.

The *Barley market* rules low and will remain so, although Australia and New Zealand has been a good market for barley, the last shipments thence have glutted that market, and made shippers from this side count their profits "over the left."

The *Market for Oats, Corn, Rye* and *Buckwheat* are all dull with very light sales, and at lower rates.

The *market for Feed Stuffs*, such as *Bran, Middlings, Corn Meal, Ground Barley*, and *Oil Cake Meal* are all about as last report, and even a little lower.

We can say truly that the "pall of dullness" prevades the grain trade—and will so continue until the great question of that Constitution is fixed.

The *Hop market* may be said to have *gone in*, for there is no market at all for hops hardly anywhere—England has sent her 2, 3, or 4 year old hops, all the refuse stock, to Australia and glutted that market, therefore we have no market there for our stock—hops are a dead letter at present.

The *Hay Market* is down in value, and the quality of hay on the market is not as good as usual.

The *Honey market* rules very, very low—see our market with fine comb honey at 10 cents a pound—while we can export 1,000 tons in 1879—*Beeswax* is wanted for export.

The *market for Hides, Leather* and *Tallow* may be said to have taken a little more lively and better rates for hides and leather.

Wholesale Grain Report.

Wheat California, per 100 lbs. Common	1 45 — 1 50

Retail Dairy Market.

The *Dairy market* is just now fully supplied—dairymen are now packing down butter—choice roll butter is now selling as low as 23 to 25 to the trade, California cheese is more plentiful and at a lower figure—eggs are very plenty and the lowest of the season.

There is now large quantities of butter arriving from the East, an unusual quantity—this affects our market.

Butter, California, Extra Choice per lb	30 — 35
do. do. for (Cooking) do	20 — 22

Lard, per lb., in tins	12½ — 14
Eastern Lard, per lb., in tins	13 — 15

Grain, Wool, Potato Bags, Etc.

The *Bag and Bagging Trade* is a little better and market for grain and wheat bags firm at 9½ to 9¾ cents, late delivery.

There will undoubtedly be enough bags to meet all demand this year, and although we believe there will be found to be more grain on hand than has yet been reported, we shall have bags enough for all.

Messrs. Neville & Co., the extensive bag manufacturers, 38 California Street, can supply our farmers at the lowest rates and on best terms.

Hand Sewed Bags, Standard, 22x36 com. prices	9 — 9½ cts.

Broom Corn	4 — 6
Bees Wax	24 — 26

California Leather Market Report.

The *markets* for *Hides, Leather* and *Tallow* are all dull, these all feel the general apathy of trade, with sales nominal, prices and value rule low.

California Sole Leather	20 — 26
do. Harness do	28 — 30
do. Skirtings	30 — 37½
Bridle Leather	44 — 64
Rough do. Oak Tanned	18 — 22
Waxed Calf Skins	50 — 1 00
do. Kips do. per dozen	50 00 — 65 00
do. Leather per foot	13 — 15

Wool, Tallow, Hides, Etc.

The *Wool Market* has a little excitement by arrivals of new clip, and there are a number of early purchasers here—some sales have been made, but heavy sales none, and in the present depressed state of trade generally, no heavy sales will be made, the wool still goes East.

The prices of wool must rule low—such is the word from New York, Boston, Philadelphia and in Europe.

Wool, Spring Clip	12 — 15
do. Choice Extra	16 — 18
Fall Clip	14 — 16

"Daily, except Sundays"—6:56, 8:00 and 11:06 A. M., 3:50 and 6:05 P. M.

FROM OAKLAND TO SAN FRANCISCO.

"Daily"—6:50, 7:20, 7:50, 8:25, 8:50, 9:20, 9:50, 10:50 and 11:50 A. M., 12:50, 2:50, 3:20, 3:50, 4:20, 4:50, 5:20, 5:50, 6:30, 6:50, 7:20 8:00, 9:10 and 10:20 P. M.

"Daily, except Sundays"—8:20 A. M. and 1:50 P. M.

"Sundays only"—10:20 and 11:20 A. M; 12:20, 1:20 and 1:55 P. M.

T. H. GOODMAN,
General Passenger and Ticket Agent.

A. N. TOWNE,
General Superintendent.

Southern Pacific Railroad

NORTHERN DIVISION.

Winter Arrangement.

Commencing Monday, December 8, 1878,

(AND UNTIL FURTHER NOTICE.)

PASSENGER TRAINS WILL LEAVE SAN FRANCISCO from Passenger Depot on Townsend Street, between Third and Fourth Streets as follows:

8:30 A. M., Daily for San Jose, Gilroy Hollister Tres Pinos, Pajaro, Salinas, Soledad and all Way Stations.

☞ AT PAJARO connects with the SANTA CRUZ, R. R. for Aptos and Santa Cruz.

☞ At Salinas connects with the M. & S. V. R. R. for Monterey.

☞ Stage connections made with this train.

10:40 A. M., Daily for San Jose and Way Stations.

3:30 P. M., Daily, (Sundays excepted,) for Gilroy.

4:40 P. M., Daily for San Jose and Way Stations.

6:30 P. M., Daily for Menlo Park and Way Stations.

☞ The extra Sunday train to San Jose and Way Stations is discontinued for the Winter season.

☞ EXCURSION TICKETS to San Jose and intermediate points and return sold on Saturdays and Sunday mornings—good for return until following Monday mornings.

A. C. BASSETT, Superintendent. H. R. JUDAH, Ass't Passenger and Ticket Agent.

SOUTHERN DIVISIONS.

☞ Passengers for points on the Southern Divisions of the road will take the cars of the Central Pacific Railroad via OAKLAND, leaving SAN FRANCISCO, via Ferry Landing, Market street, at 4:00 P. M. daily, and making close connection at GOSHEN for Sumner, Mojave, LOS ANGELES, Wilmington, Anaheim, Colton Colorado, River and YUMA.

S. P. R. R.

(NORTHERN DIVISION.)

☞ SPECIAL ANNOUNCEMENT. ☜

Commencing Saturday, July 13, 1878.

EXCURSION TICKETS

Will be sold by this Company from

SAN FRANCISCO

—TO—

San Jose and other Points and Return,

At Greatly Reduced Rates.

Tickets to San Jose, good for Return by either the Southern or Central Pacific Railroads.

☞ These tickets will be sold ONLY on SATURDAYS and SUNDAY MORNINGS.

The RETURN TRIP Ticket will not be good for passage after the MONDAY following the date of purchase.

Ticket Offices—Passengers Depot, Townsend Street and at Valencia Street Station.

A. C. BASSETT, Superintendent. H. R. JUDAH, Ass't Passenger and Tk't Agent.

NOTICE—SAN JOSE Excursion Tickets (via C. P. R. R.) can be purchased at the Offices of the Central Pacific Rail Road, Oakland Ferry, foot of Market Street, San Francisco, also, at the several Ticket Offices in Oakland. 48:8

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on this Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly entered all such enterprises.

THE CALIFORNIA FARMER was the first and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONING WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that are now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER being placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 00
Six Copies,	5 00
Ten Copies,	8 00
Twenty Copies,	15 00
Fifty Copies,	35 00

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer,

1879.

OUR NEW CLUBBING LIST.

We propose for the year of 1879 to offer to our Patrons the following valuable JOURNALS in connection with our own, all at reduced rates, so as to give them the best works at low rate—(all postpaid). Price per year.

The FARMER and VICK'S MONTHLY MAGAZINE	$2 50
The FARMER and AMERICAN AGRICULTURIST	3 00
The FARMER and POULTRY JOURNAL	3 00
The FARMER and RURAL NEW-YORKER	3 50
The FARMER and PHRENOLOGICAL JOURNAL	3 00
The FARMER and AMERICAN BEE MAGAZINE	2 00
The FARMER and SCIENTIFIC AMERICAN	7 00
The FARMER and HARPER'S MONTHLY	5 00
The FARMER and HARPER'S WEEKLY	5 00
The FARMER and HARPER'S BAZAR	5 00
The FARMER and HARPER'S THREE WORKS	7 00

[Others to be added.]

☞ Our full ADVERTISING RATES will be found on the SECOND PAGE.

All Letters on Editorial Matters to be addressed to COL. WARREN, EDITOR.

☞ All Letters on Business connected with the Office should be addressed to

WARREN & CO., Publishers.

THE NEW CONSTITUTION.

DOUBLE TAXATION.

HOW IT WILL WORK AGAINST THE FARMERS.

The clause in the new Constitution relative to the assessment of land will work peculiar hardship in the foothills. Section 2 of Article 13 says:

"Cultivated and uncultivated land, of the same quality and similarly situated, shall be assessed at the same value."

Now let us see how that will work among the small farmers of the foot-hill section. When the Assessor comes around the conversation will be about like this:

Assessor—How much land have you, Mr. Granger?

Granger—Three hundred and twenty acres.

Assessor—It is all about of the same quality, isn't it?

Granger—Yes; there is no essential difference in the quality of the land that I am aware of.

Assessor—All under cultivation?

Granger—No, sir; there are but fifty acres cultivated at present.

Assessor—What do you value your cultivated land at, Mr. Granger?

Granger—Well, I hardly know. I don't wish to sell, and have never given the subject much consideration.

Assessor—I am assessing cultivated land in this vicinity at $25 an acre; do you consider that an excessive valuation?

Granger—No. I think my cultivated land is worth $25. I wouldn't take that for it.

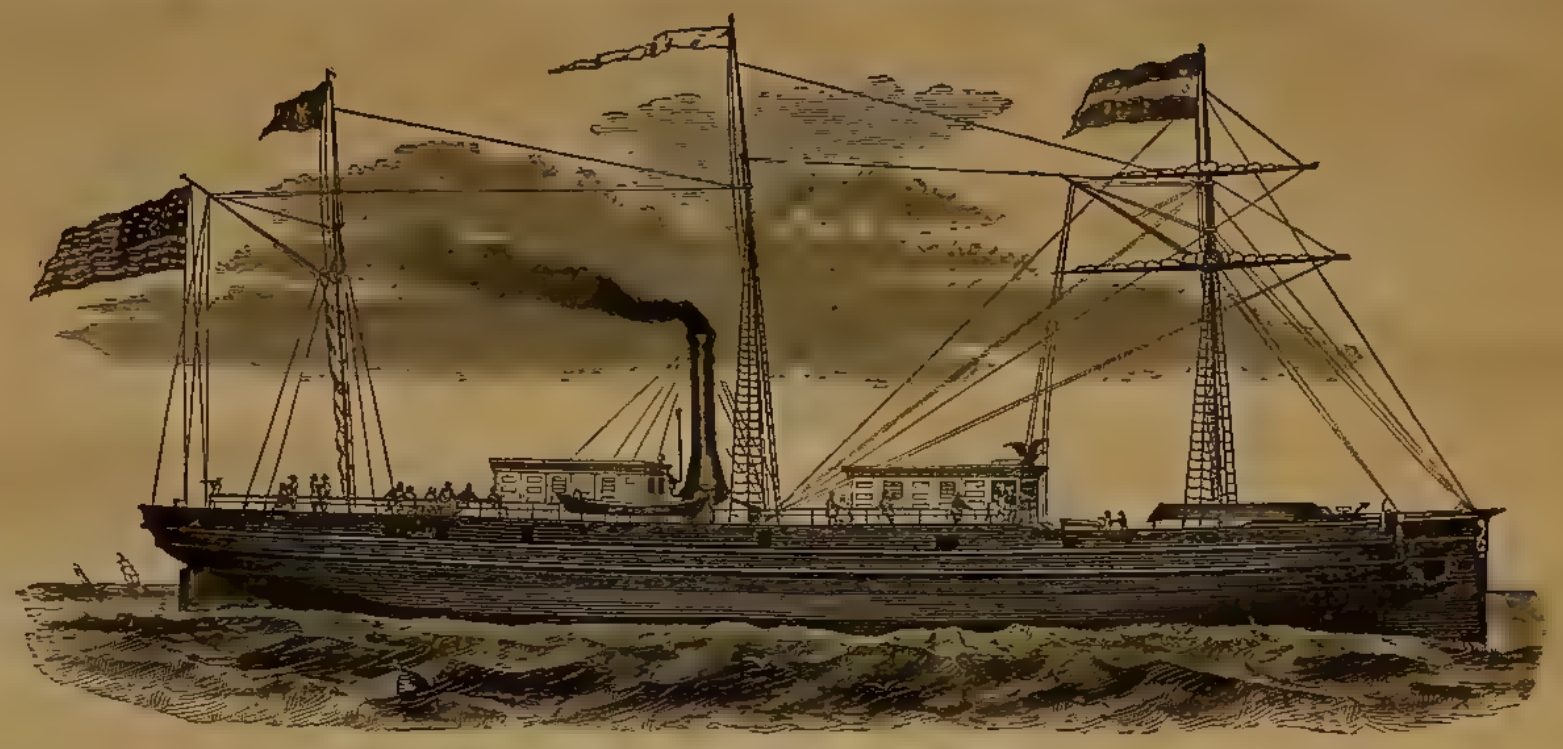
Assessor (figuring)—Very well, then, Mr. Granger, I value your land at $8,000; the buildings and other improvements I shall assess separately.

Granger—What! eight thousand dollars! Are you crazy? Why, sir, I only paid $1.25 an acre for this land, and 270 acres of it has not been improved or cultivated in any way, and isn't worth a grayune more to-day than it was when I pre-empted. What do you mean? Fifty acres, at $25, would be $1,250. I am willing you should put down the remaining 270 acres of my claim at $2 per acre—certainly not above that; 270 acres of my claim at $2 would be $540, which added to the value of my cultivated land, makes a total of $1,790 for the whole ranch—every dollar it is worth. Why, sir, every dollar I can produce and save in a year, over and above a bare living for my family, would not suffice to pay the tax on $8,000.

Assessor—I can't help that. The new Constitution says that cultivated and uncultivated land, of the same quality, shall be assessed at the same value, and I am consequently compelled to assess you $25 an acre for all your land. You can apply to the Board of Equalization, Mr. Granger, but as the clause in the Constitution I have referred to is mandatory, I don't think you stand any chance of getting a reduction.

[The *Calaveras Chronicle* presents the above statement of *facts*, of how the NEW CONSTITUTION will affect our farmers in the way of taxation upon their lands—to this statement we call the particular attention of all farmers, for they already have a load of taxes as heavy as they can bear.—ED. F.]

OUR EXTRA EDITION---FIVE THOUSAND.



OUR SHIP OF STATE.

THE OLD SHIP AND THE NEW.

THE OLD CONSTITUTION AND THE NEW.

The battle now waging in our State may be likened to the ocean battle in our war of independence, to the fight between that staunch ship of war, the *old Constitution*, with the enemy's ship the *Gurierre;* all remember the result, *old Iron Sides* won the battle and the *Gurierre* struck colors and was destroyed, captured, so must it be in the battle now, we put the *old Constitution* in battle against the *new*, and it will be like the battle alluded to above,

Old Iron Sides will win,

Our Ships of State thirty years old, will come off victorious!

We believe the OLD CONSTITUTION that has carried our State safely for thirty years, can safely carry us on still, and if there are new wants of the people, the Legislature can correct all defects and add new provisions that shall benefit the people.

SAVE THE OLD CONSTITUTION

Must be the watchword of every good citizen now; keep the old Constitution under full sail, if a new plank or spar or sail is needed to make her sweep the Ocean of our State, better furnish them, but never touch mast, spar or sail, hull, keel or rudder, but to repair them, then guard her well and we are safe.

Guard well each mast and spar and sail
If traitors come, like leaden hail
Send Free men's ballots to make them quail;
Work bravely with a Freeman's soul
Right manfully at every poll.
And with *Ten Thousand* mark your victory's roll
Then will our SHIP OF STATE float free
The Ship of FREEDOM and of LIBERTY.

AGRICULTURE AND THE NEW CONSTITUTION.

The agricultural interests of our State are invariably admitted to be the *basis of all our prosperity*, this is clearly proved by the great anxiety shown by all classes when the *rains are delayed*, or any blight touches our great grain crops, for upon these the masses are dependent and all business operations are based.

And yet with such mighty interests at stake, the *new Constitution* has stricken out all appropriations to this great interest, it has blotted out the appropriations which were made to the STATE AGRICULTURAL SOCIETY, to all the DISTRICT AGRICULTURAL SOCIETIES, and the MECHANICAL INSTITUTES, and ignored all that wise and paternal aid which every other State always give with a liberal hand to these great interests.

We are confident that our farmers, orchardists, vineyardists and stock raisers, the great mass of our agriculturists who pay the largest amount of taxes, have not yet noted these facts, that all aid to these *Industrial Institutions* are *completely cut off* in the *new Constitution*, and as with these, so will it be in regard to the aid for our *Agricultural College*, which is the recipient of a large bounty from the State.

Our farmers who are ever among the liberal minded for *charity* and *benevolent enterprises* will see that not only is all aid to the cause of AGRICULTURE and the MECHANIC ARTS stricken out of the *new Constitution*—but all aid to the *unfortunate*, all *benevolent aids*, as we show in another column, and thus every community must bear the costs of these, instead of the State Treasury—let a just thought be given to these matters and our farmers will reject the new Constitution by the ballot of—NO.

"The Legal Ticket to be Voted on the 7th of May—

"Against the New Constitution."

OUR STATE IN DANGER.

TO THE RESCUE.

The "Golden State" is in danger, and the watchword of every man who values his "Birthright" or who would battle for his "Home" must now awake to his duty and come to the rescue, for the *danger* is immediate and the *perils* many and near at hand.

SAVE THE SHIP.

Our "Ship of State" is among the "Breakers" and upon a "Piratical Coast," and it is now surrounded by ten thousand "Wreckers," ready with *false lights* to lure the ship upon the rocks, so they may destroy it and seize the cargo as their spoils.

FARMERS, TO THE RESCUE!

It is our special duty to send out a warning voice to our FARMERS that they may save their "Homesteads" from the pirates of our land, who would take from them their "Homes"—pirates that would wrest from them the fruit of their labors of long, long years, and it is for this reason, in this "Hour of Danger," that we send out a warning voice to the *farmers of our State*, and say to them,

TO THE RESCUE! TO THE RESCUE!!

Farmers, remember that however many long years you have labored and toiled to build up a home for your wife and children, now in this "Hour of Peril," your "Homes" which are your "Birthright" are in danger. Every vote tells, and remember also that there are thousands everywhere, who are ignorant, who cannot read or write, and who pay no taxes, own no homes, and yet *whose votes* tell equally with your own—now it is your *duty* and your *opportunity* to win such unfortunates from error, and lead misguided men to help you in this great work

FARMERS, TO THE RESCUE!

Plead with the ignorant, instruct, lead, guide them in the right way, and win them to help you in the great and important duty that is now of so much moment in this "Hour of Peril" to our State.

WE ARE NO POLITICIAN,

We plead for no party, sect or creed, we plead to save our "Farmers' Homes," to save their lands from unjust and double taxation, we plead to save our farmers from falling into the hands of designing and corrupt politicians who would destroy the bright hopes ever vouchsafed to the *laboring man*, and that too, when the *Spring time* opens up to them the most cheering prospects of a bountiful year ever yet presented to our State.

FARMERS, TO THE RESCUE, AGAIN!

We have never taken part in any political warfare yet, because it is not our province to do so—but we do not look upon the present great warfare as a mere *political fight*, we esteem it a war of designing persons who are about to wrest from us our "Birthright."

Our present Constitution which is safe and sure, and which has stood the winds and storms of nearly thirty years and carried us safely onward, and to give us instead, a "Ship of State" that has many a worm eaten plank from the deck to the keel, that will surely founder our ship and wreck us upon the rocks of ruin upon a lee shore.

Farmers, read the article in another column upon the matter of "Double Taxation Upon Your Lands," which is all important for you to know—and once more we say to you,

FARMERS, TO THE RESCUE.

"The Legal Ticket to be Voted on the 7th of May—

"AGAINST THE NEW CONTSITUTION."

STOPPING EMIGRATION TO OUR STATE.

The adoption of the NEW CONSTITUTION will assuredly check emigration to our State more than any measure that its bitterest enemies could possibly devise, already the news has gone abroad East, that capital to a very large amount that was intended to be invested in manufactures and new buildings and improvements has been turned from these enterprises and sent abroad, and that many large improvements in view have been abandoned, by reason of the fear that the *new Constitution* would be adopted, which by reason of heavy and *unjust taxation* would cripple all our industries.

A very large, an immense amount of capital that would have been invested in *Industrial Enterprises* has been changed into our U. S. Bonds, and the gold paid for them sent East to "Uncle Sam's Treasury" where now there is nearly $400,000,000 locked up, doing no one good, while our mechanics and working men go about our streets seeking employment.

MECHANICS AND WORKINGMEN!

look to it, if you want work now, what will you do if the NEW CONSTITUTION *should be adopted?* just as sure as this is done for every *day* you stand idle now, you would be out of employ for *a month* then.

Look to your votes! your Labor, your Bread, your Homes, depends upon your own action now.

THE RAILROAD INTERESTS.

During the present hotly and we say furiously contested elections, the bitterest party feeling will be drawn out, and, as is well known the bitterness and spite so long and so constantly hurled against the *Railroad Interest* will necessarily be kept up virulently—even to the bitter end.

We would ask our farmers and producers seriously to consider what would be their condition, and how could they market their Grain, Hay, Wool, Fruit, Wine and other products were there no RAILROADS?

The price of shipment of all these products are not one quarter of what they were *Ten years ago*, and every year less and less, and yet some will complain.

Yes, there would be grumblers even were the cost *half* what it is now—yet we ask in all earnestness for TRUTH and JUSTICE sake, why not give *due credit* for the reduction of the cost of transportation of our products to the *Railroad*, for what they have already done, instead of the bitter tirade against them now for what they can not do—farmers be *just* in this matter, and you will then find your reward in it.

More Taxation under the New Constitution

We believe the ordinances of indebtedness under the new Constitution reads:

"*All* property in the State under the new Constitution is to *taxed*."

It construes property thus and says:

"Property shall include money, bonds, stocks, dues, franchises, etc., capable of private ownership."

Now the highest evidence of dues is a judgment of a court, we now ask, are not under this clause all judgments of all the courts in the State to be assessed to the *judgment* creditor?

It is clear that this must be, this will add millions to the assessment roll.

The bloated merchant *who trusted* out a bill of goods for which the buyer failed to pay, and who, hoping to obtain something in the future from his debtor, he has obtained a judgment and will now have the agony of having to pay taxes on this judgment that is entered up against his insolvent debtor.

VOTERS OF THE STATE OF CALIFORNIA.

ON THE 7TH DAY OF MAY

You are to determine whether or not you will adopt the new Constitution.

No question of equal importance has ever been presented to you for decision.

STAND BY THE OLD CONSTITUTION,

For under it you are "Free and independent, and have the inalienable right to enjoy and defend life and liberty, to acquire, possess and protect property and to pursue and obtain safety and happiness. Taxation is equal and uniform, and Boards of Supervisors, County Clerks, District Attorneys, Sheriffs, Tax-Collectors, Assessors, and all other necessary officers must be elected by the people."

If you vote for the new Constitution you give rights to one which are denied to the other. You make taxation unequal. You confiscate private property for public use without compensation. You kill enterprise. You injure and may destroy the public School System, and you surrender that which should be guarded by you as one of the most precious jewels you possess—the right to elect those who shall manage your public affairs.

A majority of the framers of this new Constitution were good, honest men, but lacking in experience they proceeded without concert of action, and a minority, fully organized and led by crafty men, carried the day, and now offer you in the place of our present Constitution, with its clear, precise and unequivocal provisions, a voluminous document which, instead of being a declaration and reservation of the rights of the people, and a grant of power to the Executive, Legislative and Judicial Departments, is a strange mixture of Organic Laws and Status, expressed in such contradictory, uncertain, ungrammatical and ambiguous words and sentences that its meaning can never be interpreted with certainty.

Its principal aim seems to be class legislation. It strikes the "rich," but its blows recoil upon the "poor." The poor man needs the man with money and enterprise to give him work. Strike the latter and you take away the bread from the mouth of the former. A combination of capital is needed to build factories, tunnels, quartz mills, draining and irrigating ditches, canals, railroads and water works, in order to develop the immense natural resources of this State, and to give employment to the poor man; but can such a combination of capital be effected should the new Constitution be adopted? Your answer must be in the negative.

There can be no reasonable doubt that under such rule corporate life must cease, and the capital thus invested must seek employment elsewhere. No sane man would dare to invest his money in the stock or bonds of a corporation. There will be no more Powder Works, Beet Sugar Factories, Lime Works, Railroads, Steamers, Quartz Mills, Woolen Mills, Cheese Factories erected or run by a combination of capital.

MECHANICS AND LABORING MEN!

How will you be benefited when all this capital has been crushed? Will there be more work, higher wages and less hours of labor?

Will it make a better market for your wheat, your hay or your animals?

FARMERS! AND BUSINESS MEN!

Will it make money or customers more plenty?

There can be but one answer to these questions, and that must be NO!

The arguments of the agitators may present this new Constitution in an attractive light; but do not be misled. It is a delusion, and an imposition upon the rights of ALL men. It will bring you no security, either of person or property. It will protect neither labor or capital. It will bring no comforts to the fireside of the poor man, and put no bread into the mouths of his children.

It is the serpent, that when warmed will turn upon you its sting. Discard it! Do your duty as freemen! Strike the enemy a blow from which he will never recover! Assemble in every camp, village, town and city! Organize your forces, and on the 7th day of May march to the polls with the battle cry "STAND BY THE OLD CONSTITUTION!"

Agriculture.

Plow deep, while sluggards sleep,
And you shall have grain to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER V.

The next morning, as soon as the chores were done, Clarence came and asked mother for a dollar that he might go to the saw-mill, about a mile below, and buy a load of slabs. We could get a load for that price as large as the horse and oxen could draw home, and many people bought them for fire-wood; but we never had been in the habit of doing so, and mother asked in some surprise what he wanted of them.

"If I had a few of them that I could pick out of the loads I could use them instead of boards for some work I want to do about the barn. I have nails enough, and I want to make the barn warmer. I can do it very easily, and the papers say that a warm barn is better for the stock, and saves hay and grain. Now, our old barn is very cold, and it will cost but little to make it much warmer. There are cracks back of the cows where I can almost run my finger through. What slabs are not fit to use for that will do for kindling-wood, and I have a number of other jobs that I want to do with the best of them."

"Couldn't you do with a few that you could get for less money?"

"It will take just as long to go after a few, and about as long to pick out such as I want, as it would to get a full load, and they might not like to sell them and have me pick them out. Deacon Smith buys them for fire-wood, and sells what he cuts in his woods. You know he would not do that unless it was cheapest to do so."

"Well, I will let you have the dollar, but you must think that the dollars are scarce, and it depends upon you to get more for us."

So he and Ned started for the mill, and before noon were back with a fine load of slabs, which were thrown off and sorted in two piles, one pile suited for the contemplated work, and the other as fit only for fire-wood. Much to my surprise, the first pile was very large and the other very small, but Ned explained by saying that they had picked out of a very large heap, and had the privilege of taking such as they wanted. Some of the slabs were four feet long and others as much as twelve. Ned said the short ones were box-board slabs and the others came off long boards.

After dinner, it being warm and pleasant, a sort of February thaw, I was allowed to go out and help at the first job, which consisted in nailing the four foot-slabs against the side of the barn; the lower end against the barn sill, and the upper end against the joist, which was about three feet from the floor. This left a space about three inches wide between the slabs and the outside of the barn, which Ned and I stuffed full of the poor meadow hay. Although the space was so small yet it seemed to hold a large amount of hay, but after it was put in, and the last slab was put on, it seemed as if it were impossible for any wind to enter there, let it blow never so hard. Above the joist Clarence nailed slabs over the largest cracks, so that it seemed as if the stables were much warmer than before. While we were at work, Jake Wood came along the road, and, attracted by the sound of the hammering, came into the barn. Seeing what we were at, he exclaimed, "And so the squire thought same as Jake did for once, and you have begun."

"Yes," said Clarence, "the squire thought best for us to try it, and I am trying to make these stables warmer."

"Well, I reckon it's a good idea, for I never like to see cattle in the barn shivering as if they were out on the lee side of a hay-stack. Always seemed as if they must be hungry if they were cold. I know I want a powerful sight to eat in cold weather, more than I do in summer."

"That is what the papers say; that cattle need more feed if kept in cold stables."

"Well, I never thought no great shakes of farming by the papers and books, but they might happen right once in a while; but they mostly talk as if a fellow had got to spend more than he makes or else he wouldn't make nothing."

"But it may be a fact that it pays best to put money into farming business if you have it to put in," says Clarence. "You know the big stores that have the most money spent in getting everything to sell that people call for, are generally the ones that make the most money. 'Money makes money,' Uncle Robert says, and if it does in other things why shouldn't it in farming?"

"I allow you are right, young man," says Jake, "but this here is going to make it awful dark in here, and you will have to leave a door or a window open to see to do your work, and that will make it colder than the cracks do."

"I have thought of that, Jake, and I wish I had some windows to put in here, but I don't know where to find them, and if I leave the window or door open when I am doing chores, I can shut it up when I get through, and have the barn warm at night, at any rate."

"There, now," said Jake, "I shouldn't wonder if I could tell you where to find windows enough. You know Bill Giles fixed up that old house of his last spring, and put in bigger windows and tore down the old porch and built a new one. I expect he has got all those windows stowed away somewhere, and they aint of no airthly use to him. I don't doubt but you could get them cheap enough."

"But I have no money to buy them with, and I don't want to ask mother for any, for she has but little, and I don't mean to spend more than I make, if I can help it."

"You don't need no money, I don't believe, for he hasn't got no team, and if you would plough for him a day or two next spring, you would have money coming in instead of going out, and the oxen would in that way sorter pay for the windows in their own house," and Jake chuckled at the idea of thus getting the best of the oxen and Bill Giles at the same time.

"Well, I will think about it, and maybe go and see Mr. Giles to-morrow. Now I must put up the cattle and do the chores," said Clarence, and Jake went his way, having first received an invitation to stop in again and see how we got along, and promised in response to "keep an eye on us and see that we went straight, for," said he, "I feel kinder responsible for you now, seein' as I advised this plan before Squire Grey did."

Next morning Clarence was off early, and quickly came back after the oxen and wagon, with which he went off toward Mr. Giles's house and soon back again with a lot of boards, old but mostly sound, and an old door or two, which I recognized as a part of the porch which had been torn down, and a large pile of windows on top of the load, and with Bill Giles following after the load.

Now, Mr. Giles was known to us by reputation as a good-natured, clever fellow, a good carpenter, but "as lazy as all day long," who had lately come into possession of the old house and a few acres of land by the death of an old aunt, and he had modernized the house at a considerable expense, which it was thought his means did not warrant, although he performed the labor himself. Mother was a little worried at first for fear Clarence had hired him to do the work of his contemplated improvements, but was soon relieved by seeing Mr. Giles go off down the road again, after a short stop at the barn. Clarence soon came in and told us: "I had first rate luck, I bought sixteen windows for thirty cents apiece, and all those boards and doors for two dollars more, and I am to pay for them by ploughing for Mr. Giles next spring, and he has loaned me some tools to do the work, and has showed me how to do it better than I could have found out by myself in a week."

"But what you want of the boards and doors, my son?" said my mother.

"Oh, I am going to fix up a larger hen-house, so Alice can have plenty to do this summer in raising chickens and taking care of them. You know the hens pay better than anything else, and I am going in for making the farm pay in some other way than by hard work."

And off he went to the barn again, where I soon followed him, to find that he and Ned were cutting holes through the side of the barn, with the aid of the tools that were loaned by Mr. Giles. Before night they had cut a place for one half-window on the east side of the cow-stable; two more on the east side of the threshing floor, and two on the south end of the barn, back of the cattle, and another back of the horse, and one on the door of the horse-stall, which, as you may remember, I told you was in the south-west corner of the barn. And they were all fixed so as to slide back when it was desired to open them, or to shut closely when it was cold. Thanks to the marking of Mr. Giles they were put in in a very workmanlike manner, and in their proper places. Before night Mr. Giles came back, and approved of what had been done; and then went with Clarence to the sand-hill back of the house, where they had a long talk, and Mr. Giles drove some little sticks down and seemed to be planning something which I thought might be the hen-house which I heard of that morning for the first time. There was a place here where it was said gravel was taken out to build the dam for the old grist-mill which used to stand in the lower edge of what Clarence called "Field No. 3." The mill has been gone many years, but a part of the old dam stood there yet. In the pasture is what is called the gravel hole, open to south and west, where they dug into the south side of the hill after gravel; and here I thought Clarence had planned for his hen-house, and I did not like the idea of having to take care of the hens and chickens if it was to be so far from the house. When he came in I asked him about it, and he said my guess was right. When I expostulated, he said: "You see it is to be more of a summer hen-house than anything else. This one will do very well for winter, when I have put one or two more windows in it, but that will be a warm place, with lots of good gravel and sand for them, and if we should keep so many hens next winter that we should need to use it, Ned and I can take care of them then. In summer you will find it only a pleasant walk up there."

The next day the boys were busy digging into the side of the old sand-bank and putting in posts for the new hen-house, and mother found me employment in the house, and although at night both had blistered hands and were willing to go to bed early, I could not see that their enthusiasm had flagged at all, while I rather thought Ned looked up to Clarence with a respect which he had not been wont to feel for his elder brother, and upon the second day they were as eager to get off to their work as if it had been only play. Before noon I saw Bill Giles going up there, and, to my surprise, he stayed at work until nearly night. When he passed the house, going toward home, my mother felt it necessary to go out and tell him that she could not afford to pay carpenter's wages for the work up there, and she was afraid Clarence could not work for him long enough to pay him that way, if he was intending to take care of the farm at home; but he quickly silenced her by saying, laughingly, that he had not anything else to do, and he reckoned it was just as well for him to be there as down at the tavern.

"Besides that, ma'am, it is as good fun as any play I ever done to work with those little chaps, they are so earnest about it all, as if their fortunes depended upon it."

And we could hear his hearty laugh ringing after he had passed the barn. By this time it had attained quite a resemblance to a building, as seen from the house, and Ned was very anxious for mother and I to go and look at it, but we did not, for the wind blew cold and the following day was the Sabbath, and we intended to go to church. We did, however, go to the barn that mother might see how much more pleasant it looked there with the windows in it, and the cracks carefully stopped. So ended the week which had begun so sadly for us. Already through the heavy clouds light seemed to be breaking. Even in our great affliction we could rejoice that there was one greater depth of misery—the misery of having to leave our loved home—which we were not to be called upon then to fathom. And although we were entering upon what seemed like a doubtful experiment, yet the calm self-confidence of my elder brother gave us courage to indulge ourselves in hoping for the best.

DAIRY BREEDING CALENDAR

We invite Dairymen who desire a valuable "Dairy Breeding Calendar," containing very valuable items of great value to them, to call and examine the article named above—it is of but little expense, yet of great value.

CALIFORNIA FARMER OFFICE.

DEPENDING ON THE INTELLIGENT MASSES.

The bright and intelligent among the people of this State are undoubtedly, in these respects, the peers of any others on the face of the globe; but recent events have raised a doubt whether they are as numerous here, in proportion to population, as in many of the other States. Throughout New England and the Middle States the American element is largely in the ascendant, and in times of need and exigency may be depended upon to do the right thing. In California the balance of voting power is pretty evenly divided between Americans to the manor born and people of foreign birth; but the latter generally manage to keep control of public affairs by reason of the culpable indifference and neglect of the American element. Deprived of suffrage in their own land, our naturalized citizens rightfully regard the vote as the greatest privilege that can be conferred upon them, and they never fail to exercise it on all available occasions. Just now the community is in the midst of a crisis, upon the result of which will depend its welfare for many years to come. Arraigned on one side is the American element and the intelligent portion of foreigners, and on the other a heterogeneous mass of alien birth, hundreds of whom can neither read nor write, and not a few who do not even know what to do with a pen when it is placed in their hands to make their mark. Within the past two weeks, crowds of that class have thronged the Registry office, and will vote doggedly for the new Constitution. Not a ballot will be lost, not a man be absent from the polls on the 7th of May next. The "Speed, Malise, speed," of the clans has been heard in every precinct of the State, arousing their catheran hordes, and bidding them to the fray. *Per contra*, not a little zeal and determination have been manifested by the enemies of the new Constitution. The merchants and guilds, the tax-payers and people of property, the lovers of law and order, and the members of the several learned professions, have held enthusiastic meeting, disseminated thousands upon thousands of circulars, gained the support of the respectable press, and taken unusual pains to carry their point and rouse the State. But they have also depended too much upon what they have been pleased to term "the intelligent masses." Nearly twenty-nine years' residence in California, and a pretty close canvass of the ingredients which compose its population, have not served to imbue us with a very favorable opinion of the intelligence possessed by the masses, and we are afraid that it will be like putting faith in a will o' the wisp. Hundreds of them would vote rightly if properly instructed and made to comprehend the manifold villanies embodied in the new Constitution; and the serious cause for alarm is the doubt whether all of those who for years have neglected the right of franchise, and have been registered for the coming contest, will stand by the flag in the hour of strife, and step to the front manfully to the full discharge of their duty.

[We gladly give the above excellent article from our neighbor of the *Market Review* upon the influence of the masses in the coming election—we ask those who may be yet undecided, to carefully read this article, and then vote for safety.—ED. F.[

CULTIVATING THE SOIL.

The surface of the soil cannot be too frequently stirred. "If I had to preach a sermon on horticulture," says Downing, "I should take this for my text, 'Stir the Soil.'" As soon as the plants are well above the ground, they should be thinned out, so as not to interfere with each other's growth. At the same time, the soil may be loosened a little about them, so as to break any crusts that may have formed, without injury to the young plants; and the weeds may be removed. A little later, stir the soil with a narrow hoe, taking care not to cover the young plants. Every weed should be cut down or pulled up, no matter how small. It is not enough to keep the weeds down; digging deeply among the plants admits the atmosphere, and actually manures the young plants. In dry weather, it is very essential that the soil be stirred often. The air waters the fresh-dug soil much more effectively than we can do. A man will raise more moisture with a spade and a hoe in a day, than he can pour on the earth out of a watering pot in a week. If the ground be suffered to become close and compact, the cool surface exposed to the air for the reception of moisture is smaller, and what is deposited does not enter into the earth far enough to be appropriated; but if the soil be loose and porous, the air enters more deeply, and deposits its moisture beneath the surface. Almost any soil in which a seed will germinate, may be made, by continued hoeing, to produce a crop. Above all, cut away every weed that appears. "One year's seeding makes seven years' weeding." The only use of weeds is to make a necessity of tilling the ground more frequently. Weeds will come up in spite of our care, but much can be done to prevent their spreading or maturing.

A Gigantic Vegetable.

At a recent meeting of the Linnean Society, Dr. Masters read an extract from a letter received that morning, describing what is believed to be the largest plant in existence. A botanical traveler in Sumatra has found, growing near the Rafflesia, a plant belonging to the family of the Arums. The bulb or corm growing on the surface measured 5 feet in circumference. Two men endeavored to raise it; it is said they nearly broke their backs in doing it, and the root itself broke while they were lifting it. From this corm sprang a single leaf stalk, 20 feet high. At the top it divided into three branches, each as thick as a man's thigh. The leaf is divided into an immense number of segments, and measures 15 metres in circumference, or 45 feet, covering, therefore, an area of 150 square feet. The plant had done flowering when it was discovered, so that the dimensions of the spathe are as yet unknown. But seeds were obtained, which are now growing at Florence.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March.

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

Horticulture.

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

Home Correspondence.

Yolo, Yolo Co. Cal., April 22, 1879.

Col. WARREN—*Dear Sir:*

Yours of 18th inst. at hand and contents noted.

Crop prospects in this section were never more favorable than at the present time. The yield of wheat and barley will be as great, if not greater in this county than ever before—a great many of our farmers are this spring planting more or less of Egyptian Corn, on spring plowed land instead of leaving it for summer fallow—the experiments of last season in this section proved that a crop of this corn can be taken from the land with but little additional expense and then get as good crops of wheat or barley as if it had not been planted in corn—as it will mature on our dry plains and bald hills, and is fine feed for all kinds of stock as well as for the human family, some of us think it quite an acquisition to our products as we are able to get two crops every two years instead of only one, as heretofore has been the case with summer fallow.

My almonds, of which I wrote you before, and on the cultivation of which you so kindly devoted so much valuable time in writing for me some weeks ago, are growing finely, and I shall follow your plan of cultivation as nearly as may be possible—I have already plowed twice, deep, and have the soil in fine order, every tree has been well mulched with fine short well rotted stable manure—my reason for planting the hard shell bitter nut was because I understood it to be hardier and of more thrifty growth than the soft shell varieties.

I shall bud or graft all that are alive next spring they are all doing so much better than I expected that I have no fears now of the result of the experiment, notwithstanding the predictions of my neighbors that I would make a failure.

The land on which I planted the almonds is in the barren or bald hills between the bottom lands of Cache Creek and the timbered mountains of the Coast range.

On these bald hills are not to be seen a vestige of timber of any kind—the soil I am experimenting on might be called a gravelly loam, the nuts were planted in August the ground having been prepared the preceding spring, nearly every nut sprouted and sent up a thrifty growth soon after our February rain fell and now the trees are from 6 to 15 inches in height and show every indication of continuing rapid growth through the whole growing season.

We are selling a good many of the Randall Harrows, though the season is now about over, they are used now for *cross plowing, summer fallowing* and *cultivating orchards* and *vineyards*, for which purposes they are truly an excellent implement.

We shall have new cuts for new Advertisement. The 6 ft. 10 inch disc, 2 Horse Harrow is the smallest size we have, and is the size used in cultivating orchards and vineyards.

We have adopted the *cash* rule and buy and sell only on a *cash* basis.

On the Constitutional question I *fear* our precinct will vote in favor of its adoption, though we *hope* the county will reject it.

I have a small garden and would thankfully accept the proffered seeds.

I have planted in my garden twenty-seven varieties of wheat and two of barley—I planted 100 grains of each variety, fifty grains in a row six inches apart and rows twelve inches apart, all but two varieties of spring wheat were planted in the dust in December, have hoed, raked and rolled it, and it stands as thick on the ground as if sowed 90 pounds per acre, have counted over 60 stalks from a single grain, I expect to try my hand at hybridizing when the proper season arrives.

I hope I have not tired you with the personal affairs of a total stranger—but for fear of doing so I will stop. Very respectfully, yours truly,

CLAUDE V. BURKE.

New Zealand Flax.

(Phormium Tenax.)

This wonderful Plant is worthy more and better attention than it has ever received at the hands of our people.

Had this plant been received as it deserves an *hundred thousand* acres of our supposed reclaimed land would have been saved from floods, it is the best guard for embankments, it can also be utilized for paper making, cordage and basket making, and made a source of income as well as a protection to all swamp lands.

Two large plants in the Post Office grounds in our City show the character and growth of this valuable plant, it is ornamental as well as useful

The seed can be had at THE CALIFORNIA FARMER Office.

Premium Seeds.

Seeds from Rural New-Yorker Office.—We have been favored with sample parcels of the Seeds sent out to all subscribers to this Journal, and which are choice.

Our readers will bear in mind that we *club* the FARMER and the *Rural New-Yorker* now, and send them for ($6) six dollars with the Seed Premiums from each Office—a rare chance.

Florida has produced 500,000 barrels more oranges this season, by natural increase and not by superior yield, than she did last season.

PERFUME OF THE ROSE.

The Rose gives the sweetest, the most lovely and loved perfume. As the Rose is the Queen of Flowers so is its fragrance the Queen of Perfumes. Dr. Piesse, whose thorough knowledge of the subject well qualifies him for the task, has recently published in *The Garden*, of London, an article showing the way in which the perfume is extracted from the Rose, and preserved in the form of *Otto of Roses* and other costly Rose perfumes. This is reliable, and therefore valuable, especially as it corrects many foolish and incorrect statements on this subject. It is also particularly interesting at this time, treating, as it does, of the Rose fields of Roumelia, so recently desolated by fire and sword.

Its breath
Is rich beyond the rest, and when it dies
It doth bequeath a charm to sweeten death.

There are two methods of obtaining scent from the Rose, both operations being carried to a considerable extent. In Roumelia the flowers are distilled for the purpose of obtaining the Attar or Otto of Roses. In the south of France the *enfleurage* process is adopted, which yields a spirituous scent of the Rose. The principal Rose farms on which the distilling process is adopted are situated in valley of Kezanlik, in Roumelia, at the foot of the Balkan Mountains; the principal town, Kezanlik, bears the same name as the province, and can now easily be picked out in the war maps of the day. The province of Kezanlik extends for about forty miles east to west, and is watered principally by the River Thunga. It contains many small villages, the peasants of which are employed in the culture of the Rose. The only Rose cultivated for its scent, both in Roumelia and in France, is the Provence or Cabbage Rose. It can be planted either in spring or in autumn. On Messrs. Collas & Christoff's farm, where Roses are grown, parallel furrows are cut at distances or five feet apart, four inches deep, and the same in width; into these furrows shoots from the old Rose bushes are laid, not cut, but so broken off as to have a portion of the old root attached to them; these are then covered up with earth and a little manure; if water be near, the furrows are unirrigated, otherwise the grower trusts to what may fall in the shape of rain. In six months young shoots appear which are then earthed up. During the first year they make about four feet of wood; the second year a few flowers are produced; but a crop is only secured in the third year; the plants then begin to have the aspect of thickets, which soon become perfect hedges six feet high; and which will bloom well for fifteen years. During this period dead wood is cut out, but the bushes are not pruned in the ordinary sense of the word. The Balkan Mountains keep off in a great measure north and west winds; nevertheless, in spring the Roses often sustain great injury from these and frost.

As a rule, the Rose harvest begins in the middle of May, and consequently this is the time for distilling, an operation which lasts for, say twenty-five days. Supposing a plantation to produce in one season 50,000 lbs. of flowers, there must be garnered and distilled 2,000 lbs. each day. The flowers are gathered before sunrise, and are distilled by noon of the same day. As seasons differ, so do the crops and the quantity of Otto produced. The amount of Otto is greatest when the temperature at the time of distilling is low, and *vice versa*. When the weather is warm there is an abundance of bloom, but the yield of Otto is less; favorable weather is, therefore, better than large crops of blossom. The still is a copper vessel or boiler, known as the alembic, broad at the base, and becoming narrower towards the top, on which is fitted the dome or neck to which is attached the condensing pipe. Water and Roses are put into the alembic, then a fire is lighted under it, and when the water boils the steam generated carries forward the Attar from the Roses into the refrigerator; the Otto floats on the condensed water, and is thus collected. On an average it requires 3,000 lbs. of blossom to produce 1 lb. of Otto—say 16 oz., Otto of Roses always being sold by the ounce, which in Turkey is somewhat more than the English ounce.

Baring, in his reports of Roumelia, recently published by order of the Government, says:—"One of the chief manufactures is that of Attar of Roses, the average annual amount produced being 300,000 'Mescals' of 1¼ dram each, at about 16 piculs the mescal, and the whole is exported to England, &c."

SPLENDID

WEEPING TREES.

It may not be known generally that by the aid of science, all the finest kinds of our DECIDUOUS TREES, used for Ornamenting Grounds can now be had grown in the beautiful pendant form, graceful as the Weeping Willow.

The following, of very extra size and form, can now be had for planting this Autumn.

The WEEPING BEECH, MAPLE, BIRCH, ASH, ELM, POPLAR and LINDEN these are the most beautiful Ornamental Trees known, adding grace and beauty to the surroundings of every home and increasing the value of every estate where they are planted.

The plates and drawing, showing these trees in their growing condition, can be seen and these trees secured on applying to

WHERE WAS THE ADVERTISEMENT?

Purchasers who read the Advertisements in our Columns, and make their purchases thereby, will do us a kindness by stating to those of whom they purchase, where they obtained the *information of their Wants.*

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, MAY 1, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Market Building—Up Stairs.

FARMERS HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, ONE DOLLAR for five lines or less of space in Nonpareil type, for one insertion, fifteen cents a line for any larger space. Each subsequent insertion ten cents. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,

PUBLISHERS CALIFORNIA FARMER.

San Francisco, Cal.

Editor's Chair.

Our Extra Edition.

We send copies of our large Edition out this week to many who are not yet on our "Subscription List," we send to them this number in defence of the old Constitution, believing it to be better than the new, our views are fully expressed in our Columns, and these views we believe are sound, and offered for the Cause we have plead for over Twenty-Five Years.

We plead for the farmers of California and their best interests, and so laboring we work to sustain the old Constitution, firmly convinced that the *new Constitution* would entail upon our farmers many and untold evils and losses that years to come would not repair.

Laboring thus for the interest of the *Cultivators of the soil*, and our "mechanics" "manufacturers" and the real "workingman," we hope that many who receive these copies of the Farmer will carefully read what we have said, and will kindly co-operate with us and also generously enroll their names on our list, as subscribers to our Journal.

We believe the friends of the old Constitution will approve this number of our Farmer.

Old and New Constitution.

We invite the attention of all our farmers especially, and all who may read this number of our Journal, to the various arguments we have presented; these are our own unbiased opinions offered earnestly and as a free will offering, hoping and believing they will convince the wavering, encourage the doubting, and help all to come up to the work, and defeat the new Constitution and save the old.

We hope those who thus desire, will send our Journal far and wide and work with us in this Cause.

Home.—We give a selection of Poems this week each of which are valuable Essays upon *life* and its duties.

"A Trip to Europe."—A very pleasing letter from our Correspondent Ajax, whose letters are always welcome.

"Pres. Wilder of Boston."—We are always glad to give our readers the eloquent heart breathings and teachings of the venerable President Wilder—few men are now living who have done so much for their Country as this noble man.

We hope *our State* will found a Society like the one over which Mr. Wilder presides.

Horticulture.—We give an excellent practical letter from our esteemed friend of Yolo, whose valuable machines are working great good to our State by a better cultivation.

"Perfume of the Rose."—Yes! this is the day and month to enjoy the rich perfume of the rose, and when the heat and turmoil of this election is over, flowers will wear a brighter hue and the world look brighter too.

Miscellany.—We give on this page "Texan Cattle Drive" and articles upon horses' feet that should be noted—items also.

Agriculture.—"How we saved the Old Farm" is continued, our readers, especially the sons and daughters upon our farms, should read this very interesting chapter—and the lessons learned would do them good, those who desire can obtain copies of former chapters.

"The Intelligent Masses."—We ask a careful reading of this article we clip from our excellent cotemporary named.

"Cultivating the Soil."—We urge our farmers to this all important duty, life, health and strength to all kinds of crops is ensured by a constant stirring the soil in dry weather, read the letter from Yolo Co. on same theme on page 59.

Read! Read!! the voices from the country upon the Constitution.

New Advertisements.—We specially call attention to the excellent Implements for the *Harvest Season*, in our Columns.

THE SEASON OF MAY.

The opening season of May is with us, and every lover of Spring must feel its vivifying and cheering effects, and were it not for the *Blight* that now rests upon our whole State by reason of the political tornado that is now sweeping over us, our whole community would be enjoying the fresh air and bright flowers of our hills and vallies; merchants, manufacturers and mechanics would take their families and go forth, enjoy Nature in her May Day robes and bless God for Spring, and hear the shouts that come up from the happy children as they sing

"I'm to be "Queen of May," mother,
I'm to be Queen of the May."

Alas! these happy enjoyments are almost universally shut out of mind now by that fearful avalanche of politics that a dire necessity has placed upon our people; we hope however that in a few days when the "Great Battle" is over, the fields will seem green again, the flowers appear bright once more, and their fragrance be recognized and enjoyed.

Home Correspondence.

VOICE FROM SACRAMENTO COUNTY.

Sacramento Co., Cal., April 28th, 1879.

Col. Warren—*Dear Sir:*

Your good letter at hand to-day, and we hasten to send you some good names, and will send you more to-morrow. Nearly all we send are good farmers' names.

We are speaking, writing and working against the new Constitution and have been doing so for weeks, and expect to continue till sundown on 7th of May. Your paper is always good and welcome; and we always scatter the extras among the farmers.

Farmers do not understand their own true interests, if they did, they would all subscribe for your paper and would also, all vote against the new patchwork Constitution.

The feeling here is changing and the solid work is being felt, and Sacramento City and County will speak sensibly on 7th May and give more than a thousand majority against the new novel.

God bless you with health, strength and prosperity, ever faithfully your sincere friend.

* * * *

THE COUNTRY SPEAKS.

[The following patrotic letter came to us, and we cannot forego the pleasure of publishing it—we feel its power. Hear what the great San Joaquin Co. says.—Ed. F.]

Col. Warren—*Dear Sir*

Your kind letter was received yesterday evening. You guessed right! You know where to find me, same as in former times fighting against the enemies of our common country then, and our glorious State now. Yes Col. I I should regard it as a great calamity, if after successfully sailing for over 30 years, under the "old Constitution," we should be forced now, by the rabble of propertyless paupers, and mendicants of the old world, to abandon it for an abortion, such as the wisest among our respectable Americans, pronounce the new, "come by" "chance," to be.

Col. if it were left for some people to decide, I am sorry to say it would be adopted! But, thank Providence, there are sensible men enough still left in the State, outside of any one county, to beat the rabble and scum of the old world, who are howling for its adoption. If I only had the power, I would change our naturalization laws! They who come here, should have the same rights as the native born only, after having resided here 21 years, and I would make an *educational qualification clause also*, and still further; I would require the voter, who would vote to tax my property with any improvement for the public, to own property himself, liable to the same tax, if not, then he should stand aside. Our country is too free, and when the Governor of our own State, is to be insulted in public, it is high time that the old native American party, (purified by fire first, however;) should be resurrected, and its principles carried out to the very letter! It is fast coming to it, we are drifting, and you know the American people are slow to move, it takes time to arouse them to a sense of the position into which they will one day find themselves if they still continue to sleep on. But when they do awake and become thoroughly sensible of their danger, we know nothing will stand in their way, then they will sweep their enemies into oblivion as thoroughly as doth the avalanche and the whirlwind. And I am afraid it will not be met, until it comes to this, you and I certainly must know, and the fact cannot long be disguised, we are sleeping as a nation, upon a volcano, which sooner or later will burst out, and whenever that day comes, freedom's torch will again be lighted and American liberty will rise and shine brighter than ever in the hearts of those who love patriotism and take delight in seeing, as I know you and I do, our free, happy and proud America, washed clean from the scum and filth of the political cesspools of the foreign born and the alien. I do not object to decent intelligent law abiding and law loving foreigners coming amongst us! I welcome them! But the class who now come, and want to control our elections, to make laws to govern us, I detest and abhor! I did not mean to trouble you with so long a letter, but you know its impossible to say much in a few words, upon so important a subject.

Hoping you will live long Col. and help fight in the future, as you have in the past, any wrong that may lift its hydra head in any shape against the welfare of the American people—Accept my best wishes I remain very truly yours,

C. M. L.

Popular Family Flour.

Among the many favorite brands of family flour there is none that stands higher than the flour from the "Sperry Mills," at Stockton.

This flour is made by a *new process*, which gives to the flour a finer, more delicate, purer and whiter finish, and when made into bread it cannot be surpassed for whiteness or lightness, in fact we have tested its excellent qualities, and can say there is no flour superior to the flour from the City Mills, Stockton.

WE'LL SCOTCH THEM.

OUR EAGLE BIRD.

ETERNAL VIGILANCE IS THE PRICE OF LIBERTY.

The American Eagle, emblem of our Country and her Liberties now sits perched above us, watching with a jealous eyes the dangers that oftentimes menace us from a foreign foe.

Our Birthright, the dearest to an American, his elective franchise, is constantly in danger from the hordes of ignorant and vicious men who are in our midst, men who own no property, pay no taxes, and yet, whose votes count equal to the best of our citizens, who pays thousands of dollars annually in taxes.

The "Right of Ballot" should be held sacred by every lover of liberty, and it should be guarded by every American citizen with *eternal vigilance* for upon the Ballots of Free Men, depends "Life" "Liberty" and "Estate," and all that is dear and worth living for.

The most alarming sign of the times is the neglect of our citizens to use their elective right faithfully, and work to secure good and true men for all offices of honor and trust; it is this *neglect* of a free man's duty that has brought all our Country in danger of being ruled by those who are opposed to the great principles of American Liberty, and who are now doing all they can to infuse into our Government the spirit of *Communism* and its thousand evils, which tend to the destruction of our liberties.

The friends of a good Government, of civil and religious liberties can see how much danger exists whenever elections take place; the very appearance of those who are seen at the polls show the danger—these gatherings of the balloters are mere *partizans* working for party, not for our Country or a good Government, or any regard to Liberty and the true interests of our Country; vast numbers of these workers at the polls can neither read or write; and here lies the great danger of our Country, the ignorant, uneducated masses that rush to the ballot box are as much the *dangerous* element to our *liberties* as the incendiary, who, with fire-brand in hand endangers our dwelling; we are not safe even in our boasted "Land of Liberty" until our State has engrafted upon its Constitution, the safeguard of an intelligent ballot, which declares that no man shall vote that cannot read and write.

This is the only Policy of Insurance for our Liberties, and it is as important to the salvation of our Country that we be thus insured from *foes without* and *foes within*, as that we take out a Policy of Insurance to save our Homes, our Warehouses, and Manufactures from the desolation of fire.

The present important Contest now before the people of our State upon their Ballot for a new Constitution is one of the most important ever offered to our people, and it demands at this time from every man who has the "Right of Ballot" that he should be ready to work for the right.

Robbing the Orphans and Homeless.

One of the great wrongs the *new Constitution* would inflict upon the community is, that it shuts up the great heart of charity and humanity by cutting off all support to our *Orphan Asylums*, our *Aid Societies* and *all* our *Charitable Institutions*.

Charity is a God-like attribute, and it has always been the boast of the citizens of our "Golden State" that California from the advent of the "Sanitarian Commission" to the present time, has ever been ready to aid with a liberal hand every call or claim of the unfortunate abroad or at home; our great liberality to the suffering South in her recent hour of need, the "Yellow Fever Plague" bore evidence of this.

Every Orphan Asylum of every creed, every Widows' Society and Children's Aid Societies have always had a helping hand, but now, the *new Constitution* if it were adopted would *strike out* this *golden link* of charity, and cast orphans, widows, and homeless children upon a cold world for what aid they could crave and beg.

The voice of humanity cries aloud for these that we should save them from suffering, and to do this we must reject the *new Constitution* by the emphatic vote—NO!

☞SEND THE FARMER ABROAD.☜

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, to send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a Journal as the California Farmer. We know our Journal is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the home circle everywhere, as a Journal free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, special premiums of seeds are donated with the paper, to benefit our State.

"Agriculture, the soul, the basis of my empire."—*Napoleon.*

The Legal Ticket to be Voted on the 7th of May—

"Against the New Constitution."

BLIGHT UPON OUR FARMERS.

Every year our farmers have been more or less the sufferers from some blight upon their grain or other crops, and their orchards and vineyards have suffered by some *insectiverous pest*.

THE BLIGHT OF 1879.

At the present time we think we see a new blight that now threatens them unless prompt measures are adopted to remove the threatened blight, and crush the *eggs* of the insidious insect before they can come into life.

The *blight* that now threatens all the interests of our *farmers* and we can add all the *industrial interests* of our State, comes from the attempt of interested parties to force upon the people of our State a

NEW CONSTITUTION.

The advocates of the *new Constitution* cannot show to our people that it is superior to the old Constitution, even with some few things which the incoming Legislature could add to the old, while the new Constitution contains many sections which would work great and lasting injury to our farmers, and to all the best interests of our State, in another column of this paper we have shown how the new Constitution *doubly taxes* the farmer for his lands, we have also shown how it deprives all the great *Industrial Societies*, our State, and District Agricultural Societies of all aid and encouragement, which all other States accord to such Institutions, we have also shown that all benevolent and charitable Institutions are shut out from that parental aid and fostering care which it should be the duty and glory of our State to give, these are the reasons why we say that there is and will be

BLIGHT UPON OUR FARMERS.

Yes! if our farmers are neglectful of their high duty to examine well the great evils that threaten them now, if they fail to see these evils and fail to labor to avert them, by an earnest and united effort in every farming district, to come together one and all and put their seal of condemnation upon the new Constitutitn by that great emphatic word NO! openly, boldly and everywhere NO. If they fail in this duty they may prepare to see around them, even with all Nature's glorious promises of a most bounteous harvest everywhere, a blight and a mildew that shall destroy the most glorious promises that was ever yet accorded to them in this State.

We have conferred with hundreds and thousands over our State, and we have no hesitancy in saying that such is the fear and dread of the future if the new Constitution should be adopted that hundreds and thousands who are now *here* would leave our State to find a place free from *misrule*.

Should the new Constitution be forced upon the people a *blight* would strike every interest, from which our State would not recover in Ten Years; and the greatest evil would fall upon our farmers, and it is to them we now appeal, and ask them in all earnestness *for their own good* to come to the rescue from this impending blight.

We name this evil at the head of this article "A blight upon our farmers" and we feel sure that if what we esteem would be a great calamity, the adoption of the *New Constitution* should take place it would so fearfully effect the farmers' interests that it would be worse than the "Rust in our grainfields" the "smut in our cornfields" the "rot among our potatoes, the canker worm and the caterpillar upon our fruit trees," "the Phylloxera in our vineyards," "the worm in our hop fields," "the scab in the sheep fold" "the distemper among our horses, cattle and swine" some of these evils are occasionally blights upon the hopes of many a farmer—but these evils come singly, and farmers can bear them singly, but if this New Constitution should most unfortunately be forced upon our people our farmers would find the combination of evils so great that it would be like having all the fearful evils *we have named* fall upon them at once, and crush out all hope of a recuperation.

For the reasons we have given in several other articles relative to the injury the *new Constitution* would inflict upon our farmers, we appeal to them earnestly to defeat it, and pray they may, boldly, unitedly, and nobly, every man vote—NO!

Neville & Co.'s New Catalogue.

We have received the new and splendidly illustrated Catalogue of Neville & Co.'s Bag and Tent Manufactory, at 33 California street, this City.

Messrs. Neville & Co., have done themselves and their business great credit by this Catalogue, it is one of the best, most complete and most comprehensious Catalogues we ever received; from the stately Printing Press that has done the work of this Catalogue so well, we have hundreds of illustrations of every department of this extensive business house, from the minute coil of thread that sews the grain and flour sack, to the massive bales of ready made bags, boxes, coils, elegant tents, from the capacity of 4 to 1,000 persons; awnings, sewing machines, presses, grain bags, flour bags ore sacks, hydraulic hose, wagon covers and everything appertaining to a large trade is finely illustrated, making a "book of reference" of much value.

We can assure our Grain Growers that if they will visit this most complete Warehouse, all their wants can be *satisfactorily* supplied.

Wagon Making.

One thousand Wagons a month are made at the great Factory of Fish Brothers & Co., at Racine, Wisconsin.

Who cannot have a ride, this is one of the largest Manufactories in our Country, their Wagons are known the world over—they are now shipping largely to Australia, as the fame of these Wagons are well known there.

G. A. Davis, 327 Market St. is the Agent of this Company.

Crowded Out.—We were compelled to leave out several Advertisements that came too late for our Extra, will give them in our next.

Books and other notices we pass over now to do our duty to the Cause this week heralded.

WIRE OR ROPE FOR BALING HAY.

Formerly wire was used quite extensively for baling hay and is still used in some parts of the State.

There has however been some serious objections made to wire from the fact that by reason of the coils and the kinks in the wire it has occasionally been caught in the machinery of the Mower or Reaper and has done serious injury to the machines.

This objection has not been duly considered by our Haymakers and Grain Growers.

While some say there is a compactness and an economy in the wire they forget the danger and risk to a valuable Mower or Reaper, this view should not be lost sight of.

Another item to remember, the wire when once used is done with, and of no more account, while the *Baling Rope* can be used again when duly saved, for many purposes, even to *two-thirds* its original cost, and "economy is wealth."

We are induced to make these suggestions to our *farmers now* for as the times are, every *penny saved* is as good as a shilling earned, therefore we say to our "Haymakers" and our "Grain Growers" who use the machines that cut and "bale on the field" do not use *wire baling*, but use good Baling Rope, and you will be largely the gainers.

There is another danger arising from the use of wire for baling, when the bales are broken the wire is often carelessly thrown aside in the stable or stock yard, and thus exposes the stock to being caught by the feet, resulting in more or less injury, and sometimes to the loss of valuable animals, nothing more dangerous in a stock yard or stable than baling wire, and when Baling Rope is used there is no danger whatever.

Nothing Safe, Nothing Hopeful.

Every industry of our State, every future prospect, the hope of coming years, for this State, is now depending upon the action of the citizens of California, in the week coming.

The cloud that now rests like a pall upon the vital interests of California will not be lifted save by the united, energetic action of her own best citizens.

Those citizens who have Ships, Warehouses, Stores, Manufactories, Workshops, Farms and other great interests, must now see all these endangered by the threatening cloud that hangs over all these interests, and it must depend upon their united and strong action alone, to lift this cloud and avert the threatened danger, unless this danger is averted, unless the new Constitution is Defeated, our Ships will lie at our wharves idle, our Warehouses will hold their merchandize unsold, our manufacturers will have no demand for their goods, workshops will close; our farms will be sold and our farmers feel the blow as heavy as any other interest, for all must suffer.

The danger is great, it is near, it is imminent, and it behooves all to be awake and alive to duty.

Let the watchword be—*Ready! Ready!! Ready!!!*

Slandering the Grangers.

There has been a great deal said about the Grangers all going in favor of the New Constitution—this is not so, and although there may be some Grangers who conscientiously believe the new Constitution is better than the old, they are justly entitled to enjoy their opinion as well as those who believe differently, but we are glad to known that their opinion is fast changing, and ere the 7th of May thousands of Grangers will have changed from being in favor of the new to voting directly against it.

One of the most able and devoted Grangers in our State, Geo. W. Colby, Esq., a *leader* of the Grangers and the President of several of the Granger Institutions, is now in the field of labor, speaking, writing and working for the old Constitution, and his work is good and he is winning converts every day by hundreds.

With these facts before us we have felt faith that the most intelligent of the Grangers who have business interests at stake will rally strong and show themselves opposed to the new by their bold vote of NO.

Live Stock Sales.

There is now being held continuous sales of very choice stock, of horses, cattle, sheep and swine, and in large quantities.

Now is the time too, for our farmers to secure very choice stock for their farms, and if they are wise and have *cash* on hand, now is their time to invest in a kind of stock that will be better than any other stock for the farmer.

We hope our farmers will be wide awake in these matters and improve every opportunity to increase the value of their farm stock, and thus add to the value of their general property.

TO WOOL GROWERS.

I have for a number of years been Manufacturing, Selling and Using Sheep Dip, with a view of getting an article that will be acceptable to sheep men as a remedy for the disease known as Scab in Sheep. Objections have been made to the use of my Hemlock Dip, on the ground that it was *Poisonous*, and in some cases it produced death when the dip was swallowed, or taken into the stomach by the sheep when dipping; this of course was one objection, and in the hands of inexperienced parties and rude workmen, a sufficient amount of care in using the dip was not observed, and notwithstanding its efficacy as a remedy for the skin disease, parties were constrained to abandon its use through fear of handling it. I have removed the only objection made to the use of my Dip by making and placing on the market a *NON-POISONOUS* Sheep Dip, and I confidentially recommend it as the cheapest and most effectual remedy ever made, and by its use you can eradicate the disease from your flock; try it, it is safe to use at any degree of strength, and in a remedy diluted 100 or 150 parts water.

Yours truly, S. H. KENNEDY,
Omaha, Neb.

P. S.—Mr. Kennedy has just arrived in California, his head quarters at Farmer Office, where he will be glad to see his friends.

FURST & BRADLEY'S SELF-DUMP SULKY RAKE.

The Attention of Farmers is called to the merits of this Rake, and its great superiority over all Self-Dump Rakes heretofore brought to the notice of the public. The Dumping is done by friction bands around the ends of the hubs giving full control of the Rake to the operator, so as to be able to carry the teeth clear of the windrow. This does away the necessity of ratchets and pawls which is so objectionable in all other Self-Dump Rakes. The teeth are of the BEST CAST STEEL and have a double coil which renders them capable of the most severe work.

SEND FOR OUR NEW ILLUSTRATED CIRCULAR TO

GEO. A. DAVIS, Agent,

327 MARKET STREET, - - SAN FRANCISCO.

A CARD.

THE DIRECTORS OF

THE HIBERNIA SAVINGS AND LOAN SOCIETY

—TO ITS—

Depositors and Borrowers

WE HAVE CAREFULLY CONSIDERED WHAT would be the effect of the adoption of the proposed new Constitution upon your interests and upon the trust confided to us we have been aided in our examination of the question by men of tried ability and integrity, and we are now constrained by a sense of duty and responsibility to state to you the conclusions we have reached. In thus addressing you we have no private or personal objects in view This Bank has no capital stock. All its earning, in excess of necessary expenses, are divided equally among all its depositors, without any preference or distinction whatever The average amount to the credit of each depositor is only seven hundred and eighty-two 14-100 (782 14-100) dollars, and the earnings of its sixty-seven thousand three hundred and seventeen (67,317) depositors since the Bank was established, amount to twelve millions eight hundred and seventy-two thousand five hundred and forty-two 63-100 ($12,872,542 63-100) dollars. Our depositors, collectively, own a large capital, but individually they are not capitalists or monopolists. They are respectable working people, by the use of whose money this Bank has largely aided in reducing the rate of interest on money, within twenty years, from two per cent per month to seven per cent per annum Borrowers at this Bank are chiefly of the same class.

Our relations with you hitherto, whether as borrowers or depositors, encourage us to hope that what is here stated may have some force in determining your action. We are bound by the obligations of race—bound by every tie to sympathize with you, and we deplore the unjust and unfortunate competition with which you have to contend, we know that times are hard, but we also know that an unwise decision of the pending question will make times harder. Your condition is not so bad that it may not be made worse, and we are as confident as men can be of anything in the future that the adoption of the new Constitution will only aggravate the evils of which you now complain.

In part it is confused, inconsistent and absurd, that it must lead to protracted controversy and litigation Its scheme of taxation is arbitrary, unjust and impracticable. It proposes to tax (1) depositors on their pass books, (2) to tax the bank on its mortgages, (3) to tax the coin secured by the mortgages, and (4) it multiplies the taxation of dividends. It provides for taxing all contracts and obligations of every description as so much property; and it gives the Legislature power to increase or diminish the rate of taxation upon any particular property—power to make one kind of property pay nearly all taxes required by the State—a power which must lead to infinite strife, contention, bribery and corruption.

It is our deliberate judgment that the new Constitution would tend to make money scarce and dear; to fetter industry, to discourage enterprise; to prevent the establishment or continuance of factories and workshops, to diminish the value of property, and to hinder the construction of buildings and other improvements which go to develop the State and give employment to workingmen, that it is revolutionary and destructive in its spirit and purpose, and tends to create discord and hatred between classes, and that it would do more harm to working people than to any other class.

We, therefore earnestly and respectfully advise you that you would promote the welfare of the State and your own interests by voting against the adoption of the new Constitution.

GRAND TRIUMPH FOR EUCALYPTUS.

EUCALYPTUS WILL CONQUER DISEASE.

We publish the following strong TESTIMONIAL in favor of the GRAND REMEDIAL POWER of the Eucalpytus, prepared by DAVID CLARKE, CHEMIST, of Australia.

This Testimonial comes from a prominent Merchant of this City, whose name is with us for reference for all who suffer and would be relieved.

SAN FRANCISCO, April 7, 1879.

EDITOR CALIFORNIA FARMER. *Dear Sir*

Some time ago I had the misfortune to sustain a dislocation of the shoulder received from a fall, and while I was suffering the most acute pain as the effect of it, so much so as to be deprived of my sleep nights, I met my old friend, Col. Warren, who presented me with a bottle of "Eucalyptus Oil" saying as he did so, "try it." "bathe the shoulder and arm well, and on retiring saturate a cloth with the oil, and bind it to your shoulder, and you will have no more sleepless nights on account of pain from that." I followed the Colonel's directions, and must say that the Eucalyptus Oil will do all that is claimed for it as an alleviator of pain (rheumatic and otherwise) and more too.

A preparation made from the Eucalyptus Trees, by frequent ablutions of the eyes will restore weak eyes to strong ones and positively restore the sight as good as ever to people whose eyes are failing, if they will keep their body in good condition by the use of Eucalyptus Pills—while using the eye wash. Yours truly, C. H. B.

N. B.—There are many compounds made in this State, yet however good, the *genuine* Remedials are those prepared by David Clarke, Warwick, Australia, for sale by Warren & Co., Agents.

LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury or other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

WARWICK, December 30th, 1874.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed good health since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON.

LONDON BOARDING HOUSE, ALBION STREET,

WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)

[illegible]
Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus:

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it, but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK,
Commissioner Yosemite Valley.

A highly valuable testimonial has been received at the Agency, which we have been kindly permitted to use, and, coming from so high a source, we feel it a duty we owe to the public to give it the following letter:

SANTA CLARA, SANTA CLARA COLLEGE.

COL. WARREN *Dear Sir*

Heretofore we have had no occasion of trying the Eucalyptus Medicines, in Pills or Liquids, but we have commenced to use them, and we find them very beneficial; some of our Fathers find a great relief in their complaints; the consequence is that we want more Medicine, and we ask you to send us One Dozen Bottles of the Liquid, and One Dozen Boxes Pills, and Half Dozen large Boxes, and I shall send you the results. Please send bill. With best wishes for your welfare. Yours respectfully,

A. CICHI, S. J.

At later date we received the following, another proof of the virtue of this Medicine:

The Pills we find to be a mild and beneficial cathartic. The Liquid Extract is a valuable Blood Purifier and a good appetizer A. CICHI, S. J.

The above from Prof. Cichi, the well known and truly distinguished Chemist of Santa Clara College, we esteem an approval of so much value, that all who suffer from any of the above diseases, can be assured of the high merit of the Eucalyptus as a Remedial.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved and cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you David Clarke's Australian Pills—the only genuine.

MEMORY.

On fancy ardent pinions borne,
The mind its sorrows may forget;
The heart by various passions torn,
May cease to throb, but not forget.

Pale recollections will return,
With anguish struggling in her train,
And beauty of her sunbeams shorn
Will fly the haggard form of pain.

Hope's angel visage hovering o'er
Our aching head may ease impart;
But oh! what sovereign's balm can cure
The sorrows of a wounded heart.?

To me, no more the blissful hours
Of youth, of love, of hope are given;
No more my pathway strew'd with flowers
Shall seem the sunny road to heaven.

For hoary time his wreath of snow
Has o'er my throbbing temples thrown,
And down the hill of life I go,
Deserted, friendless and alone!

As some frail bark by tempest riven,
On time's deep boundless wave I lie,
By every storm, still farther driven
On the rough sea adversity.

Dark, deep and fathomless the wave,
For me no anchorage, hope or stay;
No solace, but the silent grave;
No rest, but in my bed of clay.

FINDING FAULT.

In speaking of a person's faults,
Pray don't forget your own;
Remember those with homes of glass
Should seldom throw a stone.
If we have nothing else to do
Then talk of those who sin,
'Tis better we commence at home,
And from that point begin.

We have no right to judge a man
Until he's fairly tried,
Should we not like his company,
We know the world is wide.
Some may have faults, and who has not!
The old as well as young;
Perhaps we may, for all we know,
Have fifty to their one.

I'll tell you of a better plan,
And find it works full well,
To find your own defects to cure,
Ere other faults you tell;
And though I sometime hope to be,
No worse than some I know,
My own shortcomings bid me let
The faults of others go.

Now let us all, when we begin
To slander friend or foe,
Think of the harm one word may do
To those we little know:
Remember, curses, chicken-like,
Sometimes to roost come home;
Don't speak of others' faults until
You have none of your own.

TRADE AND SPADE.

BY CHARLES MACKAY

Between two friends in days of old
A bitter strife began,
And Father Trade with Brother Trade
Disputed man to man.
"You're vain, undutiful and proud,"
Said Spade with flashing eyes,
"You earn your thousands while I starve;
You mock my children's cries,
You ride in state with lordly looks,
You dwell in bower and hall;
You speak of me reproachfully;
And honor in my fall.
So from this hour, in shine or shower,
We'll learn to live apart;
I ruled the earth ere you were born,
I cast you from my heart.

And Trade lost temper in his pride;
He uttered words of scorn,
"You do not know the ways of men,
Amid your sheep and corn.
You doze away the busy day,
Nor think how minutes run;
Go put your shoulder to the work,
And do as I have done.
You've all the world to yield your wealth—
Both corn and pasture land;
I only ask a counting house,
And room whereon to stand.
And from this hour in shine or shower,
We'll learn to live alone;
I'll do without you well enough—
The world shall be my own."

Amid thus they wrangled night and day,
Unfair, like angry men,
Till things went wrong betwee them both,
And would not right again.
But growing wiser in distress,
Each grasped the other's hand;
"'Twas wrong," said Spade, "to rail at trade;
He loves me in the land,"
And Trade as freely owned his fault;
"I've been unjust," he said,
"To quarrel with the good old man,
Who grows my daily bread.
Long may we flourish, Trade and Spade,
In city and in plain!
The people starve while we dispute—
We must not part again."

And all the people sang for joy,
To see their good accord,
While Spade assembled all his sons
And piled his plenteous board.
He fed them on the best of fare,
Untaxed the foaming ale,
And prayed in England's happy shore,
That trade may never fail;
And busy Trade sent fleets of ships
To every sea and strand,
And built his mills and factories
O'er all the prospecting land.
And so we'll sing God save the Queen!
And long may brother Spade,
And the sake of both the rich and poor,
Unite with brother Trade.

[A grand lesson for the times now, when the working men are railing against the merchants, bankers and rich men.—ED. F.]

NOTES OF A TRIP TO EUROPE.

LIVERPOOL—ITS HOTELS AND DOCKS—ENGLISH RAILWAYS—ARRIVAL IN LONDON.

BY AJAX.

Liverpool, like all English cities, is substantially built, everything giving evidence of permanence and durability, streets well paved, sidewalks commodious, buildings with solid foundations, strong, massive structures, built to stand, but lacking the beauty and style of architecture, the light handsome finish which is so general in America. Hotels and public buildings are numerous, the latter being thrown open to the public, where all that is beautiful in art can be seen gratis. Of hotels, the North-Western being the finest will serve as a model. The entrance is imposing, stately columns, on either side, gives it an air of grandeur. Entering we find ourselves in a large court, in one corner of which is the office, from this court leads the main stairway and long halls, grand in proportion, extending the entire length of the building. Off this are doors leading to the reception rooms, dining room, etc., the looks with lofty ceilings, corinthian columns, and beautiful decorations. The fittings and the furniture are the same as in our first-class hotels. The cooking is good, the service excellent, especially when you are liberal, for this is a necessary evil abroad, and you cannot get along without it. I will remark here that this abominable curse of fusing begins the moment you set foot on a foreign bound steamer, and you are annoyed and pestered to death with it—at first you give willingly, then reluctantly, then desperately, and finally subdued, you give for self-protection.

Our first breakfast was a good one, well cooked, and about such as we should have had at home. Both here and elsewhere we watched the natives eat, and found that as a rule they breakfasted on cold meats, stale bread, and tea, chops, eggs, toast, and coffee are indulged in, but hot breakfasts are not general. We also observed that an Englishman makes eating a luxury, enjoying every mouthful, he goes about it in a business like way, takes his time, and enjoys good health as a result.

The hotel office is a small affair, occupying but little room, and is presided over by two or three or more young women, who perform all the duties of our hotel clerks, with half the fuss, and without impressing you with the idea that they own the house. The rooms are large, airy and cheerless, the style of furniture and decorations adding to the cheerlessness, stationary washstands are unknown, and in some cases gas is used only in the halls and dining room. The only reason, I can assign, for English hotels lacking the comforts and conveniences which ours possess, is that they are used only by transient guests, 'who having homes of their own do not look for comforts in a hotel; whilst in America, hotels are the homes for thousands who demand home comforts, and hotel keepers are obliged to have them. There are many things besides which tend to make English hotel life undesirable, but I will leave my readers to discover them by experience. As to cost of living it varies from six shillings to one pound per day, the latter figure being the most common. This includes room, meals, fire and attendance the latter being invariably tacked on to the end of your bill. One would not mind this little imposition if the attendance could be secured with it, but you are obliged to fee besides in order to be promptly waited upon.

THE LIVERPOOL DOCKS.

We spent the greater portion of a day among the world famous docks, massive piles of masonry destined to stand the storm of ages, ships from every clime, flying the flags of every civilized nation known to the commercial world, whilst a forest of masts loom up in every direction. The scene is a stirring one and you are lost in admiration as you walk over the eight miles of docks unequaled in any part of the world. Steamers, ships, and small crafts are continually arriving and departing, some for long journeys, others up and own the coast, and as they sail in and out the mersey presents a scene of animation ever changing, but never ceasing. There are also some fine docks at Burkenhad, immediately across from Liverpool, where many of the Atlantic steamers land. Ferry boats are running back and forth, the traffic being considerable, the boats resemble our side wheal tugs very much, and are noted more for the good service they perform, than for their beauty

OFF FOR LONDON.

Thursday, April 27th, we started for London, the depot is immediately in the rear of the hotel, in fact, forms part of it, and is an immense affair, porters in uniform handle our baggage, carefully, while an obliging guard shows us to a compartment, which a slight gratuity secures for our sole occupancy. Having a few moments to spare we made a careful examination of our train, the engine, a seven foot driver, is intended for speed, and with a nearly straight track, and easy grades, has no difficulty in attaining it. We missed the comfortable cab, where the engineer and fireman are made comfortable, there being in its place a dash board, which is but a slight protection. In this there are two bulls eyes through which the engineer keeps a lookout. Taken as a whole, the engine looks like business all over, and is almost entirely free from ornamentation. The baggage car is utilized both inside and out, the roof being piled with baggage, which in bad weather is covered with a tarpaulin. The coaches are small and lighter in construction than ours, and open from the sides, thus enabling a train to discharge its passengers in one-quarter the time than it takes ours. Each coach is divided into from three to five compartments, with accommodations for from six to eight persons, according to the guage of the road. The seats are roomy and comfortable, with well upholstered seats and backs. There are three classes of coaches on all European railways, and consequently three rates of fare.

The first-class is different from the second, more in price than in extra privileges, the first being upholstered in cloth, the latter in leather, otherwise they are alike. The third-class being upholstered in soft woods, is necessarily uncomfortable for long journeys, apart from this, are bearable, and patronized by a very estimable class of people, although I do not wish to be understood as recommendig it. On observation I found that the better class of English travel second-class, also, most Americans who have traveled abroad much. In England they say that three classes of society travel first-class, noblemen, Americans and fools, the first because it is their right, the second because they always do, the third because they know no better.

We notice as we walk up and down the platform, that besides the porters, all seem to be going on the train—we find on enquiry, that no one but those having a ticket are allowed within the gate, thus preventing a great deal of confusion—leave taking must be done before entering, and ticket must be procured before you can take a seat in the coaches.

A signal from the guard prevents further inspection, we take our seats in our comfortable compartment, and are soon flying over the rails, on our way to London. We catch hurried glimpses of cities, towns and small villages, now and then a castle, or palatial residence, with broad acres extending as far as the eye can reach, and for the whole length of our journey, not one spot which is not occupied and under cultivation.

English railway traveling has its drawbacks, the passenger coaches lacking many conveniences and comforts, both necessary and useful, and as you rush by the stations you are still more convinced of this, especially when you are on a through train, which only stops once for coal. They do not even stop for water, but take it as they go from a long trough between the tracks.

But we forget all our troubles now, for we are in sight of London, and a bewildering jumble of steeples and chimney tops peep through the fog and smoke, and as we gaze upon well known landmarks, venerable relicts of the past, we thank the good fortune that has brought us here and placed those sights and wonders at our very feet, and in a few short hours we shall tread its tangled streets under the very dome of St. Paul's or within the dusky walls of the Tower.

Our train stops at Huston Station, a cab is engaged, our baggage, no inconsiderable amount, is put on the roof, and we are driven to the hotel—the second stage of our journey over.

[CONTINUED IN OUR NEXT.]

HON. MARSHALL P. WILDER.

[We have given a portion of the very able address of Hon. M. P. Wilder, delivered before the New England Historic and Genealogical Society, which was delivered at Boston on January 1, 1879, being the anniversary of this society. When the great age of the venerable Mr. Wilder is considered, now nearly *four score years*, the eloquent address is remarkable, and will be read with an affectionate interest by his many friends everywhere.—ED. F.]

AMERICAN HISTORY.

The facilities for historical investigation are increasing every day. Not only by the enlargement of libraries, but by the publication of ancient records, and the reprint of early journals, which have become too rare to be easily accessible, or which may be in a foreign language, which seals them to the American reader. And here I cannot refrain from speaking of the publications of the Prince Society, an association to which some of us belong, which has done and is doing a noble work for American history. It has just issued its eleventh volume, and this last volume cannot but be of unsurpassed interest and importance to all our historical students. I allude to the voyages of Champlain, translated from the French by Prof. Charles P. Otis, and edited by the Rev. Edmund F. Slafter, both members of the Society. Champlain visited our Atlantic coast in 1604, sixteen years before our first permanent settlement at Plymouth, and twenty-six years before the settlement of Boston. He spent more than three years in the exploration of our harbors, bays and rivers, and left a journal of his observations more minute and at the same time more ample and voluminous than that of any other navigator that preceded or followed him. This journal was printed in French in 1613, and it has thus remained, two hundred and sixty-six years, untranslated down to the present time. The first instalment of the work, which I understand is to be in at least three volumes, has just been placed in our hands. I am sure I shall express the feeling of all historical scholars when I say that we are under very great obligations to our associate member, Prof. Otis, for the successful accomplishment of his difficult task, and for giving us this ancient journal in pure, simple, lucid English; and to the Rev. Mr. Slafter, for the patient industry with which he has enriched its pages with necessary, judicious and learned annotations. When the whole work shall be completed, it will be unsurpassed in value by any other in the language relating to the early history of this continent.

LOCAL HISTORY AND GENEALOGY.

It affords me great pleasure to notice the increased interest now so generally manifested in regard to the history of our towns and the genealogy of their families; by which, this department of our library, already extensive, is largely enriched. Until recently there has been less effort than should have been made to ascertain our lines of ancestry farther back than the landing of our fathers, from the suppressed difficulty attendant upon research in the fatherland. But I have learned of many instances where this has been accomplished with great satisfaction to the persons concerned.

As an illustration, I would state that until recently I had made no thorough research in regard to my own ancestry beyond the landing of Mrs. Martha Wilder at Hingham, in 1638; but I am now enabled, in the Book of the Wilders, just published by the Rev. Moses H. Wilder, our corresponding member, to trace my genealogy directly back for nearly four hundred years, to Nicholas Wilder, a military chieftain, who fought in the famous battle at Bosworth under the Earl of Richmond, afterwards King Henry VII., and to whom that monarch gave, as a token of favor, a landed estate and a coat of arms, which are still in possession of the Wilders in the County of Berks, England, the present rector of Sulham, the Rev. John Wilder, D. D., being the fourth of this line who has sustained that office.

FAMILY INFLUENCE.

And now a word in regard to the influence of the family.

The first institution established by our benevolent Creator was the family, and it has ever been the chief school of human virtue. No influence for good is so great. From it have emanated the principles, piety and patriotism on which forever rest the prosperity and strength of nations. "The records of families," says Dr. Alexander Wilder, "constitute the frame work of history, and are invaluable auxiliaries to science, religion, and especially to civilization." The ties of kindred are the golden links of that chain which binds families, states and nations together in one great bond humanity. Everything therefore which pertains to the history of our families should be carefully recorded and preserved for the benefit of those who are to follow us. He who collects and preserves his own family history is not only a benefactor in his way, but will deserve and receive the grateful thanks of all future generations. "He confers a priceless boon upon those whose names and achievements are thus rescued from oblivion, and preserves the experience and wisdom of ages for the emulation and admonition of posterity." It is therefore a matter of special gratification that so many of our wealthy and influential citizens have aided in publishing the history of their towns and the genealogies of their families. These praiseworthy examples are highly commendable, and permit me to say that I have no sympaty with those who care not from whence they came, or have no interest in the generations which are to succeed them.

These works have greatly enlarged and enriched this department of our library, and are not only eagerly sought for by those interested by family or local relations, but have become an important element in public libraries as valuable sources of historical and genealogical research.

RESEARCHES AND DISCOVERIES.

The wide-spread enterprise which now exists in archæological and geographical researches is not confined to individuals. Many governments and institutions are actively engaged, and these various enterprises are constantly bringing to light important and valuable information. But with all these researches we look back in vain for a full knowledge of races that have preceded us. We find evidences of their existence, but no history of their origin, and little of their character or pursuits, except, perhaps, the common instinct of the soul to acts of worship. We find remains of architectural genius which it would be difficult now to reproduce, of artistic taste in stone and metal of the most curious design, but not a trace of books or anything that can inform us of their origin, progress or power. And so it has been of all races that have left no literature behind them. Strange indeed that so little should have been known of some countries or their antiquities until lately:—but thanks to our modern travelers and explorers, to Agassiz, Layard, Speke, Baker, Livingston, Stanley, Schliemann, La Plongeon, Cesnola and other investigators, we are now making rapid progress in the acquisition of knowledge with reference to the lost things of earth. These researches are furnishing us with new stores of knowledge in regard to the interior of Africa, the forests of Cambodia, the island of Cyprus, the ancient cities of Mycæna, Troy and the Egyptian Pyramids. Nor is this confined to the Old World. The discoveries of La Plongeon in Yucatan, and the explorations by our Government and the work of the Smithsonian Institution on this Western Hemisphere, and our various historical and antiquarian societies, have furnished us with specimens of the arts of people of which we have known nothing before, and have increased our desires for still further knowledge.

Who were the mound builders? Who the cliff dwellers? Who the strange people in south-eastern Asia, scarcely human in expression, yet leaving evidences of ingenuity in architecture and sculpture as perfect in proportion, form and size, as those of China or Japan? In some of these we find resemblances to those of other nations, and of colossal proportions; but how these could have been transported from places very distant, or from whence they were derived, are mysteries yet unexplained. These researches and discoveries have given a new impulse to the students of archæology and history, have added largely to our former knowledge, and are the advance-guard of one of the most profound studies of the present generation. And what is worthy of note, although indicating a state of barbarism, they frequently give evidence of an advanced stage of civilization. We give a hearty welcome to all these investigations, and would aid them with such means as we have. But interesting and useful as these researches are in revealing the history and the influence of the past, let us so discharge the duties of our day that posterity may enjoy the true record of our times, without distressing ourselves as to these antiquities, whether of a pre-Adamite origin or of a prehistoric people.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own house.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

$350.00.

The Standard Organ

Has a Beautiful Case, full, rich tone, and for durability

Santa Clara College, S. J.

SANTA CLARA, CAL.

THE TWENTY-SEVENTH ANNUAL SESSION OF THIS Institution will be resumed Thursday, January 3d.

This Institution was founded in 1851, and in 1855 was incorporated with the privileges of a University. It occupies six large buildings with extensive shady playgrounds, covered gymnasiums, swimming pond, etc.

It possesses a most complete philosophical apparatus, and valuable collections of mineralogy and geology. It has six practical schools of Assaying, Surveying, Telegraphy, Photography, and Commercial business. For the latter a new building 180x40 has just been finished that leaves nothing to be desired.

Diplomas are given in two Departments, the Classical and the Scientific, and certificates in the Commercial course.

TERMS—(Payable semi-annually in advance) Matriculation fee, to be paid but once ..... $ 10 00
Board, Lodging, Tuition in all branches, Washing and Mending of Linen, School Stationary, Medical attendance and Medicine, Baths, etc., per session of ten months. $350 00

For further particulars apply to the President of Santa Clara College, or to St. Ignatius College, 841 Market Street, San Francisco

34-1 REV. A. BRUNENGO, S. J., President.

Gatherings along the way side,
Floating gems by every tide.

TEXAN CATTLE DRIVE.

We are in possession of the facts and figures which will enable those interested in the drive of cattle from Texas north to form an idea of what the supply of cattle from that source will be. Last week we published a communication from San Antonio, Texas, which estimated the coming drive at 179,000, and the following from the San Antonio *Express* of last Friday corroborates that estimate:

Several prominent stock-raisers and drovers have been in the city the past week or ten days, and they almost unanimously unite on an estimate of 175,000 to 200,000 head as the number of this year's cattle drive from Texas. The first number is considered low, and the last the greatest that can be expected. The greater proportion of the drive will be yearlings and two-year-olds. Prices are considered high, but holders are firm. The demand for cattle is very good, but the transactions have been rather light of late, many who came here to buy preferring to wait for better rates, or, failing in that to take their chances after the cattle reach the north. The margin in the cattle driving business is considered so close that buyers hesitate before they close a contract. Profits are estimated by cents, almost, to where they were formerly calculated by dollars.

The *Express* then goes on to say that cattle in Western Texas are scarce and with the little profit now made there are many advocates of stopping the drive entirely for a few years in order to re-stock the country and thereby reduce the supply, and consequently increase the demand at the north. The closing paragraph in the article from which we have taken extracts is as follows:

Let the north west become drained of its cattle, and the old prices for Texas cattle would revive, and then our stock could readily be sold at rates far in advance of what is now considered as entirely too high. This, it is believed, could be accomplished by stopping the drive for a year or two.—*Kansas City Indicator.*

Tender and Small Feet.

A horse with tender, thin-walled, and small feet is certainly better off without shoes on; and the longer time he can be spared from work, the better. Such a horse should not be kept tied in a single stall, but should be given outdoor liberty when the weather permits; and when indoors he should go loose in a comfortable shed or box-stall, with earthen floor. Look out for corn. A few month's liberty on pasture in the spring would be beneficial. Such a horse should never wear heavy shoes, and the smith should be told not to drive the nails tight when shoeing.

Warbles.

Warbles are the larvæ of the insect *Œstrus bovis* placed under the skin of cattle during the latter part of summer. They are generally located along the back of cattle. When present in large numbers, they may be the cause of considerable irritation and annoyance to the animal. In small numbers, they do not appear to be noticed by the cow. They may be removed by puncturing them with a darning needle, or small pen-knife, and squeezing them out with the fingers. No other treatment is necessary.

A matter-of-fact philosopher asserts that "love in domestic life what butter is to bread—it possesses little nourishment in itself, but gives substantials a grand relish, without which they would be hard to swallow.

As the happy couple were leaving the church, the husband said to the partner of his wedded life: "Marriage must seem a dreadful thing to you; why, you are all of a tremble, and one could hardly hear you say 'I will.'" "I will have some courage and say it louder next time," said the blushing bride.

We are to have sorrow and suffering; but we are not to wear them as garments. It is for us, if we be true Christians, to have such a constant tendency toward joyfulness that when sorrow comes we shall be able to strike them through with the light and color of hope.

The more the agricultural situation is discussed, whether by the press or in public meetings, the more general becomes the conviction of the importance of agriculture in the nation's welfare. It is of importance to the whole community that the land should be worked to the highest advantage. The farmers themselves are fast rising to a proper appreciation of the value and dignity of their calling.—*Jackson Sentinel.*

France is at present held up as the model country of the world, on account of its wonderful recuperative power, as well as its enormous internal resources. After paying off the indemnity to Germany of about $1,000,000,000, she has rebuilt her army on a scale larger than before the war, and in the meantime has advanced in material prosperity. Yet her export trade is less than one-half that of England and her imports exceed those, and at present she is depending on imports for a large portion of her wheat supply to the extent of about 25,000,000 bushels, and has no colonies to add to her wealth nor any foreign investments. With an area of 204,096 square miles, or less than the State of Iowa, Kansas and Nebraska, she supports a population of 37,000,000, and has little or no relief from emigration, and has but little mineral wealth.

Best Fruit Dryer in the World.

HAMPTON & KELLY

—AND—

KELLY & COLE'S

FRUIT DRYER.

THIS MACHINE DRIES BY STEAM HEAT AND DOES not burn the fruit. It is very economical in its working machinery, and so perfectly simple that every family can use it in their homes. It is also perfectly safe.

In connection with this machine is an admirable GRINDER capable of grinding one bushel of fruit per minute.

The capacity of drying of the SINGLE DRYERS are from 20 to 30 bushels in 10 hours for each machine. Large machines will dry from 30 to 100 bushels in 10 hours.

Orders for these machines, for the present should be sent to Messrs. Kelly & Cole, First and Salmon Streets, Portland, Oregon.

A manufactory of these Dryers will soon be established here, and will be under the superintendance and management of **ALFRED B. COLLVER,** who is the General and Traveling Agent of all these Inventions.

Mr Collver will have his office in this City a early day all letters for him can be addressed through the Express or Postoffice to the undersigned, and they will have prompt attention.

ALFRED B. COLLVER.

N. B.—Letters can be directed to me care of EDITOR FARMER, to whom we are permitted to refer for the excellent quality of our Fruit Dryer. A. B. C.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make *no charge.*

We also send free our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American,* 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated; the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, cand find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

ADVERTISERS ABROAD AND AT HOME.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion*, larger space, *Fifteen Cents per Line*; each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving us the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months.. . . $15.00 | For one-half of a column, three months . . . 50.00
For one-quarter of a column, three months ... 30.00 | For an entire column, three months 100.00

For a single month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the above rate

WARREN & CO., Proprietors,

320 CLAY STREET, SAN FRANCISCO.

CASH FOR ADVERTISING

We desire it to be clearly understood that those who send us ADVERTISEMENTS FROM ABROAD must send the Cash with the advertisements—if they would have them appear.

We have numbers of advertisements sent us from strangers saying, "*Please Insert and Send Bill*" this we cannot do without CASH, or a special understanding before hand.

WARREN & CO.

MONEY AND EXCHANGE TABLES.

The immense sale of U. S. Bonds shows plent of money yet money accumulates in Washington, while business meo ne

We repeat what we said in our last issue, true then, it is more true now. Bonds for $150,000,000 sold in one lot to New York Bankers.

Money everywhere, in all the great marts of trade, is very abundant and rates of interest low, the very great depression in trade stops business, and no one feels like investing either in trade or any manufacturing business, and this state of things will continue till after the Constitution question is decided—if our people *reject* it "The country is safe," if they accept it, confidence will be lost and a general stagnation of trade, for our people see danger and trouble in the New Constitution, and its rejection only can give confidence and make trade revive once more.

Money in New York is a drug, as low as 1, 2, 3 per cent per annum on three months' paper.

Our bank rates are 7 to 9 and 9 to 12 per cent, according to cases—long loans can be had at 7 per cent and less.

There is now more coin in the vaults of the U. S. Treasury than in both the Banks of England and France.

GRAIN AND FLOUR MARKET.

The *Grain* and *Flour Market* can be said to be in a peculiar condition, for while there is a very large surplus of grain for export on hand it may be difficult to send it forward for want of ships, as there is a growing scarcity of good seamen—a thing rarely if ever known before—seamen wages nearly double.

By reason of continued late rains and so copiously, all fears about the crops are over, and from present appearances we shall have a most abundant season in grain crops of all kinds.

Had we ships ready manned now, there would be large shipments of flour and grain abroad, not that the market offers good prices but from a desire of holders here to sell.

Our grain holders we think are now ready to meet the market and sell, and so of our millers. Flour has fallen in price and will go lower, and this will induce very large shipments as soon as the ships are ready.

The *Wheat market* has now been checked and prices must rule lower—in spite of the "say so" would be dictators of the markets, wheat and other grains will make lower figures and this by reason of the European markets, which are not so favorable just now, and also, our ships will soon be tied up here unless seamen are more plenty.

The wheat market is really from 5 to 10 cents lower, even with our efforts at export.

The *Barley market* rules low and will remain so, although Australia and New Zealand has been a good market for barley, the last shipments thence have glutted that market, and made shippers from this side count their profits "over the left."

The *Market* for *Oats*, *Corn*, *Rye* and *Buckwheat* are all dull with very light sales, and at lower rates.

The *market* for *Feed Stuffs*, such as *Bran*, *Middlings*, *Corn Meal*, *Ground Barley*, and *Oil Cake Meal* are all about as last report, and even a little lower.

We can say truly that the "pall of dullness" prevades the grain trade and will so continue until the great question of that Constitution is fixed.

The *Hop market* may be said to have *gone in*, for there is no market at all for hops hardly anywhere—England has sent her 2, 3, or 4 year old hops, all the refuse stock, to Australia and glutted that market, therefore we have no market there for our stock—hops are a dead letter at present.

The *Hay Market* is down in value, and the quality of hay on the market is not as good as usual.

The *Honey market* rules very, very low—see our market with fine comb honey at 10 cents a pound—while we can export 1,000 tons in 1879—*Beeswax* is wanted for export.

The *market* for *Hides*, *Leather* and *Tallow* may be said to have taken a little more lively and better rates for hides and leather.

We have repeated our remarks upon markets of a former date with few exceptions, they are now strictly true, and therefore appropriate for this large extra edition.

Wholesale Grain Report.

Wheat California, per 100 lbs. Common	1 45 — 1 50

Lard, per lb., in tins	12½ — 14
Eastern Lard, per lb., in tins	13 — 16

Grain, Wool, Potato Bags, Etc.

The *Bag and Bagging Trade* is a little better and market for grain and wheat bags firm at 9½ to 9¾ cents, late delivery.

There will undoubtedly be enough bags to meet all demand this year, and although we believe there will be found to be more grain on hand than has yet been reported, we shall have bags enough for all.

Messrs. Neville & Co., the extensive bag manufacturers, 33 California Street, can supply our farmers at the lowest rates and on best terms.

(SEATS AT REDUCED RATES.)

3.30 P. M. *Daily Sundays excepted* for San Jose, Gilroy, Pajaro, Hollister, Tres Pinos and principal Way Stations.

☞On SATURDAYS only, commencing May 10th, the Santa Cruz R. R. will connect with this train at PAJARO for Aptos, Soquel and Santa Cruz. RETURNING, passengers leave Santa Cruz about 4:30 A. M. Mondays (breakfast at Gilroy), arriving at San Francisco at 10:00 A. M.

☞SPECIAL NOTICE—On SATTRDAYS ONLY, commencing May 3d, the run of this train will be extended to SALINAS—connecting with the M. and S. V. R. R. for MONTEREY Returning leaves Monterey MONDAYS (breakfast at Gilroy), arriving at San Francisco at 10:00 A. M.

3.30 P. M. *Sundays only* for San Jose and Way Stations.

4.25 P. M. *Daily Sundays excepted* for San Jose and Way Stations.

5.00 P. M. *Daily Sundays excepted* for Menlo Park and Way Stations.

6.30 P. M. *Daily* for Menlo Park and Way Stations.

Excursion Tickets at Reduced Rates

To San Jose and Intermediate points, sold on Saturdays, and Sunday morning, good for return until following Monday inclusive, as follows:

Baden	$0.50	Fair Oaks	$1 50
San Bruno	0.50	Menlo Park	1.60
Millbrae	0.65	Mayfield	1.75
Oak Grove	0.90	Mountain View	2.00
San Mateo	1.10	Lawrences	2.25
Belmont	1.25	Santa Clara	2.50
Redwood	1.40	San Jose	2.50

Also, EXCURSION TICKETS to Aptos, Soquel, Santa Cruz and Monterey, sold on Saturdays only—good for return until the following Monday inclusive.

SECOND-CLASS FARE.

Between San Francisco and San Jose, - - $1.00

☞A car with Sleeping Accommodations, constructed expressly for this travel is attached to Freight Trains, leaving San Francisco at 4:00 A. M., and San Jose at 8:30 P. M. (daily Sundays excepted).

A. C. BASSETT, Superintendent.
H. R. JUDAH, Ass't Passenger and Ticket Agent.

SOUTHERN DIVISIONS.

☞Passengers for points on the Southern Divisions of the road will take the cars of the Central Pacific Railroad via OAKLAND, leaving SAN FRANCISCO, via Ferry Landing, Market street, at 4:00 P. M. daily, and making close connection at GOSHEN for Sumner, Mojave, LOS ANGELES, Wilmington, Anaheim, Colton Colorado, River and YUMA.

"The Legal Ticket to be Voted on the 7th of May—

"AGAINST THE NEW CONSTITUTION."

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on this Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1858—both these Agricultural Fairs were planned, maintained, and conducted successfully as an individual enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the FIRST and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STOKING WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER being placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$4 00
Six Copies,	20 00
Ten Copies,	35 00
Twenty Copies,	65 00
Fifty Copies,	150 00

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer, 1879.

OUR NEW CLUBBING LIST.

We propose for the year of 1879 to offer to our Patrons the following valuable JOURNALS in connection with our own, all at reduced rates, so as to give them the best works at low rate—(all postpaid). Price per year.

The FARMER and VICK'S MONTHLY MAGAZINE	$ 5 00
The FARMER and AMERICAN AGRICULTURIST	5 00
The FARMER and POULTRY JOURNAL	5 00
The FARMER and RURAL NEW-YORKER	6 00
The FARMER and PHRENOLOGICAL JOURNAL	5 00
The FARMER and AMERICAN BEE MAGAZINE	5 00
The FARMER and SCIENTIFIC AMERICAN	7 00
The FARMER and HARPER'S MONTHLY	6 00
The FARMER and HARPER'S WEEKLY	6 00
The FARMER and HARPER'S BAZAR	6 00
The FARMER and HARPER'S THREE WORKS	8 00

[Others to be added.]

PARIS, February 27, 1879.

GREAT SHOW OF STOCK, IMPLEMENTS, ETC.

The Fat Stock show just held in the Palace of Industry was not so brilliant as compared with former years, although the entries were superior. The "Exhibition" had already exhausted the choicest lots, and the installation left much to be desired, owing to the best portion of the building being occupied with the Lottery prizes. It is now some 35 years since these shows were founded, and they have not only imparted a great impulse to agricultural ameliorations, but serve also to register the successive steps attained. Both in the cattle, sheep, and pigs, the happy results of crossing with foreign stock, English blood, is apparent. There is also the tendency to show more "lots," than individual specimens of animals. The display of agricultural implements was satisfactory, only as usual, its installation leaves everything to be desired. New manufacturers are disputing reputations and orders with old firms. There were entered, 231 oxen, 36 cows, 75 lots of sheep, 190 pigs, 17 calves, 2,009 live barn-door fowl and 1,994 implements; the collection of butter, cheese, dead poultry, fruits, and other agricultural products, was extensive and excellent. A few notable facts; the public took greater interest in this show than on similar occasions; the awards gave next to general satisfaction to the competitors—though the juries are next to invariably composed of the same persons, and the owners of the exhibits, commence to better comprehend, the value of "precocity," in the breeding of stock, whether the animals be destined directly for the butcher, or, as in the case of oxen, passing first through draught stage. Of the 284 cattle exposed, one-third at least were Durhams, and nearly another third had Durham blood; the charolais and nivernais breeds, even the best specimens of them, perhaps contain a little of the famous foreign blood. These "native Durhams," want the mathematical regularity of the pure breed; the flesh on the hips hangs in hemispheres, and ends abruptly at the upper part of the hock; the loins are not well developed; the sides are not arched, and the head is generally feminine in its looks. In the prize animal, the butcher will find scanty tallow, but much flabby fat, and the public but little meat.

PRIZE STOCK—TARIFF—IMPLEMENTS, ETC

The prize oxen, aged 33 months, weighed 16½ cwts. and the prize cow of 17 cwts. was 5½ years old; the prize sheep were of the dishley-berrichon breed, and the best pig was a normand-yorkshire, 18 months old, and weighing 51 stones.

French agriculturists are derided upon, and becoming somewhat distracted about, the question of free trade versus protection. In certain regions of France, the price of wheat varies from 18 to 22 francs, consequently it no longer pays to cultivate grain at this price. It is also a truth, that striking a tax on American corn—for the States supply two-thirds of that imported, will not remedy the evil, for foreign grain, owing to expenses of production, etc., being less, could still successfully compete with home growers: Also, American, is superior in quality, to French wheat, and if a tax was levied, the consumer would have to pay dearer for his bread, and the proceeds of the import would go, not into the pockets of farmers, but into the coffers of the State. If the culture of wheat does not pay, farmers must try the production of meat, but above all, pursue more advanced systems of tillage, notably the use of commercial manures, irrigations, and the employ of machinery; the latter is more than ever necessary at present, when the rural population tends to immigrate to the manufacturing centres, attracted by higher wages. France has not much more than commenced to lay in her necessary supply of agricultural implements. In order to encourage the extended use of machinery, regional workshops, with able mechanics are to be organized, to be ready to execute repairs.

GREEN FORAGE, ETC.

M. Goffart, the discoverer of conserved green forage for stock, is in the habit of publishing annually a statement of his experiences; this year his remarks are not less valuable, because they are an exception to an uninterrupted success; the system has not been at fault, the plan has suffered from bad weather and questionable seed maize. His neighbors were not more fortunate. While 40 tuns per acre of green maize were yielded, in some cases not 12 were obtained. This latter return is simply ruinous when the heavy expenses of tillage and manures are borne in mind. The choicest seed maize comes from Nicaragua; but it never arrives in time, and is injured generally by the weevil; New York next supplies the best seed, provided it be transported in barrels, to avoid heating; failing both, the ordinary horse tooth maize is to be preferred. There is no longer a question, that the best method to preserve, as well as, to employ the forage, is to cut it before treading it into the trench or pit. A machine worked by hand, is not to be thought of; a cutter driven by two horses ought to chaff the green maize at a cost of 6 sous per cent., while an engine will do the work for two-thirds less. It has been ascertained, that the trench eight feet wide, and covered with earth, will lose 20 per cent. of its contents, while the loss will be only nominal, if the trench be made double the width. Another point to be noted, there is a growing disposition among farmers to employ nothing but this trench forage all the year round. Generally one man, at 2½ francs per day wages, is allowed to care 12 head of cattle, fed on beet, turnips, hay, etc., to cut the roots and provender. M. Goffart requires only two men, at the same rate of wages, to care 80 head of stock fed on the pit-rations.

[CONTINUED IN OUR NEXT.]

THE SYDNEY EXHITION.

The Exhibition Commission has before it two applications for permission to make captive balloon ascents—that from M. Voigt, mentioned some days ago, and one from M. Saint-Martin, who made the original application to the Agricultural Society. Besides these, the Executive Commissioner has received copies of French and English illustrated papers, giving with views and drawings, full particulars in reference to the captive balloon actually used at the Paris Exhibition by M. Giffard. With this balloon a number of scientific experiments were made, and it was also employed by the medical faculty for the purpose of noting the effects of the pressure of air in various diseases. About two acres of space would be required for it in order to provide accommodation for spectators and for the engine that is used to make the gas. The subject is at present under the consideration of one of the committees. In order to give some idea of the extent and magnitude of the preparation being made by the mother country for our Exhibition, and the number of demands for room which the Executive Commissioner is straining every nerve to meet, it may be interesting to note the amount of space that was occupied by Great Britain and Ireland in the different buildings at the Philadelphia Exhibition, viz.,—Great Britain and Ireland (floor space), main floor, 54,155; carriage annexe, 4,130; horticultural hall, 1,050; agricultural hall, including all colonies but Canada, 12,223—71,559. There was an additional outdoor space of 8,000 feet in the horticultural grounds, occupied by England. The space actuallp allotted to Great Britain, by our London Commission, is 110,000 feet, or about 40,000 feet more than was occupied in Philadelphia, and the greatness of these demands for accommodation will necessitate that every available foot in the grounds should be turned to use. According to the report of Sir Herbert Sandford, the British Executive Commissioner, the space occupied by Great Britain and Ireland, India, Dominion of Canada, and the Australasian and all other British colonies, was 194,381 square feet on floor and grounds, being one-seventh of the total amount of the occupied space of 1,352,027 feet in and belonging to all the buildings within the Exhibition grounds, Fairmount Park, Philadelphia. No official reply from India has yet been received, but circulars letters were by last mail dispatched to Bengal, Bombay, Madras, and Ceylon.—*Sydney Morning Herald.*

WASHINGTON.

From our Specia' Correspondent

WASHINGTON, D. C., April 21, 1879.

The President has issued another edition of his civil service reform creed, varying again somewhat from any of his former announcements. It was contained in a free talk with a friend, and I violate no confidence in reporting it, "many persons appear to misunderstand me," said the President, "in the matter of my civil service appointments. By saying that a faithful officer should not be disturbed in his tenure, I mean just what the word tenure means, namely, his title to his office for the term his commission covers nothing more and nothing less. A postmaster, for example, who has held an office for one term is naturally supposed to be qualified for another, and if his support for the succession is nearly unanimous, he should have it. But it should be nearly unanimous as the first requirement. If he has not served with such acceptance as to command the solid support of his townspeople, a new man, even with less support, has an equal claim upon the office. Indeed, in some respects, he has a stronger claim, since the influence of the office holder is sufficient in most cases to give him a preponderance of support where qualifications are only equal." This was intended to explain some late appointments which had caused some surprise to his friends. The President displayed considerable feeling as the criticisms that had passed upon him, and declared that he would no longer be dictated to by Senators and members.

Capt. Jas. B. Eads has published an open letter here to the Editor of the *Cincinnati Commercial*, one of the most unscrupulous of his assailants, in which he presents an array of facts to prove the substantial success of his work at the mouth of the Mississippi. All his statements are borne out by the official reports, but the Captain is naturally annoyed at the yelping of certain newspapers, whose advice was not taken in that great scientific work, or whose friends were not allowed to have a part of the contracts. The Government officers are satisfied with the jetties, and are astonished that these assaults should be kept up on a faithful and conscientious public servant, as Capt. Eads is acknowledged by all fair men to be.

The bad practice of changing the language of debates in Congress before they appear in the *Record* was again exposed Saturday in the House. In his speech in favor of the repealing or political cause in the appropriation bill Mr. Blackburn said without qualification that he was for never calling a halt until they had repealed every vestige of Republican war legislation. Whether he meant it or not, some of his friends suggested that the expression would be interpreted to mean wiping out the Constitutional amendments and all. Mr. Blackburn thereupon wrote on a slip of paper a qualification of the sentence so that it should read "every vestige of war legislation that was intended to abridge the liberty of the citizen." This was eminently conservative and quite different from the speech, and the thing was brought forward to plague him Saturday. Mr. Blackburn, however, protested that he should not be interpreted as an extreme man, since what he most desires is to drop sectional issues. Mr. Frye insisted that he must be interpreted as his own friends dictated, and read extracts from a Mississippi paper commending Mr. Blackburn for the very remark which he had qualified. There is still a good deal of difference of opinion as to the length and character of this session touching matters of general legislation. Senator Blaine, and in fact nearly all the Republican leaders, and many Eastern Democrats predict an adjournment by May 15th, but it is possible that their wish is father to the thought. The Greenbackers, probably a majority of Democrats, and some Republicans favor a longer session and general legislation, and so predict.

MERRILL.

AMERICAN WHEAT IN SPAIN.

[The new opening for our American wheat shows what can be done when we have shipping of our own. The *American Agriculturist* of February gives the following item of importance, the price realized is a shade over $3.00 the cental, this would leave a good profit.—ED. F.]

The first cargo of American wheat was landed in Barcelona, Spain, about November 15, and created quite a sensation among the dealers. Previously most of the wheat handled at that market has been Black Sea and Hungarian, but the American was judged to be equal to the best grades of those varieties, and this cargo has called for about 25 cargoes more. The amount of the shipment was 72,000 bushels, the price obtained $3.70 per 120 pounds, and the cost of the freight was $18,000. The only unwelcome feature of this item of news is that the grain was carried in a British steamer, and that the cargoes further bargained for are to be carried in British vessels. We have at present no direct steam communication with the ports of the Mediterranean. Not until American steamship lines are established to all prominent foreign markets can we hope for the best returns from the sale of the products of our farms, mines and factories.

Home Correspondence.

NOTES FROM SAN DIEGO COUNTY.

SAN DIEGO, April 28, 1879.

COL. WARREN—*Dear Sir:*

Some months have elapsed since writing to you on the current topics of this portion of southern California; in this short article I will condense matters treated on as much as possible.

OUR PROSPECT FOR CROPS

Are not as flattering as to grain, as at this time one year ago—by enquiry and observation I find our farmers depend too much on *Providence* and as little labor as possible in putting in crops, by this I do not mean to say our farmers as a class are guilty in this particular, but a great many are. In this county, to-day, where land has been properly plowed to a sufficient depth, I could show you, notwithstanding our light rains, a promise of good paying crops.

POTATO AND HONEY CROP.

The first will be medium, say 500 tons from the county, this is of the early varieties; would have been 1000 tons if we had been blessed with two inches more rain; the late varieties will make say 250 tons, making in all a fair yield for the number of acres devoted to this article of our production.

HONEY CROP FOR 1879.

From what information I can derive up to this date, we shall fall short by at least one-third and possible one-half of our production for the year 1878, which was near 1050 tons, this is owing to lack of moisture late in the spring to perfect the many plants and flowers depended on for bee feed. I trust my figures given in this connection may turn out rather below the quantity that will be exported.

NEW MARKETS FOR HONEY.

The well known and enterprising gentlemen composing the firm of Messrs. Steiner, Klauber & Co., of this city, in addition to their large mercantile business, conceived the idea of opening up a market for our honey in Germany, by shipping to that country in November, 1878, about 700 barrels, each barrel containing 250 pounds nett, I can not state positively, but I am almost certain the venture was equal to their expectations, by the way this firm, owing to increased business, are having erected for their business purposes, a magnificent brick building with a large warehouse attached that will be better suited to their wishes as to what a business house, such as theirs, should be—when completed no doubt it will be the finest mercantile building in southern California.

MINOR TOPICS.

Notwithstanding the cry of hard times, our city in business matters is advancing, within the next 30 days two gentlemen from the East, captured by our superb climate and business outlook will launch out in mercantile pursuit in this town—I trust their most sanguine hopes will be realized.

THE DAILY PAPERS PROSPEROUS.

It surely must be financially comforting to the publishers of our two daily papers to find their columns so well filled with paying advertisements. The *San Diego News* owned and edited by J. M. Julian, Esq., and Mrs. Kate S. Baker, is particular noticeable for its very full reports of local news as well as general family reading, it merits success and I think is receiving large additions to its list of subscribers.

JNO. C. DALY.

Unselfishness of Farmers.

The Springfield *Republican* calls attention to a trait of farmers in which, it thinks, they differ, as regards each other, from the members of any other guild. "Each man is eager to show his neighbor any new discovery or acquisition which he has possessed himself of that is likely to help on the business of farming. If he thinks he has a 'good thing' he wants others to know about it, whether it be the result of some successful experiment in raising a crop, an improved breed of cattle, or variety of vegetable, or a package of superior seed which has come from a distance. Apparently he does not for a moment entertain the idea that it would be to his profit to keep such knowledge or specimens to himself. And if another farmer comes to see him, he is pleased to show all his possessions, and there are no corners of the place by which the visitor is hurried because some experimenting is going on there which the owner does not care to be seen, as is often the case when the visitor makes the grand rounds of a factory. Contrast this habit of the farmers with the way that neighboring merchants and manufacturers do their business. Why, when it was first proposed to connect the paper mills in Holyoke with their offices in this city by telephone, objection was at once raised that the paper-makers might possibly learn each other's secrets as a consequence."

["Knowledge begets knowledge"—"they that sow shall reap," the "liberal mind deviseth liberal things and by liberal things they shall stand," all jealousy like that named is to be regretted, generous aid will always bring a good reward, which the selfish reap not.—ED F.]

OUR STATE FAIR.

The *State Ag. Society's Fairs* should not be confined to one county, but go from county to county annually, and thus give every section of the State an opportunity to enjoy its benefits and make exhibitions of the products of each county which is not done now, and never will be until our AGRICULTURAL BOARD hold their Fairs in each of the counties where the many and various products of the State are found; and thus give each section of the State a fair chance to be fully represented, and to have a just share of the benefits that would result therefrom, for they are entitled to a share of the bounty given by the State to the Agricultural Cause.

It is said that this cannot be done because there are not the needed Hotel accomodations for the great masses of our farmers that would desire to attend.

We hold however we do not absolutely *need* larger *hotel accomodations*, the people from the country can provide for themselves, and they can attend and enjoy the Fair at a greatly reduced cost from all former years, by the plan we have proposed several times in past years.

Call the STATE FAIR at Oakland for example, and our plan would be for every farmer who desires to attend with his family instead of going to a hotel and subjecting himself to a large expense, let him provide himself with a neat and pretty TENT, costing $10 or $15 that would hold his whole family; then prepare all the needed eatables for a week, and thus the expense would not be *one-fourth* of the ordinary cost of a hotel, and with much more real quiet and comfort, nor would this take away trade from Hotels that would always be full by those who prefer, while many thousands would go that do not go now, on account of the expense, that "tenting out" would save.

What a grand display could be made upon suitable grounds where 500 or a thousand families should assemble, *all dwelling in tents*, each county set by themselves, with a tall banner naming the *county*, and a State Flag for the centre -with the counties arranged around it classified, visitors could then find their friends from any county and thus have a grand social gathering for a State Fair free from the crowd, jam and commotion usually had at hotels.

We have advocated this plan for many years, and every year it is more and more needed if we would have our State Fair accomplish the good that could be attained, but never will it be till our State Ag. Society shall go from county to county the same as the great States of New York, Illinois, Ohio and others.

Our summers and autumns are blessed with seasons *free* from storms and rains during Fair times, so that the people could enjoy the "tenting out" better than any other State in the Union.

Summer parties are now enjoying such seasons, we therefore say, Why not have our AGRICULTURAL FAIRS thus planned to *save expense?* while the people shall dwell upon the "tented field" and enjoy life, health and pleasure at but little cost.

The material for such enjoyments are a trifle, tents cost but little and will last for years.

We hope the friends that wish to see our State Ag. Fair held in the different counties will respond to this proposition.

THIN SEEDING OF WHEAT.

A. J. Scoggins of Lemoor, Tulare county, planted on the 12th of March, one pound of wheat of the Champlain variety. It was planted in rows twelve inches apart one way, and eight inches the other. No after cultivation was given. On the 15th of July the wheat was harvested, and the yield found to be 791 pounds. The soil was sandy loam, eighteen feet deep. It was not underdrained, and no fertilizer was used. The land was plowed twice before the wheat was put in. When the wheat was threshed, Mr. Scoggins says it weighed 805 pounds, but as he wished to see it weighed again before making his affidavit to the yield, he found that one of the sacks had been torn by a loose horse, and a part of the contents wasted. If the saving had been very close, Mr. S. adds: "we would have had 1,000 pounds; but we Californians don't gather wheat one straw at a time."

This wheat was grown in competition for prizes offered by a seed firm in New York. There were several competitors in California, most of whom got very creditable results. All of them planted in drills, one kernel in a place, and the kernels from four to eight inches apart. Many of the plats were cultivated. A. J. Hickerson of Plumas county, planted one pound of Defiance wheat on one sixty-fourth of an acre and harvested therefrom 316 pounds, or at the rate of nearly 340 bushels per acre.

The first prize, Defiance wheat, was grown by J. Brakefield, Avon, Minn., and the yield from one pound of seed was 528 pounds. Mr. Brakefield also won the second prize for the greatest yield of Champlain wheat, the same being 484 pounds from one pound of seed.—*Chicago Farmer's Review.*

A special bargain will be offered in the splendid new pattern Farm Wagons and Buggies now on exhibition and sale at the agricultural warehouse of G. A. Davis, 327 Market Street, S. F.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have GRAIN to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER VI.

As my purpose is to tell you of our farm and its management, rather than to dwell upon other topics, I will not pause to describe the congregation nor the sermon, though as the venerable pastor made appropriate reference to our sudden bereavement, and prayed that we might be led to place our trust in "Him who is the God of the widow and the fatherless," it made an impression upon my mind which had been made by no religious service before, and which has never been obliterated. Many came up to tender their sympathy to my mother, some of whom we had previously looked upon as strange, but if they could have known that all the time I was more in the mood for giving thanks for escaping the prospect of Blackington, with its real and imaginary horrors, I fear that I should have obtained but little sympathy there.

With Monday morning came a snow-storm, which, for some days, put a stop to work out of doors, but Clarence was busy fixing up little household conveniences. Little shelves were made and put into almost every imaginable place, which were afterward found to be most handy; hanging-shelves were securely put in the cellar, buttons were fixed on doors in the house and on the other buildings, wood and slabs were cut and neatly piled in the wood-house, tools were mended, old Charley's harness was brought in, washed, stitched, and oiled as it never was before, and I know not what would have been done if the weather had not at last come so that they could begin on the hen-house again. At last it cleared up and they were able to work there, and the first day I was invited to help put hay into the walls, as we did at the barn. It was my first inspection of the new building, and I was glad to satisfy my curiosity in regard to it. It was twelve feet wide and twenty-four feet long, five feet high at the back-side and about nine on the front, facing the south. The sides were covered with the twelve-foot slabs from the mill, excepting where spaces had been left for doors and windows. The roof was made of some of the old boards which came from Mr. Giles's, and the cracks in the roof were carefully battened, as Clarence called it, with other boards or slabs, so that but very little rain could come through. Ned and I were set to lining the walls by nailing slabs to the posts upon the inside and stuffing hay between them and the outside, while Clarence went at the more difficult job of fixing in the windows and the door, at which he was soon assisted by Bill Giles, who sauntered up with his hands in his pockets, and at first showed Clarence how to do the work, and then soon after threw off his coat with the remark that he "might as well help a little as to stand there and freeze looking on," and was quickly as busy as any of us, and accomplishing much more. I doubt if he would have worked with as good a relish if he had been hired by the day, and feel sure that he would not if he had been working for himself. With his skillful help five whole windows were quickly put into the south side, and a door upon the south at the west corner; then a half-window was put in the east end near the roof, and another opposite to it in the west end, and the building was completed, as I thought. But it was to be furnished, and roosts were made and put across the east end. I wondered why the windows were all crowded toward the door, but Clarence explained that that was the bedroom, and he did not want too much light there. The roosts were only about two and a half feet from the ground, for Clarence said he did not want the hens to have too far to fly down, as if he got Brahma hens, as he meant to, it would hurt them to come down, as they were so heavy. Then rows of nests were made on the back side and west end, one row on the ground and another just above them, giving room for about forty nests. Clarence said the lower row he meant to keep to set the hens in. At Bill's suggestion Ned was sent with the horse to bring up a lot of laths that came out of the old porch, which were of no use to him excepting for kindling-wood, but would do well for nailing on the windows to keep the hens from flying through them, and for making coops which would fasten the hens into the lower nests while setting, or rather, would let them come off to the gravel floor, but keep them from going back on any other nest but their own. While he was gone Bill made a feed-box by building a bench midway of the room and fastening on it a V-shaped trough large enough to hold a bushel of corn, with a narrow crack at the bottom where the corn would rattle down upon the bench. But little could come out before the heap on the bench would stop the crack, and no more could come until the hens had eaten the heap, or a part of it. In the ground he also put a trough for water, with a cover nearly over it, where there was just room for the hens to drink without scattering dirt into their water. I noticed that this was put where the sun shone on it longest, and the cover was made of a broken tin-pan, because Bill said it would warm the water more in the sunshine than if the cover was of wood. The feed-box was put upon the bench, I was told, in order to keep rats from getting at the corn, and to make it more secure, an old tin-pan was nailed, bottom up, upon the top of each leg, under the bench. Before night all was finished, and I was sent to the house to ask mother to come and examine it. I doubt if the architect of any of the magnificent public buildings in this country felt more genuine pride when the committee came to examine and approve his work after it was completed, than did my brother when mother stepped into the building and glanced around.

"Surely," said she, "you have done very well indeed with what you had to work with. But why have you built it so large? It is large enough for an hundred fowl."

"It was just about as easy to make it large as small, for the slabs were just so long, and I hope to have an hundred fowl here next winter, if I have good luck."

"I think Mr. Giles must have helped you a good deal, for it looks more like his work than boy's work."

"Well, ma'am," said Bill, "what I've done hasn't been of much account, and I guess the boys would have figured it out without me, somehow, but I kinder wanted to give them a lift because I know what it is to puzzle over a job that I wasn't just used to, and I may want a lift from them some time, for I have got a little land down there, and I don't know just how to manage, because I was not brought up on a farm. Now, you see, I have been wanting a hen-house myself down there, and I thought I couldn't afford to buy lumber to build it if times was so hard, and those I had lots of it better than this is built, but I didn't know how to use it. But I have enough of it left, and I reckon I will build one for myself now, and the plan of this is worth more than my work, anyway."

"Well, William," said my mother, and I knew by the use of the Christian name that he was at last acknowledged as a neighbor, in the Scriptural meaning of the word, and that his kindness or his praise of her boys had overcome her dislike of his laziness, "I am very sure that you have helped very much, and if we can do anything for you, I hope you will not be afraid to ask it for it, and we will try to be as willing as you have been to help the boys."

"There is a way, ma'am, that you might help me great deal more, but I am a'most afraid to ask such a favor, only you speak so kind, and I know you feel kind. You see my wife was brought up to work in a factory, and she don't know so much about housework as she would if her mother had lived on a farm, though she used to tend a loom as well as any of them; but it was just killing her to work there, and I married her, and now if she could run up here once in a while and get you to show her about how to make such bread and pies and things as you make, and a little about fixing up clothes for herself and the little ones, it would do us a power of good, and I would be willing to do ten times as much as I have done for the boys. Fact is, ma'am, I know I ain't just what I ought to be all the time, but I go home and find victuals spoilt by not being cooked right, and the old woman cross because clothes will wear out, and she don't know how to fix them decent again, and she knows I can't find money to buy new all the time, and she scolds, and then I swear, and likely enough go off to the tavern and make a fool of myself, and that only makes things worse, and I have thought of it a lot since I have been at work here, and seeing how busy these boys were, and pleasant about their work, and how neat and tidy their clothes are, though I'll warrant it does not cost as much to dress all of 'em as it does for clothes for me."

And Bill shifted his feet uneasily and affected to be picking up nails from the ground, as he awaited a reply.

"Certainly William, let her come up any time, and I will show her all I can, and help her about fixing up clothes for herself and the baby, and for you, too, and I may be able to find something that our children have outgrown that will do to make over for them and will piece out."

"Thank you, ma'am, very much. I will tell her, and I warrant she will be as pleased as if I had had another farm left me," and Bill hurried away with a suspicious moisture in his eyes, although he "whistled as he went" a gay dancing tune.

Do not smile, gentle reader, at this changing of works and giving away old clothes. Such friendly acts were the custom of that region, and served to keep alive good feeling among neighbors, who were thus drawn together until neighbors were almost as near as members of one family. After Bill had gone, mother and I went to the house, while the boys proceeded to throw gravel against the outer walls of the building until they had it banked up nearly three feet high on the north, east and west, so as to be still more impervious to cold winds and rain.

During all this time our hens, of which we had about forty, had been giving us a liberal supply of eggs at the old hen-house, and a few days before Ned had announced that the speckled-necked one wanted to set, and Clarence gave orders for her to be left on the nest. To-night he found another setting and told Clarence of it at the supper-table.

"Just what I wanted, and how lucky, just as I was ready for it. I am going to the squire's in the morning to get some of his Brahma eggs. I will carry over two dozen and a half of ours to change with him. They will do just as well for them to cook, and I want the Brahma chickens."

"You do not think of setting hens now, do you, Clarence? They will come off in March, and you cannot raise them in such cold weather."

"I could not in the old hen-house, but in the new one they will be almost as warm as in summer, and early chickens sell for such a great price that I hope it will pay well."

I petitioned for a chance to go with him; but as he said he must walk, for he did not dare to carry the eggs in a wagon over the frozen ground, for fear they would not hatch, and that he should be off by daylight, I did not care to avail myself of the permission which he so readily gave. That very night the nests in the new hen-house were made ready, by hollowing out two of those on the ground, lining them with cut-hay, and sifting a good handful of wood-ashes over them, as Clarence said, "to keep off the lice. Sulphur would be better, but I have not got it, and cannot get it short of the Corners. I think the ashes will do in this new building." Then the hens were brought up there and put on the nests and the nest-eggs put under them and the coops put before them to keep them from wandering away. This was done that they might get settled to their new nests before the precious eggs were put under them. Sure enough, Clarence was off by daylight in the morning, and returned before noon, with his basket of eggs, so little tired with his walk of ten miles that he went immediately at work on the piggery, somewhat to our surprise. But soon after noon one of the men that I had seen at Squire Grey's, at work, drove into the yard with two fine hogs in the team wagon, which he proceeded to unload into the sty, after knocking at the door and handing in a note for mother, which I will insert here that you may see the character of the man:—

STAFFORD, MASS., Feb. 8.

MRS. REYNOLDS:

I have sent over to Clarence two fine young sows, which I have scarcely room for in my piggery. They are both with pig, and I shall expect him to pay me twenty-five dollars for them when he sells the pigs, or I will take them back and pay him a dollar a week for keeping the two until they farrow, and after that a dollar and a half a week for four weeks, if he takes good care of them and feeds them well. They are at my risk until that time, so do not fear his running in debt. I should not have been in such hurry about getting them away, but it might hurt them to move them later. He has told me of his new honnery and his plans in regard to it, and I can pack up five dozen eggs each week and send over, that he may not have another such long walk, and you may send in return the same number of yours. I think I can pack them so they will hatch none the worse for the ride. I have also offered to take his calves when they are dropped, if he will bring them over to me at two days old, and give him in exchange heifer calves from my Alderney cows, full or half-blooded, which he can raise according to his own ideas. The calves from your cows will be worth more to me to raise for veal. The Alderneys are worth much more to make cows of, and I should raise them myself if I had a man that I could trust to take the pains with them that your boys will. Hoping and believing that those will achieve success who so richly deserve it,

I am yours respectfully, JAMES GREY.

I could scarcely realize that we were to have pigs, Jersey calves, and Brahma chickens just as fine as those which I had admired at the squire's; but it was truly so, and yet the squire's letter read almost as if we were doing him a favor in receiving them. As soon as the man had driven away, I hurried out to look at the pigs. There they were, perhaps not much different from hundreds that I had seen, but they were our own, for girl though I was, I was beginning to feel an interest in the out-door management of the farm which I had never felt before. They were yet in the outer yard, for they had no soon followed Clarence home that he had not finished his work on the piggery, but was sawing boards and fitting them in. He had fixed the trough so that he could shut the pigs away from it while he put in the food for them, and had made a new plank (or slab) walk for them to come up on into the house from the yard, and had made the yard fence strong and tight, and when I asked what more he had to do, replied:

"Don't you see? They must be separated by and by, before they have their pigs, and I may as well get the boards all ready so I can do it at any time in a few minutes. By and by I shall be busy about something else, and shall not want to stop to fix this up. So I will get it all ready now; but I shall let them stay together until almost time for them to have their little pigs and then part them off."

So he had his partition all ready to put in, and then made them a good bed of hay for them and let them in, and made a partition in the yard, all but nailing on two boards which he cut and laid by all ready. He was at some pains to take out a bottom rail which they would have had to step over, as he said it was very bad for them to have any such thing in their way, and he also put rails all around the inside of their sleeping-places about nine inches from the floor, and the same distance from the wall, because, he said, when they had little ones they were apt to lie down against the side of the pen, and when the pigs were small they would get caught between the mother and the board, and in that way get jammed so as to kill them. But if the rails were there the little pig would slip under the rail, and off out of the way, without being hurt. When I asked him how he knew so much about pigs, "By my reading, miss," was the answer I got, "and not because I was brought up amongst them."

And now we were fairly under way with the farming. We were not having much milk, as we were milking only one cow, for one was a heifer that had never had a calf, and the other two were to calve in April and were now dry. The heifer was one that father had traded for, and was not expected to calve until June, while the old cow, which was now giving milk, would calve in May. But we had hens setting in the new hen-house; more at the old one, giving us plenty of eggs, for it was and had been all winter my task to give them corn and oats and scraps of meat and warm water several times a day, and I had carefully attended to it at first, because the egg-money was mother's from which she bought my boots and dresses, as well as her own, and I was desirous that there should be no lack, and since Clarence had taken charge, because I wished to help all I could to save our farm and make it pay.

And so the rest of the month passed without any events of especial importance, and so did most of March. The boys were busy preparing wood for the next year's use in stormy weather, while, when it was pleasant enough, they threw over the manure which was in the barn-yard into a large heap, that, as Clarence said, it might heat and get better fitted for use. He was so eager to increase the size of that heap that he cleaned up all the accumulation of the chip dirt in the wood-house and around the woodpile out of doors, and added to it, and the dirt in the lane-way, for almost a foot deep was scraped up and put in with the rest; but I own I was hardly prepared, on going to call him to dinner one day to find that he had taken up the floor of the cow stable, and was throwing out the dirt from underneath, which Ned was wheeling to the heap.

"You see, sis," he said, "this has been under here for forty years, and lots of stuff has soaked through the floor cracks into it and in from the outside, and it is just as rich as it can be, and I am going to take it all out and fill it up with dry sand out of the sand-hill, and then get Bill Giles to help me put in some new sticks here and lay a new floor. This has got so rotten in some places that I am afraid it will break through and some of the cattle will get a broken leg, which will be a bad job for us. And that hole outside I shall fill up with sand or loam, so as not to have a mud-hole full of dirty water there all summer, as there has been every summer since I can remember."

[TO BE CONTINUED.]

Gapes in Chickens.

[The *Country Gentleman* gives the following good article upon gapes in chickens and the remedy.—ED. F.]

I have seen of late, many articles to the effect that gapes in chickens could not be cured. The gapes are produced by small worms about one inch long, in the windpipe.

To get rid of them, get a half pint bottle or any other that is convenient, fill it with kerosene, and place it where you can get it easily. Then get a small feather from the wing of a grown fowl, strip the feather from a quill, all but a little on the small end, put it into the oil and leave it there until you have your chicken ready. Hold him in your left hand with his head between the forefinger and thumb, press them gently together, and you have him with his bill wide open. Then take the feather which has become well saturated with the kerosene, and being careful to insert it into the windpipe, and not the throat, push it gently down the pipe until you are sure of reaching the bottom. Twist it around once or twice, and pull out quick. I have brought three worms at a time in this way, and if any remain, the chicken will soon throw them out, as the kerosene kills what remains.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

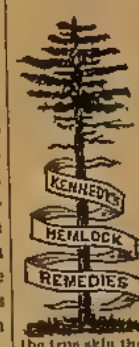
IN SHEEP.

S. H. KENNEDY'S

NON POISONOUS

SHEEP DIP!



Manufactured by

S. H KENNEDY, Omaha, Nebraska, eradicates the pest. This is the only dip that adds to the staple and value of the wool. It will cure the most obstinate cases—diluted 150 parts hot water, and will not cost A CENT A HEAD each dipping. Packed in ONE and FIVE GALLON TIN CANS.

Dip Scabby Sheep in the Early Spring and Summer as that is the time to eradicate the disease from the skin. Fall and Winter dipping will not cure the Scab, it only holds the disease in check, in the Fall and Winter months, the insect that causes the Scab is forcing his way so deep into the true skin that he cannot be reached or destroyed, while in the early Spring the insect comes to the surface of the skin and is easily eradicated by one or two dippings in my Sheep Dip.

Price per Gallon:

VALUABLE

FARMS FOR SALE.

Valuable Farms in the sunny lands of San Diego County

Those families who desire to leave the cold wintry region of the north and come to a better climate—are invited to the following Farms we offer at good bargains:—

One Farm of 1,500 acres, undivided, can have a great chance to buy this Farm.

One of 320 acres, of rich land of the very best soil, running water, and generally low land, capable of growing any crop wanted, a portion fenced, with fruit trees and vines now bearing.

One Farm of 160 acres of most excellent soil, capable of raising all Tropical Fruits in the greatest luxuriance.

All these Farms are in the Bee-region—and suitable for this interest—all sold on easy terms. For particulars address

STEINER, KLAUBER & CO.,
San Diego City, Cal. 49 2

Or CALIFORNIA FARMER Office, 320 Clay Street.

$66 a week in your own town. $5 Outfit free. No risk. Reader, if you want a business at which persons of either sex can make great pay all the time they work, write to particulars, to H. HALLETT & Co., Portland, Maine. 47 2

Horticulture.

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

MAY, 1879.

[*Vick's Magazine* that always has so many beautiful things in it, this preaches of May, a sermon and a lesson with good word.—Ed. F.]

Few appreciate the blessings they enjoy, and the old saying, that men only learn the value of blessings by their loss, is more truthful than many old saws. Those who live in cities look upon the country as the home of comfort, and even luxury; they believe the atmosphere is perfumed with odors from a thousand flowers, while the meadows and groves, and lanes are redolent with health, and flooded with milk and honey. They receive the quart of milk and water, if nothing worse, dished out every morning by the milkman, in a tin measure, and, while they look upon its azure surface, think of the country and its rich, golden cream; while the poor quart of ripe and unripe strawberries, jammed out of all resemblance to the fruit of the strawberry plant, reminds them of the large, luscious berries, almost too much for a mouthful, eaten in early days in the country, and they feel sad, and think truly that God made the country, but the city is man's unhappy work, and sigh for the fine fruits and fresh vegetables and the breezy lawns and shady woods, and the health and vigor of former days, and resolve that when a few more dollars are gathered, with a few more gray hairs, they will flie away to the country, there to enjoy in repose the evening of life and gently await the setting sun.

The dweller in the country, however seldom appreciates or enjoys the blessings and luxuries that are attainable, and almost without money or price. He may have corn, and pork, and beef, and mutton, and potatoes, and bread from the fields, and the commonest laborer in the cities obtain these; but the real luxuries of life come not from the broad acres, but from the little garden patch—the acre or so that furnishes the raspberries, strawberries, currants, plums and pears, and asparagus, beans, peas cauliflower, celery, and many other delicate thing that not only pay, but give health and comfort. It is just this little piece of ground that makes all the difference between very ordinary and very luxurious living, and that, we think, while adding much to the pleasure, will subtract a good deal from doctor's bills. So we thought it well at this spring season to call the attention of our readers to the subject, with such suggestions as were likely to be most needed, instead of responding to a few inquiries, which are now before us, in the usual manner.

EXPERIENCE IN FRUIT RAISING.

Dr. E. W. Sylvester, of Lyons, N. Y., read a paper on "Fruit-growing" at the fair held at Elmira last fall, in which he said he bought his farm of one hundred acres, twenty-six years ago and planted out the first year 1,100 fruit trees. During the last ten years the average money received each year exceeds the purchase money paid for the farm and buildings; or, in other words, the fruit has paid the original cost of the farm ten times over in as many years. Croakers said at first he would never live to eat the fruit of the trees he planted, or, if he did, apples would not be worth over fifty cents a barrel. But he had lived long enough to gather a thousand barrels in a season; to make sales of pears at $15 and $16 per barrel and apples at $4 to $10 per barrel; the average apple rate for the last twenty years having been $2 25 per barrel. With labor and other expenses as at present, apples at one dollar per barrel will pay better than most farm products. The export demand for fruit is yearly increasing. Last year 396,000 barrels of apples went abroad, and this year it is likely to exceed half a million. There were 14,818,052 pounds of dried fruit exported, and there was also a million dollars worth of canned fruit. The doctor fully believes that fruit-growing has paid, does pay, and will pay all the way down to the millenium, and then folks will live on fruit altogether.

[We feel sure that the cause of the great success of Dr. Sylvester was the simple fact that what he did, he did well, cultivated well, pruned well, planted the choicest kinds of fruit, and sent only the best to market, that's the true way—more than forty years ago, we, ourselves were shippers of apples to London by steamer, every apple picked by hand, carefully packed in papers, barrels paper lined, and then, though paying high freight, by steamer from Boston to Liverpool, we received two guineas per barrel—that paid.—Ed. F.]

A Magnificent Estate.

A large and very fine estate of some FOUR HUNDRED ACRES with a fine Orchard of the very choicest fruit; a large Vineyard, very productive; a large number of Fig Trees, great bearers

ORANGE, LEMON, OLIVE, and choice EXOTIC FRUITS of all kind.

This estate is located in one of the "Beauty Spots" of our State, a retreat, healthy and delightful spot:

This estate will be sold at a great bargain by reason of declining health of the present owner.

Particulars can be had from EDITOR FARMER.

WARREN & CO.

AN ENEMY AMONGST THE ORANGES.

WITHCOTT, near Toowoomba, February 20.

Enclosed you will find a few specimens of a fly which is making sad havoc amongst the oranges at the present time. I spent the whole of yesterday capturing them, and watching their mode of procedure, namely:—They fly straight to the orange and insert that spike they have behind, and deposit a number of eggs under the skin of the orange to the depth of one eighth of an inch; a little gum then exudes from the hole, and completely seals it up until the eggs are hatched, which soon takes place, and in the form of maggots they work their way into the orange, and soon destroy the juice and cause the fruit to become yellow and fall off. Up to the present time I have done my best to stop this pest from multiplying, for all the fruit that drops off I destroy by fire, and any I see affected on the trees I take the point of my penknife and cut a piece out about the size of a pea, not penetrating the pulp, and in most cases I find from thirty to forty eggs embedded in the skin. I find they do not interfere with the mandarin oranges; I suppose the skin is too thin for their purpose. Within the last ten days these pests have destroyed more than the half of my crop, and I looking for that moth of which I have read so much for the last three years that I have been a subscriber to the *Queenslander*. I like the spade better than the pen, but I considered it was my duty to put others on their guard and destroy this pest at once if possible. If you have done so before, will you kindly describe this fly to the public? and oblige—Yours, &c.,

HENRY L. PENTECOST.

[The fly is identical with that which attacks peaches during August and September. It is a black fly three-eighths of an inch long, with shiny bright wings, and has two bright bars upon the body.—Ed. *Q.*]

[Will the orange growers of California keep a sharp look out for this insect and let us know if our trees are troubled with it.—Ed. F.]

Why Flowers Turn to the Sun.

Wiesner has presented to the Vienna Academy a monograph upon heliotropism and geotropism in plants. After a historical sketch, the author treats of the influence of heliotropism, and shows that with decreasing intensity of light the strength of the heliotropic effect increases to a certain point, and beyond this point decreases. The lower limit of light intensity coincides with the lower limit of heliotropic effect for the stoppage of growth in length, while the upper limit does not coincide, or only occasionally coincides, with the upper limit of heliotropic effect for growth in length. In the case of very sensitive heliotropic plants, the upper limit of light intensity for stoppage of growth in length lies higher, and in less sensitive plants lower, than the upper limit for growth in length. He next considers the relation between the refrangibility of rays and their heliotropic effect, and shows that portions of very sensitive heliotropic plants, as *Vicia sativa*, curve in all lights, even in the ultra-red and ultra-violet, except the yellow. Experiments on the joint action of heliotropism and geotropism are next described, and the author concludes that the phenomenon of heliotropism is due to unequal growth upon unequally lighted sides of the plant.—EDITOR'S SCIENTIFIC RECORD, in *Harper's Magazine for May*.

Hyacinth in its wild state is generally blue, sometimes pink, and of course is never double. All the cultivated varieties have sprung from the wild hyacinth in Asia, near Aleppos and Bagdad. The precise time of its introduction to cultivate is unknown, but according to the best records it must have been before 1596. Until the beginning of the present century white, blue, and pink were the only colors known, but now there is no color or shade of which we cannot find hyacinths.

SPLENDID

WEEPING TREES.

It may not be known generally that by the aid of science, all the finest kinds of our DECIDUOUS TREES, used for Ornamenting Grounds can now be had grown in the beautiful pendant form, graceful as the Weeping Willow.

The following, of very extra size and form, can now be had for planting this Autumn.

The WEEPING BEECH, MAPLE, BIRCH, ASH, ELM, POPLAR and LINDEN these are the most beautiful Ornamental Trees known, adding grace and beauty to the surroundings of every home and increasing the value of every estate where they are planted.

The plates and drawing, showing these trees in their growing condition, can be seen and these trees secured on applying to

WHERE WAS THE ADVERTISEMENT?

Purchasers who read the Advertisements in our Columns, and make their purchases thereby, will do us a kindness by stating to those of whom they purchase, where they obtained the *information of their Wants.*

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, MAY 8, 1879.

THE CALIFORNIA FARMER READING ROOM, AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marsh Building—Up Stairs.

FARMERS HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of Interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, ONE DOLLAR for five lines or less of space in Nonpareil type, for one insertion, fifteen cents a line for any larger space. Each subsequent insertion ten cents. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates to Clubs or Societies.

PUBLISHERS CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair.

Home.—We feel assured our readers will find interest in our Poets' Column this week.

"Hope" teaches a beautiful lesson; "The Vacant Chair" will recall many recollections of home and loved ones.

"The Mother's Fool" will remind many readers of prominent citizens everywhere, who were like the mother's fool—yet won their way to a Senatorship and the Gubernatorial Chair by means of self-education—a lesson for all young men.

"God's Capable Woman." -In this interesting essay we have a noble sketch for all women to read, and all young women to study.

"Hearts Overworked" should be carefully read. "Bancroft's Historical Library" must be visited and remembered.

Other articles on "milk" "flour" and other items to be noted on Home page.

Horticulture.—The May Chapter from Vick's excellent Magazine will find many readers to approve—"Experience in Fruit Raising," "An Enemy among the Oranges," "Why Flowers turn to the Sun," are all good teachings.

Miscellany. — "Value of Foreign Coins," "Triplet Maxims," both contain valuable knowledge, and "Wealth of our Country" should be studied.

Agriculture.—"We give the 6th chapter in that most excellent story "How we saved the Old Farm," our farmers' growing sons should be sure to read the whole of this story, it is one of the best ever written on the subject of a well managed farm. (Back numbers of the story can be had at this Office).

"Capes in Chickens," a capital remedy.

Our Front Page.—"Our European Letter" we know will interest and instruct our readers of the progress of agriculture in France and its surroundings.

"Our Arizona Letter."—We give another letter from our esteemed Correspondent *Ajax*, his description of travel and the place will interest our readers in this new and to be "a wonderful Country."

"Our Washington Letter."—This gives us an interesting view of the state of politics at Washington, Congress, the "White House" and the President.

"San Diego."—We give another letter from our Correspondent at San Diego, showing the increasing interests of that fast growing section of our State.

Unanswered Letters.—We are constantly receiving letters of inquiry from numerous sources, asking us to furnish replies and statistics that would occupy pages, and these from strangers, on matters not of a public interest, but only their private business, and then not even a stamp for reply, of course our time will not allow us to comply, though kindly disposed—stamps for reply should always be sent.

Cut this Out and Save Life.

Who does not value life? and who would not give all their wealth to *preserve health?* for this is life?

What is life without good health? a heavy, weary load of pain and sorrow.

BLOOD IS LIFE!

And the best blood purifier in the world is "David Clarke's Australian Liver Pills," there are no pills manufactured that surpass them in excellence, and are so certain a remedy for all evils that affect the liver or taint the blood—buy only David Clarke's Great Remedials.

Bills Sent Out.

We would hope that those of our patrons to whom we have sent bills, will kindly remember that a good many *little sums from each* would be of great advantage in times when money is of value.

SEASON—PROSPECTS—CROPS.

Never ceasing are the many benefits that are sent to our farmers constantly of rains and sunshine, but how seldom do we hear farmers send forth praise for these blessings, but if a sharp frost comes and kills their potatoes and beans, then comes the complaints from all quarters.

It cannot be denied but that the present season has, thus far been generally a prosperous one—rains, dews and sunshine have come to our farmers in generous supply, and everywhere almost crops look well and promise well, there may be spots in some counties where farmers think their crops will be short by reason of a want of the usual needed supply, yet we feel that if a better system of culture had been given, or if some of the open plains now dry had been planted with trees, the rains would have been more readily attracted to these regions and better crops been secured.

There has been a great political strife over our farming districts that has taken up much time for the battle—if our farmers will but give an equal amount of time to study and learning the wants of the soil that they have given to the late and exciting contest—(a duty which was right for them to perform,) we think they would learn much that would benefit them greatly.

There has been some little frost nipping this week, of which we have spoken elsewhere, otherwise we hear no complaints.

The grain crop generally will be a large one, especially the barley crop.

We hear of insects, rust, etc., but this always happens, but when land is deeply and cleanly cultivated, and work timely, rightly and well done, insects and disease are not found any more than upon humans—which things will come when uncleanliness prevails.

The orchard and vineyard crops promise large yields—already strawberries and cherries are abundant, strawberries unusually low, 20 to 25 cents a drawer—also oranges $1 per 100 which gives a feast to all families and children now—being cheaper, and more healthy than pork, bacon, etc.

The wool clip will be a good one and quality good, with a prospect of a rise in value of wool ere long.

The hop interest is low, prices so low as to give a loss to the grower.

The wine crop this year will be large, and the quality better than before, each year we improve in quality of wines, so much so as to win high encomiums for our wines, and what is cheering and most of importance, large orders from New York and Louisville, and even in Europe for our wines.

In the last few months Messrs. Kohler & Frohling, G. Groninger, Landsberger & Co., Lachman & Co., and the De Turk and Searle wines are all largely ordered for export, this is good news for our wine interest.

Much attention is now given to the preserving of our fruits by the well known fruit packers, Sol'm Wagenheim & Co., Cutting Packing Co., C. J. King of Wm. & Co., and the San Jose Packing Company—these firms will pack hundreds of thousands of dollars value in fruits that otherwise would be lost.

Steadily, even in hard times as the cry is, these industries must go on.

JACK FROST.

Jack Frost has been nipping off the hopes of many growers of our early crops, there was something significant in the fact that last *Tuesday night* this cold-hearted wanderer took a widespread ramble, and cut down and bit off the early *potatoes, tomatoes, string beans*, and in some cases entered our vineyards and took a sly nip at the foliage of the grape vines—this midnight havoc occurred in San Joaquin, Yuba, Napa, Sonoma and Santa Clara Vallies, a wide sweep of travel for this night's work.

It is a little singular too that "Jack Frost" visited the very counties and did the most damage where the people have so largely voted *in favor* of the *new Constitution*.

If "coming events cast their shadows before"—then we may suppose this severe frost nip was a forerunner of the *cold snap* the people were to feel the next day; as the voters of these very districts gave a majority for the *new Constitution*.

We should most certainly say that "Jack Frost" and the ballotings were all a most *Unconstitutional* proceeding.

The Wine Interest of California.

The Wine interest of California is in danger of being very seriously injured if Congress should change the *Tariff on Wines* that is now sought to be effected by importers of Foreign wines, in the Eastern States and Europe.

Should the new tariff be carried, it would injure the wine interest of our State by millions of dollars, an earnest memorial protesting against a decrease of duties is before Congress in the hands of our Senators and Representatives, and we have faith to believe that by their efforts and labors in Congress they will defeat the measure, and thus save our vineyards from this great injury.

Australian Seeds.—We have received from the Acclimatization Society of New Zealand a very liberal collection of choice seeds, sent us through the office and courtesies of H. Craig, Esq, of the N. Z. Insurance Co., in this City, many, many thanks for the courtesy.

We also acknowledge a parcel valuable seeds from the Directory of the Royal Gardens, at Victoria.

We again return thanks to our esteemed friend Baron von Mueller, of Melbourne, for valuable Seeds.

Thanks to our kind friend G. S. W. for the delicious Strawberries sent us, and those promised also, we had a feast; and our mouths water for *those to come*.

Catalogues.—A mountain pile of new and handsome Catalogues of Nurserymen, Seedsmen and Manufactures, all waiting notice and notoriety send along your Advertisements, Gents, then you shall have *especial* attention and notice that shall pay you well.

THE FARMERS' BALLOTS.

The late election has done more to bring into notice our *farmers* and our *farmers' influence* than any event that has occurred since the *first* developments were made in agriculture in our State.

The *banker* the *merchant* and the *ship owner* and the *manufacturer* have thus far led the van in all our *political* movements, and thus far have controlled all the elections, placing in all the offices of power and trust the men of their choice, while the farmers and mechanics have generally stood back, rarely pressing forward their own views or claims, but willing to be *guided* or *led*, by the leaders among office holders, or those who aspired to office, and thus working for others and not for themselves.

The late election has brought our farmers to the front and shown their power and influence, and it is this power and influence that is destined to control our State hereafter, and if used by a wise intelligence and patriotic desire for the greatest good of the whole people, will result in untold prosperity to our State.

A very great good must result to the people of this City and to all the leading cities where the masses of our capitalists are centred, by showing them where the power lays for all the future.

No city can be really a prosperous one long unless it has a producing country and a working population around it outside to support it, this we think is the cause of the present apathy in the city of San Francisco, while Oakland, Stockton, San Jose and Sacramento feel the general stagnation in trade, they are all more active in business than this City, from the very fact of a large country near and around them, to give them daily business and build them up.

We believe it is now being well understood that San Francisco has had more than double the number of business places, stores, etc., than could be sustained, hence the great number of houses, stores and workshops now marked—To Let.

It is the country and the farming and producing people that build up and sustain cities, and without these, cities cannot prosper, and therefore our farming and producing classes must always be justly esteemed as the builders up of our cities, and their worth duly estimated.

Goldsmith speaks of the power and influence of the peasantry of the country and says:

> "Princes and lords may flourish or may fade;
> A breath can make them, as a breath has made,
> But a bold peasantry their country's pride
> When once destroyed, can never be supplied."

The mightiest minds of all ages, the greatest Statesmen of Europe and our own country have all declared the value of Agriculture to a nation, and the value of an *intelligent peasantry*, the very "Lords of the Soil."

The brightest minds of Europe in past and present times look to the peasantry as the source of prosperity always.

Sir John Sinclair the warm friend of Washington, and Washington himself, Clay, Jefferson, Jackson and a host like these, with the great Napoleon, all declare that Agriculture is the basis of a Nation's wealth, and, for all this great work

THE PLOUGH

Is the emblem, the shield and the weapon that makes a Nation prosperous.

THE NEW CONSTITUTION.

By the vote of the people at the "ballot box," that arbiter of a "people's will," the "new Constitution" has been adopted by some 8,000 or 9,000 votes. We are glad the majority is large enough to prevent any quibbling about it, and now let our citizens quietly and cheerfully abide this decision of the "ballot box," and go to work manfully to clear the battle field, gather up the slain and mortally wounded, clear the wreck of battle and bring back order out of chaos, and restore as far as is possible the consequences of the fierce warfare that has been so long and so bitterly waged.

We believed the "old Constitution" was good enough, and believe so still, we advocated the plan of having our *Legislature* make all needed alteration and changes in the Constitution, as the proper place for such work—and it will be found that after all the cost of the *Constitutional Convention* and of the *election* just held, that the great work will now have to be done by the next Legislature, for it will be found, and it is so announced by the very friends and advocates of the *new Constitution* that it is *not self-acting*, that most of the sections and the principal and important portions of this great work will have to be referred to the Legislature in order to make the work legal and set the machinery in motion.

This will be strange news to those who have been shouting *victory! victory!* when they find that the work is *not completed*—and that finally it depends upon the very men yet to be elected to the *next Legislature* to make the *new Constitution* what its friends want and what they have been battling for.

> What constitutes a State?
> Not high-raised battlement or labored mound,
> Thick wall or moated gate;
> Not cities proud with spires and turrets crowned.
> Not bays and broad armed ports
> Where laughing at the storm rich navies ride;
> Not starred and spangled courts,
> Where low-browed baseness waits perfume to pride.
> No; men, high-minded men.
>
> Men who their duties know
> But know their rights, and, knowing, dare maintain.
> Prevent the long-aimed blow,
> And crush the tyrant while they rend the chain!

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, can find a "List of Duties" of each district at the Office and Reading Room of the California Farmer, 320 Clay Street, San Francisco.

Home Correspondence.

A FLYING TRIP TO ARIZONA.

Leaving San Francisco one afternoon by the 4 o'clock boat, via Oakland, hence by rail to Lathrop, we were soon hurrying over the country bound for Arizona. Rain had been falling in copious showers, and the hills and vallies were covered with verdure, promising well for an abundant harvest—at the various stations we were gratified to hear the farmers speak encouragingly of growing crops and prospects for a prosperous year.

Retiring early we were soon in the arms of the fickle God, lulled to sleep by the clatter of wheels and the shake-up motion of the flying train.

Daylight saw us up, and we were amply repaid for our early rising by the fine view of the mountains as we crept up from the valley and neared the loop, that wonder of engineers' skill. The river from this point is grand, not like that on the Sierra's, but on a milder, gentler scale, yet noticeably grand, as it comes on us so suddenly, valley one moment, the next rugged mountains. We are soon over the summit, and our speed increases as we go flying down the grade toward Mohave desert.

At Mohave we breakfast, across the desert, up over the San Fernando Mountains, through the great tunnel, and were at Los Angeles.

We dine, lay in a supply of oranges at prices in excess of San Francisco's, and after adding to our train several cars loaded with rails and ties, soon leave the orange and lemon groves far behind.

For the first few hours the scene is delightful, fine fields, orchards, and vineyards, verdure and cultivation everywhere, but as night approaches signs of civilization disappear, and dreary wastes, trackless deserts reach out on every side, as if to draw the barren mountains within their grasp.

At seven the next morning we were at Yuma, which has so often been described that I will only mention its principal features—Uncle Sam has a post here, and considerable business is done in the adobe town, Yuma is beside noted for its extreme warm weather and bare legged Indians, the latter seem to flourish in an army ulster in summer and a breech clout in winter.

Leaving Yuma the road follows the old stage road down the Gila River, passing through a much more interesting country, interesting on account of its being different from any ever seen before. Long stretches of desert, with here and there a stray mountain, seeming to say, what am I here for?

Late in the afternoon we reached Gila Bend, the present terminus of the road.

They were moving the town when we arrived, having moved that day from Staverix, the last terminus. After some skirmishing we found seats at the thirteenth table at one of the best hotels, where we regaled ourselves on the choicest luxuries the market afforded, as there may not be enough to go around, the hotel and market had better divide this compliment between them.

We waded about through the dust, saw all the attractions of the town, returned to the stage office, and took our seats on the coach. The driver we immediately made our friend, and as we journeyed on through the long watches of the night, time flew, as with song and story we whiled away the hours. The singing was particularly agreeable to the inside passengers who had not slept, but might.

At Maricopa we are to breakfast, but ye Gods what a breakfast. Oh, for words to write of this most detestable repast, no language could convey the faintest outline of a shadow or the idea intended. Traveler, avoid it, go around it as you would a thing "as to be hated needs but to be seen."

With a new driver, and horses changed for mules, we got away from Maricopa Wells, with a prayer that we might never look upon its like again.

The Railroad Company will have their new town established soon, and this imposition can be avoided.

I cannot say that a mule team is what it is cracked up to be, although our driver cracked his up considerably with his whip, and kept them trotting like coyotes.

As we neared the Pima villages we saw signs of vegetation, evidence of the thrift and industry of the Pima Indians. Their little farms looked quite promising, the irrigating system having made "the desert to blossom like the rose." A scheme at present under consideration to remove them from their reservation would work a great hardship and would indeed be cruel; the scheme has the impress of Job on its face.

To the right of the road after leaving the Pima Agency is Casa Grande, one of the most interesting ruins in all Arizona, unravelled mystery lurks about it crumbling walls. The oldest inhabitants can give no account of its origin, or the intentions of its builders. Broken pottery, much of it well preserved, covers the ground, but no trace of anything by which can be learned its age, or condition of those who in ages past constructed it. Many theories have been advanced, but nothing tangible or reliable.

At Florence, an adobe town of 500 souls, we had supper, a change of driver and horses, and another night on the road is before us.

As we dash out on the open plain, Picacho Peak, a noble landmark looms up before us, its rugged edges outlined through the moonlight, presenting a weird, wild picture. At daylight we breakfast at Desert Station, and with a fresh relay of horses are off for Tucson, which after a drive of seven hours we reach at noon.

The country through which we have passed seems to have all the requirements for agricultural land, and with irrigation could be made to grow anything, but the absence of water in the vallies—but fine streams or even springs in the mountains makes the sinking of wells absolutely necessary in order to make these lands available, I see no reason why water could not be obtained in this way.

Tucson contains some seven thousand people, and is one of the busiest, liveliest towns I have seen for sometime—everybody seems to be busy, stores and buildings all occupied, old houses being repaired, and new ones building all over the city. Labor is performed principally by the Pafagua Indians and Mexicans, who are familiar with the manufacture of adobes, of which the city is built. The people are enthusiastic over the idea of having a railroad, and predict wonders for Tucson in the future. The price of board and rooms are reasonable, which compare favorably with any outside of San Francisco.

Water is abundant, and is sold from carts—a scheme to supply the city with artesian well water is under consideration, and will be probably in operation before another year.

Taking a private conveyance we drove south seventy-five miles to the Tombstone Mining District, passing Cienga Station, twenty-five miles from Tucson. This station and the country around it was the stamping ground of the Apache and the graves of twenty-five victims tell the story of murder and pillage. The station is kept by mine host Dunbar, who does everything for the comfort of travelers, clean beds, good fare and warm fires, and one never regrets having spent the night at Loicing's Station.

The Tombstone Mining District promises great things, and the work at present done has developed immense surface deposits, which have the appearance of permanent ledges as they go down on them. Considerable prospecting has been done, enough to determine the value of certain properties, notably the Contention, Head Centre, Lucky Cuss, Tough Nut, Empire, and others. The number of men employed is small, hence the business of the towns, of which there are three, is limited.

There is water sufficient for all milling purposes and wood in abundance, only sixteen miles away.

Bidding adieu to Tombstone, we turned our faces homeward, and after three days staging, and two days on the railroad, we arrived in San Francisco much pleased with our flying trip.

Ajax.

KENNEDY'S NEW SHEEP DIP.

Denver, Colorado.

S. H. Kennedy—*Dear Sir:*

Please send me three cases 30 one gallon cans, Non-Poisonous Dip, and three cans 6, five gallons of same. I believe you have struck the dip now on which I will eventually succeed in making big sales, it works to perfection so far, and all those that have used it are much pleased with its operation—will send you more testimonials soon.

I have no fear but your Dip will come out on the top eventually, of all dips. Yours truly,

Geo. Ruble.

Geo. Ruble, wholesale dealer in Saddlery, Leather, Wool and Hides.

AUSTRALIA.

AGRICULTURAL NEWSPAPERS.

Editors, strangers and citizens from the Eastern, the Middle, or Southern States, also Editors over our own Coast who may desire to see or refer to their own Journals, or any Agricultural or Horticultural Journals, will always find them on file in the Farmer Reading Room, to which they are always bid welcome.

One Hundred of the leading Journals and Magazines of this class, the best in the United States, are in this collection, giving to those in search of Agricultural knowledge the best Information on this Coast.

A Large Library also, for *General Reference*.

Australia and California

We have full files of Australian Papers from all parts of Australia, showing the great interest they take in this Country, one thing of great moment, is the "Steamship Line," it is of vital importance to the welfare of the Colonies, and so vastly important to the Pacific Coast in the great trade that can be built up between the Colonies and California, if our Merchants do their duty.

These Journals are arranged on file for the convenience of all who may desire to peruse them. We have as follows:—

The Sydney Morning Herald, Sydney.
" *Town and Country*, Sporting Paper, Sydney
" *Australasian*, Melbourne.
" *Weekly Times*, "
" *Adelaide Observer*, Adelaide.
" *Queenslander*, Brisbane, Queensland.
" *Week*, " "
" *Capricornian*, Rockhampton, Queensland.
" *Port Dennison Times*, Port Dennison.
" *Wide Bay and Burnett News*, Queensland.
" *Darling Downs Gazette*, Toowoomba, "

Many of these Journals are of the largest size, from 20 to 38 pages, several, splendidly illustrated with views of the Public Buildings, Landscapes, Public Men, Stock, etc.

CONTRIBUTIONS FROM QUEENSLAND.

We Invite all our readers and our citizens especially who are interested in our Manufactures and the Mechanic Arts, and our Agriculture, to visit the Farmer Office and see the Rich Products brought from Queensland by the Commissioner, which are now on Exhibition open to all, in the Reading Room and Museum of the California Farmer Office.

Extract from a Liverpool Letter.

One of the large packing firms at Cleveland, in connection with forwarding packing returns, kindly furnishes the following extract from a Liverpool letter, under a recent date, in regard to the provision market: "There is no accumulation of stocks here. Stuff so far continues to sell about as fast as landed. Prices a shade weaker; however, we cannot go much, if any, lower, and plenty room for an advance. The country buyers are full of stock, and it is natural to conclude there is a very large consumption going on at these low prices, and must continue."

FURST & BRADLEY'S SELF-DUMP SULKY RAKE.

The Attention of Farmers is called to the merits of this Rake, and its great superiority over all Self-Dump Rakes heretofore brought to the notice of the public. The Dumping is done by friction bands around the ends of the hubs giving full control of the Rake to the operator, so as to be able to carry the teeth clear of the windrow. This does away the necessity of ratchets and pawls which is so objectionable in all other Self-Dump Rakes. The teeth are of the BEST CAST STEEL and have a double coil which renders them capable of the most severe work.

SEND FOR OUR NEW ILLUSTRATED CIRCULAR TO

GEO. A. DAVIS, Agent,

327 MARKET STREET, - - - SAN FRANCISCO.

SAN FRANCISCO CORDAGE CO.

ESTABLISHED 1856.

GRAND TRIUMPH FOR EUCALYPTUS.

EUCALYPTUS WILL CONQUER DISEASE.

We publish the following strong TESTIMONIAL in favor of the GRAND REMEDIAL POWER of the Eucalpytus, prepared by DAVID CLARKE, CHEMIST, of Australia.

This Testimonial comes from a prominent Merchant of this City, whose name is with us for reference for all who suffer and would be relieved.

SAN FRANCISCO, April 7, 1879.

EDITOR CALIFORNIA FARMER—*Dear Sir*

Some time ago I had the misfortune to sustain a dislocation of the shoulder received from a fall, and while I was suffering the most acute pain as the effect of it, so much so as to be deprived of my sleep nights, I met my old friend, Col. Warren, who presented me with a bottle of "Eucalyptus Oil" saying as he did so, "try it." "bathe the shoulder and arm well, and on retiring saturate a cloth with the oil, and bind it to your shoulder, and you will have no more sleepless nights on account of pain from that." I followed the Colonel's directions, and must say that the Eucalyptus Oil will do all that is claimed for it as an alleviator of pain (rheumatic and otherwise) and more too.

A preparation made from the Eucalyptus Tree, by frequent ablutions of the eyes will restore weak eyes to strong ones and positively restore the sight as good as ever to people whose eyes are failing, if they will keep their body in good condition by the use of Eucalyptus Pills—while using the eye wash. Yours truly, G. H. B.

N. B.—There are many compounds made in this State, yet however good, the *genuine* Remedials are those prepared by David Clarke, Warwick, Australia, for sale by Warren & Co., Agents.

LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury* or other *Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed good *health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON

LONDON BOARDING HOUSE, ALBION STREET, WARWICK, September 23, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed) JOHN GREEN, Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus.

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it, but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK, Commissioner Yosemite Valley.

A highly valuable testimonial has been received at the Agency, which we have been kindly permitted to use, and, coming from so high a source, we feel it a duty we owe to the public to give it the following letter:

SANTA CLARA, SANTA CLARA COLLEGE.

COL. WARREN—*Dear Sir*

Heretofore we have had no occasion of trying the Eucalyptus Medicines, in Pills or Liquids, but we have commenced to use them, and we find them very beneficial; some of our Fathers find a great relief in their complaints; the consequence is that we want more Medicine, and we ask you to send us One Dozen Bottles of the Liquid, and One Dozen Boxes Pills, and Half Dozen large Boxes, and I shall send you the results. Please send bill. With best wishes for your welfare. Yours respectfully,

A. CICHI, S. J.

At later date we received the following, another proof of the virtue of this Medicine:

The Pills we find to be a mild and beneficial cathartic. The Liquid Extract is a valuable Blood Purifier and a good appetizer. A. CICHI, S. J.

The above from Prof. Cichi, the well known and truly distinguished Chemist of Santa Clara College, we esteem an approval of so much value, that all who suffer from any of the above diseases, can be assured of the high merit of the Eucalyptus as a Remedial.

We have the names of *scores* of well-known citizens at our office, from all over the State, who have been relieved and cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you David Clarke's Australian Pills—the only genuine.

Home! It should be Heaven on Earth

HOPE.

No more beautiful lesson has been taught by a modern poet than in these stanzas by Whittier. Adam and Eve, exiled from the Garden, had sat down disconsolately, on the outer side of the wall of Paradise, and there an Angel found them bewailing their fate. Thereupon the radiant presence spoke:

"Arise," he said, "why look behind,
When hope is all before,
Patient hand and willing mind
Your loss may yet restore?

"I leave you with a spell whose power
Can make the desert glad,
And call around you fruit and flower
As fair as Eden had.

"I clothe your hands with power to lift
The curse from off your soil;
Your very doom shall seem a gift,
Your loss a gain through toil.

"Go, cheerful as you humming bees,
To labor as to play,"
While gleaming over Eden's trees
The Angel passed away

The pilgrims of the world went forth
Obedient to the word,
And found where'er they tilled the earth,
A garden of the Lord.

Once more, O, white-winged Angel stand,
Where man still pines and grieves
And lead through toil to Eden land,
New Adams and new Eves!

THE VACANT CHAIR.

BY WINNIE WILLIS.

Nay, chide not my tears which are falling so fast,
My spirit must bend lest it break to the blast;
For a shadow has fallen upon our hearth,
And hushed the voices of music and mirth,
Oh, then, chide me not in my deep despair—
By our hearthstone stands a "vacant chair!"

The spring is here with its birds and flowers,
But sad to me are its soft sunny hours;
Ye may not know the grief we have felt,
Unless by a brother's grave ye have knelt—
Unless ye have mourned for the young and fair,
Who have left by your hearthstone a "vacant chair!"

My father is treading the down-hill of years,
And soon he'll be leaving this dark vale of tears;
Oh, gladly to hope we'd his spirit beguile,
But we know when he smiles it's a sorrowful smile,
For the grief of his soul to our hearts is laid bare,
As sadly he looks on that "vacant chair!"

My mother's dark hair is silvering with gray,
And her step grows heavier day by day;
Oft' tear stains rest on her thin pale cheek,
Which tell the anguish she cares not to speak.
Oh, mournful the shade that her face doth wear,
As her mild eyes rest on that "vacant chair!"

And often my sorrowing heart is pressed
To a brother's fond and faithful breast,
While he gently strives to soothe my grief,
And tells me that "Heaven can give relief!"
But I know his own woe is all he can bear
As he silently looks on that "vacant chair!"

When the curtain of twilight is down over the skies,
And the stars look down with their angel eyes,
We sisters oft' gather—a loving band—
And speak of one in the spirit land.
But, alas! our gaze is resting there,
Through fast falling tears on that "vacant chair!"

Alas, alas, for the shadows which fall
'Like on peasant's cot and on prince's hall!
Alas for the hearts which are yearning to gaze
On the loved and the lost of earlier days!
Heaven alone can help those their grief to bear,
By whose hearthstone stands a "vacant chair!"

"MOTHER'S FOOL."

"'Tis plain to me," said the farmer's wife,
"These boys will make their mark in life;
They never were made to handle a hoe,
And at once to college they ought to go.
Yes, John and Henry, 'tis clear to me,
Great men in this world are sure to be;
But Tom, he's little above a fool—
So John and Harry must go to school."

"Now, really, wife," quoth farmer Brown,
As he set his mug of cider down,
"Tom does more work in a day for me
Than both of his brothers do in three.
Book learnin' will never plant beans or corn,
Nor hoe potatoes, sure as you're born—
Nor mend a rood of broken fence;
For my part give me common sense."

But his wife the roost was bound to rule,
And so "the boys" were sent to school;
While Tom, of course, was left behind,
For his mother said he had no mind.

Five years at school the students spent,
Then each one into business went.
John learned to play the flute and fiddle,
And parted his hair (of course) in the middle;
Though his brother looked rather higher than he
And hung out his shingle—"H. Brown, M. D."
Meanwhile, at home, their brother Tom
Had taken a notion in his head,
Though he said not a word, but trimmed his trees,
And hoed his corn and sowed his peas,
But somehow, either by "hook or crook,"
He managed to read full many a book.
Well, the war broke out, and "Captain Tom"
To battle a hundred soldiers led,
And when the enemy's flag went down,
Came marching home as "General Brown."

But he went to work on the farm again,
Planted his corn and sowed his grain,
Repaired the house and broken fence,
And people said he had "common sense."
Now, common sense was rather rare,
And the State House needed a portion there,
So our "family dunce" moved into town,
And people called him "Governor Brown,"
And his brothers that went to the city school,
Came home to live with "mother's fool."

—*Christian at Work.*

WARD'S FERTILIZERS.—These very superior kinds of *Fertilizers* and also *Insect destroyers* should be universally used upon plants and flower

GOD'S CAPABLE WOMAN.

"The heart of her husband doth safely trust in her."

Not many nights since, a ministerial hand of no mean power, drew aside the curtain of darkness which hangs between the sides of a two-fold city life.

The curtain swings back slowly and heavily. Stretched on the grand panorama of stern reality are the bright and dark scenes—the one solemnly, reluctantly passing from view; the other stealthily coming in. The distant stars send their cold and pitiless rays upon the night side of our city life—the lights of earth gleam brilliantly through crystal panes, and struggling feebly through heavy screens. The dance of death whirls past; we shrink within ourselves as the traps for men, disguised and undisguised, open and shut, and our souls cry out for the weak and fallen, when the battle for bread begins. The watches of the night come and go. In yon whited sepulchre we hear the click of ivory balls, the rattling of glass, the ring of gold, and jeers of profanity. But we not only hear—we see the flush of youth upon boyish cheeks; the erect head and strong arm, but somewhat depressed air of man in his prime, the furrowed brow and gray hair of age. We see cheeks now crimson, now ashen—eyes glowing with animation and exultation over booty won, now with phrensy and desperation at its loss. Still the click of the balls goes on, the drink of death passes around, and the clash and ring resound upon the air.

Here are the fathers of our glorious America's children, here the sinews of her physical, political and spiritual strength, here the hope of her immortality! The cold, dark waters of the Styx lap the sands at their feet, and the Furies dance above their heads. Oh, America! land of the true and good, hast thou come to this? Must thy pure soil of liberty be thrown open as the common burial ground for the leprous bodies of slaves to sin.

Is there no cause for this evil that stalks through our land, making men sell their souls for gold? By laws unchangeable, however baneful the effect, it must have an adequate cause. For all evil there is a remedy. The clerical hand which tore the curtain aside may now loose its grap, if it will. We have seen enough of the awful effects; we would search for the causes, and leaving this loathsome place, let us turn our footsteps home. Home? Those behind that screen have homes, too, or they once had; may not one of the causes lurk in the corners of these homes? A wife drives her husband, and a mother her son, to such a place? I am on sacred ground, and I know it—ground, it may be, holy with the prayers, and damp with the mingled tears of mother and wife. I know, too, that it is hard to find stepping stones on this ground without bruising a heart that is already bleeding and torn. Is it not cruel to go to the pale-faced, sad-eyed wife whose husband, a money-making man, cares nought for his home or her, and spends his nights she knows not where, and thunder in her ears: "Thou art the cause of this thing!"

We would not ruthlessly rend the veil which hides the privacy of home life—its joys, its sorrows, its skeletons, from the gaze of the world outside; still, going back to the nature of things, we must feel it true, that if here is the molding and ruling hand, and if she were God's Capable Woman, men would be in the highest sense God's Capable Men. If inspiration adds any thing to reason, we may bring to our aid the first attribute in the description of the virtuous woman: "The heart of her husband doth safely trust in her, so that he shall have no need of spoil." We have not a Deborah, calling the hosts of Israel to battle, or a Queen of Sheba, arrayed in her wealth and power, for our ideal—but a woman in her home, and the "heart of her husband doth safely trust in her." Is it something remarkable for a man to trust in his wife, that the inspired writer placed it first? You know a little better than others whether the man who calls you wife trusts in you—whether he prefers the pleasant quiet of your home to the enchantment of the traps for men, or your society to that of the lepers in high life behind the curtain. We might, in a general way, look at some of the causes, if these things are so, laying it down as a truth, that if a man really trusts in his wife he will prefer his home to all the enticements of vice and sin without. A man can not, in the highest sense of the word, trust in the woman whom he knows to be inferior intellectually. Many a good, true heart aches sorely in its loneliness, because, fascinated by the talents of some professional man, it has united its destiny with his, and finds when too late that it has but little fellowship with his pursuits. He may, like a true man, be very tender toward her, or he may go out in the shades of night to find what he seeks for in vain at home. A man may think he is justifiable in searching the paths of sin for gain, when all he can accumulate by honest labor is wasted by his wife. The love of property is innate, and a man can not safely trust in a woman who is forever taking from, and never adding to the little he may gather. A man can not trust in a woman he can not respect, and he can not respect a woman, even though his wife, who is careless in her house, the care of her children, her dress, and her conversation.

Women, true and noble by nature, do not realize the necessity for constant watchfulness, until too late. The sin lies at some door—may not each mother, each wife ask; "Lord, is it mine?" To consummate this evil, Satan and his legions have centered all their skill; to counteract it, more than they who are against it is God, the hosts of Heaven, and every true man and woman. The threads of sin—silken, golden hued, bind a man with a web he can not break; but the gentle hand of a wise woman can weave, with stronger woof, a garment unsullied by sin, unspotted from the world, binding her husband to herself, so that his heart can "safely trust in her," and her children to their home, so that they shall "rise up and call her blessed."—LULU BOWEN, in *Woman Work.*

A New Jersey firm advertise "single and married bedsteads." That will do.

HEARTS OVERWORKED.

No organ in the body is so liable to be overworked as the heart. When every other part of the body sleeps, it keeps on its perpetual motion. Every increased effort or action demands from the heart more force. A man runs to catch a train, and his heart beats audibly. He drinks wine, and the blood rushes through its reservoir faster than ever was intended by nature. His pulse rises after each course at dinner. A telegram arrives, and his heart knocks at his side. And, when any one of these "excitements" is over, he is conscious of a corresponding depression—a sinking or emptiness as it is called. The healthy action of all the members of our frame depends upon the supply of blood received from the central fountain. When the heart's action is arrested, the stomach, which requires from it a large supply of blood, becomes enfeebled. The brain, also waiting for the blood, is inactive. The heart is a very willing member, but if it be made to fetch and carry incessantly—if it be "put upon," as the unselfish member of a family often is—it undergoes a disorganization which is equivalent to its rupture. And this disorganization begins too often nowadays in the hearts of very young children. Parents know that if their sons are to succeed at any of these competitive examinations which have now become so exigent high pressure is employed. Hence young persons are stimulated to overwork by rewards and punishments. The sight of a clever boy who is being trained for competition is truly a sad one. The precocious coached-up children are never well. Their mental excitement keeps up a flush which, like the excitement caused by strong drink in older children, looks like health, but has no relation to it; in a word, the intemperance of education is overstraining and breaking their young hearts. If in the school-room some hearts are broken from mental strain, in the play-ground and in the gymnasium others succumb to physical strain. "It is no object of mine," says Dr. Richardson, "to underrate the advantages of physical exercise for the young; but I can scarcely overrate the danger of those fierce competitive exercises which the world in general seems determined to applaud. I had the opportunity once in my life of living near a rower. He was a patient of mine, suffering from the very form of induced heart disease of which I am now speaking, and he gave me ample means of studying the conditions of many of those whom he trained both for running and rowing. I found occasion, certainly, to admire the physique to which his trained men were brought; the strength of muscle they attained; the force of their heart; but the admiration was qualified by the stern fact of the results." But, indeed, it is not by overwork so much as by worry and anxiety that our hearts are disorganized. "Laborious mental exercise is healthy, unless it be made anxious by necessary or unnecessary difficulties. Regular mental labor is best carried on by introducing into it some variety." Business and professional men wear out their hearts by acquiring habits of express-train haste, which a little attention to method would render unnecessary.—*Chambers' Journal.*

Effect of Cold on Milk.

The effects of a low temperature on milk have been carefully examined by M. Eug. Tisserand, who recently communicated his observations to the Academie des Sciences. He found that if cows' milk is, immediately or soon after being drawn, placed in vessels at various temperatures between freezing point and 90 deg. F., and the initial temperature is maintained for twenty-four or thirty-six hours, it will be found that the nearer the temperature of the milk is to freezing point the more rapid is the collection of cream, the more considerable is the quantity of cream, the amount of butter is greater, and the skimmed milk, the butter, and the cheese are of better quality. These facts, he believes, may be explained by Pasteur's observations on ferments, and their effects on the media in which they live. It is probable that the refrigeration arrests the evolution of the living organisms which set up fermentation, and hinders the changes which are due to their growth. The facts stated indicate room for great improvement in the methods of storage and preservation of milk. To keep milk at its original quality, extreme cleanliness and a low temperature are absolutely necessary. In the North of Europe, Denmark, etc., the value of cold is already recognized, and in warmer climates the need for its assistance is greater. There is nothing impracticable in the suggestion, since running streams can be used to aid refrigeration. Where the quality of the milk is of greater importance ice may be employed.—*Lancet.*

Compressed Flour.

Some time ago a Frenchman tried what effect compressing flour would have on the quality. Flour was subjected to a hydraulic pressure of 260 tons, and reduced more than 24 per cent in volume. It was found that the compression had not injured the flour in any respect, and accordingly it was placed in zinc boxes and sealed up. At the same time other flour manufactured from the same wheat, but not compressed, was also sealed up. After an interval of three months, and again, after the lapse of a year, the two kinds of flour were examined and made into bread. The compressed flour was declared in both instances to be the better of the two. The loose flour that had been sealed up for a year showed signs of mould, while the compressed flour was perfectly sweet.

A NEW ART INDUSTRY FOR LADIES.—Amongst the latest novelties in fashion are buttons made of the red Watcombe Terra Cotta, adorned with paintings of favorite views in England, Scotland, and Ireland. They are about the size of a half crown, and the views are painted by an Irish lady.

[Have we not artists in California that will give us views of California etched upon our beautiful native wood.—ED. F.]

BANCROFT'S HISTORICAL LIBRARY.

How few of our citizens are aware of the great Treasure House in History that has been prepared by that true Historian of our Coast, H. H. Bancroft, Esq.

At his Library Rooms on Market street over the Bookstore of A. L. Bancroft & Co., in spacious Rooms can be seen a library of more than 20,000 Volumes; and Newspapers, Magazines, etc., of 200,000 more, and in this vast amount of Literary, Biographical and Historical works can be found a mass of records of the early history of the Pacific Coast, gathered by the indefatigable energy of Mr. Bancroft, and at a very heavy cost, a collection too, which cannot be found in any other Library in the world.

Mr. Bancroft has already issued 5 large Volumes of the *Native Races of the Pacific States*, these Volumes contain invaluable records which it has required years to collect, and so great has been the interest to secure these Volumes that all the leading Libraries of our State and Coast and the other States and European Libraries have obtained them as the most reliable records, known of the Pacific States.

Mr. Bancroft has now in his employ many copyists and aids in his works upon History, which will be unsurpassed by any other work published.

We cannot conceive a greater treasure to a Californian than *Bancroft's History of the Pacific States*, every public Library and our School Libraries, should all have these great Historical Records.

We design at early day to speak in detail of his great enterprise, and the great good he is doing to the world in collecting so great an amount of historical records and publishing them, indeed as we can say *pro bono publico*, for Mr. Bancroft has expended a fortune in his researches and labors.

When we were kindly shown through this "Hall of Records" we could not but hope that ere long these Treasures would be placed in a spacious building, independent of all others, a splendid building worthy of such treasures, and over the portals we would have inscribed in justice to Mr. Bancroft.

BANCROFT'S HISTORICAL LIBRARY.

A Donner Monument.

Jos. Marzen, Sr., owns the beautiful and valuable Donner Meadows. Mr. Marzen offers, if it can be shown that either of the Donner party were located on land belonging to him, to erect, at his own expense, a suitable monument in commemoration of the sad tragedy. As soon as the snow disappears, a party of Truckeeites propose visiting the meadows and definitely locating the cabins. W. G. Murphy, of Marysville, has long contemplated a monument for the cabin in which his family lived, and where his mother perished. The large rock by the side of this cabin has a perpendicular face, which could easily be smoothed down, and with suitable engraving would make a beautiful memorial, which would be strikingly appropriate. W. C. Graves, of Calistoga, is quite familiar with the locations of the cabins, and perhaps can be induced to visit Truckee and assist in selecting the spot best adapted for the erection of the Donner monument.

[The *Truckee Republican* calls for information as to locality of the Donner party; we visited Donner Lake a few years ago, and found the very tree under which the Donner party ate the last meal at the lake, we also hold now a piece of the very tree with initials out in the wood and snow shoes, such as were worn by the party, these are at the FARMER office.—ED. F.]

Fine Arts in Peru.

A recent act of the Administration in Peru has been the issuing of a decree ordering the foundation of a Fine Arts Institution, for the teaching of painting, sculpture, music, declamation and architecture. The purpose of the Government in creating an institution of this kind is to offer a new field to young men, who will thus have the opportunity afforded them of acquiring such knowledge as may open to them a new career.—This measure has met with general favor, and if properly carried out, is expected to prove of great benefit in the work of social improvement in the country.

GOOD NEWS.—American girls are adopting the sensible fashions of English girls at watering places. They no longer wear long trailing morning dresses, which are too delicate for anything but piazza promenades. They don the short oheviot suits, or flannel serge yachting suits, and are ready for archery, tennis, croquet, or a mountain walk. By the sea-shore, when storm signals are out, they have a tweed ulster, a tweed derby, thick boots and a short dress, and defy the weather. Simplicity in dress is considered a mark of good taste.

The municipalities of Prague, Leipzic, Weimer and other foreign cities, have forbidden the wearing of dresses with trains upon the streets, "because of the dust, injurious to the public health, raised by them." What a dust the woman of Boston would raise if the city daddies should issue a similar order.—*Ex.*

Each Number contains THIRTY-TWO PAGES of reading, many fine Wood Cut Illustrations, and one COLORED PLATE. A beautiful Garden Magazine, printed on elegant paper, and full of information. In English and German. Price, $1.25 a year; Five copies $5.00.

Vick's Flower and Vegetable Garden, 50 cents in paper covers; in elegant cloth covers $1.00.

Vick's Catalogue,—300 Illustrations, only 2 cents.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own home.

PATTI. I have used the Pianos of every celebrated make, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEBER. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturer of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

$350.00.

Sweden—crown, gold, 26.8 cents.
Switzerland—franc, gold and silver, 19.3 cents.
Tripoli—mahub of 20 piasters, silver, 64.4 cents.
Turkey—piaster, gold, 4.3 cents.
U. S. of Columbia—peso, silver, 93.5 cents.

The above rates will be taken in estimating the values of all foreign merchandise made out in any of said currencies, exported on or after January 1, 1879.

TRIPLET MAXIMS.

Three things to love—courage, gentleness and affection.

Three things to admire—intellect, dignity, and gracefulness.

Three things to hate—cruelty, arrogance, and ingratitude.

Three things to delight in—beauty, frankness, and freedom.

Three things to wish for—health, friends, and a contented spirit.

Three things to like—cordiality, good honor, and cheerfulness.

Three things to avoid—idleness, loquacity, and flippant jesting.

Three things to cultivate—good books, good friends, and good humor.

Three things to contend for—honor, country, and friends.

Three things to teach—truth, industry, and contentment.

Three things to govern—temper, tongue, and conduct.

Three things to cherish—virtue, goodness, and wisdom.

Three things to do—think, live, act.

[EDITORIAL.]

WEALTH OF OUR COUNTRY.

The rapid accumulation of gold in the Treasury of the United States now estimated at $400,000,000 with the steady and immense sales of the 4 per cent U. S. Bonds is a clear proof of the rapidly increasing wealth of our Country, in spite of all the cry of "stagnation of trade" "hard times" bankruptcies, etc.

The great facts before us that our *Exports* were *Three Hundred Millions of Dollars* more than our *Imports* for 1878, and the almost certainty of their being much larger in 1879, shows the sources whence comes the gold that purchases the U. S. Bonds, which formerly was sent to Europe for sale.

This vast increase as is shown in two years of over *Six Hundred Millions of Dollars* to our National wealth, is rapidly being felt in the reduced rates of interest, which will soon be shown by an increased desire for investments that will pay more than 4 per cent. This it is hoped will lead our capitalists to turn their attention to our manufacturing interests, ship building, mechanical inventions, Railroads and other internal improvements, for the now very rapidly increasing wealth of the country must be employed, and so great is it that all the Bonds that the United States can offer will be taken, and even then, millions will be left seeking other investments.

A little reflection will readily prove this; the next *three years* our *Exports* will exceed our *Imports* by more than *One Thousand Millions of Dollars*, and the greater portion of this will seek investment, and this is *independent* of the other increase of wealth and increase of capital in our country by manufactures, trade, commerce and home prosperity, therefore we can safely say that the people of England and France purchase and hold all the "Consols" of their own countries, so the people of the United States will soon hold and control in our own country all the "Bonds of the United States" as the safest, best and most certain investment of capital that can be made—and we venture the assertion that within ten years, and even less, *United States Bonds* will command a higher premium than any other Bonds in the world.

Black Ink.

Aleppo galls, one pound; logwood, copperas and gum arabic, half a pound each; water, three gallons. Boil all in the water an hour then strain.

Best Fruit Dryer in the World.

HAMPTON & KELLY

—AND—

KELLY & COLE'S

FRUIT DRYER.

THIS MACHINE DRIES BY STEAM HEAT AND DOES not burn the fruit. It is very economical in its working machinery, and so perfectly simple that every family can use it in their homes; it is also perfectly safe.

In connection with this machine is an admirable GRINDER capable of grinding one bushel of fruit per minute.

The capacity of drying of the SINGLE DRYERS are from 20 to 30 bushels in 10 hours for each machine. Large machines will dry from 50 to 100 bushels in 10 hours.

Orders for these machines, for the present should be sent to Messrs. Kelly & Cole, First and Salmon Streets, Portland, Oregon.

A manufactory of these Dryers will soon be established here, and will be under the superintendance and management of **ALFRED B. COLLVER**, who is the General and Traveling Agent of all these Inventions.

Mr. Collver will have his office in this City a early day—all letters for him can be addressed through the Express or Postoffice to the undersigned, and they will have prompt attention.

ALFRED B. COLLVER.

N B—Letters can be directed to me care of EDITOR FARMER, to whom we are permitted to refer for the excellent quality of our Fruit Dryer. A. B. C.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade-Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscriptions $3.20 a year, postpaid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (Munn & Co.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make no *charge.*

We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses in all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to

List of Australian Duties.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, can find a "List of Duties" of each district at the Office and Reading Room of the CALIFORNIA FARMER, 320 Clay Street, San Francisco.

COMMISSION SALES-ROOM,

—AND—

Purchasing Agency.

HAVING HAD THE EXPERIENCE OF OVER THIRTY years in dealing in TREES, PLANTS, SEEDS, and AGRICULTURAL IMPLEMENTS, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from fifteen to twenty-five per cent. for the great mass of purchasers. We would therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of MERCHANDISE for our FARMERS or RANCHMEN, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing their wants as minutely as they can; and when they desire our judgment we will do our best to suit them.

Our charge will be Five per cent., together with the cost of packing, freight, drayage, etc. Orders should inclose a satisfactory REFERENCE or the CASH; or bill could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of TREES, SEEDS, PLANTS, etc., as this is our especial business, and we know we can satisfy all who may entrust us with their business.

Gardens and Grounds designed and put in order, and every article furnished for the same.

Any one desirous of having their Gardens look gay throughout the season, can be furnished with the plants at a reasonable rate, by applying at this office.

Every information given as to the cultivation of Plants and raising of Seeds, etc. Also respecting the mode and the system of Pruning all varieties of Trees, etc.

A large Library of Floral Works can always be found at the Reading Room and Museum, which are free to all for reference.

BOOKS---SEEDS---TREES

All rare and choice things can always be purchased as above.

Silk and Tea Culture.

A PRACTICAL TREATISE ON

SILK CULTURE,

AND ALSO UPON

TEA CULTURE.

A Neat Little Bound Volume of NEARLY 100 PAGES. A work prepared by T. A. KENDO, who it will be recollected started the Enterprise of Tea Culture in this State, at Placerville, some years ago. Price Fifty cents.

Forest Tree Seeds!

THOSE WHO DESIRE COLLECTIONS OF "FOREST TREE SEEDS" can always secure such collections of the very best—with choice kinds of "FOREIGN TREE SEED" also, and particularly as above.

RARE AUSTRALIAN SEEDS.

EUCALYPTUS OIL.

The PURE EUCALYPTUS OIL prepared by DAVID CLARKE, Chemist, Warwick, Queensland, just received and for sale for Druggist's use.

This Oil is used as a Liniment for RHEUMATISM, BURNS, SORE THROAT, and CONTRACTED SINEWS. A Grand Liniment for External Use, and should be kept in every family.

This OIL is valuable upon a "STOCK FARM" for all animals where Liniment is needed, as it has been proved to be the best Liniment known.

FOR SALE,

Wholesale and Retail,

WARREN & CO.,

320 Clay Street,

AGENTS FOR DAVID CLARKE'S REMEDIALS.

ADVERTISERS ABROAD AND AT HOME.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA is a PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three* or *four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLAR for Five Lines, or less, Nonpareil, *first insertion*; larger space, *Fifteen Cents per Line*; each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving to the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months.....$15.00 | For one-half of a column, three months 60.00
For one-quarter of a column, three months ..... 30.00 | For an entire column, three months..... 100.00

For a sin le month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the above rate

WARREN & CO., Proprietors,
320 CLAY STREET, SAN FRANCISCO.

CASH FOR ADVERTISING.

We desire it to be clearly understood that those who send us ADVERTISEMENTS FROM ABROAD must send the Cash with the advertisements—if they would have them appear.

We have numbers of advertisements sent us from strangers saying, "*Please Insert and Send Bill*" this we cannot do without Cash, or a special understanding before hand.

WARREN & CO.

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, May 8, 1879.

Money and Exchange Tables.

Bkr. on England, new style, long and short	4 87½ a 4 89
Gold, at par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	8s 5d a 8s 7d
Value of Club Wheat in Liverpool	8s 1d a 8s 3d.
Value of Wheat in New York, bushel	1 02 — 1 13
Brewers Barley in New York, bushel	60 — 1 00

MONEY AND EXCHANGE TABLES.

The *Money Market* of our city and State is in a peculiar condition, there is plenty of capital, even to overloaded coffers in the hands of bankers and of capitalists, but the difficulty is to know where and how to place it.

The Government of the U. S. has now six *hundreds of millions* in the Treasury, and enough to redeem all the Treasury notes out—and yet the people need this money for business operations but must wait till *Congress* and the U. S. Treasurer makes the next move.

Our Government Bonds are now at a high premium, and stand higher than any Bonds the world over.

The *Money market* of our city and *State* is somewhat mixed up and confused by the late *Tornado* in politics, which affecting all kinds of *business* has affected the money market sensibly, and it will take some time to get the disturbed waters smooth and clear again.

The rates of money is very low in Europe, money is easy in the East, and interest rates as usual here—but none to meet money in general circulation here and will not be for some time to come, probably about "Harvest time."

GRAIN AND FLOUR MARKET.

The *Grain Market* has felt the political avalanche that has checked in a measure all business and sales that were not in fulfillments of contracts.

From April 1st, to this date more than twenty cargoes of Wheat were sent abroad, an unexpected large shipment, the total export of Wheat and Flour since July last will exceed 300,000 tons—this speaks well for hard times.

The rates of *Flour* and *Wheat* at this date is lower than before for some time, and with the prospect of a good crop must rule low, even with all the efforts of Keene and the speculators at the East to carry up the rates.

The price of *Wheat* is still down, and markets dull, there is about a dozen ships on the berth to load with wheat and this moves a little of the supply stock, but wheat is lower here and in England also.

The *Flour market* is none too active and prices low, common brands quite low, the price of extra brands of flour are 1 to $2.50 per barrel less than last year at this time, were it not for a fair export trade, our market would be glutted—about 40,000 barrels have been sent abroad in two weeks, value over $100,000.

The *Barley* market shows a very low figure—and less inquiry at home or abroad, seldom have the figures stood so low down, and brewers' barley ditto, and little call.

The market for all grains very dull—like trade in everything.

Oats, Corn, Rye, and *Buckwheat* not much in demand, receipts more than sales, this dullness will be till the excitement resulting from the elections are over—then we may hope for a healthy and better state of things.

The market for all *Feed stuff* remains with but little change since last report, our figures show how much.

Bran, Middlings, Ground Barley, Corn Meal, Oil Cake Meal, etc., all are as was, nearly

Hogs are still a drug in the market, selling from 3 to 8 cents, a loss to the grower.

The *Honey market* is full up, and prices low, a very large amount of California honey was shipped to Germany last season as is shown by our letter from San Diego—*Bees* was lower.

The *Market for Potatoes* is quite full—prices very low, unusually so—*Onions* are again down to a reasonable figure.

Mushrooms	

Fish Market.

The *Fish market* will be always full enough to please even an epicure, as we have fish of all colors and from all waters, deep, shallow, lake, river or sea. Our salmon beat the world for this choice fish—some extra fish are now in market.

Salmon have been selling in our markets as low as 25 to 50cts. for a whole salmon, and in Oregon they use salmon to manure their orchards.

Salmon ₱ lb	4 — 6

Grain, Wool, Potato Bags, Etc.

The *Bag and Bagging Trade* is a little better and market for grain and wheat bags firm at 9½ to 9¾ cents, late delivery.

There will undoubtedly be enough bags to meet all demand this year, and although we believe there will be found to be more grain on hand than has yet been reported, we shall have bags enough for all.

Messrs. Neville & Co., the extensive bag manufacturers, 33 California Street, can supply our farmers at the lowest rates and on best terms.

T. H. GOODMAN,
General Passenger and Ticket Agent.

A. N. TOWNE,
General Superintendent.

Southern Pacific Railroad

NORTHERN DIVISION

SUMMER ARRANGEMENT.

Commencing Monday, April 21, 1879.

(AND UNTIL FURTHER NOTICE.)

PASSENGER TRAINS WILL LEAVE SAN FRANCISCO from Passenger Depot on Townsend Street, between Third and Fourth Streets as follows

8.20 A. M., *Daily* for San Jose and Way Stations. Stages for Pescadero (via San Mateo) connect with this train only.

9.30 A. M. *Sundays only* for San Jose and Way Stations. Returning leaves San Jose at 6 P. M.

10.40 A. M. *Daily* for San Jose, Gilroy, Hollister, Tres Pinos, Pajaro, Salinas, Soledad, and all Way Stations.

AT PAJARO the SANTA CRUZ, R. R. connects with this train for Aptos and Santa Cruz. At Salinas the M. & S. V. R. R. connects with this train for Monterey. Stage connections made with this train. (Pescadero Stages via San Mateo excepted.)

Parlor Car Attached to this Car.

(SEATS AT REDUCED RATES.)

3.30 P. M. *Daily Sundays excepted* for San Jose, Gilroy, Pajaro, Hollister, Tres Pinos and principal Way Stations.

On SATURDAYS only, commencing May 10th, the Santa Cruz R. R. will connect with this train at PAJARO for Aptos, Soquel and Santa Cruz. Returning, passengers leave Santa Cruz about 4:30 A. M. Mondays (breakfast at Gilroy), arriving at San Francisco at 10:00 A. M.

SPECIAL NOTICE—On SATURDAYS ONLY, commencing May 10th, the run of this train will be extended to SALINAS—connecting with the M. and S. V. R. R. for MONTEREY. Returning leaves Monterey MONDAYS (breakfast at Gilroy), arriving at San Francisco at 10:00 A. M.

3.30 P. M. *Sundays only* for San Jose and Way Stations.

4.26 P. M. *Daily Sundays excepted* for San Jose and Way Stations.

5.00 P. M. *Daily Sundays excepted* for Menlo Park and Way Stations.

6.30 P. M. *Daily* for Menlo Park and Way Stations.

Excursion Tickets at Reduced Rates

To San Jose and intermediate points, sold on Saturdays, and Sunday morning, good for return until following Monday inclusive, as follows

Baden	$0 50	Fair Oaks	$1 50
San Bruno	0 50	Menlo Park	1 60
Millbrae	0 65	Mayfield	1 75
Oak Grove	0 90	Mountain View	2.00
San Mateo	1 10	Lawrences	2.25
Belmont	1 25	Santa Clara	2.50
Redwood	1 40	San Jose	2.60

Also, EXCURSION TICKETS to Aptos, Soquel, Santa Cruz and Monterey, sold on Saturdays only—good for return until the following Monday inclusive.

SECOND-CLASS FARE.

Between San Francisco and San Jose, - - $1.00

A car with Sleeping Accommodations, constructed expressly for this travel is attached to Freight Trains, leaving San Francisco at 4:00 A. M., and San Jose at 8:30 P. M. (daily Sundays excepted).

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst Passenger and Ticket Agent.

SOUTHERN DIVISIONS.

Passengers for points on the Southern Divisions of the road will take the cars of the Central Pacific Railroad via OAKLAND, leaving SAN FRANCISCO, via Ferry Landing, Market street, at 11.00 P. M. daily, and making close connection at GOSHEN for Sumner, Mojave, LOS ANGELES, Wilmington, Anaheim, Colton, Colorado River and MARICOPA. (156 miles east from Yuma.)

1854. 1879.

THE CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on this Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1853—both these Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS, and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the first and only advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, and not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONED WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage the long years of labor in the NOBLE CAUSE OF AGRICULTURE, which such years of labor merit, our JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER have been placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 00
Six Copies,	5 00
Ten Copies,	8 00
Twenty Copies,	15 00
Fifty Copies,	100 00

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, as they may desire.

California Farmer. 1879.

OUR NEW CLUBBING LIST.

We propose for the year of 1879 to offer to our Patrons the following valuable JOURNALS in connection with our own, all at reduced rates, so as to give them the best works at low rate—(all postpaid). Price per year.

The FARMER and VICK'S MONTHLY MAGAZINE	$ 2 00
The FARMER and AMERICAN AGRICULTURIST	3 00
The FARMER and POULTRY JOURNAL	3 00
The FARMER and RURAL NEW-YORKER	3 00
The FARMER and PHRENOLOGICAL JOURNAL	3 00
The FARMER and AMERICAN BEE MAGAZINE	1 50
The FARMER and SCIENTIFIC AMERICAN	6 00
The FARMER and HARPER'S MONTHLY	4 00
The FARMER and HARPER'S WEEKLY	4 00
The FARMER and HARPER'S BAZAR	4 00
The FARMER and HARPER'S THREE WORKS	10 00

PARIS, February 27, 1879.

DAIRY COWS AS MILKERS.

Dr. Estein, of Bonn, draws attention to some facts connected with dairy stock, that is, of cows, viewed as machines for transforming raw material-food, into milk. He lays down, that the milk yielding quality of cows, is not peculiar to any race, so much as that the mean yield between breeds, is different. A good milker may be common to any race. It appears that a M. de Kappen, near Paderborn registers every fortnight the weight of each animal, and the quantity of milk it has yielded—testing thus the ratio between secretion and flesh. Now the digestive aptitude is proportional to this live weight, and the function of the mamiferous organs to the quantity of nutrive elements conveyed to them by the circulating blood. The average weight of the 30 cows, is 11½ cwts., and the daily yield of milk over 11½ quarts, or 773 quarts per year, for every 2 cwts. yielded 1,286 quarts of milk, per 16 stones weight, while another of 13½ cwts., gave but 398 quarts, per the 16 stones. Here the evidence is striving, that the difference depends not on race, though the herd is Dutch, but on the formation of the mamiferous organs. Further: the relation between the yield of milk and its richness, augments with the abundance and superior quality of the ration; the appetite of the animal thus becomes the test. Now as it clearly requires more food to support an animal of 13½ cwts. and yielding less milk, than one of 13½ cwts. producing more, the latter must be the more remunerative machine for transforming food into milk.

MANURES—THEIR VALUE.

Street-sweepings form a manure of an uncertain importance, but in Paris, that which is produced in the vicinity of the markets is more valuable. At Dunkirk, the refuse of the streets is mixed with stable manure, and sea sand, the mass being daily wetted with urine and feculent matter; its wholesale price is 2½ francs per cubic yard, or ton, the contractor re-selling it to farmers for 4 francs. As a general rule not more than 50 per cent. of street manure is valuable. Professor Henrich of Rostock, has experimented with six different kinds of nitrogenous manure on rye, the soil operated on being deficient in azote. The same quantity of nitrogen given in spring to the several plats, under the form of fish guano, powdered horn, blood, and nitrate of soda, have produced the same effect; but have been less efficacious when in the form of sulphate of ammonia, or powdered flesh. The influence of all the manures was excellent on the grain, thus contradicting a common belief, that it is the straw which is influenced. When there is too much fat in an animal manure, its azote is diminished. In the present experiments, nitrate of soda proved the best manure, and in addition, was the least costly. M. Ladureau's experiments with flax are interesting; the most lucrative yield of flax is that from a manure uniting azote, phosphoric acid, and potash; the fibre though not so abundant, will be of superior fineness. Nitrate of soda does not produce much effect, flax requires very little soda, but much potash, and it has not the power to replace, like beet and some other plants, potash by soda. In the north of France and in Belgium, the plan is therefore bad, which consists in dosing, more or less strongly, with farm-yard manure, guano, oil-cake, animal refuse, and similar nitrogenous manures, soils intended for flax. When the land is of ordinary richness, 2 or 4 cwts. of the salts of potash and of magnesia, sown in spring will suffice.

HOP CULTURE.

It is anticipated that the new commercial treaties will give an impulse to the cultivation of hops in this country: France has about 9,000 acres under the crop, which sells at 70 francs the cwt. Twenty years ago the price was from 200 to 400 francs.

Cabbage is liable to a well-known disease in the roots, called fingers and toes, or club root: it is not very general in France, but in the neighborhood of St. Petersburg it is a veritable plague. M. Woronin has devoted three years to the study of this disease, which he calls "hernia," it is produced by a microscopic parasite, and develops with greater rapidity on moist, than on dry soils; radishes; turnips, and other cruciferæ are liable to be attacked by the parasites, which, quitting the excrescence on the root, seek refuge in the soil, till the occasion offers to feed on another root, irrespective of age. Burning the diseased roots, and changing the crop for a few years, are the proposed remedies; cutting the club, employing soot, etc., are useless.

[CONCLUDED]

Home Correspondence.

THE GREAT YOSEMITE VALLEY.

ITS RESPLENDENT GLORIES—THE SEASON OF TRAVEL—THE COMING SABBATH SCHOOL GATHERING—ONE THOUSAND IN THE VALLEY.

YOSEMITE VALLEY, May 15, 1879.

COL. WARREN—*Dear Sir*

Since I wrote you last, the dark and freezing shadows of the winter solstice have passed away, and the genial rays of the vernal sun have warmed into life and given a new birth to the dead beauties of last year.

Yosemite is now resplendent with the emerald robes of spring, and carpeted with flowery mosaics. The melting snow on the mountain heights has swollen the various falls to their full volume of rushing, foaming waters, pure and white as the driven snow from whence it comes. The clouds of mist and spray arising from the seething, boiling cauldron of troubled waters at their base are illumed by the cloudless sun and adorned with a glory of prismatic splendor.

All the different hotels are now open for the reception of the numerous guests which are daily arriving by the four different stage routes. All that come with one accord exclaim, that the half had not been told them, and only regret that they cannot stay longer, for in no other parts of the world can so much magnificent scenery be seen in so small a focus. Carriages for the roads in the valley, and saddle horses and guides for the trails to the upper heights, and points of interest are in abundance, and every one is striving to please and supply the wants of tourists with courtesy and dispatch.

The contractor to build the undenominational church for the Sunday School Association here has commenced work and expects to have it ready for formal dedication by the sixteenth of June next. It seems to me almost like sacrilege to build a church within the portals of this the grandest of all God's temples. It is like building a toy church within the walls of St. Peter's cathedral at Rome. But it will clearly show the contrast between the frail and puny works of man, as compared with the mighty grandeur and magnificence of the works of God, and I hope it will do good.

In the late great contest for and against the new Constitution, I see that you labored heroically for the true and best interests of California, as you always have done, and you are entitled to the gratitude of all who love true freedom. But the news comes to us that the great voice of the people is in its favor. This falls like the foreboding shadow of a great calamity on the true votaries of a free government. May God forgive those who by their avarice may have helped to create and bring about this frenzied panic among the people. Thousands, lured by falsehood and deception, have voted for this great fraud who ought to have known better. May God and Freedom forgive them, for they know not what they have done. They have helped to forge shackles, which, when when the opportunity is brought about, will be made use of to disfranchise and enslave the citizens of the State.

In breaking up the unity of the State control of our public schools and putting them under incompetent control, it shatters the very foundation of our republican government, whose crumbling ruins will some day crush both friends and foes alike. All energy is now paralyzed. Industry, wealth and enterprise stand appalled with fear, not knowing whither to flee for safety. The genius of Freedom stands bowed, like a weeping Niobe, sick and in sorrow, from the wounds received from the stricken serpent, which she in pity and charity took to her bosom and warmed and nourished into life. Do not disturb the sanctity of her grief, while she communes with her votaries and her God.

Now, let the people be vigilant and watchful, cease beating into pruning hooks the old swords which have once done battle for Freedom. Send *good*, and *true*, and *wise* men to our Legislative Halls, to try and get this new organic law amended and pruned of its worst features and avert if possible the threatened impending ruin. If successful, then rejoice and thank God. If not!!——

My old friend; will you pardon me if I try to give you a rough pen sketch of the marvellous *vision*, morbid, though it may be, which forces itself unbidden upon the tablet of my mind? If NOT, then will the genius of Freedom, clothed in the full panoply of war, arouse in her might, with a terrible resolve. The lightning flash of her falchion will electrify the whole Republic. Her voice, ringing like the clarion notes of a silver bugle, will be heard throughout the land, crying

"Rally round the flag boys, rally once again."

Then will the Pacific send greeting to her sister, the Atlantic. The Sierra Nevada mountains give the alarm to the Rockies, the Alleghanies, and the White mountains. Shasta, with her snowy crown and crystal banner will signal to her brothers Rainier and Hood, with their icy armor and fiery hearts. Fremont, Long, and Pike, will send willing response to Whitney, Lyell and Tyndall.

Then shall be heard a murmur throughout the land, which swells to a great noise unheard before. Not like the ceaseless roar of the storm driven ocean, as her dying billows roll in foaming battalions upon a rock bound shore. Neither can it be compared to the moaning howl of the mountain storm, as it battles with the struggling, reeling ranks of giant forest trees, which creak and wail as they cling to the mountain sides for foothold and life. Nor like the appalling sound which swiftly heralds the desolating earthquake; but more like all combined. In the waving lulls of the raging tumult may be heard the voice of a chieftain, re-echoing the patriotic war cry of the Pacific's once illustrious orator, statesman and warrior, whose immolated bones now lie in silent repose upon the summit of Lone Mountain. "Years, years ago, I took my stand for Freedom, and where the feet of my youth were planted, there my manhood and my age shall march." And from the ranks a medley of confused refrains fill the air, such as

"Rally around the flag boys, rally once again."
"Glory, glory, Hallelujah; true men are marching on."
"Hurrah, hurrah, we bring the Jubilee."

Soon the smoke and dust of the battling hosts fill the air and darken the noonday sun. In trembling fear the country awaits the result. In time, silence reigns. Gently as by the fanning breeze of hovering wings, and the moistening showers of the falling tears of the angels of peace and mercy on their mission of love, the dust and smoke of battle subsides and drifts away, and the field of carnage is lighted up to view. The awful scene of destruction and desolation I will not attempt to portray. The cohorts of despotism and communism; the enemies of Liberty are either dead or fleeing for safety. Peace once more reigns. But, lo! upon the ramparts heights, appears a NEW BANNER,

Upon whose field of lustrous sheen,
A new and strange device is seen,

Emblazoned in a halo of resplendent glory, and all, encircled within an eliptical cordon of golden stars; multitudes are crowding forward to enlist in the ranks of its numerous votaries, who wear the badge of wisdom as a visor to their helmets but only those, *long tried*, and who could READ the strange device, and give the true interpretation thereof, were qualified, or allowed to enlist, or have a voice in its protection.

Surrounded by his officers of state, and his counsellors, stands the bearer of the new banner, upon his broad and ample brow the great Jehovah has set his seal of knowledge, and his face is radiant with benevolence and love. Upon his left stands the genius of Freedom clothed in the garments of Peace. On the right stands Wisdom with a golden CROWN; upon its broad and burnished diadem, set in pearls and diamonds, rubies and sapphires are the seals of all the States, and the seals and insignia of all the different guilds and industries of the nation. And wisdom places this crown upon the head of the Ruler of the Republic, the NATION of North America. The genius of Freedom responds, "*so mote it be*," and all the multitudes cry *amen*. The vision ends, and I go to rest. Farewell.

Yours sincerely,

GALEN CLARK.

OUR EXTRA EDITION.

THE GREAT YOSEMITE.

BIG TREE AT OAK FLAT.

INSPIRATION POINT.

THE INCENDIARY.

With what dread and horror all good people view the midnight *Incendiary* who goes out with torch in hand to burn our dwellings, destroy our property and peril all the interests of life; for such a malignant criminal our *Laws* fix a dire penalty which on conviction the wrong doer must pay—for *Justice* demands it.

But we ask, have we not those in our midst who are incendiaries of *another kind*, who, though they carry no torch at midnight to burn, rob and destroy, yet who are ever on the alert with venomed tongue, glibe pen and with printed fire brands scatter far and wide those slanderous stories against our public men, against our Institutions, against our Internal improvements and thus check progress, stop enterprises, destroy public and private credit, and also create fear and alarm in the public mind that is destructive to all the business enterprises of the day.

During the late political Tornado that has swept over our State what a mass of this kind of incendiarism has been scattered far and wide to the great injury of our State and all its best and highest interests.

The gross slanders and vile attacks upon the great Railroad enterprises of our State and the Managers of the same, have been of a most malignant character, and these against our institutions that give employment to more than *ten thousand laborers*, and scatters tens of millions of dollars over our State annually; it is certainly much to be regretted that by such incendiary acts of individuals and some Journals, a portion of our farmers and laborers have been induced to join in this hue and cry against what is termed the "Great Monopoly," and yet we would ask in all earnestness what could our farmers, our Grain growers, our Fruit raisers, Wool and Hop growers, our Wine makers and all our producers do were it not for the "Railroads" of our State, by means of which their vast products are brought to market, and again sent abroad to all the Eastern markets, to relieve us of this vast surplus, and yet the same cry of *Monopoly!* MONOPOLY!! why these very communistic cries come from those who now pay a freight of only *one-third*, and in many cases only *one-quarter* of the rates paid in years gone by.

There is also the same cry against banks, capitalists and monied men, because they are *rich* and have money, while the rates of interest have been steadily coming down from 3 to 2 and to 1 per cent. until now the rates are only from 6 to 9 per cent. and even millions loaned on U. S. Bonds at 4 per cent.

As long as these incendiary acts are being carried on by individuals, by parties or by the press, the very spirit of *self-protection* will cause a contraction of confidence and of business enterprises, and the only way to hope for *better times* is to crush out, drive out, and frown down that fearful spirit of communism and agrarianism that now paralyzes the business enterprises of the day, and this can be done by our leading merchants, bankers, ship owners, manufacturers and noble public men, uniting in a strong phalanx, as a Committee of PUBLIC SAFETY that shall crush out the *wrong* and restore the *right*, and by such a union elect high minded, responsible men only to all places of honor and trust, at the same time casting aside forever all political schemers and propertyless men—such a measure will be the salvation of our State and we believe the feeling now is that upon such action and upon the character of the next Legislature depends the future welfare of our State.

OUR ILLUSTRATIONS.

We present above two of the most striking views connected with the famed Valley of Yosemite.

The first as shown above is the coach fully loaded, passing through the "Big Tree," the diameter of this tree was over 40 feet—the stump as now standing, stripped of its bark, measures 30 feet 6 inches, and is to-day one of the largest and most remarkable trees of the world.

The second view shown above is "Inspiration Point" and from its height looking down into the Valley is a noted view, in unsurpassed wondrous beauty on the Globe.

Inspiration Point gives to the tourists a conception of the wonders he is soon to see and enjoy.

The Letter on this Page from our esteemed Correspondent from the Valley will give the reader considerable "inspiration" for it is full of the inspired grandeur which that writer enjoys all the time.

While these Illustrations give but the mere outlines of the scenes, all must remember that there is no artist or writer that can describe or paint the full glories of this most gorgeous Valley.

We shall in future numbers give special sketches of the scenes, visitors, hotels and most noted spots in the Valley, and the routes to and from there.

University of California.

This Head Quarters of Learning under the patronage of the State and Nation announces the NEW YEAR for their work on the Examination Day, as will be seen by the Advertisement in our Columns and to which public attention is called.

The Regents of this College are now making every exertion to make this Institution prosperous, and to this end they have the good wishes of all.

We return thanks to the Committee of the "First Cavalry Battallion" for their courtesy in sending us the invitation to their festivities last week, at Alameda.

We return thanks to the New York Board of Trade for Documents on Railroad matters of public interest.

Agriculture.

Plow deep, while sluggards sleep,
And you shall have grain to sell and to keep

HOW WE SAVED THE OLD FARM.

CHAPTER VII.

All this time we had been looking for Mrs. Giles to come up to make us that call, and mother had planned what she would show her, and what she would give her; so, when Clarence, after supper, announced his intention of going down to see if he could get Bill to come up next day to help about fixing the barn floor, mother told him to ask her to come with him, and spend the day with us, and he returned with the news that they would do so. And in the morning they came, Bill carrying the baby, a hearty-looking girl of a year old, and "Liza," as Bill called her, leading a boy of about three years. We had never seen Bill's wife and children, and I looked at them with some curiosity. She had on a faded dress of some woollen material, evidently cut and fitted for her by an experienced hand, but sewed by herself, or some one who had little skill with the needle. Seams were drawn and puckered out of all shape or into all shapes but the right one. Buttons were fastened on the front for ornament, but not for use, as no button-holes had been made to correspond, and pins fastened the front together. A cheap shawl of gay colors and an expensive bonnet of a style a year or two old, which looked as if it had been sat down upon more than once, were her outward adornments, while, upon their removal, a variety of cheap jewelry was displayed. The children were arrayed in a cheaper style of garments, the boy having a jacket which I thought had been presented to her by some one whose boy had outgrown it, and a pair of pants which she had evidently fashioned herself, judging by the cut and sewing of them, out of some cheap material. The pants and stockings did not meet, and the poor child's knees looked blue and half-frozen, at sight of which my mother could not help exclaiming; a hat which she said was "like Bob's dog—his best dog, and all the dog he had," and a pair of good, stout shoes completed his outward attire, while the baby, a little to my surprise, had on a neat and pretty dress of calico. She explained this by informing us during the day that one of Bill's cousins, who came down to see them a few weeks ago, had made the dress and sent it to her. She told much the same story that Bill had told at the hen-house, and spoke of her deficiencies in a way that led us to hope that she would willingly learn better if she had an opportunity. As a consequence of her freedom in speaking, my mother spoke to her more freely in regard to the faults of her dress than she was in the habit of speaking to people about their faults. She showed her how she made her yeast of potatoes and flour, and put up a large bottle full for her to take home with her to start some with at home, also how the bread was made with it, and the milk-biscuits for tea. She also gave her a hint about the preparation of that staple New England dinner, a "boiled dish" of beef and vegetables, and instructed her carefully in the art of making light molasses gingerbread, which we all thought was better than any kind of expensive cake. I thought, and still think, that my mother could make the best gingerbread I ever ate, and it was both cheap and wholesome, two things which are much in its favor. She showed her also about the faults in her sewing, and lectured her about those faulty seams, and the pinned dress without button-holes, almost as severely as she would have lectured me for the same faults. From some old bits of woolen clothes she cut some leggins to cover that boy's knees and thin stockings, and some mittens for his hands, and I was set to sewing them up, and putting buttons and button-holes to the leggins.

The boy was like most boys of his age, full of play and mischief, and I soon noticed that he did not mind her at all. If refused anything that he called for, it usually ended by his setting up a yell that would not let us hear anything else until he received it, or got a passionate blow on the head that made the uproar worse for awhile. I think before night I received permission to visit the barn, which I had been longing to do all day, on purpose that my mother might point out to her some of the faults in the management of her children, for it was a different task to speak of those faults than to correct those which were confessed, and which Mr. Giles had come to ask for instruction upon. But I am confident that what mother said was well received, and I hope it bore fruit in time, though firmness and patience, which were what she most lacked in governing her children were not to be acquired in a moment, and even a three years' old boy or a babe in arms knows when they can conquer by persistence, as well as children of larger growth, and it would have taken long to eradicate from those children the memory of the many times when, by screaming and crying, they had forced the mother to yield to them.

At the barn I found everything going on well under Bill's directions. Several loads of earth had been taken out to add to the compost heap. New sticks had been put under the floor where the old ones had decayed, and in some places supported by stone walls built for that purpose. The stone was taken from the nearest wall, "for," said Clarence, "I can replace the wall when I plough in the spring better than I can stop to dig stones now." The floor was laid in such a way that the boys could easily take it up to put in the sand under it when they should be ready to do so, and before night it was finished, and some alterations made in the arrangements of the mangers from which the cattle and horses ate, so that they could be more easily cleaned out of all that the animals refused to eat, and also to bring them up nearer to the position in which a cow naturally stands, for although a cow feeds in the pasture with her nose level with her feet, she cannot do so as well when chained up by the neck. Rough but strong partitions were put up between the heads of the animals to prevent them from stealing food from one another, and a plan for a place for the expected calves, upon the opposite side of the threshing floor, was contrived for the boys to fix on some rainy day or when they were ready.

Before Bill and Liza went home mother offered to pay him for his day's work, for, she said, she could see the necessity of fixing the stable floors, and was willing to pay for it. "It is not like the hen-house work, which is an experiment of Clarence's, and I dare not risk money in experiments, if he risks his labor," she said. But Bill would not accept anything, saying that the bargain beforehand was that she was to teach Liza, and he was to work to pay for it. After a hearty supper, Clarence carried them home, and more than one bundle in the wagon besides, which mother had packed. Mother was saving, for she had learned to be so in the hard school of poverty, but she could give in consequence of it many things which were of value to the recipients greater than to herself. And, as I have said, such neighborly acts were current coin in Brookfield.

All this time the sitting of hens at the new hennery had been going on at such a rate that the squire's five dozen per week were not enough, although, at first, they gained upon us, and Clarence was obliged to send word that he could use more if he could have them. Every day the hens were taken off and the eggs examined, and if one was broken in any nest the rest were carefully washed in warm water and replaced in the nest. When the time approached for the first sitting to come off in a few days, they were sprinkled with water every day to soften the shell, and one morning I was invited up to examine our first Brahma chicks. There were twenty-six of them, one hen having hatched every egg, and the other eleven, all as white as the snow which lay on the ground outside. They were equally divided, and the nests carefully cleaned out and supplied with clean straw, and they were left where they were. Luckily it was the last snow of the season, and was rapidly melting, and before night the boys had fixed a place out of doors in front of the hen-house (on the south side) very much like a hot-bed frame, where the hens were placed in coops and the chickens allowed to run out in little yards under glass, the remainder of Bill's windows being used to cover them. Here the next day the hens and chickens were removed after the sun came out bright, but at night were put back into their nests inside; and in this way was each successive lot taken out, in very warm days the sash being removed in whole or in part during the warmest part of the day to gradually accustom them to the air. After the first four hens had hatched, the rest, which had been set in pairs, were taken off two at a time and all the chickens placed under the care of one, while the other was carried back to the other hen-house, where she was soon laying again. When the coops were all filled, the oldest were turned out from under the glass, being then so large as to be in no danger from the weather, which by that time had in fact got quite warm. But before that time, mother and I had been called out to the piggery on two different mornings to see the little white pigs that were there, seven in one lot and eight in the other, and they were all doing well. And they ought to if care could make them thrive, for the boys visited piggery and hendery a dozen times every day, though their stops were always short, for they were busy all the time. And I was often with them, for I felt as much interest in the farming as if I had been a boy myself, and but little was done that I did not know about and know the reason of, if I could get them to explain it to me.

When the little pigs were about two weeks old there was a little calf at the barn, and I so much admired it that I regretted that we could not keep that and get the one from the squire's too, but when it was two days old the boys loaded it into the wagon and carried it off, bringing back when they came another of about the same age, but much smaller and leaner-looking, in spite of its having come from one of the squire's fat cows. But it was pure Alderney, and its delicate fawn color and white, its fine head and large, beautiful eyes so much resembled my idea of a young deer that I was quickly reconciled to its lack of size. They fed it on new milk a few days, putting their hands into the pan of milk and letting it suck the finger. I was allowed, as an especial favor, to offer my finger for that purpose, but I soon found its teeth were so sharp that I was contented to look on without taking an active part. In a few days, however, it knew enough to drink the milk without the finger being in its mouth, and then a part sweet skimmed milk was substituted for the new milk, and when it was two weeks old it was having only skimmed milk, the skimmed being carefully warmed to the temperature of milk from the cow. But by that time another one was there, another change having been made with the squire, and the same progress was gone through with for that, and more than that, there were too little lambs. They were each one of a pair of twins from the squire's sheep, and he said he had rather have one good lamb than two poor ones on one sheep, so he asked Clarence to take them away, telling him that they were easier to raise by hand than calves and were of his choicest breed of South Downs, which was why he preferred to keep only one on a sheep. How rich we felt! two calves, two lambs, fifteen pigs, and over an hundred chickens already, and many more in prospect.

Although the care of all this riches took up considerable time, the boys were busying plowing and drawing out manure, and getting ready for planting; and mother and I had the care of the milk and making the butter. Clarence the last time he went to the squire's brought home a patent churn, which he borrowed there, it being one that was not need because it was too small for his great dairy, but it was large enough for our four cows. With this, one of the boys would churn in the morning before going to the field, saying it was nothing but fun beside the labor of our old dash-churn. The butter was light colored yet, but it showed the effects of the meal which Clarence was feeding, and we were willing to put it away for our own use, that we might have the more to sell when it got of better color, for we knew that yellow butter would sell better than white, even if they tasted just alike. And we were determined to allow ourselves nothing more than the comforts and necessaries of life until we were sure that we could do so without running in debt for them.

[TO BE CONTINUED.]

Exporting Meats to England.

During the past week the importations of dead meat from America amounted to 6,294 quarters of beef, 1,803 sheep, and 369 pigs. The City of Montreal brought 720 quarters of beef, 200 sheep, and 200 pigs; the Castello, 1,000 quarters of beef; the Lord Clive, 804 quarters of beef, 53 sheep, and 169 pigs; the Britannic, 1,500 quarters of beef and 600 sheep; the Celtic, 700 quarters of beef and 300 sheep; and the Wisconsin, 2,200 quarters of beef and 650 sheep. The arrivals of live cattle were but small, amounting only to 923 animals, brought by the steamers Massachusetts, Lord Clive, Bayarian, and Lake Camplain.

DETERIORATION OF THE POTATO.

The first is, that, though the best specimens of all other crops are saved for seed, in the case of potatoes the best are sold, the next best used in the family, and the remainder—the refuse, the deformed, the discolored, the immature—are planted, with the expectation that the very worst will produce a full crop of the very best. In such a lot of seed there will be hundreds that bear no resemblance to the original; and, looking over a field planted with such trash, one may find hills in all stages of growth—some ripe, and others that will grow till killed by frost. I have counted twenty varieties on a single acre, of all colors and forms; all the product, originally, of the Early Rose. Now, seed saved again from such a crop will have reached its end, as far as profit is concerned. And, to make the thing still worse, this seed is almost always produced by poor crops in which the habit of unfruitfulness has become constitutional. This latter fact has never received from cultivators the consideration to which it is entitled; for it is of great, very great importance, and no seed should ever be saved from an inferior plant, or from other than a full crop. A growing potato plant, before it has put out any side branches, sets from four to six tubers—generally four. These will be the largest, most perfect in shape, and the best ripened of any in the hill, and will contain more natural vigor than smaller tubers. As soon as the plants puts out side branches more tubers will set, which are connected with these side branches and fed entirely by them; but as they are of later growth and less vigorous than the parent stem, so the tubers are smaller, weaker, and less mature. As the season advances other side branches are started, less robust and leafy than the last, producing still smaller tubers. These are the ones among which 'sports' are generally found, and from which mongrels are propagated.

[It is to be hoped our potato raisers will carefully read the above sound doctrine, growers of potatoes, corn or any article should be as careful to secure good seed as the "stock raisers" are to secure good blood from sire and dam, poor seed and low pedigree soon runs out.—ED. F.]

Australian Cattle and Sheep.

We have Letters from Auckland giving us a list of the very choice Blood Stock of one of the *very best* Stock Raisers in all that region of country

Among the many very choicest Animals are HEREFORD, DURHAM and DEVON CATTLE of the very highest blood and purest pedigree.

Of the HORSES are the CLYDESDALE, the best stock of all Scotland's high bloods.

Of SHEEP, the LEICESTER and LINCOLN, several of the Breeders valued at £150 to £200 each, from this price down to 20 to 30 guineas each.

This class of Stock is very rarely found in this country, and these were exhibited at the late Fairs in Australia, and bore off all the highest Premiums.

It is proposed to import some of this into California at early day.

Those of our Stock Breeders who would like the particulars and the value of this Stock, can obtain all needed information by calling on HUGH CRAIG, ESQ., at *New Zealand Ins. Co.*, California street, or at CALIFORNIA FARMER Office from the EDITOR.

Vermont Merino Sheep Breeders' Association

First Vol. Register, 395 pages, 22 plates, substantial leather binding, contains history of importation and improvement of Merino Sheep, register and pedigrees of 572 stock rams, with pedigree and history of over 200 flocks, pure bred, improved Spanish Merino Sheep. Sent postpaid on receipt of $2.00. ALBERT CHAPMAN, Sec., Middlebury, Vt.

It is the rugged highway that calls out one's strength, not the valleys of sensuous ease.

A NEW BOOK.

"Dournof," a Russian story, by Henry Greville, is published this day by T. B. Peterson & Brothers, Philadelphia. "Dournof" was written in Russia during Madame Greville's residence in St. Petersburg, and is a graphic story of Russian life, containing careful studies of Russian character which are most admirable, and is far superior to any of her other works. The story bears some resemblance to "Dosia" and to "Pretty Little Countess Zina," but is more interesting all the characters being master-pieces of character drawing, while there is an ease and naturalness about each of the characters that makes the volume very entertaining and very enjoyable. One gets a good deal of valuable history, and of interesting facts pertaining to the people of Russia, from such stories as this, every page of which shows the hand of a powerful and experienced author. Henry Greville, indeed, is a charming and exquisite writer. Marie Stewart, the translator, has done her work well, and in the most thorough manner, in the English version she has made of this attractive story. "Dournof" is published in a large square duodecimo volume, paper cover, price 50 cents, and will be found for sale by all booksellers and news agents, and on all railroad trains, or copies of it will be sent to any one, to any place, at once, on their remitting the price in a letter to the publishers, T. B. Peterson & Brothers, Philadelphia, Pa.

N. ASHTON & SON'S

Liverpool Fine Salt.

IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.

Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:

"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt; therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13; for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams; and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

VALUABLE

FARMS FOR SALE.

Valuable Farms in the sunny lands of San Diego County

Those families who desire to leave the cold wintry region of the north and come to a better climate—are invited to the following Farms we offer at good bargains:—

One Farm of 1,500 acres, undivided, can have a great chance to buy this Farm.

One of 320 acres, of rich land of the very best soil, running water, and generally low land, capable of growing any crop wanted, a portion fenced, with fruit trees and vines now bearing.

One Farm of 100 acres of most excellent soil, capable of raising all Tropical Fruits in the greatest luxuriance.

All these Farms are in the Bee-region and suitable for this interest all sold on easy terms. For particulars address

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

FRAGRANT WOODS.

The properties and uses of woods are various; some are sought for their beauty and utility for the cabinet-maker or pianoforte manufacturer, some for their adaptability for carving or engraving on, others for their coloring properties, and some for their medicinal uses. There are a few, however, which have the rare attraction of being fragrant and odorous, and hence are valued for small and special fancy articles for ladies' use, or for the purposes of the perfumer, who distils pleasant scents from them. Although fragrant odors are very generally diffused over the vegetable kingdom, yet they are not often centred in the woody fibre of plants. We know these odors well in flowers, and we find them strongly diffused in many aromatic leaves, as the lemon and citronelle grasses, the leaves of the Faham orchid *(Angræcum fragrans)*, and of the *Eucalyptus citriodora*, and *E. odorata*. Sometimes the pleasant odor or pungent flavor is concentrated in the seeds and seed-vessels, as in the nutmeg, the tonquin bean *(Dipterix odorata)*, the musk seed *(Abelmoschus moschatus)*, the odoriferous seeds of *Oxydendron Cognemany* (Nees), the vanilla pods, and those of *Myrospermum frutescens* (Jacq.), etc., of South America. In several trees the aromatic principle is strongest in the barks, as in cassia and cinnamon, the sassafras of Tasmania *(Atherosperma moschata)*, and *Croton cascarilla* and *C. cleutheria*, of the Bahamas. Essential oils are obtained from many of these.

The study and consideration of woods may be influenced by many causes, according to the purposes to which they are to be applied. The cabinet-maker will group them according to the disposition of their colors and the distinction of their fibres, and will sometimes also take into consideration the odor, which is an essential point in the eyes of the perfumer. As I do not remember to have seen any grouping of the fragrant or odorous woods, I propose condensing a few observations as a guide to those who may be interested in this class of woods, which is not, after all, extensive, and only a few of which are as yet much used. Two or three are tolerably well known, such as champhor, sandal, and cedar woods; others have not been so generally described.

The bark of *Ocotea aromatica*, from New Caledonia, possesses a strong sassafras flavor, and there is a fragrant bark yielded by the *Alyxia aromatica*, of Java and Cochin China: but as I have not met with specimens, I cannot tell whether the odor penetrates to the wood. The *Ixora (Coffea) odorata* of Tahiti has, however, I know, a close and fragrant wood.

In Tasmania and Australia we have the musk-wood *(Eurybia argophylla)*, with a timber of a pleasant fragrance and a beautiful mottled color, well adapted to turnery, cabinet work and perfumery purposes. The native box-wood *(Bursaria spinosa, Cav.)* has also a pleasant but fleeting scent. The scent-wood of the same island *(Atyxia buxifolia, R. Br.)* has an odor similar to that of the tonquin bean. It is but a straggling sea-side shrub of three to five inches in diameter, and consequently does not produce wood of any size, but it is fine and close-grained, of a lightish brown mottled appearance.

In the colony of Western Australia we have the raspberry jam wood, a species of the *Eucalyptus*, which derives its popular name from the similarity of the scent to that preserve.

Many of the Australian woods exhibit a peculiar beauty of structure, which adapts them for small furniture and turnery uses. Some are highly fragrant, and retain their agreeable odor for a considerable period of time, which renders them additionally pleasant and acceptable in the form of ornamental articles for the boudoir and drawing-room. The scented mynll *(Acacia homalophylla)* is a very hard and heavy wood, which has an intense and delightful smell of violets. It has a dark and beautiful duramen, which makes it applicable to numerous purposes of the cabinet-maker and the wood-turner, and an infinite variety of minor uses. It rarely exceeds a foot in diameter, but has been used as veneers. This tree is common in many parts of Australia; since the London Exhibition of 1862, when the caskets, pipes, and other articles shown from Queensland, and the remarkable property it possesses became known to European manufacturers, the wood has been in request for making glove, handerchief, and other fancy boxes. As long as it remains unpolished, it preserves this peculiar fragrance of violets, which does not occur with such perfection in any other known substance.

[For many years we have shown the value of the various splendid varieties of Australian woods grown in Australia, and urged their cultivation here for mechanical uses and for artistic work.

Very few of our tree growers even, or our nurserymen have any idea of the great value of these various woods, each and all of which can be grown with great profit as a business operation.

Among the many varieties of the *Eucalyptus tribe* are found some of the most fragrant woods, and woods of the finest and most beautiful shades, suitable for cabinet and ornamental work, and yet but little thought has yet been given to their great value, while other countries are growing them by the *millions of trees*.

It is to be hoped that a wiser thought will be given to Australian trees soon, so that we can utilize these woods in cabinet ware and for other ornamental purposes.—ED. F.]

RHUBARB WINE.—We have samples of the "Rhubarb Wine" advertised by us in the FARMER, to which we call special attention of wine dealers, as we have it on sale at our office.

A FREE BOOK of nearly 100 large octavo pages for the asking. Full of valuable notes on Scrofula; Diseases of Women; Aches and Pains; Heart Troubles and a great variety of Chronic Diseases, with evidence that in most cases, these diseases are curable. Send for one stamp.

USES OF FERNS.

Those who have been fairly inoculated with the love of ferns, will be interested to learn that many species of these beautiful plants are used not only for food and medicine, but for economic purposes. As food, they are chiefly useful to the aboriginal inhabitants of some foreign countries. In the larger of the exotic ferns—the tree-like species—the inner part of the stem, stipes or rhizoma—corresponding to what would be the pith in other plants—and sometimes the whole of the tuberous rhizoma, is eaten generally after being boiled. In India, some of the natives boil the tops of one species of fern, and eat it with shrimp-curry. Amongst ourselves, two of the most beautiful species—the Bracken and the Male Fern—are said to have been sometimes used as ingredients in the manufacture of beer; whilst one foreign species *(Aspidium fragrans)* is actually stated to have been used for making tea. Our native Maiden-hair used at one time to furnish a principal ingredient for a syrup called "capillaire." * * The rootstock of the Royal Fern *(Osmunda regalis)* was in times gone by reputed to possess the quality of healing wounds, whether applied to them externally, or taken inwardly in the form of a decoction. Its outward application was considered a specific against bruises or sprains, and good for bones broken or out of joint; and taken inwardly, it was also believed to be good for cholic and for splenetic disorders. In some parts of Europe its rootstock is said to be used, after being boiled in water, for the purpose of starching linen. * * A pleasant and familiar inhabitant of our lanes and woods the Common Polypody—*(Polypodium vulgare)* has had ascribed to it, by ancient herbalists, various medicinal qualities, amongst them being the power of curing coughs and asthmatic affections, the dried rhizomas being powdered for the purpose and mixed with honey.—*The Fern World, by Francis George Heath.*

THE AUSTRALIAN GUM TREES.

There is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the back bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

The BEST MEDICINE one can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is Clarke's Liver and Blood Pills.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach or Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

FERTILIZERS—THEIR OPERATION.

Deductions from experiments made at Athens, Ga., 1873, by Dr. E. M. Pendleton.

1. That there is a great waste of ammonia when peruvian guano is used in its concentrated form, it should be mixed with superphosphate, alkaline salts, etc.

2. That no combination of salts, leaving out soluble phosphoric acid, will pay on our worn out soils.

3. That taken separately, none of the salts sold as fertilizers to make home compounds will pay. Their virtues, if any, must be in chemical action upon each other, and the substances with which they are composed.

4. That ashes treated with sulphuric acid will greatly improve their fertilizing qualities.

5. That the application of soluble manures in a liquid form is better and more efficient than when applied in the dry state.

6. That lime will only pay on soils abounding in organic matter.

7. That subsoiling land for corn, will pay.

8. That five by three feet is the best distance to plant corn on medium land.

9. That pulling fodder does not seriously injure the corn after it passes the milk stage.

Light sandy soil will grow good crops of corn, if properly fertilized.

Liberal planting should be practiced.

Late planting of corn secures an earlier and thriftier crop generally. Corn contains all the elements essential to the growth of man and animals.

Employment is nature's physician, and is essential to human happiness.

Very Rare Australian Seeds.

WE HAVE RECENTLY RECEIVED FROM AUSTRALIA large collections of the new varieties of the Eucalypts never before imported here; also, very rare TREE and SHRUB SEEDS, which are most desirable to introduce upon the Pacific Coast.

In order to scatter them widely, and thus have them extensively grown and more widely disseminated. We shall put them up into collections of *ten parcels each*, and mail them to order, at $5 each collection. Address

WARREN & CO.,

NURSERYMEN AND FLORISTS ABROAD

Nurserymen and Florists abroad who desire to make their business widely known on the Pacific Coast; those Nurserymen, especially, who have NEW and RARE kinds of Trees, Plants, Shrubs, or Seeds, should remember that by advertising with us and making their business known in our columns, they can secure an extensive trade from our Golden Land, and at the same time make their business known over the whole Union, and also in Europe and over all Australia, as our JOURNAL circulates there to a large extent.

This is the season when Nurserymen should make known what they have for sale.

Best Fruit Dryer in the World.

HAMPTON & KELLY
—AND—
KELLY & COLE'S
FRUIT DRYER.

THIS MACHINE DRIES BY STEAM HEAT AND DOES not burn the fruit. It is very economical in its working machinery, and so perfectly simple that every family can use it in their homes; it is also perfectly safe.

In connection with this machine is an admirable GRINDER capable of grinding one bushel of fruit per minute.

The capacity of drying of the SINGLE DRYERS are from 20 to 30 bushels in 10 hours for each machine. Large machines will dry from 30 to 100 bushels in 10 hours.

Orders for these machines, for the present should be sent to Messrs. Kelly & Cole, First and Salmon Streets, Portland, Oregon.

A manufactory of these Dryers will soon be established here, and will be under the superintendance and management of ALFRED B. COLLVER, who is the General and Traveling Agent of all these inventions.

Mr. Collver will have his office in this City a early day all letters for him can be addressed through the Express or Postoffice to the undersigned, and they will have prompt attention.

ALFRED B. COLLVER.

N. B.—Letters can be directed to me care of EDITOR FARMER, to whom we are permitted to refer for the excellent quality of our Fruit Dryer. A. B. C.

Directions for their culture given to all purchasers. For sale at
Farmer Office.

A GOOD PLAN.

Anybody can learn to make money rapidly operating in Stocks, by the "Two Unerring Rules for Success," in Messrs. Lawrence & Co.'s new circular. The combination method, which this firm have made so successful, enables people with large or small means to reap all the benefits of largest capital and best skill. Thousands of orders, in various sums, are pooled into one vast amount and *co-operated* as a *mighty whole*, thus securing to each shareholder all the advantages of the largest operator. Immense profits are divided monthly. Any amount from $5 to $5,000, or more, can be used successfully. *N. Y. Baptist Weekly*, September 26, 1873, says, "By the combination system $5 would make $75, or 5 per cent.; $50 pays $750, or 7 per cent., $100 makes $1,500, or 10 per cent. on the stock during the month according to the market." *Frank Leslie's Illustrated Newspaper*, June 28: "The combination method of operating stocks is the most successful ever adopted." *New York Independent*, Sept. 12: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." *Brooklyn Journal*, April 29: "Our editor made a net profit of $101 from $20 in one of Messrs. Lawrence & Co.'s combinations." New circular (mailed free) explains everything. Stocks and bonds wanted. Government bonds supplied. Lawrence & Co., Bankers, 57 Exchange Place, N. Y.

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, MAY 29, 1879.

THE CALIFORNIA FARMER READING ROOM,

AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, ONE DOLLAR for five lines or less of space in Nonpareil type, for one insertion, fifteen cents a line for any larger space. Each subsequent insertion ten cents. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞ Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also.

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,

PUBLISHERS CALIFORNIA FARMER,

San Francisco, Cal.

Editor's Chair.

Home.—We invite our readers to the excellent article on "The Blues" in our Home column, it is very appropriate now when so many have the *Blues*.

"Matrimonial Courtesy" has most admirable counsel to both "husband and wife," an excellent sermon, which if duly observed by both will add much to the happiness of both parties.

"A Sensible College," Iowa has shown good sense in the teachings of their Colleges.

"The Next Best Thing," a very excellent lesson as we say to thoughtless husbands—they should certainly go hungry, who will not provide that which makes the *fire burn*.

"Perfume on Health" should be read.

Our Poets' Column.—We have been favored with a most excellent Poem by our kind Correspondent, W. G. B. "Coming round the Curve," a poem full of good counsel. We hope to hear often from W. G. B.

"The Ring my Mother Wore," is full of tender love and affection, and will come home to many a loving and devoted heart.

"Tried Gold" is most excellent and true.

Horticulture.—The chapter on "Fragrant Woods" should have special attention of owners of large tracts of land that can be made to yield large returns.

"Uses of Ferns" is worthy of more than a passing notice, there is important knowledge conveyed in the article.

"Australian Gum Trees," more and more the great value of these trees are being made known, they are truly the wonders of the world.

"Fertilizers" no State in our Union is so neglectful of the vast importance of *good fertilizers* for the soil as California, the cultivators of our soil are robbing it year by year, and land that once yielded 40 to 50 bushels wheat to the acre, now only returns 10 to 20, because the soil has been impoverished by a constant cropping of 15 to 20 years, and nothing done to restore the land to fertility.

Miscellany.—We call attention to the very interesting article on page 79, giving the "Highest Inhabited Point" in the United States, not only this, but the highest on the Globe, this knowledge should be extended, this shows that the American people are *higher up* in civilization than any other Nation surely.

"Honorable Politics."—Here is a chapter worthy serious consideration now when the people of our State having so important a duty as the making and establishing a "New Constitution."

Agriculture.—"How we Saved the Old Farm" we give chapter 7, and we know hundreds of readers have been not only delighted with it but wisely instructed by it to their great gain, by these admirable hints so well pictured.

"Deterioration of the Potatoe" our growers of this important and great product of our State can learn a valuable lesson by this article.

"Australian Cattle and Sheep," here we give important information for our Stock growers.

Read about "Vermont Sheep Breeders Books."

Our Front Page.—Our "Paris Letter" has important information for our readers as usual.

Yosemite Valley.—This is now the great season of travel to this most wonderful temple of natural beauties—we give a most admirable letter from our esteemed Correspondent, Galen Clark, Esq., Commissioner of the Valley, that will be read with delight.

Mr. Clark by his letter shows that he is the very man for *Guardian of that great Valley*.

Many articles on Front Page will be read with interest.

Yosemite Valley Pictures.—Lovers of the beautiful must not forget that "Watkins" is the true delineator of Yosemite, his Gallery of Art should be visited by all.

SEASON---PROSPECTS---CROPS.

The present may truly be said to be a most remarkable season for California, in fact we have never had one of such peculiar and sudden changes, from frosts that have nipped vegetation to sudden warmth; from clouds and rains repeatedly and late in the season, to bright, prosperous and quick growing weather.

It is admitted by the cultivators generally in every county that crops everywhere will be large and full, our Grain Crop by reason of our late rains will come up to a full and in many sections an extra yield, and especially the late sown grain, much of which was designed for hay will now make a good yield of grain.

The *Fruit Crop* will in many places be an unusual large yield that will require that a vast amount shall be *dried* and *preserved*, already a large amount has been thus used up, and more will be put up this season than ever before.

The *Vineyard Harvest* also promises to be a very large yield, and we think more Wine will be made this year than ever before, and better wine too.

The *Hop Crop* will not be large by reason of the badly depressed market and low price of Hops here and abroad, the many shipments resulting in a loss to shippers, many hop fields not being gathered.

The *Wool Clip* now excites attention by reason of a quick rise in values East, and an advance of about 25 per cent. on choice lots, the Eastern manufacturers buying very largely.

The *Honey Crop* which is now one of the articles of large export and of large value, though the yield of Honey will not be as large this year, it will approximate to 750 tons, *a large amount of sweetness*.

With such a goodly prospect of crops and with such large resources for our State, it is most unfortunate that a commonwealth so rich within itself should be depressed in all departments of business by apathy and dullness, and a restricted circulation of *money*, the very "life blood" of business, and this by reason of a host of political jugglers of all parties, who now are laboring each for themselves, with the resolution to "Rule or Ruin."

When will our best citizens throughout our State rise up in the majesty of free men and elect rulers that shall save this glorious State from further misrule.

Unless there shall be this effort and union among our business men and unless they shall assist one another and show a generous forbearance, the creditor to the debtor, what has heretofore been considered a dull state of trade, will be greatly increased and matters will go on from bad to worse until the end comes.

The present political battle just over, seems but a foreshadowing of a greater battle yet to come—for it is now a general belief that the ultimate fate of California, its weal or woe, will depend upon the coming election in September, and if old political hacks and wire pullers of other days are to control our elections, it were better good men emigrate to some other country.

JUBILEE IN YOSEMITE VALLEY.

The middle of June the great gathering of those who are interested in the cause of Sabbath schools from all parts of the United States are to assemble in the Yosemite Valley.

Some 500 persons are now on the way here for this grand convention of the *friends* and *guides* of *children*.

What a grand thought, Yosemite Valley, God's most beautiful Temple is soon to be the place where amid scenes of beauty unequalled by any other spot of earth, there beneath the mightiest and loftiest cataracts in the world where rainbows dance in the sprays of many waterfalls and beneath rocky domes a mile high, a thousand voices will unite to sing that glorious old time song "Old Hundred."

"Be thou O God exalted high
And as thy *Glory* fills the sky."

Then, as the echo of this Anthem shall cease there shall come the still small voice, saying:

"Suffer little children to come unto me."

for this is the mission of this great number that will soon meet in the Valley where all Nature is constantly sending up anthems of praise to the God of all created beauties like the Temple he has reared in this Valley.

THE HAY MAKERS.

As usual in May season when hay makers begun their work of cutting and making hay we are always sure to have a good rainy spell, so as to catch hay makers at their work, this has been the case with but few exceptions for all past years.

Rains have fallen every year with rare exceptions in May; in 1860 we had remarkable rains, 61, 62 and 63, and so on since, what influence the cutting down large fields of grass, its changes and the influence of its gasses and vapors may have upon the atmosphere to induce rains, theorists and scientists can study and decide, this is quite certain that it does affect the atmosphere and may be a predisposing cause to a certain extent.

The rains which have been unusual this year more so than any year in the past, even 1860 has done some injury to hay in the field, but large quantities that cannot be restored and saved for dry hay can be *fed to stock*, and thus saved from total loss.

The loss to hay makers however will be more than made up to the grain growers, as this rain upon late planted grain will add from 10 to 25 per cent. to the yield, while our cornfields, potatoe crops, bean crops and all vegetables will be largely benefited by the rains.

There is no unmixed evil—so if some who lose *complain*, there are more that will *rejoice*—and thus there can be found always

A silver lining to the cloud.

Bills Sent Out.

We would hope that those of our patrons to whom we have sent bills, will kindly remember that a good many *little sums from each* would be of great advantage in times when money is of value.

OUR FARMERS GREAT MISTAKE.

We feel assured that our farmers will too soon see they have made a sad a grievious mistake in arraying themselves as they have done against capital, meaning in their late warfare, railroads, banks, capitalists, and the moneyed interests of the State generally.

We fear many of our farmers who have mortgaged estates, and we regret to know the number is quite large, and many more, even a large majority of them also are more or less indebted to store keepers in their own towns, and also in this city, for their harvest machinery, that will feel that in entering into this political warfare are bucking against capital, is like a man with his head in a 'lion's mouth,' who would attempt to bite the *lion's tongue* his own life would pay the forfeit—and so now for those persons who have thus unwisely acted, will find that as their course has endangered public confidence and credit generally, they will be the first to feel the pressure and will be called on to pay up their mortgages and other debts, at short notices.

The farmers will find also, that the injury done to business credit generally, and which is producing a scarcity of money and a stagnation of business, will prevent them obtaining the means for harvesting their crops the present year, their short sighted policy in thus battling against capital, has cut off their avenues and sources whence their aid was to come in "harvest season."

No one can more deeply regret this fact than ourselves, and our farmers must remember, this Journal *warned farmers in season*, and worked hard at our own cost hoping to aid the farmers to take the right course, and while we feel that every man is free to act as he pleases, we knew beforehand that it would be worse than madness for men largely in debt to *banks* and *capitalists* to warfare against them, for whosoever saw the case case of a *victory against capital*—there is a true scriptural text that should be remembered,

"It is hard to kick against the pricks."

Our farmers suffer often from a *drouth*, but they will soon find that a harder case than an ordinary drouth is on the land—for when the well runs dry, water ceases to flow, and now when banks and capitalists, from whence they formerly obtained money for harvesting their crops say NO! a greater drouth will fall on them.

There will be no Freidlander this season to aid them, nor will they find another Ralston to help them over the harvest, and the large amount of unpaid indebtedness of past years from our farmers to merchants in our city, now compels them to say as a general rule to the farmer, "no more credit, we sell for cash."

With the facts before us that mortgages *must be paid up*, and this too at the opening of the *harvest season*, where can our farmers look for aid?

How can they buy their headers, harvesters and threshers, and how can they pay for their bags for their grain?

Farmers, we repeat, we regret deeply the great mistake you have made, that while you were in debt, you should battle against the very source whence your aid could come—now, again remember—for, as Richilieu said to the King, so we your true friend would say to you, "Pause, Sire, pause and reflect."

The Santa Clara College.

This truly distinguished College and most admirable Educational Institution has its Twenty-Eighth Annual Commencement Exercises and Exhibition on Monday and Tuesday of next week.

This College is in a most flourishing condition and with nearly two hundred students is sending out annually many most estimable graduates.

Santa Clara College under its most excellent President and its devoted Fathers as Professors occupies a proud place on the Roll of our Educational Institutions, its libraries, its many museums of science, and its unequalled philosophical apparatus, gives to this College great prominence.

The coming Festival will offer to our citizens a most happy occasion for a grand intellectual feast and a pleasant trip to one of the fairest Valles in our State, a view along the route and from the College observatory that would pay a journey of a thousand miles, and also the assurance of a happy welcome from the Fathers of the College, to add zest to the enjoyment.

May Day Celebrations.

The month of May is noted always as the "Month of Celebration," our Colleges, our Public and private schools, our Benevolent institutions, our Masonic, Odd Fellows and all similar associations take the "month of May" as the season for a rural, social Festival, while the colleges and schools hold their annual examinations and exhibitions where intellectual and social meetings and enjoyments make the month of May so noted everywhere in our Country.

The present year however, we think there has been less of the general outdoor gatherings than usual, and undoubtedly the state of trade with its depressing influences has prevented the attendance of many that otherwise would have swelled the ranks of the merry May Day scenes, yet there has been and will be much social and intellectual enjoyment and progress in spite of every drawback that interposes.

The month of May, beautiful May
The season of sunshine and flowers,
To the hills and the vallies away, away,
And there spend a few happy hours

How to Rule.

The people of our City have been a little puzzled at the liberality and courtesy of the Fireman Fund Insurance Co., who have lately sent out many thousands of neat *desk rulers* a foot long, marked in inches, and these are sent with the compliments of the Company.

While the name of the Company serves as a good *advertisement* to draw attention and make business, there is a *cute meaning* conveyed by this little weapon which all do not understand, for having sent many thousands all over the country modestly,

Yet this is their object, and this they can boast
Their business increases, and they RULE THE COAST.

SYDNEY INTERNATIONAL EXHIBITION.

Very great interest is now being awakened in all the Australian Colonies and in Europe and also in the Eastern States for the coming International Exhibition at Sydney, next September.

There will be quite a large delegation of merchants and business men go on from the Eastern States, and a large amount of Goods, Agricultural Implements, Machinery, Furniture, Inventions and Goods in every department of business.

Everything that is usually shown at our Mechanics' Fairs will be sent on from the East, and if our people here are but alive to their own interest and desire the Pacific Coast to be known and truly represented, they will not delay a moment in making due preparation for this Exhibition.

The Pacific Mail Steamer leaves here for Sydney 9th of June, and again in July, and what is done must be done quickly, it would be worth A Million of Dollars to have California and the Pacific Coast duly and fully represented at the Sydney Exhibition.

In order to facilitate and aid in this work we called on the Agent of the Mail Steamers, H. B. Williams, Esq., and he informed us that the Steamers will take all Goods for this Exhibition at rates equal to Half Freight, *i. e.*, the freight to be paid down in full and returned Free—for so great a distance this is surely a liberal offer.

All who desire to learn of this Great Exhibition can know all the particulars and see plans of the Buildings, the Grounds, Rules and Regulations, Forms of Entry and every particular, and also find *full* files of all the leading Australian papers at Farmer Office.

We have received all the Maps, Plates and all the documents from the Office of the Commissioner of the Exhibition, so we can give Official particulars, and to all who are interested will gladly aid in this work.

GOOD WORDS FOR US FROM AUSTRALIA.

We feel very grateful for the kind words spoken in our behalf by one of our Exchanges from Australia, the *Maryborough and Donolly Advertiser*, and tender them thanks for their neighborly courtesy and good wishes, we also return acknowledgments for many good words from our Australian friends and shall endeavor to merit them.

[We give the words of our friends below.—Ed. F.]

"That widely known American agricultural Journal, the California Farmer, continues to be remarkable for the amount of attention that it devotes to Australia affairs. The last number of that Journal contains quite a number of reports, paragraphs, etc., relating to these colonies; a large proportion of its space being occupied by an article on South Australia, as "the future granary of the world;" a lengthy description of the Botanical Gardens at Brisbane; a long series of notices of various official reports and private works about the various colonies; a brief editorial congratulating Mr. Angus Mackay, of Queensland, who was commissioner for the colony at the Philadelphia Exhibition, on his election as a member of Parliament, and other paragraphs of a like nature. The Farmer, in the same issue, says:—"It has ever been our pleasure to do what we could to promote the great and growing interests between New South Wales, New Zealand, and all the Australian colonies, as we believe a large and vast trade must eventually be done between that country and all the Pacific Coast." Certainly that Journal has always kept this object in view; no American paper has done more to correctly inform the Americans with regard to the position, resources, and prospects of the Australian colonies, and none, perhaps, is more worthy of Australian support. Apart from its well-known interest in the colonies, and its commendable desire to promote and extend our trade with America, the California Farmer has much to commend it to the support of Australian readers, which, indeed, it seems to be already receiving to a gratifying extent.

THE NEW FRUIT DRYER.

The new fruit dryer now advertised in our columns, as the Hampton & Kelly and Kelly & Cole's patent, has proved a most excellent invention and wherever used shows excellent results.

Mr. Alfred B. Collver now canvassing this coast in behalf of this invention, has been appointed by Thompson Kelly and Hon. W. P. Watson, of Multnomah and Wasco Counties, as agent for the sale and use of said dryers, and also for the grinding machine for preparing, condensing, and preserving and drying fruits, vegetables, meats and fish; the said dryers prepare all without any deleterious or poisonous matters which result from soldered canned goods, and these thus dried and preserved will keep to an indefinite period, even when exposed to atmospheric changes from heat to cold, or from wet to dry, in all the variable elevations of our Pacific slope.

Jams and jellies prepared by this dryer keep without tops or coverings and retain all the flavor of closed jars—as these and various preserved fruits have kept perfect from 1875 to present time.

Mr. Kelly prepared samples which were taken on a ship and carried to London and exposed on the voyage through the tropics, yet were still in perfect order for all use after months exposure thus.

Milk and cider has been dried perfectly and changed to jelly, and both retaining qualities to be again used perfectly, and these preparations taken on voyages to Australia and China, proving valuable preparations. Many preparations by this excellent fruit dryer can be shown, thus giving it a high reputation.

Mr. Collver is now in Oregon presenting the merits of this dryer, and will be in California soon to manufacture and sell this invention, information of the dryer can be had at Farmer office.

Thanks.—We are indebted to Samuel Miller Esq., of the Yosemite Stage Office for courtesies, and also to Messrs. Matteson and Harrison of the Oak Flat Route, for Illustrations and courtesies, also routes of travel, etc., for which we are duly grateful.

DEATH OF MR. J. G. RAPHAEL.

One of the most estimable citizens of Sydney has gone to his last account. Mr. Joseph G. Raphael, well known for his connection with philanthropic institutions and his unbounded charity, died at his residence, Elizabeth-street north, last night. The cause of death was debility, from which he had suffered for more than two years. Latterly he became extremely weak in bodily health, but his mental faculties were unimpaired to the last, and through all his affliction he never lost that genial air of cheerfulness and good humor, which made for him so many friends. Mr. Raphael was born in London in February, 1813, and arrived in this city in the year 1839. His first employment here was as a clerk in a wholesale store, and he won his way to fortune by mercantile pursuits, having been in business as a merchant for twelve or thirteen years. For some fourteen years he was an Alderman of the city, and his name is associated with many useful civil reforms. He was also elected as one of the representatives of West Sydney, and in the Legislative Assembly in general election of 1872. But it was in social and not political movements that Mr Raphael proved his great usefulness, he having been a director of several of the charitable and philantrophic institutions of this city. He was also connected with some of the banking institutions of Sydney. His hand was always ready to assist the needy, and none ever applied to him for help in vain. His life was insured for a very large sum, every shilling of which he bequeathed to charitable institutions. The deceased gentleman leaves a widow, four daughters, and sixteen grandchildren.

We believe there is not a citizen who will not hear with regret of the death of Mr. Joseph Raphael.

[We copy the above notice of the death of Mr. Raphael from the *Evening News* of February 3d.

It was sad news to us, for it had been our privilege and pleasure to have enjoyed a correspondence and the courtesies of this highly valued citizen of Sydney, and to have esteemed him as an honored friend.

Deeply regretting his loss, knowing the value of such a man to every community, we must bow to the Will Supreme over us; we tender to his afflicted family and to all bereaved our true sympathy for their great loss.—Ed. F.]

AUSTRALIA.

AGRICULTURAL NEWSPAPERS.

Editors, strangers and citizens from the Eastern, the Middle, or Southern States, also Editors over our own Coast who may desire to see or refer to their own Journals, or any Agricultural or Horticultural Journals, will always find them on file in the Farmer Reading Room, to which they are always bid welcome.

One Hundred of the leading Journals and Magazines of this class, the best in the United States, are in this collection, giving to those in search of Agricultural knowledge the best Information on this Coast.

A Large Library also, for *General Reference*.

Australia and California

We have full files of Australian Papers from all parts of Australia, showing the great interest they take in this Country, one thing of great moment, is the "Steamship Line," it is of vital importance to the welfare of the Colonies, and so vastly important to the Pacific Coast in the great trade that can be built up between the Colonies and California, if our Merchants do their duty.

These Journals are arranged on file for the convenience of all who may desire to peruse them. We have as follows:—

The Sydney Morning Herald, Sydney.
" *Town and Country*, Sporting Paper, Sydney
" *Australasian*, Melbourne.
" *Weekly Times*, "
" *Adelaide Observer*, Adelaide.
" *Queenslander*, Brisbane, Queensland.
" *Week*, " "
" *Capricornian*, Rockhampton, Queensland.
" *Port Dennison Times*, Port Dennison.
" *Wide Bay and Burnett News*, Queensland.
" *Darling Downs Gazette*, Toowoomba, "

Many of these Journals are of the largest size, from 20 to 38 pages, several, splendidly illustrated with views of the Public Buildings, Landscapes, Public Men, Stock, etc.

Contributions from Queensland.

We Invite all our readers and our citizens especially who are interested in our Manufactures and the Mechanic Arts, and our Agriculture, to visit the Farmer Office and see the Rich Products brought from Queensland by the Commissioner, they are now on Exhibition open to all, in the Reading Room and Museum of the California Farmer Office.

The Buckeye Mower.

In almost every hay field in our land can be seen the popular Buckeye Mower, as it is now admitted to be the *leading Mower* in the market.

Messrs. M. C. Hawley & Co., are the Headquarters for this grand Implement, and they claim that there are more "Buckeyes" in use among our haymakers than any other Mower known, and perhaps twice or thrice as many.

The Mechanics' Institute Fair.

The grand fair of this Institution will once more open its doors for an exhibition on August 5th, and continue open to September 6th—every effort will be made to have the coming fair surpass all former ones, the work is progressing rapidly—we shall give particulars soon.

Sweet Potatoes in Florida.—The crop of sweet potatoes in Florida is about 400 bushels per acre—so says Dr. Mason.

FURST & BRADLEY'S SELF-DUMP SULKY RAKE.

The Attention of Farmers is called to the merits of this Rake, and its great superiority over all Self-Dump Rakes heretofore brought to the notice of the public. The Dumping is done by friction bands around the ends of the hubs giving full control of the Rake to the operator, so as to be able to carry the teeth clear of the windrow. This does away the necessity of ratchets and pawls which is so objectionable in all other Self-Dump Rakes. The teeth are of the BEST CAST STEEL and have a double coil which renders them capable of the most severe work.

Clarke's

LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury* or *other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

WARWICK, December 30th, 1872.

TO MR. DAVID CLARKE, Chemist, Warwick.

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed good *health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON.

LONDON BOARDING HOUSE, ALBION STREET,

WARWICK, September 23, 1874.

TO MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)

[illegible]
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus:

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for those medicines—now, such as you have that are good as liniment and internal medicines send me by Wells, Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia for *three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir:*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it, but if I must take it give me the Eucalyptus above all others. Yours sincerely,

GALEN CLARK,
Commissioner Yosemite Valley.

A highly valuable testimonial has been received at the Agency, which we have been kindly permitted to use, and, coming from so high a source, we feel it a duty we owe to the public to give it the following letter

SANTA CLARA, SANTA CLARA COLLEGE.

COL. WARREN—*Dear Sir*

Heretofore we have had no occasion of trying the Eucalyptus Medicines, in Pills or Liquids, but we have commenced to use them, and we find them very beneficial; some of our Fathers find a great relief in their complaints; the consequence is that we want more Medicine, and we ask you to send us One Dozen Bottles of the Liquid, and One Dozen Boxes Pills, and Half Dozen large Boxes, and I shall send you the results. Please send bill. With best wishes for your welfare. Yours respectfully,

A. CIENI, S. J.

At later date we received the following, another proof of the virtue of this Medicine:

The Pills we find to be a mild and beneficial cathartic. The Liquid Extract is a valuable Blood Purifier and a good appetizer. A. CIENI, S. J.

The above from Prof. Cieni, the well known and truly distinguished Chemist of Santa Clara College, we esteem an approval of so much value, that all who suffer from any of the above diseases, can be assured of the high merit of the Eucalyptus as a Remedial.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved and cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, mere imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you David Clarke's Australian Pills—the only genuine.

Written for THE CALIFORNIA FARMER.

COMING ROUND THE CURVE.

W. G. R.

There is a clever maxim,
Which I would on you impress,
Whether in joy or sorrow,
In pleasure or distress,
To keep your wits about you,
And faithfully observe,
To look out for the engine
When it's coming round the curve.

Should business cares oppress you,
And times seem hard and drear,
An honest heart and sunny smile
Will all your future cheer.
Put on the brakes, keep a sharp look out,
The maxim well will serve,
If you blow your whistle lively
When you're coming round the curve.

If a gay coquette should charm you,
With eyes and hair like night,
To make your poor heart flutter,
And telescope it quite.
You bring to mind this maxim
And then (without reserve)
To hoist the danger signal
When she's coming round the curve.

To do your duty manfully,
To cleave unto the right,
Will make life all the happier
And your joys will be more bright,
If you leave the wrong behind you
And from the right ne'er swerve;
The engine will not harm you
When it's coming round the curve.

And when the grim destroyer
Shall stare you in the face,
Remember that the lot of all
Is a final resting place.
Don't let this thought unman you,
But be a man of nerve,
But look out for the engine
When its going round the curve.

THE RING MY MOTHER WORE.

The earth has many treasures rare,
In gems and golden ore;
My heart hath one, more precious far—
The ring my mother wore.
I saw it first, when I, a child,
Was playing by her side,
She told me then 'twas father's gift
When she became his bride.

I saw it oft in sorrow's hours,
Which marked the after years,
When shining on the soft white hand
That wiped away my tears
And, oh! I saw it once again,
When, on her dying bed,
She lifted up her hand in prayer,
And laid it on my head.

Beside that bed, where fell my tears,
The ring to me was given;
She placed it on my hand, and said,
"We'll meet again in heaven!"
I kissed the cheek I oft had pressed,
From which the rose had fled;
And, bowed with grief, stood motherless,
Alone, beside the dead.

Among the blest in realms above,
Where sorrows are unknown,
Oh, may I meet my mother dear,
No more to weep alone.
Her dying words of love and faith
I'll cherish evermore
Within the heart which holds so dear
The ring my mother wore.

TRIED GOLD.

Get the spindle and distaff ready,
God will send the flax;
So makes the bee, from summer flowers,
Honeycomb and wax.
Work the six days, pray all seven,
Trust the rest to the grace of Heaven.

Cast thy bread upon the waters,
Ask not gain or praise;
Then shalt eat it fresh and sweet,
After many days.
Work the six days, pray all seven,
Leave the rest to the grace of Heaven.

Winds may blow, but the tree God planteth
Taketh deeper root;
Winds that shake it can not break it,
It shall bear good fruit.
Work the six days, pray all seven,
Leave the rest to the grace of Heaven.

Never wish for tarnished wages,
Fraud and lying pay;
Unto every evil doer
Comes the evil day.
Work the six days, pray all seven,
Trust the rest to the grace of Heaven.

He doeth well who doth his best,
He doeth well who strives;
Noblest efforts may sometimes fail—
Never noble lives.
Work the six days, pray all seven,
Trust the rest to the grace of Heaven.

A Glorious Sight.

A pleasant sight met our gaze on Friday afternoon, when we beheld two brothers representing two important lines of trade, in pleasant, social converse in the dry goods establishment of the eldest brother. Both have passed the age of threescore, yet are remarkably well preserved, and each in their separate line of business have always taken a front rank in the market. They had on this occasion thrown off the breaks of care and were having a brotherly social time.

"Pa," said a little boy, five years old, "I saw a lion and a lamb lying side by side in the meadow this morning." "Tut, tut, James, don't tell such stories" said the father. "I tell you I did," persisted the child, "but it was a dande-lion."

THE BLUES.

As the spring season comes on, almost every one begins to suffer more or less from this intangible but very decided complaint. It would seem as if the lovely spring days, the warm sunshine, the sight of budding trees and springing flowers, would put new life in our veins; and, to a certain degree, they do freshen us and do us good; but we almost all overtax ourselves in the spring. If there is any season of the year when children should be leniently treated as to lessons, it is in the spring. Housekeepers that are wise will clean house in the fall; the spring cleaning is a sure precursor of colds and nervous fevers and utter prostration.

But before, or sometimes in the place of, colds and fevers we have the "blues." Things are no worse than they were a month ago, but we can only look on the dark side. If Bridget breaks a dish, it is always, at this season, the one you cared for most. The children's mischievous pranks are almost unbearable, and it seems as if John whistles "Silver Threads Among the Gold," so indefatigably just to aggravate one. "I feel cross and nervous and tired—you ought to feel so, too," is, I fear, the secret opinion of too many of us when we feel "blue."

Now a man, when he is in this mood, generally knows how to treat himself. He will manage a half holiday, by hook or by crook, and take a brisk walk, or, if that is impossible, he will determine not to think of his anxieties until he is in better spirits. But a woman—especially young women and girls—act so differently.

Mary "feels blue," so she does not exert herself to dress, but sits sewing—the very worst thing one can do when low-spirited; or, being a very conscientious girl, perhaps she suddenly remembers that she resolved some time ago to read Locke on the Understanding, or Bacon on the Advancement of Learning. She is about as fit to read such works as if she should undertake to eat a pound of beefsteak when she had not a particle of appetite. She sits and pores over the book and wonders that things look horribly dull and flat to her all day!

I venture to say if Mary had given herself a good day's work, such as sweeping and dusting her room, arranging her bureau, etc., and then taken a brisk walk, taking a little thought as to her "best things," would have vanished.

But again, a young wife and mother feels blue. She has been looking over the children's clothes and sewing for dear life for a week past. Bridget is saucy, and somehow the pretty home that she loves so much seems narrow and confining. I say to such a one, at almost any cost get out of your own house, for a day at least. It is good for us to hold our children and husbands off at arm's length, once in a while, as an artist does his picture; we get a better view and forget the little blotches here and there that annoyed us.

I have a friend who says whenever she feels blue she puts on her best clothes, and really some of us will find that will do us good. Find out some one to help or to cheer if you can, but do not refer to your down heartedness. The moment we confess a feeling, be it love, hatred or low spirits, we intensify it. Act and speak cheerfully and you will find you are feeling brighter soon.

I should like to whisper a word to some of the husbands scattered through the land. In the spring of the year "mother" gets nervous—she snaps at the children, tells Tom too sharply to "stop that whistling," and perhaps suddenly breaks down and takes to her bed. The poor husband is completely surprised—can't understand the matter at all. He goes to his business, or works upon his farm day after day, and is in and out from morning till night. He sees his business friends from day to day, and seldom is troubled with the children's racket, for they are trained to be quiet and to have everything in order when papa comes home.

But all through the long winter how different it has been with the wife. She has been, from morning till night, from week to week, and month to month, with three or four children constantly demanding her care, her thought and patience. Her servants are a care, and part of the time, if in the country, she may have been without any. In nine cases out of ten, she has not been free from this care, away from the four walls of her home, for two days at a time within six months. She needs to breathe a new atmosphere, to see some other scene than the home scene, be it ever so lovely.

You propose leaving home—she "can't manage it," but this should not be allowed. Let us women be more unselfish in the matter. If you have a friend who is tied to her home by the care of two or three children, can't you offer to keep house for her for a week or two? Even suppose you merely exchange houses for a time—any change is good.

If more husbands would but realize that their wives must have their holiday from the care of children and servants, and that this holiday had better come in the spring of the year, I am sure that we should have fewer people suffering from the blues. But there are some who are tied to their post; who have no choice—is there no help for them? He who gave them their lot in life is ready to give them strength to bear it; but they must ask for that strength, and the great trouble is we forget that we do not get strength for the morrow's task. Go for the daily, the hourly task, being sure the work we are doing is our's, not another's, and we will never be refused.

I must add one word to explain that "not another's." Women—Christian women—are so foolish in this matter. Perhaps they are told by a thoughtless husband to make bricks without straw, and instead of just not doing it, they turn, and twist, and contrive, and what comes of it? Having managed once, they may do it again. As long as there is money for tobacco and cigars there is no need of a woman wearing her strength out day after day to do the work of two. Where there is no money, of course, the task is really hers, and she must try to do it. In the same way many a mother toils from morning till night, doing work she should leave to her daughters. Taking the burdens of others is not always our duty, and when we are not in the path of duty *we do not get strength*.—HOPE LEONARD, in *Christian Union*.

MATRIMONIAL COURTESY.

There is no greater bane to domestic happiness than excessive familiarity, and yet there is nothing that more frequently follows the conjugal tie. Before marriage there is a mutual effort to please; there is mutual deference, mutual respect; all of which preserves love in its freshness, and causes the object of admiration to appear endowed with charms beyond those which nature and cultivation may have bestowed. No sooner, in most cases, has the vow been pronounced which makes the tie indissoluble, than all the arts of courtship are neglected and forgotten. This should not be so, for the happiness of the married state is thus dangerously jeopardized. On all principles of sound philosophy, the husband is entitled to at least as much attention and consideration as the lover received, and the wife should be the recipient of more care, consideration and solicitude than were bestowed upon the affianced bride; but how often are these relative rights and duties observed? The honeymoon is scarcely over when the gentleman lounges about the house, smokes his cigar where he pleases, elevates his feet on the mantel-piece, gives utterance to ribaldry or profanity, and talks to his wife in a style that he should not venture to use to a domestic; and on the other side, the picture is just as bad. The lady who was so neat, tidy, elegant and graceful before marriage, has become absolutely untidy and slovenly. She arranges her hair, and dresses for strangers, but anything will do to wear before her husband; nor is the looking glass consulted that he may be pleased. There is no deference paid to his wishes when expressed, and there is no attempt made to ascertain what his wishes may be. Carelessness and familiarity go hand in hand until mutual respect is entirely destroyed, and love becomes an attenuated shadow, or a ridiculous mockery. And what follows then? Either a life of perpetual jarring and strife, or a divorce—a divided household and a stigmatized family.

There must be familiarity between husband and wife; there may be familiarity between friends, but if either overstep the bounds of respect and decorum there is great danger to the association. The husband should give utterance to no thought or language in the presence of his wife that ought to shock the mind or the hearing of any other lady, and he should make her the first consideration, above all others. His respect would beget reciprocal solicitude on her part, and her solicitude would be calculated to produce a like result in him. If but a tithe of the care, which was expended in gaining the affections, should be employed in preserving them, there would be a marked diminution of domestic unhappiness, and one branch of practice would gradually disappear from the jurisdiction of the courts. Conjugal courtesy should be a study more important than all the poetry and romance in any literature, for on its practice depends greatly all the poetry and romance of conjugal life.

[A writer in *Woman at Work*, J. A. N., presents a very true picture of what married life should be, and which by reason of the non-fulfillment of these all important duties, the many family wrecks that are presented in our courts are the fruits of it.—ED. F.]

THE NEXT BEST THING.

"Mr. Moncton," said my grandmother, "I have no wood to burn to-day. What shall I do?"

"O, send Louisa around to pick up some," said the good man, making a stride toward the door.

"But she has picked up all she can find."

"Then let her break up some old stuff."

"But she has broken up everything already."

"O, well, then, do the next best thing—I must be off," said the farmer; and off he was, whistling as he went, and no doubt wondering in his heart what the next best thing would turn out to be. Noon came, and with it came my grandfather and four hungry laborers. My grandmother stood in the kitchen, spinning on her great wheel, and singing a pleasant ditty; Louisa was scouring in the back room, and the cat purring on the hearth before a black and fireless chimney, while the table sat in the middle of the room ready for dinner with empty dishes.

"Well, wife, here we are," said my grandfather, cheerily.

"So I see," said she, placidly. "Have you had a good morning in the cornfield?"

"Why, yes; so-so. But where is dinner?"

"In the pot on the door-step. Won't you see if it is done?"

And on the door-step, to be sure, sat the great iron pot, nicely covered, but not looking particular steamy. My grandfather raised the cover, and there lay all the ingredients of a nice boiled dinner—everything prepared in the nicest manner, and all the vegetables as raw as they had ever been. My grandfather stared, and my grandmother joined another roll to the yard upon her distaff, and began another verse of her song.

"Why, woman, what does this mean?" began my grandfather, indignantly. "This dinner isn't cooked at all?"

"Dear me, is it not? Why, it has set in the sun these four hours."

"Set in the sun!"

"Yes; you told me to try the next best thing to having a fire, and I thought setting my dinner in the sun was about that."

My grandfather stood doubtful for a moment, but finally his sense of humor overcame his sense of injury, and he laughed aloud. Then, picking up his hat, he said, "Come, boys, we might as well start for the woods. We shall have no dinner till we have earned it, I perceive."

"Won't you have some bread and cheese before you go?" asked my grandmother, generous in her victory, as women always are. And so she won the day."

[Here is a capital lesson for many thoughtless husbands, who leave their wives to do the chopping of wood and hauling water and never lift a helping hand.—ED. F.]

Beauty, like the flowering blossoms, soon fades; but the divine excellence of the mind, like the medical virtues of the plant, remains in it when all those charms are withered.

A SENSIBLE COLLEGE.

Girls are admitted to the Iowa Agricultural College and taught all sorts of queer and absurd things. For instance, the authorities there have the funny notion that girls ought to know how to cook! Every girl in the junior class has learned how to make good bread; weighing and measuring her ingredients, mixing and kneading and baking, and regulating her fire. Each has also been taught to make yeast and bake biscuit, pudding, pie and cake of various kinds; how to cook a roast, to broil a steak, and make a fragrant cup of coffee; how to stuff a turkey, make oyster soup, prepare stock for other soups, steam and mash potatoes so that they will melt in the mouth, and, in short, to get up a first-class meal, combining both substantial and fancy dishes, in good style. Theory and manual skill have gone hand in hand. Vast stores of learning have been accumulated in the arts of canning, preserving and pickling fruit, and they have taken practical lessons in all the details of household management, such as house furnishing, care of beds and bedding, washing and ironing, care of the sick and numerous other things. It is not stated whether the girls are taught how to get up in the morning and build fires, but no doubt such a useful branch of information receives the attention its importance demands. It is hard to see what use a modern young lady can make of these lost arts. These things can't be done in a parlor, with nice gloves on. Such a course of instruction must totally unfit a young lady for the grave duties of life, such as flirtation, reading *Ledger* stories, gossiping and all things of this nature that must be attended to. Still, it is just possible that numbers of sensible young men can be found who will just be idiotic enough to marry these Iowa girls in preference to the nice young ladies, whose knowledge of housekeeping ends at piano pounding and handkerchief flirtation.

Effects of Perfume on Health.

We learn that an Italian professor has recently made some very agreeable medicinal researches, resulting in the discovery that vegetable perfumes exercise a positively healthy influence on the atmosphere, converting its oxygen into ozone, and thus increasing its oxidising influence. The essences found to develop the largest quantity of ozone are those of cherry, laurel, clover, lavender, mint, juniper, lemon, fennel and bergamot; those that give it in smaller quantity are anise, nutmeg, and thyme. The flowers of the narcissus, hyacinth, mignonette, heliotrope, and lily of the valley develop ozone in closed vessels. Flowers destitute of perfume do not develop it, and those which have but slight perfume develop it in small quantities. Reasoning from these facts, the professor recommends the cultivation of flowers in marshy districts, and in all places infested with animal emanations, on account of the powerful oxidising influence of ozone.—*Medical Press.*

GRAND TRIUMPH FOR EUCALYPTUS.

EUCALYPTUS WILL CONQUER DISEASE.

We publish the following strong TESTIMONIAL in favor of the GRAND REMEDIAL POWER of the Eucalpytus, prepared by DAVID CLARKE, CHEMIST, of Australia.

This Testimonial comes from a prominent Merchant of this City, whose name is with us for reference for all who suffer and would be relieved.

SAN FRANCISCO, April 7, 1879.

EDITOR CALIFORNIA FARMER—*Dear Sir*

Some time ago I had the misfortune to sustain a dislocation of the shoulder received from a fall, and while I was suffering the most acute pain as the effect of it, so much so as to be deprived of my sleep nights, I met my old friend, Col. Warren, who presented me with a bottle of "Eucalyptus Oil" saying as he did so, "try it." "bathe the shoulder and arm well, and on retiring saturate a cloth with the oil, and bind it to your shoulder, and you will have no more sleepless nights on account of pain from that." I followed the Colonel's directions, and must say that the Eucalyptus Oil will do all that is claimed for it as an alleviator of pain (rheumatic and otherwise) and more too.

A preparation made from the Eucalyptus Trees, by frequent ablutions of the eyes will restore weak eyes to strong ones and positively restore the sight as good as ever to people whose eyes are failing, if they will keep their body in good condition by the use of Eucalyptus Pills—while using the eye wash. Yours truly, G. H. B.

N. B.—There are many compounds made in this State, yet however good, the *genuine* Remedials are those prepared by David Clarke, Warwick, Australia, for sale by Warren & Co., Agents.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own home.

PATTI. I have used the Pianos of every celebrated make but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLL. Madame Parepa called your Pianos the best in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your instruments surpass my expectations, and I rank you justly as the Foremost Manufacturers of the day

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

Santa Clara College, S. J.

SANTA CLARA, CAL.

THE TWENTY-SEVENTH ANNUAL SESSION OF THIS Institution will be resumed Thursday, January 8d.

This Institution was founded in 1851, and in 1855 was incorporated with the privileges of a University. It occupies six large buildings with extensive shady playgrounds, covered gymnasiums, swimming pond, etc.

It possesses a most complete philosophical apparatus, and valuable collections of mineralogy and geology. It has also practical schools of Assaying, Surveying, Telegraphy, Photography, and Commercial business. For the latter a new building 185x40 has just been finished that leaves nothing to be desired.

Diplomas are given in two Departments, the Classical and the Scientific, and certificates in the Commercial course.

TERMS—(Payable semi-annually in advance) Matriculation fee, to be paid but once.....$ 10 00
Board, Lodging, Tuition in all branches, Washing and Mending of Linen, School Stationary, Medical attendance and Medicine, Baths, etc., per session of ten months..... 250 00

For further particulars apply to the President of Santa Clara College, or to St. Ignatius College, 841 Market Street, San Francisco

THE HIGHEST INHABITED POINT.

SOMETHING ABOUT THE LIFE OF THE SIGNAL SERVICE OBSERVERS AT THE TOP OF PIKE'S PEAK.

[A correspondent of the *Boston Journal* gives the following very interesting sketch of that wonderful place. "Pike's Peak," believing our readers will be interested in it, we give it.—ED. F.]

The United States Signal Service Station at Pike's Peak is the highest signal station in the world; it is also the highest inhabited portion of the globe. It was opened in the month of September, 1873. That it was a wise provision of the government in establishing a signal station at this point is no longer questioned, the facts having already demonstrated its practicability, and the present success promises that Pike's Peak Signal Station is yet to stand at the head of all astronomical and meteorological stations in the world. This point is wonderfully favored by nature for the study of astronomy and meteorology. The purity of the atmosphere brings out a remarkable brilliancy and clearness to the stars and all the heavenly bodies. The nights are almost always cloudless, and cloudy days are the exception. Nine-tenths of the storms are below the Peak. The best and most complete report of the last total eclipse of the sun received at Washington was the report of Prof. Loud, of Colorado College, from observations taken at Pike's Peak.

The signal station is now under the charge of Sergeants Choate, Blake and Sweeney. These men are detailed from the Army because of their peculiar adaptability and special qualifications for the accurate execution of the nice duties of taking astronomical and meteorological observations. To Sergeant Rufus Choate I am greatly indebted for the particulars embodied in this article.

The summit of Pike's Peak contains 60 acres. It is 14,336 feet above the level of the sea. On the highest point of the summit stands the signal station, a rough stone building, 24 by 30, one story in height. It is divided into four rooms—officer's room, kitchen, store-room, and wood-room. And here on this bleak spot, nearly 20 miles from the habitations of man, though three miles nearer the heavenly regions than most parts of New England, these men live the larger part of the year. The ascent is three miles from the timber-line, where the greater part of vegetation ceases. Short grass, inlaid with delicate Alpine flowers, struggle for an existence against the frigidity of the atmosphere, and creeps toward the mountain top; but soon there hundreds of acres of cold gray and reddish rocks where not a vestige of verdure exists.

Like the dwellers of the arctic regions, the inhabitants of Pike's Peak have but two seasons—summer and winter. Two months of summer—August and September—and ten long, cold months of winter. The season passes quickly. The atmosphere is congenial; the many visitors at the station enhance its social life with joy, woderment, and mirth. During the summer of 1873, upward of 300 people, in parties of from five to thirty, visited the Peak, among them many ladies. They gathered from the four quarters of the globe, and they all expressed an admiration and astonishment at the grandeur and sublimity of the wonderful views as seen from the Peak. To behold a sunrise from the Peak is an event of a lifetime, and for this purpose visitors often remain over night at the station, to be ready to catch the first glimpse of the sun as it appears above the horizon, flooding with its bright rays the mountains, hills, valleys, and plains, to the wonder and delight of the amazed beholder.

The duties of the officers are various. Seven observations are taken daily; all storms are closely watched and each special and distinctive characteristic duly recorded. Sunrise and sunset demand close attention. Every peculiarity of the heavenly regions is viewed and a record made of the same, and monthly reports of these records are sent to head-quarters at Washington. The present year has been unusually prolific in sun-dogs, which, it is said to pronosticate earthquakes, subterranean explosions, immense freshets, and troublous times. The government office at Pike's Peak is no sinecure, for the officer must buffet all storms and brave all weathers. Occasionally an electric storm visits Pike's Peak. There is but little thunder accompanying these storms, but the mountain seems all on fire. Sergeant Choate informs me that when he was out observing one of these storms it appeared as though the whole mountain top was a sheet of electric flame. It came out of every rock and crevice around with wonderful audacity. It played around him; and, as he expressed it, shot down from the sky and darted out of each boot toe, and so completely filled him with electricity that he could not retain his foothold, but bounded and rebounded from the rock like a rubber ball; he felt as though a powerful electric battery was pouring its darts all through him, and deeming "discretion the better part of valor," he bounded into the signal station for preservation. Sergeant Choate was at the Springs in December, and on December 21 he left for the Peak, wearing Norwegian snow-shoes 12 feet in length. It was a weary task and a dreary trip. The first night out he slept in the snow on the mountain's side. The second night the mercury fell to 20 degrees below zero. He sought shelter in a deserted cabin through which the wind whistled tunes anything but agreeable, here he built a small fire, but avoided sleep, fearing the extreme cold might produce the sleep of death. The third day he reached the station safely.

The summer months are also occupied in preparing for the long siege of winter. During the months of August and September upward of three thousand pounds of the usual variety of family stores, and about twenty-five cords of fire-wood are snugly stowed away. These are all carried to the Peak in small quantities, on the back of the poor, despised Burro, whose head has the appearance of being incased in cloth, and whose ears are nearly the length of his legs, and who walks at the pace of a snail, and a very slow snail at that.

HONORABLE POLITICS.

[In the EDITOR'S CHAIR of *Harper's Magazine for June* we find the following very just strictures upon *political matters*, it would be well if the Journals of this City and State would copy this article over some of their editorials as a contrast.—ED. F.]

Honorable politics, although they may lead to civil war, need not occasion personal ill-will. But then honorable politics imply a respect of treatment, a freedom from misrepresentation, or taunt, or calumny, or ridicule, or innuendo, which are seldom found. When a man charges an opponent with unconstitutional conduct, or insists that he favors a course which is prejudicial to the public welfare, he merely states that his opinions differ from those of his opponent, and, of course, one opinion may be as defensible as the other. When Webster and Hayne differed as to the nature of the Constitution, and each maintained his view with arguments, there was no reason whatever that they should not eat together the quiet chop, nor smoke the peaceful pipe. But when one gentleman asserted that his opponent supported a system which was the sum of human villainies, demoralizing to all who were brought within its sphere, and making them man-stealers, brutes, and assassins, it was hard to separate the abstract view from its concrete application. It is true that the accused might reply that the charge sprang from ignorance, and could not be accepted as a sincere assertion; but, on the other hand, if a man really believed that the person, the associate, or the colleague of whom he spoke was in fact a thief and a murderer, he could not honestly treat him as if he were a gentleman. If he did not think so, he had no right whatever to say so, and he showed himself to be no gentleman.

A member of Congress accepted an invitation to the house of a colleague. "Do you think him an honest man?" asked a friend. "No, I think him a black scoundrel." "Why do you go?" "Because he is my colleague." That kind of courtesy is corrupting in the highest degree, because it makes a certain position screen rascality. All that black scoundrels have to do, then, is to secure such a position, and they will be treated as honorable men. But if this member of Congress did wrong in socially countenancing a man whom he believed to be a rascal, how could he have done right in taking the quiet chop and smoking the peaceful pipe with another man whom he believed to be a much greater rascal? When an especially brazen and outrageous offender is arraigned before any kind of tribunal, there is always some one who thinks to establish his own charity by saying that he who is without sin may cast the first stone. As a reproof to censoriousness, which was the significance of its first application, this is a wise and timely maxim. As an exhortation to constant forbearance and charity, it is a comfortable scripture. But when a fellow is caught smearing a baby with kerosene and scraping a match, or in the act of blocking the track of an elevated road so as certainly to throw the train into the street below, is it then Christian charity to whisper that he who is without sin may cast the first stone? Then let us close the courts and raze the prisons, and the more wanton and cruel murders an assassin commits, the more heavenly let our charity be in blessing him on his way to commit more.

The reason why so few marriages are happy is because young ladies spend their time in making nets, not in making cages.

There are prating coxcombs in the world who would rather talk than listen, although Shakespeare were the orator and human nature the theme.

PATENTS

In connection with the publication of the *Scientific American*, we continue to act as Solicitors for Patents Caveats, Trade Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. In this line of business we have had *thirty-three years' experience.*

Patents obtained through us are noticed in the *Scientific American.* This large and splendidly illustrated weekly paper shows the current progress of Science, is very interesting, and has an enormous circulation. Subscription price $3.20 a year, post-paid; single copies 10 cents. Sold at all Book-stores and News-offices.

Can I Obtain a Patent? The quickest and best way to obtain a satisfactory answer, without expense, is to write to us (MUNN & CO.), describing the invention, with a small sketch. All we need is to get the *idea.* We will immediately answer, and give the necessary instructions. For this advice we make *no charge.*

We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for obtaining advances on inventions. Address MUNN & CO., Publishers of the *Scientific American*, 37 Park Row, New York.

Farmers' Accounts.

WE HAVE OFTEN URGED OUR FARMERS TO KEEP full Records of all their farming operations—keep them in full details in every department of their labor. The number of acres of their farm, when, and how cultivated, the crops put in, their Stock of all grades, the cost of all purchases, the sales of Stock, produce of all kinds, Laborers accounts, Family and Farm expenses a all detail, the weather accounts with every detail, so as to know what is profitable and what is not. Such a record would be of great value to every Farmer.

A new Book for such a Record can be seen at FARMER Office, which we shall be glad to explain and recommend to all—handsomely got up and finely bound Price, $2.50, worth ten times the cost. 45:21

ADVERTISERS ABROAD AND AT HOME.

We call the special attention of all who desire to make their business widely known over the

PACIFIC COAST,

TO THE COLUMNS OF THE

CALIFORNIA FARMER!

NOW

Established Nearly Twenty-Five Years.

The class of advertisers now in our columns is a guarantee that the FARMER advertises for the *Best houses* among our business men, and we advertise for none but the BEST, and such as we can earnestly and conscientiously recommend to our patrons abroad as well as at home.

Our Grand Pacific Railroad

And its numerous branches and connections over our State, gives a speedy movement to business of all kinds, and is greatly enlarging the sales of all kinds of merchandise. We, therefore, invite all who wish to make their business widely known to advertise in our columns.

MANUFACTURERS OF AGRICULTURAL IMPLEMENTS,

Stock Raisers, Nurserymen, Booksellers, Seedsmen, Florists, Inventors,

And all who desire to open up their business with the PACIFIC COAST, can have no better way than through our columns.

The trade between the Eastern States and California is largely increasing, while the trade of the Pacific Coast is greatly expanding—reaching to China, Japan, Australia, Mexico, and the Islands of the sea. Thus, California will be

ONE OF THE LARGEST MARKETS FOR ALL KINDS OF TRADE,

And they are wise who open up a trade here.

The AGRICULTURAL TRADE OF CALIFORNIA IS A PERENNIAL TRADE, lasting all the year. Our GREAT PLANTING SEASON is *three or four months earlier* than New England; therefore, EASTERN ADVERTISERS should make known their business early.

OUR TERMS OF ADVERTISING:

LINE ADVERTISEMENTS REDUCED.

The charge for advertising in the FARMER is as follows:—All line advertisements will be ONE DOLLARS for Five Lines, or less, Nonpareil, *first insertion*, larger space, *Fifteen Cents per Line*; each subsequent insertion, *Ten Cents per Line.* This offers the best and most reasonable rates, giving as the FARMER does, a wide circulation for its patrons. It is the VERY BEST MEDIUM to reach the best patrons of the agricultural community.

FOR LARGE ILLUSTRATED AND DISPLAYED ADVERTISEMENTS:

For one-sixth of a column, three months, $20.00.

For one-eight of a column, three months.... ....$15.00 | For one-half of a column, three months. ... 50 00
For one-quarter of a column, three months .... 30.00 | For an entire column, three months 100.00

For a six le month, half the rates of three months.

For special advertisements and for advertisements placed in the reading columns, twenty-five per cent. extra. It must be specially understood that these rates are invariable—unchangeable; the same rates and terms to all alike. ADVERTISEMENTS ALWAYS PAYABLE IN ADVANCE, (unless specially agreed otherwise).

CASH must accompany all Advertisement received from Abroad to insure their insertion—and at the abov rate

WARREN & CO., Proprietors,
320 CLAY STREET, SAN FRANCISCO.

COMMISSION
SALES-ROOM,
—AND—
Purchasing Agency.

HAVING HAD THE EXPERIENCE OF OVER THIRTY years in dealing in TREES, PLANTS, SEEDS, and AGRICULTURAL IMPLEMENTS, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from fifteen to twenty-five per cent. for the great mass o purchasers. We would therefore offer to make purchases for all who wish our services, of any of those articles named, o for any articles of MERCHANDISE for our FARMERS or HANDSMEN, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing their wants as minutely as they can; and when they desire our judgment we will do our best to suit them.

Our charge will be Five per cent., together with the cost of packing, freight, drayage, etc. Orders should inclose a satisfactory REFERENCE or the CASH; or bill could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of TREES, SEEDS, PLANTS, etc., as this is our especial business, and we know we can satisfy all who may entrust us with their favors.

Gardens and Grounds designed and put in order, and every article furnished for the same.

Any one desirous of having their Gardens look gay throughout the season, can be furnished with the plants at a reasonable rate, by applying at this office.

Every information given as to the cultivation of Plants and raising of Seeds, etc. Also respecting the mode and the system of Pruning all varieties of Trees, etc.

A large Library of Floral Works can always be found at the Reading Room and Museum, which are free to all for reference.

BOOKS---SEEDS---TREES

All rare and choice things can always be purchased as above.

Silk and Tea Culture.

A PRACTICAL TREATISE ON

SILK CULTURE,

Produce Markets.

Wholesale Produce Report.

Represents the prices paid by the Dealer to the Producer on the wharf or landing places.

CORRECTED BY EDITOR FARMER

SAN FRANCISCO, May 29, 1879.

Money and Exchange Tables.

Exc. on England, new style, long and short	4 88 a 4 89½
Gold, 4% par	— 1 00
Value of Greenbacks, equal to Gold	— 1 00
Value of Wheat in Liverpool	9s 4d.a 9s 1d.
Value of Club Wheat in Liverpool	9s 1d.a 9s 2d.
Value of Wheat in New York, bushel	1 02 — 1 13
Brewers Barley in New York, bushel	80 — 1 00

MONEY AND EXCHANGE TABLES.

The *Money Markets* of the world are now greatly agitated by the actions of "money kings" in Europe and in our own country—the immense purchases of U. St Bonds shows there is an abundance of money in all the marts of the world.

England France and Germany hold full coffers, and the United States Treasury holds as much as them all, as the U. S. Treasury has now approximating $500,000,000 under control, and this is the cause of the apathy of trade in many portions of our country.

This drain of gold from the people to the vaults of "Uncle Sam" of course checks trade and business, and until a new move is made, and a circulation of this vast hoarded amount begins, business must be stagnant, and we cannot expect it otherwise.

The rates of money in all Europe is low, low in New York, here rates as before.

It is remarkable indeed the steady rise of United States 4 per cent bonds, soon they will reach 5 per cent premium.

GRAIN AND FLOUR MARKET.

The *Grain Market* is not as hopeful or prosperous as could be hoped for, contradictory reports from Europe affect the market, one day to start upward, the next check again—and were it not for engagements to load ships under contract, this trade would be flat indeed.

Millions of grain bags are being offered at public auction by reason of want of cash customers, the new Constitution cuts off credit, and cash or no bags is now the word.

The *Agricultural Implement Trade* has been far behind all former years—cash for harvesting implements is the word generally, and as our farmers worked against capital, they are now short of money, and are obliged to make old implements do this year, so much for the new Constitution and its results to farmers.

The export of *Flour* continues but in lessened quantities, at prices a little lower, as concessions are made in wheat

The *Wheat market* is a shade lower, and the certainty of a very large harvest this year, with a much larger surplus still on hand than was supposed, will tend to keep down prices of grain till the new harvest.

Reports from the Liverpool market are not favorable for higher rates, as wheat and corn pour into Liverpool and London freely and stocks accumulate.

The *Barley market* is still very low, even with some considerable export, yet prices seldom as low down as this month—but as the crop of barley will be large this year, prices must rule low unless new and better markets open abroad.

Corn, Rye, Oats, and *Buckwheat*, all remain slack in demand, sales dull, receipts more than sales generally

The list of *Feed Stuffs*, such as *Bran, Middlings, Ground Barley, Corn Meal,* and *Oil Cake Meal* are as last reported, or nearly so.

The *Hop market* is still low down, it does not pay to grow them, and many are abandoning their culture; in the willow region, San Jose, famed for the finest hops grown, they are being plowed up and the land laid off into building lots and offered for sale.

The *Honey market* is now full, even while reports say that the crop of the State will not be more than half to three-fourths of the usual crop, even now the price rules very low, and with large exports too, as we reported last week, to which we refer—*Beeswax* remains low.

The *Potato market* is well and fully supplied, both old and new, old potatoes sell all the way from 25 to 60 cents the 100 pounds—new and choice sell at $1 to $1.50—*Sweets* a few, scarce, $3—and *Onions* down low, the new crop $1.25 to $1.50.

The *Bean market* is well and fully supplied, and the prices range from $1.50 to $3, and limas $5 to $6

Wholesale Grain Report.

Retail Prices in the Fruit Market.

The *Fruit market* is not all we could wish, as we see poor fruit shows, "that don't pay"—none but the best should be sent to market—apples still hold out—pears gone—semi-tropic fruit, a liberal supply, but not as good as we wish, or that it might be with better and more careful culture.

Strawberries abundant and cheap. Cherries more plenty. Apricots just come. Raspberries made first peep." Currants now in market freely. Island fruits plenty.

Apples, per box	75 — 1 50
do. do. lb	6 — 8

Fish Market.

The *Fish market* will be always full enough to please even an epicure, as we have fish of all colors and from all waters, deep, shallow, lake, river or sea. Our salmon beat the world for this choice fish—some extra fish are now in market.

Salmon have been selling in our markets as low as 25 to 50cts. for a whole salmon, and in Oregon they use salmon to manure their orchards.

Salmon ₱ lb.	4 — 6
do smoked new	10 — 12
do pickled, ₱ lb	6 — 10
Lake Bigler Trout each	15 — 20
Lake Tuglee Trout, extra	20 — 25

Shell Fish.

The *Shell Fish market* is equal to any market now, for we have all the luxuries, far superior to any European market. Oysters are showing nice and fat and the public appetite now craves this delicious bivalve. Every day a grand show in our market—if you desire the choicest of these luxuries, go to Geo. Mayre in California Market.

Oysters ₱ 100 choice	75 — 1 00
Chesapeake oysters per dozen	50 — 75
Cray Fish, per lb	12 — 15
Clams per 100	— — 50
Mussels do	— — 25
Crabs, boiled, each	— — 25
do soft, per doz	— — 50

Retail Meat Market.

The *Retail Meat market* furnishes all the choicest kinds at unusually low figures for this season of the year, and thus is an unusual full market.

Porter House	15 — 18
Porter House, extra	20 — 25
Beef, tenderloin, per lb	15 — 18

Duck Eggs, " "	18 — 20
Lard, per lb., in tins	12½— 14
Eastern Lard, per lb., in tins	12 — 15

Grain, Wool, Potato Bags, Etc.

The *Bags and Bagging Trade* is at a stand still, we guess there is an overstock, and of this we shall soon know we do not think with the large stock of bags in the country, bags can go higher, and those who have bought to hold will soon loose their grip—and we shall see. One thing is very certain the grain grower must buy his bags this year on the new tack—CASH even if it pinches—this is according to the new Constitution, and they must not grumble

Messrs. Neville & Co., the extensive bag manufacturers, 33 California Street, can supply our farmers at the lowest rates and on best terms.

Hand Sewed Bags, Standard, 22 x 36 com. prices	9½ — 0¼cts.

☞SEND THE FARMER ABROAD.☜

We would ask all our readers who have kindred and friends in the Eastern States or in Europe, who feel an interest in California, its wonderful progress and its productions, to send to such friends a California newspaper?

We now wish to call their special attention to the good they can do by sending to them such a JOURNAL as the CALIFORNIA FARMER. We know our JOURNAL is hailed with a pleasurable interest in every State in the Union, and in Europe, and welcomed into the HOME CIRCLE everywhere, as a JOURNAL free from all impure and objectionable reading matter or advertisements.

To every subscription abroad, SPECIAL PREMIUMS OF SEEDS are donated with the paper, to benefit our State.

C. P. R. R

"Sundays only"—10:30 and 11:30 A. M., 12:30 and 1:30 P. M.

FROM SAN FRANCISCO TO ALAMEDA.

"Daily"—7:00, 8:00, 9:00, 10:00, A. M.; 12:00, 2:00, 4:00 5:00 6:00 and 10:30 P. M.

"Sundays only"—11:00 A. M., and 1 30 P. M.

FROM SAN FRANCISCO TO FERNSIDE.

"Daily, except Sundays"—7:00, 9:00 and 10:00 A. M.; 5:00 and 10:30 P. M.

FROM SAN FRANCISCO TO BROOKLYN

"Daily" 7:30, 8:30 and 9:30 A. M.; 1:00, 3:30, 4:30, 5:30, 6:30, 7:00, 8:10 and 9:20 P. M.

"Daily, except Sunday"—6:30, 11:00 A. M. and 11:45

"Sundays only"—10:30, 11:30 A. M. and 12:30 P. M

FROM BROOKLYN TO SAN FRANCISCO.

"Daily"—6:40, 7:40, 8:40, 9:40, 10:40 A. M. 12:40, 2:40, 4:40, 5:40, 6:40, 7:50, 9:00 and 10:10 P. M.

"Daily, except Sundays"—5:10 and 5:50.

"Sundays only"—11:40 A. M., and 1:25 P. M.

FROM ALAMEDA TO SAN FRANCISCO.

"Daily"—7:00, 8:06 and 9:00 A. M.; 2:00, 3:55, 5:00, 6:06 and 7:00 P. M.

"Daily, except Sundays"—6:00, 8:40, 11:30, A. M., and 1:30 P. M.

"Sundays only"—10:00, 11:00 A. M., 12:00 and 1:00 P. M.

FROM FERNSIDE TO SAN FRANCISCO.

"Daily, except Sundays"—6:55, 9:00 and 11:05 A. M., 3:50 and 6:05 P. M.

FROM OAKLAND TO SAN FRANCISCO.

"Daily"—6:50, 7:30, 7:50, 8:25, 8:50, 9:20, 9:50, 10:50 and 11:50 A. M., 12:50, 2:50, 3:20, 3:50, 4:20, 4:50, 5:20, 5:50, 6:20, 6:50, 7:20, 8:00, 9:10 and 10:20 P. M.

"Daily, except Sundays"—7:20 A. M. and 1:50 P. M.

"Sundays only"—10:20 and 11:20 A. M.; 12:20, 1:20 and 1:35 P. M.

T. H. GOODMAN, General Passenger and Ticket Agent.

A. N. TOWNE, General Superintendent.

Southern Pacific Railroad

NORTHERN DIVISION.

SUMMER ARRANGEMENT.

Commencing Monday, April 21, 1879,

(AND UNTIL FURTHER NOTICE.)

PASSENGER TRAINS WILL LEAVE SAN FRANCISCO from Passenger Depot on Townsend Street, between Third and Fourth Streets as follows.

8.20 A. M., *Daily* for San Jose and Way Stations. ☞Stages for Pescadero (via San Mateo) connect with this train only.

9.30 A. M. *Sundays only* for San Jose and Way Stations. Returning, leaves San Jose at 6 P. M

10.40 A. M. *Daily* for San Jose, Gilroy, Hollister, Tres Pinos, Pajaro, Salinas, Soledad, and all Way Stations.

☞AT PAJARO the SANTA CRUZ, R. R. connects with this train for Aptos and Santa Cruz. At Salinas the M. & S. V. R. R. connects with this train for Monterey. ☞Stage connections made with this train. (Pescadero Stages via San Mateo excepted.)

Parlor Car Attached to this Car.

(SEATS AT REDUCED RATES.)

3.30 P. M. *Daily Sundays excepted* for San Jose, Gilroy, Pajaro, Hollister, Tres Pinos and principal Way Stations.

☞On SATURDAYS only, commencing May 10th, the Santa Cruz R. R. will connect with this train at PAJARO for Aptos, Soquel and Santa Cruz. RETURNING, passengers leave Santa Cruz about 4:30 A. M. Mondays (breakfast at Gilroy), arriving at San Francisco at 10:00 A. M.

☞SPECIAL NOTICE—On SATURDAYS ONLY, commencing May 10th, the run of this train will be extended to SALINAS—connecting with the M. and S. V. R. R. for MONTEREY. Returning leaves Monterey MONDAYS (breakfast at Gilroy), arriving at San Francisco at 10:00 A. M.

3.30 P. M. *Sundays only* for San Jose and Way Stations.

4.25 P. M. *Daily Sundays excepted* for San Jose and Way Stations.

5.00 P. M. *Daily Sundays excepted* for Menlo Park and Way Stations.

6.30 P. M. *Daily* for Menlo Park and Way Stations.

Excursion Tickets at Reduced Rates

To San Jose and intermediate points, sold on Saturdays, and Sunday morning, good for return until following Monday inclusive, as follows:

Baden	$0.50	Fair Oaks	$1.50
San Bruno	0.50	Menlo Park	1.60
Millbrae	0.95	Mayfield	1.75
Oak Grove	0.90	Mountain View	2.00
San Mateo	1.10	Lawrences	2.25
Belmont	1.25	Santa Clara	2.50
Redwood	1.40	San Jose	2.50

Also, EXCURSION TICKETS to Aptos, Soquel, Santa Cruz and Monterey, sold on Saturdays only—good for return until the following Monday inclusive.

SECOND-CLASS FARE.

Between San Francisco and San Jose, - - $1.00

☞A car with Sleeping Accommodations, constructed expressly for this travel is attached to Freight Trains, leaving San Francisco at 4:00 A. M., and San Jose at 3:30 P. M. (daily Sundays excepted).

A. C. BASSETT, Superintendent. U. R. JUDAH, Ass't Passenger and Ticket Agent.

SOUTHERN DIVISIONS.

☞Passengers for points on the Southern Divisions of the road will take the cars of the Central Pacific Railroad via OAKLAND, leaving SAN FRANCISCO, via Ferry Landing, Market street, at 4:00 P. M. daily, and making close connection at GOSHEN for Sumner, Mojave, LOS ANGELES, Wilmington, Anaheim, Colton, Colorado River and MARICOPA. (156 miles east from Yuma.)

25 NEW YEAR CARDS, with name, 20c. 25 Extra Mixed, 10c. GEO. I. REED & Co., Nassau, N. Y. 47:1y

1854. 1879.

THE

CALIFORNIA FARMER

FOR 1879.

THE CALIFORNIA FARMER completes its TWENTY-FIFTH year with 1878, and is the oldest and only exclusive AGRICULTURAL JOURNAL devoted to this cause on the Pacific Coast.

The California Farmer

Established in 1854, has been the PIONEER HERALD of the AGRICULTURAL and HORTICULTURAL interests and enterprises on the Pacific Coast, this is no vain boast, but the simple truth.

The proprietors of the CALIFORNIA FARMER established and conducted the FIRST GRAND FAIR ever held on the Coast—this was at Sacramento in the year of 1852, and also the GRAND FAIR at San Francisco in 1853—both the Agricultural Fairs were planned, maintained, and conducted successfully as an INDIVIDUAL enterprise to promote the cause of agriculture on the Pacific Coast, in their early days, and at individual cost.

THE CALIFORNIA FARMER was the first and only advocate of SILK CULTURE, TEA CULTURE, COFFEE CULTURE, COTTON CULTURE, and the earnest advocate of ORANGE CULTURE, and of all the TROPICAL FRUITS and this was in early years when the masses lightly esteemed all such enterprises.

THE CALIFORNIA FARMER was the FIRST and ever advocate for the planting of the ALFALFA as a forage plant, and the first to introduce the seed and its culture, not only this grass, but all other valuable grains and forage plants now cultivated.

THE CALIFORNIA FARMER was the first and only JOURNAL that advocated the cause of BLUE STONE WHEAT, of SUMMER FALLOW, of SUBSOILING, and of DEEP PLOWING, and the only advocate for years of EARLY SOWING OF GRAIN IN DRY SOIL—doctrines that have now, after long years of trial become the basis of true and successful culture.

THE

California Farmer

Now addresses itself to the TRUE FRIENDS of progressive agriculture and only claims that just share of attention and patronage its long years of labor in the NOBLE CAUSE of AGRICULTURE, which such years of labor merit, the JOURNAL sends out NO AGENTS, NO RUNNERS, and only addresses itself to the real friends of this NOBLE SCIENCE, and claims their voluntary and generous co-operation in this work.

The TERMS OF THE CALIFORNIA FARMER have been placed at a low price, should induce, as we trust it will, a generous addition to our LIST OF SUBSCRIBERS for the year of 1879.

Desirous of placing this old PIONEER AGRICULTURAL JOURNAL, (The only exclusive AGRICULTURAL JOURNAL of the Pacific Coast), before the people at so low a price that all can have it, we make the following

Terms for the Year 1879.

And With Seed Premiums.

Single Copies,	$1 00
Six Copies,	5 00
Ten Copies,	8 00
Twenty Copies,	15 00
Fifty Copies,	35 00

CITY SUBSCRIBERS

Will have their Papers Delivered at their Residence or Post Office Box, if they may desire.

California Farmer

1879.

OUR NEW CLUBBING LIST.

We propose for the year of 1879 to offer to our Patrons the following valuable JOURNALS in connection with our own all at reduced rates, so as to give them the best work at low rate—(all postpaid). Price per year.

The FARMER and VICK'S MONTHLY MAGAZINE	$2 00
The FARMER and AMERICAN AGRICULTURIST	2 00
The FARMER and POULTRY JOURNAL	2 00
The FARMER and RURAL NEW-YORKER	3 00
The FARMER and PHRENOLOGICAL JOURNAL	2 00
The FARMER and AMERICAN BEE MAGAZINE	2 00
The FARMER and SCIENTIFIC AMERICAN	4 00
The FARMER and HARPER'S MONTHLY	4 00
The FARMER and HARPER'S WEEKLY	4 00
The FARMER and HARPER'S BAZAR	4 00
The FARMER and HARPER'S THREE WORKS	6 00

WARREN & CO.

PARIS, March 27, 1879.

AGRICULTURAL SCHOOLS.

In the new law in course of being voted on popular education, the teaching of agriculture in the royal national schools will be obligatory, and at once to take effect. This is going a little too rapidly; the greater part of the country schoolmasters are not prepared to impart the desired instruction; all that can be reasonably expected from them is, that they prepare themselves, as well as their pupils, by means of judiciously selected treatises on rural economy. Later, when the normal schools are inaugurated, and masters duly trained, greater results can be demanded. Each department is to have its normal school, to which an agricultural professor will be attached; 50 professors are required, and six years are allowed to execute the programme. The supply of suitable candidates for these chairs of agriculture is at present very limited; in time, the superior agronomical colleges will meet the demand. The new professors will require to hold conferences for the benefit of the surrounding farmers, as well as to impart instruction in the normal schools, hence, a special tact is necessary for attracting adult attention. In the agricultural school of Ecully, near Lyons, advantage is taken of the Rhone to teach fish culture. Many farming societies give prizes to the proprietors of oyster beds and fish ponds.

BREEDING HORSES AND DAIRY COWS

It is no secret that good horses are not on the increase in France; many departments, farmers for their production of horses, have to-day no reputation. The artillery horse is the type desired, in general the horses are too light, too fine, and hence the leaning towards the omnibus horse as the ideal, which has endurance, is of a large volume, draws well and trots. There are 22 official depots of stallions in the country, yet the amelioration in the breed does not produce the expected results, because no care is taken in the selection of the mares to be covered; farmers simply aim to have a foal. It is suggested that the stallions of the State be allowed, without fee, to cover only those mares selected by competent local authorities, the receipt for the service would serve later, as a leaf from a herd-book, for purchasers of the progeny. The government also could undertake to select private stallions, and to indemnify owners for their services following mares selected. An old Alsatian agriculturist, as the results of his experience in the standing dispute as to the milking qualities of the Durhams, states he has only pure Durhams in his sheds, that yield their average 14 quarts of milk daily; that the secret to make Durhams good milkers, is not to "fatten" the stock during the first years of their existence, nor yet insufficiently feed them, for it is during the first years of the animal's growth, that a pound of flesh costs least to produce. Taking food as the base of calculation, he finds no breed pays relatively better for their keep than Durhams, and they consume from 1-5 to 1-4 less rations, than Dutch or Swiss cows.

SUGAR BEET CULTURE.

Liebig was the first to raise his voice against the exhaustive nature of beet cultivation for sugar; he showed, that all the alkalies contained in the roots, were concentrated in the molasses; hence, the "fatigue," or exhaustion of the soil within a short period. Potash is absolutely necessary in the functions of the plant to produce sugar, and even when returned directly to the soil, it fails to restore the latter's vitality for beet cultivation. This apparent anomaly is due to the fact, that the organic matters of the surface soil rapidly seize and retain the salt, while beet, being a tap rooted plant, draws its food from the depths of the soil where the sustenance is limited, and so becomes insufficient after a few crops of beet. This is the explanation of many, why the soil of Saxony and of other regions, now fail to produce sugar beet, or if so, a diminution of two-thirds in the yield. Soils repel the plant, and the latter about July commences to fade, sinks into decrepitude and rots—the leaves last. If a vertical section of the root be now made, the tissue will be found covered with red rings—commencement of decomposition. These roots yield little sugar, and the pulp will not preserve in trenches; even when sound, the sick roots communicate contagion to a whole pit. The soil occasionally displays signs of weariness one season, recovers another, but relapses with more intense fatigue afterwards. In addition to the explanation of exhaustion, Messrs. Liebscher & Marker of Halle, have discovered the presence of a parasite, called *nematode*, which is as numerous, and propagates as rapidly, as the phylloxera itself; they are to be encountered on the rootlets in the form of white specks; rarely on a diseased plant, for having destroyed the cutter's feeders, they decamp. These insects are never found in large numbers where the beet thrives well; they are more frequent in a soil where the beet is raised for seed, and it is essential never to employ the washings and root-trimmings of the sugar factory, if the beet delivered appears to be affected. It is not clear if the presence of the nematode be the cause, or the consequence, of the disease; it is a diagnosis of the malady, and may resemble the animal economy, where parasites prey on bodies insufficiently nourished.

[CONTINUED IN OUR NEXT.]

AUSTRALIA.

AGRICULTURAL NEWSPAPERS.

Editors, strangers and citizens from the Eastern, the Middle, or Southern States, also Editors over our own Coast who may desire to see or refer to their own Journals, or any Agricultural or Horticultural Journals, will always find them on file in the FARMER READING ROOM, to which they are always bid welcome.

ONE HUNDRED of the leading Journals and Magazines of this class, the best in the United States, are in this collection, giving to those in search of Agricultural knowledge the best Information on this Coast.

A Large Library also, for *General Reference*.

Australia and California

We have full files of Australian Papers from all parts of Australia, showing the great interest they take in this Country, one thing of great moment, is the "Steamship Line," it is of vital importance to the welfare of the Colonies, and so vastly important to the Pacific Coast in the great trade that can be built up between the Colonies and California, if our Merchants do their duty.

These Journals are arranged on file for the convenience of all who may desire to peruse them. We have as follows:—

The Sydney Morning Herald, Sydney.
" *Town and Country*, Sporting Paper, Sydney
" *Australasian*, Melbourne.
" *Weekly Times*, "
" *Adelaide Observer*, Adelaide.
" *Queenslander*, Brisbane, Queensland.
" *Week*, " "
" *Capricornian*, Rockhampton, Queensland
" *Port Dennison Times*, Port Dennison.
" *Wide Bay and Burnett News*, Queensland.
" *Darling Downs Gazette*, Toowoomba, "

Many of these Journals are of the largest size, from 20 to 38 pages, several, splendidly illustrated with views of the Public Buildings, Landscapes, Public Men, Stock, etc.

CONTRIBUTIONS FROM QUEENSLAND.

We Invite all our readers and our citizens especially who are interested in our MANUFACTURES and the MECHANIC ARTS, and our AGRICULTURE, to visit the FARMER Office and see the RICH PRODUCTS brought from QUEENSLAND by the Commissioner, they are now on Exhibition open to all, in the READING ROOM and MUSEUM of the CALIFORNIA FARMER OFFICE.

Wisely insure at the New Zealand Insurance Co.'s office, 307 California Street.

Foreign Correspondence.

THE GRAPE PLAGUE.

TAHITI, April 12, 1879.

COL. WARREN—*Dear Sir*

Your Paris correspondent, in one of his letters, notices that a M. Fancon has tried successfully the submersion of grape vines in water, in order to destroy and prevent the phylloxera.

It is quite probable that a proper degree of submersion, with a proper kind of water, where practicable, would be serviceable for such a purpose. But it requires great judgment, considerable scientific knowledge, and favorable circumstances to insure success to such an effort. And here, as in many other cases, it is that your Agricultural College would make itself useful, if your farmers and grape growers would avail themselves of it. By knowing the whys and wherefores, your grape growers would be enabled to judge for themselves whether the circumstances surrounding them would make such a mode of treatment a reliable one.

In the first place, sea or ocean water, pure or mixed with fresh water, would not be proper to make such a submersion. The soda in it, which forms the principal constituent of the salt which distinguishes it, is highly injurious to the plant, to say nothing of other ingredients contained in sea water.

In the second place, the water from many, perhaps the most of your alkaline plains would also be improper, for the reason stated above. It might contain too much soda.

In the third place, your rivers would also be improper for such a purpose, as they contain, generally, ingredients that are injurious to vegetation. Some of them are highly acid, which would be death to the grape vine. And hardly any of them contain that element, so important to the grape vine attacked by phylloxera, I mean potash.

In the fourth place, the waters pumped from your mines, the most of them, are also highly improper for submerging grape vines. Although I notice the statement of analysis of the water of some mine, which shows a large percentage of potash. The statement is contained among the details of analysis, contained in the last yearly report of the California State University. It is quite probable, if the circumstances be favorable, that it would pay to evaporate the waters of that mine and use the resulting salts as a fertilizer. Being from home at the present writing, I cannot lay my hands upon that report, and consequently cannot give the page that contains the statement of the analysis.

In the fifth place, it would not be proper to use stagnant water for such submersion, nor to allow any water, no matter of what quality, to remain long enough to stagnate in contact with the grape vines. Water, under such circumstances, absorbs and condenses a large quantity of carbonic acid gas, and thus does more harm than good to the afflicted vines, as the presence of the phylloxra is owing to an excess of carbon derived from carbonic acid gas already absorbed by the plant, and which it cannot assimilate, owing to the want of potash, to accompany it in the formation of any part of its products.

The most proper water to use for the submersion of grape vines or other plants for the prevention of phylloxera; oidium, blight, etc., is that which contains more or less potash, as a distinguishing quality, such as water flowing from disintegrating lava, or water flowing from feldspathor other potash-bearing rocks, unmixed with deleterious mineral waters.

In California, Nevada, Oregon and Washington Territory, owing to the eminently volcanic nature of the soil, you are very much exposed to the baneful effects of these mineral springs. They are very numerous, and their waters, mixing with water from rains, forming your streams and rivers, render their waters very unsafe for using for submersion, and some of them are probably for the same reasons, of a bad quality for ordinary irrigation.

Under all these circumstances, it requires, as I said before, great judgment and a certain degree of scientific knowledge to enable a grape grower to know when he is safe, when he has an opportunity to invest his money, his time and his labor to throw up banks to retain the water for submersion or to dig ditches to conduct it where he wants it.

But the idea that Mr. Fancon seems to attach to submersion, that it destroys the phylloxera is an erroneous one. For, allowing that the insects and their eggs that are submerged are totally destroyed, if the water and the soil are deficient in potash the plant will continue to be diseased, and supply more or less food for the phylloxera, etc., and they will propagate rapidly and in prodigious numbers and soon overrun the diseased plants.

Yours, etc., THOS. CHOST

CATALOGUES.—A mountain pile of new and handsome Catalogues of Nurserymen, Seedsmen and Manufactures, all waiting notice and notoriety send along your Advertisements, Gents, then you shall have *especial* attention and notice that shall pay you well.

CAPABILITIES OF NEW ZEALAND.

Sir Julius Vogel, the Agent-General for New Zealand, sends the *Times* the following extracts from a letter he has received from a highly respectable firm, whose business and experience in the colony enable them to speak with authority as to the value of the land:—

"As regards the capabilities of the land, that in the north island is, when laid down with English grass, as fine grazing pasture as there is in the world, but until it has been cultivated a few years it is not such good grain-growing land as there is in the south. Last year the writer was on a farm of 500 acres in the Waikato which had carried 1600 long-woolled sheep, 160 head of cattle, and 60 head of horses the whole year, and the sheep clipped 9½ lb. wools.

"In Canterbury all the land will grow wheat, and 30 bushels per acre without any manure is quite an ordinary crop, while 60 and even 70 bushels per acre are frequently obtained off really choice land. We have purchased a farmer's oats, which have yielded 102 bushels per acre. As an instance of what is done here at times, we purchased last season the produce of 98 acres from a farmer in the Ashburton district, and the yield was 46½ bushels per acre. This man had purchased 102 acres of land 18 months previously from the Government at £2 per acre, and with only two ploughings and within 18 months he obtained the results above stated: and as he received 6s. per bushel, it will be seen he grossed £11 11s. 3d. per acre, and at a cost, as he estimated, of some £3 per acre. This, of course, is an exceptional case, but we know of many similar, and, in fact, it is only necessary to look at our prosperous and increasing class of farmers to be satisfied that farming here pays handsomely since the development of the railways under your successful public works scheme has enabled produce to be taken to market at a reasonable rate. In addition to wheat, oats, and barley, the land in Canterbury grows roots most prolifically. For instance, 20 tons of turnips or 15 tons of potatoes per acre is a fair yield on good land. Cattle do remarkably well here, and the land carries stock so well that a handsome return is made when butter realizes 9d. to 10d. per lb., and cheese 6d. The paying price realizable for products is, perhaps, the best test of the soil's capabilities. Thousands of tons of potatoes are grown here for export to Australia, and £2 per ton leaves the farmer a very handsome margin.

"That land here, notwithstanding the rapid increase of late in its selling price, is still far below its intrinsic value is unquestionable, as we are wanting in capital to keep pace with the rapid development of the country. The result, then, is that, instead of having capitalists willing to buy land and farm it, to get, say, an income of 6 per cent on the cost, or who will let it to a farmer on a 6 per cent. basis, every farmer buying new land here hopes to make the cost price out of it in from three to five years. Large tracts of land are taken up by farmers who have plows, teams, etc., from land speculators on what are termed purchasing-clause leases. The farmer has no cash, and he merely covenants to pay a stated rental for three to five years, and with an agreement to purchase at a fixed price at the end of the term. In every instance the farmer hopes not only to make his rental (based, by the way, on a 10 per cent. valuation), but also to make enough out of the soil to pay the whole or major part of the purchase-money at the end of the term. In nine-tenths of the cases he is successful, if a prudent and industrious man.

"Thus, then, it must be evident that land here is below its intrinsic value, as, when the colony increases in wealth, there will be buyers who will give a value for it that will not stand more than a moderate rate of interest.

"It is only since the railway scheme has been successfully carried out that our farmers have been able to make any great progress, and in a very few years, at the present rate of progress, we shall have capitalised sufficient wealth to buy land at something nearer its value; but, in the meantime, there is a fine opening for all classes in this favored land, and we really believe that, taking climate and soil into consideration, it is the most fertile and pleasant country to live in on the globe. Our business being grain and produce merchants, we naturally have an excellent opportunity of estimating the prosperity of the farming class, and we confidently assert, that in no other place in the world are they so prosperous as here."

[We copy the above extracts from our excellent Exchange, the *Sydney Morning Herald*, so that our readers may learn from the reliable source which we give, the capabilities of this rich and rapidly growing country.—ED. F.]

UNANSWERED LETTERS.—We are constantly receiving letters of inquiry from numerous sources, asking us to furnish replies and statistics that would occupy pages, and these from strangers, on matters not of a public interest, but only their private business, and then not even a stamp for reply, of course our time will not allow us to comply, though kindly disposed—stamps for reply should always be sent.

Foreign Correspondence.

REPORT OF SYDNEY MARKETS.

We are indebted to our attentive Correspondents, Messrs. Cowlshaw Bros., and also to Wm. H. Fleecher, Esq., for valuable reports of the markets of Sydney; by these reports it will be observed that dullness in trade, and low prices prevail there as well as in our own land.

Messrs. Cowlshaw Bros. say:

SYDNEY, April 23d, 1879.

COL. WARREN—*Dear Sir:*

Tonnage, is in demand for your port, the "Duncraig" loads here at 10s. and Cape Verde at Newcastle at 9s. per ton, and 8 vessels are loading at Newcase on Ship's account.

We have to report a very depressed market for all your products—we quote:

Salmon offering at 6s. 6d. per doz. duty paid, buyers are not disposed to give more than 6s.

Barley, the quantities to hand are in excess of our requirements, a parcel arrived per "Dunnerdale" is offering at 2s. 10d. per bushel.

Maize, is dull of sale at 3s. per bushel.

Hops, are difficult to sell even at 4d. per pound in bond.

Mr. Fleecher reports maize 3s. per bushel, oats 3s. 6d. to 3s. 9d. Wheat Adelaide best up to 6s. New Zealand 4s. 9d. hops dull at 5d. in bond, dried apples 4d. in bond, market generally very quiet.

FREE TRADE IN WINES.

The mission of M. Leon Chotteau to America in behalf of the wine interest and some other interests of France, in order to urge upon our Congress a new tariff, whereby French wines particularly, with a few other manufactures could be introduced here free of duty in exchange for similar favors to some American manufactures were to enter France free or on reduced duties, has excited great interest for the past year.

M. Chotteau has been insefatigable in his labors, addressing the Chambers of Commerce of the principal cities of the Union and laboring with our Congressmen also, gaining favor with those interested in importations, and meeting with opposition from those who are interested in our own great wine interest here.

There can be no question but that it would be suicidal to the great wine interest of California, were Congress to change the tariff to favor free trade in French wines, or even to reduce them, for the truth can no longer be disguised that France and all the wine makers of Europe are becoming very jealous of the growing reputation and the largely increasing products of the vineyards of California, and the fact also that our wines are cutting off their trade in the Eastern States, and that we are sending our fine wines to Europe also; these are the causes of the movement on the part of the vignerons of Europe in sending over to this country so able a representative of their interests as M. Chotteau, to stay if possible the loss of their trade in wines to this country, which must necessarily take place by reason of the improved quality, the increased quantity, and enlarged sales of California wines wherever they are introduced.

THE GREAT BOOK HOUSE.

The citizens of our State and Coast when they come to our City, and our own citizens also should by all means find time to visit the *great Book Warehouse* of

BANCROFT & CO.

on Market street; this is one of the largest and most complete Book Warehouses in the United States, an immense large building of *five stories* high, with basement, and full packed with the history and literature of the world.

This establishment we say is most complete; printing, engraving, stereotyping and binding, thus from the manuscript, a perfect, handsome book can be sent forth in a brief time.

Bancroft & Co., are famed for their great trade in "School Books" controlling in a measure this trade in the State.

There "Subscription Book" trade is immense, and so of every department of business as connected with this trade, books, papers, stationery, etc., their business keeping about one hundred clerks and officers in constant employ, and to this trade is added a Musical Department of large dimensions.

Bancroft & Co., have a very excellent corps of business men in their various departments, men trained to their business for long years, and thus they know their duty and do it.

The heads of this House are fully qualified by long years to maintain and carry on a Book trade that requires millions of books, and from all parts of the world to meet the demands of their trade.

A. L. Bancroft, Esq., is now in the East, laying out the work for their great trade, while H. H. Bancroft Esq., the other head of the house, the historian, is the mover of all this great enterprise.

We hope visitors to our City and especially all strangers coming here will be sure to visit Bancroft's & Co., Book Store, for we know they will thank us for calling their attention to it, as one of the largest and most admirably arranged establishments of this kind in the United States.

Agriculture.

Plow deep; while sluggards sleep,
And you shall have GRAIN to sell and to keep.

HOW WE SAVED THE OLD FARM.

CHAPTER VIII.

By the first of May, Ned and I were obliged to go to school, where we pursued our accustomed studies. Ned, though usually fond of school, begged to be allowed to remain at home through the summer to help about the work, but this my mother would not listen to for a moment. But as they had ploughed the fields which were ploughed last year, and planted a part of the garden, and had drawn in the sand to fill the hole under the barn floor, and also that one in the barnyard, and had drawn manure upon the two-acre lot, in the large field, across the road, where potatoes grew last year, making quite a hole in the large heap that Clarence was so proud of; Clarence also insisted that he could get along alone, or with a little help from Jake Wood, if Ned would do all he could before school-time in the morning and after school was out at night. In this lot, the north end of "Field No. 6," Clarence intended to plant potatoes, and he had ploughed the manure under, but upon the three-acre lot, in the same field, he intended to put corn, and had ploughed before manuring, intending to spread the manure on the top and harrow it in, as he had read in some of the farming papers, which he was always poring over in the evening, that that was the best way for corn. The eight-acre field of rye was looking very well. It was quite time the potatoes were planted and the manure drawn out on the cornfield, and Clarence went after Jake Wood to come and help him a few days if he could get him. A little to my mother's surprise, Jake made no objections at all to coming, merely saying that he should not want any pay for his work until fall, and then perhaps he should want something off the farm for a part of it. The boys had furrowed the potato field and had cut the potatoes for seed, evenings, when they could not do other work, and was all ready for the planting when Jake came in the morning. There were several barrels of wood-ashes in the cellar, and Jake and Clarence carried some of them out to the field, and Ned, before school, assisted in putting about a cupful in each hill as long as he could stay with them without being late at school. Jake had not deserted us all this time, but had called several times and inspected the operations of the boys, with which he was much pleased, and seemed to take much credit to himself for the encouragement which he had given to the plan at the first.

"I tell you, ma'am," said Jake, that evening at the supper-table, I never see anything to beat it since I was born. Them pigs and chickens and calves are growing like all natur', and if there isn't a good crop of pertaters on that lot we have planted to-day, I never will guess again, for I was along here when they were carting the manure on there, and I never saw such lots of manure ploughed in under any field in Brookfield since I have lived here, which has been, man and boy, going on to sixty years, now. Seventy big loads, Clarence tells me; and then the ashes in the hill to kinder shove them along. I wouldn't wonder if there was more on that little lot this year than there was last year on the two lots. I want to help dig them just for the fun of seeing the big ones roll out; and if the boys don't keep the weeds out of it, I will come and pull them out myself, for it takes as much manure to raise a big horse-weed as it does for a big pertater. And there is manure enough left to give the other field, where he calculates to put the corn, about as heavy a coat as pertater field has got, which we will begin to draw out to morrow."

"Then you have finished the potato field?" asked my mother."

"Well, I guess we have, ma'am. That boy can handle a hoe just about as handy as any man I ever worked with, and we haven't stopped to play about it, though he had to go off about a half dozen times to attend to the critters, but he was right back; and then Ned give us quite a lift in the morning and after school. Two boys like them chaps can do a heap of work when they set out,—and they work just as if they were playin'."

"And Jake says he can help me until I get the manure on the cornfield and get it planted, mother," said Clarence.

"Yes, ma'am," said Jake, "I can as well as not, for Rover and I have had a pretty good time in the woods lately, and it will do him good to lie side of the wall and watch for woodchucks awhile, and will give him a chance to think over his misbehavior."

"What," I asked in some surprise, "does Rover ever misbehave?"

"Well, I am almost ashamed to tell of it, and perhaps I ought not to as he never done sich a thing before, but you see, miss, I was down to the Corners yesterday, and there was a fellow there that I know, that had been into the tavern until he got about 'how come ye so,' and he was out there front of the blacksmith shop talking and acting a little silly, I allow, and there was a gang of boys around him making fun of him. I felt bad for him, and I went by into the shop to get a trap fixed, just as if I hadn't seen him, and while I was in there I missed Rover, and I looked out and he was actually among those boys a laughin' at that fellow as if it was something funny to see a man makin' a fool of himself, when the Almighty meant that he should have sense. And I just called Rover in and made him lie down, and I told him how much ashamed of him I was, 'cause he had had sorter decent bringing up, and ought to have known better than to laugh at a man that was in that shape. And I set out not to let him come out with me to-day, only he begged so hard, and seemed to be so sorry."

Surely enough, as I glanced at the dog, he had his head down, with a sneaking look which I had never seen him have before.

"But," said my mother, "it seems to me the boys ought to have had a talking to more than the dog."

"Well, ma'am," said Jake, "I wasn't responsible for the boys; their fathers were there in the blacksmith shop, some of them, anyway, and they might let their boys act so if they had a mind to, but a dog that I had under my care shouldn't do it, if I knew it." And there was a twinkle in Jake's eye that told that his lecture to the dog was intended to have its influence upon the boys or their parents.

"It seems strange that they do not shut up that liquor-shop at the tavern," said my mother.

"Well, you see the man that keeps it has got money, and is a strong politician, and lots of fellows vote just as he says, and his party don't want to trouble him for fear he would jine t'other side with all his votes. Then it isn't anybody's business in particular, and so everybody thinks somebody else ought to attend to it, and so it goes."

Clarence changed the conversation by asking how much seed-corn would be needed to plant the three acres.

"Well, said Jake, "you might as well shell three pecks or a bushel, though it won't take quite so much as that, maybe. Depends something how many kernels you put in the hill. I should put in five or six, and when it comes up, if 'twas too thick pull up one or two when I hoed it. I believe in having seed enough, and I hate to see places where there isn't anything growing, when it is manured as you manure your field. It 'pears to me like spreading a good dinner and not having folks to eat it, and so letting it go to waste. If you didn't put on more than Deacon Whiting does where he plants, it would do as well if more than half of it didn't come up. He put about three loads to the acre, and then finds fault with the weather because the corn don't grow. Plants about twenty acres, and don't have corn enough to fat any critters decently. He wanted I should come to help him plant this week, but he treats a man that works for him just as he does his fields, and his critters, too, for that matter: gives them just as little as he dares to to feed on, and then gets all he can out of them; don't make a big bargain out of the fields and the critters at that, for 'tis plaguey little he gets, and he wouldn't get no great out of me, neither, if I was to work for him all the time. I told him one day at the store that there was more wasted on his farm than on any other two in Brookfield. You ought to have seen him stare at me. He wanted to know how that was, and I told him he wasted half his feed, for if he kept only one yoke of oxen instead of three, and three cows instead of a dozen, and gave them enough to eat, it would not take more than half as much to feed them as it did to feed the great drove he kept now, and he would get more milk and more work than he did now, and then he wasted half his work and more too, 'cause if he had manured a little field decently he could 'a raised as much on it as he did on the big lot he planted, without workin' half so much to take care of it. I tell you he was mad, and if he hadn't been a deacon, I expect I should have got a cussin', but all he said was, that 'I didn't know how hard farmers had to work when I was shuckin' round in the woods;' just as if he thought it was nothing but fun to tote a gun all day through the woods and briers. I shouldn't have said what I did, only I was thinking of the day before, when he wanted me to help him push a cord and a half of wood up the hill, that three yoke of cattle had got stuck with. I helped him, of course, for I pitied the poor, hungry-looking critters; but if I had had him hitched to the cart tongue, I should have tried if a whip wouldn't have made him pull it. Last time I worked for him the dog didn't have a mouthful of dinner, but he and I went home to supper and I made it up to him. If a man can't feed my dog, I don't ask him to feed me, anyway."

And Jake shoved back from the table and began to cut tobacco for his pipe as savagely as if he were punishing the deacon for his neglect of the dog's wants. Luckily for my peace of mind, I knew that Rover had always been liberally fed when Jake had worked at our house, for my mother would not have allowed any animal to be hungry while she had plenty, however strong might be her prejudice again a poor man keeping a dog. But Jake's dog was looked upon more favorably than other dogs by her, for she knew that he contributed to the support of his master in hunting far more than the value of his feed. And it was Jake's only company and better company for him than a lazy wife or saucy children." But when he said this he was returning from a call upon one of his friends, who was reputed to possess both those encumbrances; and Jake had gone there to help about some little job, and perhaps he had not received a very cordial reception from the wife. Jake never forgot a kindness nor forgave an insult. But the pipe was filled and lighted, and under its soothing influence, he began again.

"What have you planted in the garden, Clarence? I see you have got part of it under way."

"I have put in some peas, two rows, and some sweet corn; that is all. The squire said when I was over last, that next time I came he would give me some currant bushes and blackberries and gooseberry bushes that he was going to thin out of his, and perhaps some strawberry vines, and I want to put them in first and then see what room I have left. Shall have more peas and two or three plantings of corn so as to have it green all summer, and then beans and cucumbers and such things. I don't remember what we used to plant at first, and I meant to have asked you about it."

"I reckon you want to put in a few onions and beets and parsnips, don't you?"

"Yes, I shall want them and a few cabbages, too; but I haven't got the seed yet, and I didn't know if it was time to put them in, and I thought I would go down to the Corners some day when not too busy and buy some papers of such seed as I wanted."

"Now, don't you do that," said Jake; but you just write to some of those seed fellows in Boston and tell them what you want, and send your money in the letter, enough to pay for them, and you will get your seeds a good deal cheaper, and better seeds, too, I allow, for I don't think no great of those little papers of seeds. Half the time they don't come up at all, whatever's the reason for it. You can find the names of some of those chaps in your papers, most likely, and I will take your letter down to the Corners and give it to the stage-driver to-night, and you will get your seeds to-morrow night, and your change back."

So the address was found in the paper, and the order was written, Jake suggesting the amount, as a quarter pound of onion seed, same of beet-seed, cabbage, and parsnip, and mother furnished a five-dollar bill on the assurance of Jake that the right change would come back, and Jake departed for the Corners, and the boys and I went to shelling corn for planting, selecting only the handsomest ears and rejecting the kernels at each end of the ear, which Clarence said was always done. Next morning Jake came back commissioned to find out the price of the pigs and when they would be ready to take away, as lots of fellows wanted to know. They were six weeks old a few days before, and Clarence was thinking that it was time to sell them, but no one had engaged any yet; but in consequence of Jake's endeavors I will now say that they were all sold in a few days at four dollars each. You can perhaps imagine how proud Clarence was when he placed sixty dollars in mother's hands, from which he was to take only the twenty-five to pay the squire for the hogs. That day was spent in drawing out manure upon the garden lot and the proposed cornfield. To make a finish of the garden, the drills for the peas were opened and the manure spread in them and covered with an inch or two of earth, upon which the peas were to be planted when it was time. On the side where the berries were to be put, about half an acre was left without manure, as Jake said what we put there would not bear that year, and as the ground was pretty rich, it would do best to manure them in the fall, which would make them bear next year. Of course, if manure had been more plenty they would not have been hurt by it; but manure could not be used where there would not be early return for it.

The next day was Saturday, and as the seeds came in the morning when Jake came, Ned and I were promised plenty of work. We raked the beds for the small seeds until they were so fine that we could get them no finer; and Jake and Clarence sowed them, even Jake being astonished at the quantity of ground it took to plant that amount of seeds upon, so much that I mistrusted he had not been wiser than we were about the quantity we ought to have bought. "But, anyway," he said, "they are things that will sell if you too many of them, and selling is what you want to be doing, I reckon. Some folks make a living just raisin' garden stuff to sell, and I have no doubt you could sell lots of it in Blackington, if it was only a little less work to get it there."

[TO BE CONTINUED.]

AMERICAN BACON IN ENGLAND.

To what an extent the minds of English consumers have become prejudiced against American bacon and its price nominally reduced, may be inferred from the following which appeared in a recent issue of the *Mark Lane Express*:

A letter from a curate, seriously affirming that American bacon of first rate quality can be had in England at 4½d. per pound, has greatly interested economical housewives. It is not surprising that an effort has been made to disparage the American article, and to show that if it can be sold at 4½d. it is worth no more, if not a great deal less. One writer, hailing all the way from Turin, and who, for all we know, may be a Borough ham dealer on his travels, declares that American hams, chiefly from Cincinnati, have been destroyed there in consequence of their containing immense numbers of trichinæ. This is a warning to British matrons in search of cheap American bacon, which would be more effective but for the fact that the English market is already overrun with American bacon under an English name. It is estimated that 3,000,000 American pigs will be manufactured this year into many more millions of American hams for sale in England, but these hams are seldom sold by retailers for what they are. They are carefully selected and "dried" in England or Ireland, returning from the latter country in the form of the well-known Belfast hams, advanced in price from 46s. to 95s. per cwt. The American "long rib" is transmuted into "Irish rolled" bacon. "Cumberland cut," another American product, is converted into "farm-fed." Wholesale dealers sell what is known as clear middles at 3d. a pound, and find it marked on the counter of a retailer who keeps "no Yankee rubbish" at 8d. per pound. This is very sharp practice, no doubt; but the public are greatly to blame, for they prefer to pay a high price for a poor article labeled "English" rather than a low price for a good article sold as "American." The gullibility of the English purchaser has been repeatedly tested by cutting an American ham in two, one half-marked "American" at 6d., and the other "home-cured" at 1od. The "home cured" is speedily brought up, while the same article with a different name, and at half the price, is left untouched.

A well informed correspondent of the *London Live Stock Journal* in writing of the varieties of pigs says:

"The Berkshires may fairly claim for themselves to be, amongst our improved breeds of pigs, one of if not the best for the ordinary pig keeper. They seem to be hardier, and require less care and attention during their young state. This is a great recommendation, now a good stock-man is such a rarity. They are besides fairly quick feeders, and attain to a good weight, say 23 stone imperial (350 lbs.) at twelve months old; the flesh having a large proportion of lean meat it is highly prized for making bacon, and it has no doubt had its share in making Wiltshire bacon take the high place it has in the good opinion of the housewife.

RHUBARB WINE.—We have samples of the "Rhubarb Wine" advertised by us in the FARMER, to which we call special attention of wine dealers, as we have it on sale at our office.

A PENN BOOK of nearly 100 large octavo pages for the sick. Full of valuable notes on Scrofula; Diseases of Women; Aches and Pains; Heart Troubles and a great variety of CHRONIC DISEASES, with evidence that in most cases these diseases are curable. Sent for one stamp.
Address MURRAY HILL PUB. CO.,

N. ASHTON & SON'S
Liverpool Fine Salt.
IN UNIVERSAL USE THROUGHOUT THE EASTERN and Western States, and acknowledged far superior to any other brand of factory-filled salt.
Extract from Proceedings of the National Butter, Cheese and Egg Association, at Chicago, in March:
"A sack of salt contains 7,168 half-ounces; therefore it will make 7,168 pounds of butter, which, at 25 cents per pound, is worth say $1,800. A sack of Ashton's Salt costs about $1 per sack more than ordinary brands of factory-filled salt, therefore, is there any gentleman who would risk the salt, therefore, is there any gentleman who would risk the spoiling of $1,800 worth of butter to save $1, when by spending that $1, he can have the quality of his butter guaranteed, as far as salt can guarantee it? The extra cost of using Ashton's for cheese is hardly one cent on a hundred pounds, worth $13, for curing provisions, the additional expense does not equal three cents on a hundred pounds of hams, and for household purposes, it costs about 50 cents extra per annum for a family of six. Why not use the best salt?"

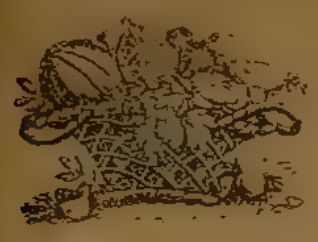
First Vol. Register, 395 pages, 22 plates, substantial leather binding, contains history of importation and improvement of Merino Sheep, register and pedigrees of 372 stock rams, with pedigrees and history of over 200 flocks, pure bred, improved Spanish Merino Sheep. Sent postpaid on receipt of $2.00. ALBERT CHAPMAN, Sec., Middlebury, Vt.

A Pamphlet Free.
THE MURRAY HILL PUBLISHING COMPANY, 129 East 28th St., New York City, will send by mail a large pamphlet entitled EVIDENCES OF DOCTOR FOOTE'S SUCCESS as a writer and practitioner of medicine, and a catalogue of all their publications—reading enough for several weeks—if you will but enclose one letter stamp to their address.



Horticulture.

"Every tree is known by its fruit."
"The desert shall blossom with the rose."

ORANGE AND LEMON TREES.

Scarcely a week passes without our receiving inquiries about budding lemon or orange trees. An opinion appears to be prevalent that seedling plants will not produce flowers or fruit without budding. It would seem almost impossible that such an error could be entertained, and yet we know it to be wide spread. A large proportion of the orange and lemon groves of Florida and other sections are planted with seedling trees that are never budded. An orange seedling fruits as freely as an apple seedling. Varieties are propagated by budding, but much good fruit is produced by seedlings.

Florists who raise orange trees solely for their blossoms, bud them with those kinds that are known to be abundant bloomers. One of the best of these is a dwarf variety called the Otaheite orange; it produces a great abundance of fragrant flowers and a small, worthless fruit. Seedling plants may sometimes require to be older than if budded, and sometimes not. A seedling tree nine years old, five feet in height, this spring has matured three fine fruits, nearly equal in size. One of them measures four and one-half inches in length, and four inches in diameter the short way; they are nearly round and very fragrant, having an odor almost like a peach. We call it the Grandma Lemon. This tree has been reared from the seed in a pot and trained by the skillful hands of one who all her life has loved and reared plants. The snows of nearly ninety winters have left her locks white and thin; but the sunshine of as many springs and summers, and the smiles of the flowers, have gladdened and warmed her heart. Not in the least has age chilled the fervor of the admiration which she developed for flowers when a child, and which, also, she has imbued the hearts of her children. These beautiful fruits, the last in a long life, are only symbols of a fruitage that has honored her for scores of years, and that in the future shall contine to "call her blessed."—*Vick's Magazine.*

RAISIN RAISING.

We clip the following from the New York *Times*:

To the already apparently unlimited agricultural and mineral resources of California, a new industry seems likely to be added—that of raisin-making. About four years ago J. P. Whitney, a gentleman widely known in that State in connection with wool-growing and grain raising on a large scale, began planting vines of the "Muscat of Alexandria" variety of white grapes with a view to demonstrating that raisins could be made in America of as good quality as those from abroad. Since that time about 200,000 vines have been planted. As the first result of Mr. Whitney's experiments two car-loads of 20,000 pounds each of California-made raisins were recently sent East, one car-load coming to this city and the other going to Boston. In both cities they have been received with favor, selling equally well with the best imported Malaga raisins, with which they compare favorably as to size, color, skin, stones and flavor—the latter being the most essential quality. The United States is the greatest raisin-consuming country in the world, and uses annually more raisins than the whole of Europe. The market is mainly supplied from Spain, the raisins known as "Malagas" being considered the best. They come from a comparatively narrow strip of country in the south of Spain, which has hitherto been regarded as surpassing all other regions for raisins of that character. The annual yield of Malaga grapes average 2,250,000 boxes, of twenty pounds each. It sometimes reaches 2,500,000 boxes, and last season about 2,000,000 boxes were marketed. Of this enormous yield the United States takes fully one-half, on which it pays a duty—as on all other raisins—of two and a half cents per pound. An inferior raisin with which the market is largely supplied, is known as the Valencian, and comes from a region further north in Spain.

GIVE OUR BOYS A CHANCE.

Mr. Dietz the able Manager of the Boys' Aid Society has made many appeals to the public *to give the boys a chance*, now we offer a capital chance for lots of boys, and girls too, (for girls make as good gardeners and florists as boys), we therefore invite them to read about the energetic and smart boy who writes a letter to *Vick's Magazine*, telling Mr. Vick what he accomplished.

Boys and girls can raise plants and flowers and sell them too, and this is better than to waste their time on the streets.

Hear what this *boy* says after he became a *man* and an editor too, good for him:

An editor in Michigan writes us a letter of his experience, when a boy, in gardening, which may be useful to some of our young readers: "A dozen years ago, before I had cut loose and drifted out on the uncertain sea of journalism, I was a boy, just at that age when the general American boy begins to feel the need of spending-money, and likes to feel that it is his own. In order to be independent I determined to earn my own money. As a 'starter' I sent a club to you for flower and garden seeds, taking my commission in seeds, which I sold at a profit. As this was not sufficient to satisfy me, I used all my ingenuity and the knowledge I could acquire from your works in constructing a suitable hot-bed. Here I sowed Cabbage and Tomato plants, and I am proud to say I had the earliest and best in the market. So flourishing was my business that I employed other boys to sell on commission, and when the planting season was over I was nearly twenty dollars ahead! And however successful I may be in after life, I am sure that no money I ever earn can give me the genuine pleasure I enjoyed in spending that money. I hope that you will suggest this plan to your readers, for what one ten-year-old boy has done, ten ten-year-old boys can do."—*Vick's Magazine.*

WINE AND SPIRIT REVIEW.

From Messrs. J. R. Parkington & Co.,
Our Correspondent at London,
Crutched Friars, London, E. C., May, 1879.

We expressed a hope in a recent report, that the Select Committee on the Wine Duties would lose no time in proceeding with their labors, and we are glad to find that they have not only commenced, but that considerable evidence has also been taken. All the witnesses examined up to the present, appear to consider that the prevailing system of levying the Wine Duties is fairly equitable, and generally satisfactory to the trade, besides which, any reduction would not materially affect the prices to the consumer, or increase the consumption of Spanish wines, whereas, on the other hand, a serious loss to our revenue would most probably ensue. A graduated scale is at present receiving considerable attention, but if adopted, it would undoubtedly cause much complication, not to mention endless disputes in the trade, as well as between merchants and the customs.

The Select Committee on the Food and Drugs Act have made their report, in which we believe they recommend that the limit for Gin should be 35, and for all other spirits 25, under proof.

Business has exhibited a little more animation during the past fortnight, but only to the extent of small orders to meet current demands.

From the champagne districts we learn that the frosts on the 12th and 13th April did little or no damage, in consequence of the very backward condition of the vines.

There has been some little excitement at Bordeaux this week, in consequence of the sale of 2800 hogsheads Chateau La Tresne vintages 1877 and 1878, comprising 1600 hogsheads of the former year at £5 per hogshead, and 1200 hogsheads of the latter at £4 15s per hogshead.

The recent wet and cold weather has done much damage to the vine, many of the buds, instead of developing, having been bitten so severely as to wither and drop.

At Cognac business in genuine brandies continues restricted, although there have been a few transactions in common kinds.

WHISKEY—Irish continues very quiet. Some few days ago a rumor got abroad that another large failure was imminent, but it was discovered to be without foundation, and confidence is again restored.

Rum remains depressed, a few sales having taken place in Jamaica and Demerara only, at previous rates. There is a further slight falling off in the stocks, which amount to 32,000 puncheons, as against 37,060 last year.

LONDON AGRICULTURAL SEED TRADE

From Messrs. John Shaw & Sons the well known Seed Merchants, of London, we have the following:—

MARK LANE, LONDON, E. C., May, 1879.

EDITOR FARMER.

The trade for farm seeds, as might be expected, now presents a quiet appearance; and there is no quotable variation in the value of any kind of clover seed. A few orders for immediate sowing continue to drop in; but these of course, diminish every week both in number and extent.

With regard to the surplus stock of American clover held in this country, there is a better feeling; and a substantial advance is noted on the unprecedentedly low prices recently accepted. The present stock in Liverpool is 11,000 bags, against this time last year 2,800.

A considerable quantity of new Canadian clover has lately been sold at from 30 to 32 per cwt.

The English clovers are said to look remarkably well; but not so good an account is given of the trefoils. Alsike and white clover are without alteration.

For Foreign Italian and Perennial ryegrass the inquiry keeps brisk. There is also an improved sale for mustard and rapeseed. Spring tares have during the last few days met with increased attention. Other articles in the present quiet state of things offer no subject for remark.

THE AUSTRALIAN GUM TREES.

There is no tree known to science that presents so many valuable properties as the various species of the Australian Eucalypti. As many as one hundred and fifty varieties of this invaluable tree have been discovered. No timbers in the world can compare with those of Australia; for purposes requiring great strength, combined with great durability, they are unapproachable. Owing to an essential volatile oil that exudes from the foliage, epidemic rarely exists in Australia. The entire species are more or less medicinal. Yet after many experiments, I have found that some of the species, most useless as far as their timber is concerned, are of the greatest value as medicine plants.

In the back bush the gum leaf has often to answer the purposes of the entire medicine chest.

During the past six years I have been experimenting on the various species of the Australian Gum—the roots, the bark, the gum, and the leaves—with great care.

I have found that the gum that exudes from some of the species cannot be excelled for some purposes.

For Rheumatism, Neuralgia, Gout, Sciatica, or any affection of the Nervous System, it appears to be almost a specific, giving immediate and permanent relief. For resolving the attack of Fever and Ague, it is marvelous. It is equally valuable in all diseases of the Liver.

The BEST MEDICINE one can possibly take for Indigestion, Fever and Ague, Wind in the Stomach or Bowels, Sick Headache, Heartburn, Giddiness, Drowsiness, Languor, Spasms, Pains and Fullness at the pit of the Stomach or region of the Liver, Loss of Appetite, Diarrhœa, Dysentry, and the most certain cure for Piles is Clarke's Liver and Bilious Pills.

It is essentially necessary during an attack of any of these diseases that the bowels be freely evacuated by a dose of four to six of the "Liver and Bilious Pills" previous to taking the Fluid Extract, and a small dose of the Pills every night will greatly assist the action of the Fluid Extract. For Rheumatism, Sciatica, Gout, Neuralgia, or pains in any portion of the body or limbs, the part affected should be freely bathed with the "Concentrated Fluid Extract."

For Dysentry and Diarrhœa it supersedes all other medicines known. For ordinary cuts, or slight bruises, one application generally suffices.

For Colic, Pains in the Stomach or Bowels, a single dose generally gives relief before five minutes. In bad cases a dose may be taken every half-hour, or hour, till relieved.

Very Rare Australian Seeds.

WE HAVE RECENTLY RECEIVED FROM AUSTRALIA large collections of the new varieties of the Eucalypts never before imported here; also, very rare TREE and SHRUB SEEDS, which are most desirable to introduce upon the Pacific Coast.

In order to scatter them widely, and thus have them extensively grown and more widely disseminated. We shall put them up into collections of ten *parcels each*, and mail them to order, at $5 each collection. Address

WARREN & CO.,
320 Clay Street, - - - San Francisco.

NURSERYMEN AND FLORISTS ABROAD

Nurserymen and Florists abroad who desire to make their business widely known on the Pacific Coast; those Nurserymen, especially, who have NEW and RARE kinds of Trees, Plants, Shrubs, or Seeds, should remember that by advertising with us and making their business known in our columns, they can secure an extensive trade from our Golden Land, and at the same time make their business known over the whole Union, and also in Europe and over all Australia, as our JOURNAL circulates there to a large extent.

This is the season when Nurserymen should make known what they have for sale.

Best Fruit Dryer in the World.

HAMPTON & KELLY
—AND—
KELLY & COLE'S
FRUIT DRYER.

THIS MACHINE DRIES BY STEAM HEAT AND DOES not burn the fruit. It is very economical in its working machinery, and so perfectly simple that every family can use it in their homes, it is also perfectly safe.

In connection with this machine is an admirable GRINDER capable of grinding one bushel of fruit per minute.

The capacity of drying of the SINGLE DRYERS are from 20 to 30 bushels in 10 hours for each machine. Large machines will dry from 30 to 100 bushels in 10 hours.

Orders for these machines, for the present should be sent to Messrs. Kelly & Cole, First and Salmon Streets, Portland, Oregon.

A manufactory of these Dryers will soon be established here, and will be under the superintendance and management of **ALFRED B. COLLVER**, who is the General and Traveling Agent of all these Inventions.

Mr. Collver will have his office in this City a early day—all letters for him can be addressed through the Express or Postoffice to the undersigned, and they will have prompt attention.

ALFRED B. COLLVER.

N. B.—Letters can be directed to me care of EDITOR FARMER, to whom we are permitted to refer for the excellent quality of our Fruit Dryer. A. B. C.

This estate will be sold at a great bargain by reason of declining health of the present owner.

Particulars can be had from EDITOR FARMER

The California Farmer.

SAN FRANCISCO.

THURSDAY EVENING, JUNE 13, 1879.

THE CALIFORNIA FARMER READING ROOM, AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Maple Building—Up Stairs.

FARMERS HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the Farmer Office is always open, and an attendant ready to make every effort to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

Farmers Reading Room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the Farmer Office. Members of the Press and Strangers from abroad are particularly invited to avail themselves of these rooms. Newspapers from every State in the Union, as well as Foreign Newspapers, Periodicals, and Magazines are upon file and on the table for reference; a Good Library of hundreds of volumes with works illustrative of Agriculture Horticulture, and Floriculture, and works for reference upon all the Sciences; also, a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all Free.

Advertising Medium.

The terms for advertising in the California Farmer is, ONE DOLLAR for five lines or less of space in Nonpareil type, for one insertion, fifteen cents a line for any larger space. Each subsequent insertion ten cents. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. The right is always reserved, to reject any advertisement deemed objectionable.

Sample Copies.

☞Those who receive a number of the Farmer with this paragraph marked, will please understand it is sent to them for their examination, hoping our paper will meet their approval and induce them to subscribe, and to a desire to prompt their neighbors to subscribe also

Samples copies sent when requested. Liberal rates for Clubs or Societies.

WARREN & Co.,

PUBLISHERS CALIFORNIA FARMER,

San Francisco, Cal.

Editor's Chair.

Home.—We have in our poets' column "Home" and the "Wedding," kindly sent us by *two new correspondents*, to which we invite our readers, both of which contain much merit, we hope more from the same source—"Don't Stop My Paper," is very appropos for the times, and has excellent points for all who feel the hard times.

"Growing Old," by Mrs. Henry Ward Beecher, is worthy a careful reading by every wife and mother—"Health of Women," "Children at Home," "About Food," "A Poor Girl's Hair," "Soft Water," on Home page are worthy of note.

Horticulture.—"Orange and Lemon Trees," "Raisins," "Give our Boys a Chance," should be read. "The London Wine and Spirit Review" shows the condition of the London wine market, and is of moment to our wine makers now that great efforts are made to crush out our wine interests by the free trade system of France. "London Seed Trade" show the condition of the seed trade there. "Australian Gum Trees," these trees should be more extensively grown over this State, and large forests of them grown to shield our State from the whirlwinds and storms that have desolated other portions of our country lately.

Miscellany.—"The Land of Magnificent Distances," is specially worthy of note, how few of our people know of this great region—"Our Imports and Exports" show our country gaining

Agriculture.—"How we Saved the Old Farm," we give chapter eight of this truly interesting story, and commend it to all our readers, the book should be in every farmer's library—"American Bacon in England," here are remarkable facts for our hog raisers and pork packers to know

Our Front Page.—We invite our vineyardists to the letter of our correspondent from Tahiti, a gentleman scientist, who shows he understands the subject, and has before offered in our columns very valuable letters upon the phylloxera and suggestions for a remedy.

We ask attention to the very interesting article on the "Capabilities of New Zealand," where now are large interests with this coast—also the "Sydney Markets," from our kind correspondent there.

Can you suggest a remedy for the small red insect that infest, trees and shrubs, covering itself with a white down?—A Reader of the Farmer.

[We are glad to give a good and sure remedy—the Eucalyptus Oil put on with a swab of woolen cloth is a sure remedy.—Ed. F.]

URANINE.

This wonderful new compound which has excited so much wonder and admiration, and which is so valuable as an Analine Dye, has been received by us and will be offered for sale by us at early day. We can show it as illustration of its magic power—a single grain will color 350 gallons of water. For sale at

FARMER OFFICE.

Bills Sent Out.

We would hope that those of our patrons to whom we have sent bills, will kindly remember that a good many *little sums from each* would be of great advantage in times when money is of value.

Our Merchants and Shippers of Goods to Australia who desire to know the rates of duties to the several Colonies, can find a "List of Duties" of each district at the Office and Reading Room of the California Farmer, 320 Clay Street, San Francisco.

BORN.

Korte—In Alameda, June 10, 1879, to the wife of William Korte, a son.

SEASON—PROSPECTS—CROPS.

From all the leading counties in our State we have encouraging tidings of the crops, the haying season is nearly over, and a very large crop will be made even with the loss that may have been occasioned by reason of the late rains.

The Barley Crop is now being gathered and promises to be a heavy one, even better than last year.

The other Grains are all doing well, rye, oats, buckwheat, all promise a good fair yield, while the Corn Crop will be a heavy one.

When we speak of our great crop our Wheat, we feel assured we are safe in saying that it will exceed the Crop of 1878, and various as are the estimates made, from 400,000 to 750,000 tons for export, we are satisfied that California will have the present year of the best of grain, Half a Million Tons as the sum we can spare for *export*.

With a Harvest like this, our Grain growers ought to be able to tide over some of the trials and difficulties of which they have so long been complaining, and if our farmers will but sell their grain as fast as they can harvest it, pay their obligations and thus send out into a general circulation the cash value of their crops, instead of storing it and "holding on" for a speculation, the great good they would do themselves and the State would be immense, for this five hundred thousand tons of grain, of *one thousand, five hundred millions of pounds*, even at 1½cts. per lb. net, would be *Fifteen Millions of Dollars*, and this sum scattered over our State would lift the incubus of debt from many thousands, and set the wheels of business to rolling merrily, and give a cheerful tone to tens of thousands of our citizens, who now are waiting for the turn of the present stagnant pools of waters to run clear again.

The Orchard Fruits of our State will this year be immense, as their abundance is already beginning to show upon our markets, so great will the harvest be that our noted Fruit preservers, Cutting & Co., James King of William & Co., Sol. Wagenheim & Co., are all driving an immense work, and this will largely increase as other fruits mature, a look through the wholesale Commission Houses on Washington, Sansome and Davis street at early morn, would surprise those that have never been there at early hour.

The Vineyards now give a goodly promise, and we believe such will be the great immenaity of the Crop that our Wine makers will make this year from *ten to twelve* million gallons of Wine, and of better quality than ever before made, constant experience is making its mark on the quality of our California Wines, and it is this great interest of our State that has so excited the jealousy of France, and caused the mission of Mons. Chotteau to our country, of which we speak in another Column.

Our noted California Wine makers, Messrs. Kohler & Frohling, Groesinger, Landsberger & Co., Lachman & Co., and Sonoma Vinicultural Society, by their large exports of Wine to the Eastern States and to Europe, have excited the action of wine makers abroad as we have noted elsewhere.

The Wool Clip of our State will be a good one, over forty million pounds, and this product has recently advanced more than *twenty-five per cent. in value*, thus adding quite a little sum to the pockets of our Wool growers.

All the other Crops of our State promise well, if we except the *Hop Crop* which appears to come short this year by some 30 to 40 per cent, and yet it will be large, some 600 tons.

Were it not for the *political cloud bursts* that so often sweep over our State we could promise sunshine and prosperity to all, based upon so plenteous a harvest in prospect, but a State under misrule and amid such a thraldom of interests, all hopes and prospects are subject to defeat.

Much of the future prosperity, we may say that all, depend upon our farmers now, for in the coming elections all the great interests of the State are placed in the scale—and our farmers hold the balance, when the weighing process comes, and the scales of prosperity or adversity are offered by the coming election, we trust our farmers will be at their post and not be found wanting. But save the state.

American Pomological Association.

The Seventeenth Session of this most excellent institution will hold their next annual gathering and festival exhibition of fruits in the city of Rochester, on Wednesday, September 17, to continue for three days

The noble and venerable President, Hon. Marshall P. Wilder, who recently was injured by a fall, we are happy to learn has again recovered and it may be hoped will preside at that meeting.

The meeting will be in the Council Chamber of Rochester, this having been granted to the Society for that purpose. We shall give the full plans soons.

The Great Sydney Exposition.

The great Australian Exhibition will be held at Sydney, opening on the first of September, and continuing *six months*.

This will be a grand opportunity for the merchants and manufacturers of California and the whole Pacific Coast to make themselves and their business known in that rich region of country.

The Pacific Mail Steamship Co., will take articles for the Exhibition at *half freight* rates, and it is to be hoped this opportunity will be duly appreciated.

All who desire information upon the Exhibition can find the Rules, Regulations, Officers names, Plan of the Buildings and all particulars at the California Farmer Office, together with complete files of Australian Newspapers from Melbourne, Queensland, Sydney, Auckland and all the important parts of that Country, with the reports of all the great interests, manufactured products, exports, etc., of Australia, these can also be had for reference to the Exhibition.

A special bargain will be offered in the splendid new pattern Farm Wagons and Buggies now on exhibition and sale at the agricultural warehouse of G. A. Davis, 327 Market Street, S. F.

BATTLE OF BUNKER HILL.

On Tuesday next again comes the anniversary of the "Battle of Bunker Hill," one of the most noted, and one of the most important events in the history of the Revolution, which gave to our country the blessing of civil and religious liberty.

As a son of New England, born in old Middlesex County, within whose boundaries are Bunker Hill, Lexington and Concord, we hail the return of this day as an epoch that stands out in history marked in letters of living light, to serve as a beacon to lead all the descendants of our "Revolutionary Sires" to be true to that great charter of freedom that was purchased at the cost of the blood of patriots.

What thrilling memories cluster around that memorable day and that sacred column that now stands on Bunker Hill; to us no spot in our own beloved country is more dear to us, it is our native county, and it has been made doubly dear by all its associations, for the name and the kindred who fought, bled and died there.

We remember well the laying of the corner stone of that lofty monument, when the noble Lafayette was present, and even at that period of long past years it was our pleasure, privilege and duty to perform military service on that occasion to the immortal hero of France who came to this country, the friend and laborer in the cause of Liberty with the immortal Washington.

The recollections of these long past events, now thrills us with precious memories as we recall them, and as we remember how few now live who can go back and recall those times or the form and features of that mighty defender of the Constitution, Daniel Webster, the orator on that occasion; as we recall his glowing eloquence on that day, we can in imagination see his towering form again as he stood upon that sacred spot with Lafayette by his sid, and a host of noble men also of those days, men too, nearly all of whom now "sleep the sleep that knows no waking."

Rarely have mortal lips uttered more eloquent words than were uttered that day in the full, clear voice of that great man whose every word could be heard by more than *twenty thousand people* who stood around him, and never has there been uttered a more thrilling peroration of eloquence than was breathed forth in the closing words of that oration, when Webster, raising himself as it were upward with his own spirit, inspired by his mighty thoughts, he lifted his arm and pointing upward said, as he prophesied the completion of that monument:

"When that last block shall be laid, when the cap stone shall be fixed, *the morning sun shall gild it with its beams, at its last lingering ray shall play around its summit.*"

Tuesday next this memorable day will be celebrated in this State by a gathering of all who can pay honor and reverence to it.

The "Bunker Hill Association," W. G. Badger, Esq., President, will hold their meeting at Redwood City, where with oration, poem, and appropriate speeches this day will be duly observed—let all who can help keep it in holy remembrance.

Fruit Drying Season.

The season for drying and preserving fruits is at hand, and all the various plans, systems and inventions will be brought forward and offered for use.

The "Alden Process" has accomplished much, and done good work, but being an expensive and costly apparatus it has not become so general as those of the more recent inventions.

The late "Fruit Dryers" are the "Granger" a valuable dryer and offered at small cost (sample dryer at the Farmer Office) the new dryer of Hampton & Kelly, advertised in our Columns, and also a good Dryer by R. B. Blower, at Woodland—these Dryers being of little cost compared with the Alden, will now come into general use.

The very large anticipated crop of fruit of the present year will require the use of many fruit dryers in order to preserve the excess of fruit and save our growers from loss

We invite attention to the "Family Fruit Dryer" now on exhibition at the Farmer Office known as the "Granger Fruit Dryer" and also to the one now offered by Andrew Collver, which is to be made in our City at early day.

Samples of the fruit dried on the Granger Dryer can be seen at Farmer Office.

Industry shall Prosper.

In our advertising Columns will be seen the card of Messrs. E. T. Anthony & Co., at 407, 409 Commercial street—the well-known re-packing establishment of over twenty-six years.

This firm is the only one in our City of this kind, and they are so well-known that their business extends over our entire Coast, it requires from 10 to 30 men to do the work; presses of 500 tons capacity soon makes a large amount of loose material into a small parcel so strong and well packed that the saving of space and measurement for shipment abroad, that the cost of re-packing is more than saved by the saving of freight in transportation on the measurement.

A visit to this establishment would interest and instruct all who buy goods for shipment abroad, as the knowledge they gain would save them money also.

The Great Yosemite Valley.

During the past few weeks this wonderful place has been the scene of great excitement, and great preparation for a scene that in past years would hardly have been conceived possible; that of concentrating three to five hundred people in the valley from all parts of our Union, and building and dedicating of a temple and holding a National Sabbath School Convention in Yosemite Valley.

This has been done recently, and we hope to lay before our readers a full account of that most interesting event, from our kind correspondent in the valley.

We had hoped to have been able to have witnessed that event, but fate willed otherwise, and we submit and wait for our correspondent's report.

GREAT STAGNATION OF TRADE.

[There can be no question now that the mercantile interest of our City and all business generally has been depressed by the result of the late election and the adoption of the new Constitution.

The result of the election has taken the great mass of business men by surprise, so confident were they that the new Constitution would be defeated that they were not prepared for such a result, the consequences are, that there is now a great depression in trade, and added to this there is a want of confidence, a fear and foreboding, that makes matters worse than before the election.

To add to the stagnation of trade, Real Estate and other solid properties are depreciating, failures are increasing, stores and houses innumerable "To Let" and the numbers daily enlarged, and this is directly attributable to the adoption of the new Constitution.

Every day and every week there are many and new sources of anxiety made known; the want of money is being very seriously felt, and as this want increases new difficulties occur, Real Estate is not only unsaleable but is constantly depreciating, there are no buildings going up, no manufactories started, and workmen out of employ are increasing in numbers, while their own necessities are becoming importunate, and added to these all business men connected with building operations are suffering most seriously by this stagnation in business; carpenters, masons, painters and workmen in all departments are feeling this condition of things, while all classes of men who have depended upon the increase of new buildings, lumber merchants, door, window and sash makers, and all hardware merchants who supplied these mechanics are doing no business, and this stagnation effect a host of others; workingmen and builders being out of employ hotels and boarding-houses have to suffer and thus through all the departments of trade, a stagnation and a deadness that is fearfully sad, and this the result of our political *stratagists* that have given the people a New Constitution that has come as a cloud over our State.

Our political system must be *revolutionized* if we would save our State.

One of our Eastern exchanges discourses about the kind of men we "need for the times," the writer gives a true view of what is needed, and certainly it will apply to California now, and points out the very kind of work that is to be done, so that the next Legislature will be composed of the right kind of men.—Ed. F.]

THE KIND OF MEN WE NEED FOR OFFICE.

"A democratic rascal is no better than a republican rogue, and *vice versa*. It is the ability and honesty of the man that fit him for office, and not his political faith. The man who fights for principles, and not for party; who dares overleap the hedges of personal friendship or favoritism, to do his duty, regardless of public or private opinion; who stoops to nothing below the dignity of his manhood, and would scorn to hold his position as a highway robber, stealing from the thousands of his fellowmen who would put him there, is the type of man the country needs to save it from impending ruin, and recall the prosperity which reigned throughout our glorious land when our fathers were not ashamed of quitting the public service poorer, (but as honest,) than when they entered it.

"It is time people open their eyes, and bury party prejudice; it is time that they purge the land of its corruption, and not suffer themselves to be cajoled by the promises of adventurers, whose sole aim is to obtain an office that will enable them to put their hands in the public coffers, and add more to the destitution now prevailing. The country needs not only talented and efficient men in its positions of trust, but it needs *honest* men, and it must have them."

[The above picture of our need now is to the very point—there must be a revolutionizing of party, we do not want old partizans, but new, clear headed men, who have never yet been slimed in the filthy pool of politics, already partizans are at work, but they must be cast aside, and new men called to take the lead.—Ed. F.]

SANTA CLARA COLLEGE.

This truly distinguished College had its Twenty-Eighth Annual Commencement exercises at the College on the 2d and 3d of this month, and it was our great pleasure to be present and enjoy the exercises of the students, and also enjoy the great social entertainment of the Fathers; where, surrounded by their pupils, parents, and friends they meet at the Annual Dinners in a happy reunion.

For more than twenty years we have enjoyed these Annual Commencement days at this College, and we must say that no College in our land, and we have attended many, are more thorough and complete, and no College on this coast with so extensive means or more faithful teachers than at the Santa Clara College.

The exercises of the present year were of a high order—the essays and addresses were evidences of very advanced scholarship, showing true devotion on the part of Fathers and Professors, and wise and close application on the part of the students, all speaking in high commendation of this College.

Commencement days are most interesting times to students, and quite interesting scenes are witnessed when so many students finish their studies and take their farewell of the College and the Fathers for a vacation or a final adieu,

The Commencement day this year at the College was a brilliant affair, from 1200 to 1500 persons attended and all were gratified, bestowing great credit upon Fathers, pupils and the College.

The College buildings are very extensive, and the many halls of the various and very valuable collections of the needed apparatus for every science taught, make the College a place of famed resort by men of science.

The grounds around the College are also extensive and truly grand, we have special note of them of which we shall speak soon.

We remember with great and pleasurable interest our many Commencement days at this College and return our kind regards to the Fathers for what we have enjoyed, and at same time earnestly recommend parents to this College if they wish their sons to do well.

CARRIAGE MANUFACTURING.

Our City is full of carriages of all kinds, and hundreds are sold every month at the public auctions that take place for various causes.

It is one thing however to buy a carriage cheap and another thing to get a *good Carriage*; it is one thing to buy a *showy* and *stylish* carriage, and another thing to get one that shall be *lasting* and *durable*.

It is one thing to buy a *costly carriage* and at same time to get one that shall prove an *easy going carriage*, one that will make a journey pleasant and agreeable.

It is one thing to buy a carriage however highly commended, and quite another thing to find after the purchase and a trial of it, that you have indeed made a purchase that has *combined all the good qualities named*, a carriage at a fair price that is *elegant, easy going, durable and satisfactory* on all the points named so essential in a family carriage.

We know there are a large number of good Carriage Manufactories in our State where carriages of all kinds are manufactured and sold, and each manufacturer claims their own best.

There are however many that *make carriages* in order to sell as many as they can, irrespective of the great desideratum that their work shall give *satisfaction* to the purchaser.

We have always held to the fact that the best article is always cheapest in the long run; and, most assuredly if there is one thing more than another where this rule will apply in the fullest sense, it is in relation to a good family carriage of any kind; and this rule will hold good to all who purchase a carriage of any kind, and also to our *farmers* for their wagons and all implements; the best article is always cheapest to buy.

Having examined many of the carriages made in our State, and there are many good and excellent ones made here, we have seen no carriages or buggies or any class of family carriages or farmers wagons, or store and express wagons, that have ever excelled those made by the extensive Carriage and Wagon Makers on Pacific street; the old and long established firm of

B. Grave & Co

Mr. Grave has been over 15 years engaged in *Carriage making* in our City, and the motto of this Firm is to make only the *Best* and send out only *perfect work*.

In this connection we can attest to the fact that we know their carriages always give satisfaction to their patrons.

Messrs. Grave & Co., employ from 30 to 50 men as orders come in, and they have large orders, not only from Home customers but all over the State, and from other places outside, even from Australia.

The style of their famed Openheim Carriage, made to use as a single or double Carriage, has no superior on this Coast, their Phaeton's, Coupes, Coaches for private use, their Stage Coaches, their Buggies and Wagons are admitted to be of a very superior quality and always please and give entire satisfaction to all who buy of this popular Firm.

To such manufacturers we always take pleasure to commend our friends and all our readers, for we are sure *our recommendation* is based on a certain knowledge that this Firm will never fail to do their work well, and please and satisfy all who give them their business.

This notice is made without any disparagement to many excellent manufacturers, but as an act of justice to worthy manufacturers of our own City, who have given long years of labor to many worthy and industrious mechanics, and thus sustained the industries of our State.

The American Association.

We have announcement of the fourth annual meeting of the "American Association of Florists, Seedsmen, etc.," to be held at the new Board rooms at Cleveland, Ohio, June 18th.

This is to be a large assembly, as delegates are expected from the principal States of the Union. every effort will be made by the officers of the Association for a meeting of great interest.

The following is the programme

Wednesday, June 18, 1879, at 10 A. M.

Address of Welcome
Response of the President
Appointment of Committees
Miscellaneous Business.

Wednesday P. M.

Address of Geo. W. Campbell, Esq., on the subject of Grape Culture and the probable future of Grape Culture in the United States
Miscellaneous Business

Thursday, June 19th, 9 A. M

Addess of Jonathan Periam, Esq., on "The Influence of Horticultural Art of Civilization."
Followed by a paper from W. C. Barry, on "New Fruits."

Thursday P. M.

Address by Dr. C. Thomas, State Entomologist, on the Aphides or Plant Lice.
Followed by Thomas Meehan, Esq., on the Future of the Nursery Business

Friday, June 20th, 9 A. M

Address of Dr. John A. Warder, on the subject of Forestry
Address of Dr. S. B. Parsons, on New Plants and the Planting of Fruit Trees in Landscape Styles

For all information address D. Wilmot Scott, Cor. Secretary, at Galena, Ill.

Haymaking and Hayraking.

When the grass and grain falls for *hay making* the next thing is to make up the *Hay*, and the very best invention to put the hay in windrows is the excellent Self Dump Hay Rake, of the Firm Bradley & Co. Patent.

Haymakers this is the Rake for you, and Geo. A. Davis, 327 Market street, is the only Warehouse where you can buy them.

The large export movement in wheat and flour at this port in April was an agreeable surprise. Usually at this season of the year we do not expect much activity in this department. At the commencement of April we had eighteen and vessels under engagement to take wheat, and few thought that they would all be loaded by the end of the month. We did even better than that. The record show that there were twenty-three clearances with wheat and flour during the month of April, independent of quantities by steamer. All but two of these clearance represented full cargoes. The number is the largest in four months. From the commencement of the present harvest year, July 1, 1878, to April 30, 1879, we have dispatched 216 ships and barks with wheat and flour—fifty

FURST & BRADLEY'S SELF-DUMP SULKY RAKE.

The Attention of Farmers is called to the merits of this Rake, and its great superiority over all Self-Dump Rakes heretofore brought to the notice of the public. The Dumping is done by friction bands around the ends of the hubs giving full control of the Rake to the operator, so as to be able to carry the teeth clear of the windrow. This does away the necessity of ratchets and pawls which is so objectionable in all other Self-Dump Rakes. The teeth are of the BEST CAST STEEL and have a double coil which renders them capable of the most severe work.

EUCALYPTUS

Clarke's

LIVER AND BILIOUS PILLS.

They are guaranteed to contain no preparation of *Mercury* or *other Mineral*, being made exclusively from choice vegetable extracts, combined in such proportions as to form the most perfect, useful, and natural purgative and tonic medicine ever before introduced. May be taken at all times without danger of taking cold.

They are especially useful in all Female Irregularities.

WARWICK, December 30th, 1872.

To MR. DAVID CLARKE, Chemist, Warwick

DEAR SIR—During the last nine months I have travelled two thousand nine hundred miles through Northern Queensland. The only medicine I used was your "LIVER AND BILIOUS PILLS," which I took occasionally, and have enjoyed *good health* since, while others in similar circumstances have been ill with Fever and Ague. I can thoroughly recommend them. (Signed) WILLIAM WATSON.

LONDON BOARDING HOUSE, ALBION STREET,
WARWICK, September 25, 1874.

To MR. DAVID CLARKE, Chemist and Druggist, Warwick.

DEAR SIR—I have been suffering from Indigestion, and all the miserable feelings connected therewith, for the past five (5) years. I have tried nearly every remedy I could hear of, but to no purpose. Having heard from an acquaintance about your "LIVER AND BILIOUS PILLS," I thought I would give them a trial, although I had little faith in any remedy. After using a little more than one box of these valuable Pills, thank Providence, my health became vastly improved. I can now sleep comfortably at night, have a good appetite, and feel altogether a different man.

I give this testimonial unsought, in order that others, suffering as I have been, may be benefitted. (Signed)
JOHN GREEN,
—Tentmaker, &c.

TESTIMONIALS IN CALIFORNIA.

We give but a few of the many we have received—but they are all of the most reliable character.

From San Jose we have a letter from a distinguished citizen who writes thus

"A lady who had been badly afflicted with the Rheumatism tells me that the preparations of the Eucalyptus *has cured her*, and says you are the agent for these medicines—now, such as you have that are good as liniment and internal medicines send me by Wells Fargo & Co."

The Medicines were sent as ordered and with like success.

An English gentleman, stopping at the Palace Hotel, who had been afflicted with the Neuralgia *for three years*, and never a day free from pain—was entirely cured by using *three boxes* Pills and one bottle Liquid.

YOSEMITE VALLEY, September 17, 1877.

COL. WARREN—*Dear Sir*

I have given away and used up all the Eucalyptus Medicines which you sent to me. I find that they have been so greatly beneficial in every case that I am very anxious to get some more Pills and two or three bottles of the Extract. I have ever been opposed to taking Medicine if possible to avoid it, but if I must take it give me the Eucalyptus above all others. Yours sincerely,
GALEN CLARK,
Commissioner Yosemite Valley.

A highly valuable testimonial has been received at the Agency, which we have been kindly permitted to use, and, coming from so high a source, we feel it a duty we owe to the public to give it the following letter

SANTA CLARA, SANTA CLARA COUNTY.

COL. WARREN—*Dear Sir*

Heretofore we have had no occasion of trying the Eucalyptus Medicines, in Pills or Liquids, but we have commenced to use them, and we find them very beneficial; some of our Fathers find a great relief in their complaints; the consequence is that we want more Medicine, and we ask you to send us One Dozen Bottles of the Liquid, and One Dozen Boxes Pills, and Half Dozen large Boxes, and I shall send you the results. Please send bill. With best wishes for your welfare. Yours respectfully,
A. CICHI, S. J.

At later date we received the following, another proof of the virtue of this Medicine

The Pills we find to be a mild and beneficial cathartic. The Liquid Extract is a valuable Blood Purifier and a good appetizer A. CICHI, S. J.

The above from Prof. Cichi, the well known and truly distinguished Chemist of Santa Clara College, we esteem an approval of so much value, that all who suffer from any of the above diseases, can be assured of the high merit of the Eucalyptus as a Remedial.

We have the names of scores of well-known citizens at our office, from all over the State, who have been relieved and cured from long and great suffering by the use of these Eucalyptus Remedials.

Those who desire *permanent relief* should bear in mind that there have been many compounds made in this State, more imitations, sold as the Eucalyptus Remedies—but DAVID CLARKE'S *Australian Preparations* are the only Genuine Remedials that can be relied upon.

Ask your Apothecary to be sure and give you David Clarke's Australian Pills—the only genuine.

Home Miscellany.

"There is no place like Home.
Home! It should be Heaven on Earth

Written for THE CALIFORNIA FARMER.

HOME.

LETTIE.

Home that place of true and gentle rest,
Unfolding the finer feelings of the breast,
Which jarred by strife, and jostled by the throng,
As they, with eager footsteps push along
Need Home! dear Home, to tune the jarring string,
And make the heart revibrate, with a joyful ring.

Like the tired wanderer, who, seeking rest and shade,
Finds shelter, in a peaceful woodland glade,
For having wandered 'till his feet are sore,
And weary limbs refuse, to serve him more,
O'er burning fields, through forest tangled steep;
The view enchants, and charms him, into sleep.

Grand, stately trees, like virtues, firm and strong,
Deep rooted, tall, and giant-like, in form,
Enclose the spot, and bar the burning heat,
And the wild tempest from the loved retreat.

Sweet blooming flowers, emblems of joy and love,
Lift their bright, pure faces to the sky above,
Living their humble mission, die, and seek no goal,
But paint in Heavens own beauty, a picture on the soul.

Fond Nature strove with free and lavish hand
To grace the bower, as if twice fairy land.
Wild song-birds, choose the spot, from all around,
And make the woodland echo with their sound,
'Till even the tiny leaflets catch the strain,
And softly, gently, murmur it again.

Ah, such a happy hour for birds and flowers!
Would that such happiness might be in Homes of ours,
Unstained by spoil and gain untried by strife,
Would not it be a joyous, thankful life.

If virtue with her strong protecting arm,
Were round about us shielding from all harm,
Then we would find our homes secure and strong,
And storms howe'er severe would not be long.

And flowers of happiness would ever gladly bloom,
Smiling away the dreariness, and gloom,
Bright thoughts like happy birds, be on the wing,
And we like birds with joyful hearts would sing.

The if stern winter come all drear and cold,
The trees of virtue stand protecting as of old,
And spring times genial warmth and sunny clime
Will bring its sweetest flowers in God's own time.

Written for THE CALIFORNIA FARMER.

THE WEDDING.

ELLEN BUTTERFIELD.

He led her to the altar,
So happy, bright and fair.
She knew he would not falter
In his loving, tender care.

She in her joy and gladness,
Thought not of weal or woe,
Which in future might bring sadness
To the hearts that loved her so.

But what means that look of sorrow?
And the tear that now is starting?
Ah! she thinks her of the morrow,
Of the anguish of the parting.

Of her parents, O, how lovely!
Of her home that soon so drear,
She their darling and their only,
'Gain would she their hearts cheer

But the shadow quickly vanished,
From her fair and lovely brow,
For she had her loved and cherished
To protect and shield her now.

And a holy calm stole o'er her,
As she thought of One above,
Who would ever gently guide her
With His watchful care and love.

DON'T STOP MY PAPER.

Don't stop my paper, printer,
Don't strike my name off yet;
You know the times are stringent,
And dollars hard to get;
But tug a little harder
Is what I mean to do,
And scrape the dimes together,
Enough for me and you.

I can't afford to drop it,
I find it doesn't pay
To do without the paper,
However others may.
I hate to ask my neighbors
To give me theirs on loan;
They don't just say, but mean it,
Why don't you have your own?

You can't tell how we miss it,
If it, by any fate,
Should happen not to reach us,
Or comes a little late;
Then all is in a hubbub,
Then things go all awry,
And printer, if you are married,
You know the reason why.

I cannot do without it,
It is no use to try,
For other people take it,
And, printer, so must I.
It, too, must keep me posted,
And know what is going on,
Or feel, and be accounted
A fogy simpleton.

Then take it kindly printer,
If pay be somewhat slow,
For cash is not so plenty,
And wants not few you know.
But I must have my paper
Cost what it may to me,
I'd rather dock my sugar,
And do without my tea.

So, printer, don't you stop it,
Unless you want my frown,
For here's the year's subscription,
And credit it right down
And send the paper promptly
And regularly on,
And let it bring us weekly
Its welcomed benison.

A clock is being exhibited in Paris that fires a shot every hour, somebody says that the practical utility of this invention is, *to kill time.*

GROWING OLD.

[MRS. HENRY WARD BEECHER, in the *Christian Union*, gives a beautiful, truthful and glowing picture upon the subject of "Growing Old," no writer could give a more faithful sketch on this momentous theme—every parent, and every husband and wife will recognize and feel the thrilling truths here portrayed by this able writer.—ED. F.]

If we truly believe this life is simply a preparatory state, where we are being fitted to enter another and better life, why should we shrink from the approach of old age? It but brings us nearer to the full enjoyment of that blessedness for which most are supposed to be striving. Those who own hearts bear witness that they are not living in this probationary state, in a manner that will insure them an entrance to the joys of that better world, have good reason to dread old age and all its infirmities, for they realize that these are warnings of the coming change, when the acts of their whole lives, the thoughts of their hearts, not even manifested by word or act, will be fully revealed.

But even among the best, whose lamps are kept trimmed and burning, this repugnance to growing old is frequently manifested. This arises, no doubt, in part from the uncertainty of what that change will be, knowing that if they have lived aright it must be most blessed, yet still shrinking ing from the first step into this unknown, untried future.

Said a little girl just hovering between life and death: "I am willing to die, mamma; but if you could only go with me and lay my hand in His, mamma, for I am not really acquainted with Jesus, and you know how timid I am about meeting strangers, even when I have learned to love them."

That little girl touched the true reason why good people so often

"Stand shivering on the brink,"

But that shrinking from the untried is not all. As we grow old we look back on the past and see much that we could have done better. So much good that we have carelessly neglected to do; so many of the sorrowful ones that we have passed by without at least giving sympathy; so many sick that we have not ministered unto; so many fallen to whom we have not stretched strong and willing hands.

It is this long list of mistakes—if not sins—that robs old age of the sweet peace in watching for the great change that is near.

Ah! If we could go back, still holding in our hearts the clear memory, the full consciousness of our mistakes in the past—every neglected duty, every unkind act or word—and have the privilege of making a second trial, of living again the whole of the three score years and ten, or at least from the period when capable of judging between right and wrong!

But even while the first life spread out, ever before us like a chart, should we really improve upon the past? God only knows. And that He does not grant this second trial, argues that it is not for the best. He who doeth all things well, doubtless sees what the result would be.

But this is idle speculation. The word of God, the whole map of human life, that lies spread out before us, our own knowledge of good and evil, the good deeds of those that have gone before, or are now making the world brighter and better by their daily walk and conversation; all are in need to guide us safely, and keep us from stumbling, if our hearts are open to such influences, and really desirous of doing our duty.

Anxiety for children not yet established in life is another cause for our reluctance to accept old age and its infirmities, when it begins to herald its approach. We are not ready to have our children grow out from our care, our restraining influence; and even when well settled and leading a life quite independent of us, we are not easily reconciled to the weaknesses and feebleness that are the usual signs of the advancing old age. It is hard to believe that we are no longer necessary to the comfort and well-being of our children. It takes years to realize that they have grown away from us, that for all practical purposes we are no longer needed by our children—loved and honored, to be sure, as souvenirs of their youth, but they find themselves able to pass on successfully without our help. To see that those whom we watched over, and gave our rest and strength—almost our lives for—have grown far beyond anything that we can do for them, except to love them to the last of life—this is hard.

But when two have journeyed from early youth to the verge of old age, have seen their children grow up and scatter, making separate homes for themselves, as is perfectly right and natural, then, if one stumbles and passes into old age and its infirmities before the other, no longer keeping even pace together, to be, or to be supposed incapable of any longer bearing the burden and heat of the day together—one bright and full of energy, the other no longer called upon for active service—that is the one thing most to be dreaded in growing old. An early death with the full harness on would be far preferable.

But the poison, the bitterness of even that sharpest pang, may be somewhat softened, if, while in full health and strength, one endeavors to live so truly and faithfully for the comfort and happiness of others, that they shall leave all along their lives some bright spots that cannot grow dim, even when they are laid aside. Such lives cannot die out. Their memory will always live in the hearts of their best beloved. After their ever busy lives have closed, what they really did of good to others will be more truly recognized and more lovingly appreciated, than when those loving acts were an every hour's occurrence. Even if one does not derive all the comfort and support from this thought, in after life, which is their due still it is a good memento to leave behind us, because such lives bring blessings to others.

"This thought I give you all to keep;
Who soweth good seed shall surely reap.
The year grows rich as it groweth old,
And life's last sands are its sands of gold."

Religion is the best armor in the world, but the worst cloak.

HEALTH OF WOMEN.

We were consulted some time ago, says Dr. Nixon, by an elegant lady of fashionable life on account of two of her beautiful daughters, who were as sylph-like and symmetrical as fashion could make them, but who showed too plainly that their forms and constitutions were as frail as debility could make them without actually manifesting some specific form of disease. "Oh, what shall I do with my beautiful girls?" exclaimed the mother. "Give them strength," I replied. "And how shall that be done?" said she. "Let them make their own beds, carry their own water up stairs and down, and sweep their own rooms, and perchance the parlor and drawing-room, go to market and bring baskets of provisions home, garden, wash and iron!" Looking at me with surprise, she said: "What sort of minds would they have, what sort of bodies?" I answered: "They would have as healthy and happy ones as your servants. You now give all the health and happiness to your domestics. Be merciful to your daughters and let them have a share.

Work without useful aim or end, is not occupation nor employment. When the treadmill was introduced as a mode of punishment, the wretched prisoners felt themselves more degraded by "doing nothing," as they called it than by their crimes. How many ladies in fashionable life are doomed for years to feel the bitterness of "doing nothing!" What wonder if they are nervous, irritable and diseased. Useful work, or satisfactory employment, is as essential to the health of the mind as to that of the body.

CHILDREN AT HOME.

Nothing concerning the future welfare and happiness of the young is so neglected by parents and guardians as the manner in which their evenings are passed. Darkness is a temptation to evil, and allowing young men and boys to be absent from home when the light of day does not restrain them from misconduct, is in reality training them to it, and will in the future often be productive of incalculable mischief and ruin. In the family circle, however, something more is needed than the mere command, and parents should endeavor by their own example to show the importance of making the evening hours the happiest in the day, for if heads of households do not acknowledge the truth of the proverb, "there is no place like home," how can they expect their children to believe in it? Evening amusement and recreations in the home parlors are decidedly more agreeable and pleasant than enjoyments or dissipations abroad; and honorable and learned men are the product of the one, while miserable and dissipated specimens of the human race are the fruit of the other. Let home be the delightful place it should be, and let the same fascinations and inducements be offered at the homestead as abroad, and a more exalted and creditable class of citizens will be found.

[We would hope most earnestly that parents at the present time, in this State particularly, where there are so many temptations on every hand for the young will awake to their duty, and as it is pictured above, make *Home* the happiest place and thus save their children from harm.—ED. F.]

A NEW THEORY ABOUT FOOD.

A German physician has started a new theory with regard to food. He maintains that both the vegetarians and the meat eaters are on the wrong track. Vegetables are not more wholesome than meat nor meat than vegetables, and nothing is gained by consuming a compound of both. Whatever nutritive qualities they may possess, he says, are destroyed in great measure, and often entirely, by the process of cooking. All food should be eaten raw. If this practice were adopted there would be little or no illness among human beings. They would live their apportioned time and simply fade away, like animals in a wild state, from old age. Let those afflicted with gout, rheumatism and indigestion, try for a time the effect of a simple, uncooked diet, such as oysters and fruit for instance, and they will find all medicine unnecessary and such a rapid improvement of their health that they will forswear all cooked articles of food at once and forever. Intemperance would also, it is urged, no longer be the curse of civilized communities. The yearning for drink is caused by the unnatural abstraction from what are termed "solids" of the aqueous element they contain—uncooked beef, for example, containing from 70 to 80 per cent., and some vegetables even a larger proportion of water. There would be less thirst, and consequently less desire to drink if our food were consumed in its natural state without first being subjected to the action of fire.

Soft Water.

Those who are obliged to use hard water to do washing may prepare it by boiling wheat bran in it. Two or three quarts of bran is put in a bag, made of strong, but thin muslin, tied up and put in a boiler full of cold water, the boiler placed upon the stove, and the water allowed to boil for an hour or so, when it is poured out and the boiler refilled. The bag of bran is again put in and again boiled for an hour or so. This operation is repeated until enough water has been prepared for all the rubbing, boiling, etc. The water in which the clothes are rinsed needs not preparation, but is used as it comes from the well. Ladies who have used hard water for years and have tried lye, soda, sal-soda, etc., tell us that the water washes better and injures the clothes less prepared in this way than in any other in which they have seen it prepared. A bag containing three quarts of bran may be boiled in three boilers full of water, but if more water than this is required fresh bran should be used. The water acquires a softness from the bran that renders it more pleasant to the hand and it is not injurious to the colored clothes, flannels, etc., as when prepared with the alkali.

"Mamma, I don't think the people who make dolls are very pious people," said a little girl to her mother, one day. "Why not, my child?" because you can never make them kneel. I always have to lay my doll down on her stomach to say her prayers."

A POOR GIRL'S HAIR.

A young and poorly clad girl entered a barber shop in Vienna, and told the proprietor he must "buy her hair." The barber examined her long, glossy chestnut locks, and began to bargain. He could give eight florins and no more. Hair was plentiful this year, the prices had fallen, there was less demand, and other phrases of the kind. The little maiden's eyes filled with tears and she hesitated a moment while threading her fingers through her chestnut locks; she finally threw herself in a chair and exclaimed:

"Then take it quickly."

The barber, satisfied with his bargain, was about to clinch it with his shears, when a gentleman who sat half-shaven, looking on, told him to stop.

"My child," said he, "why do you sell your beautiful hair?"

"My mother has been nearly five months ill. I cannot work enough to support us; everything has been sold or pawned, and there is not a penny in the house."

"No, no, my child; if that is the case I will buy your hair, and give you one hundred florins for it."

He gave the poor girl the note, the sight of which dried her tears, and he took up the barber's shears. Taking the locks in his hand he took the longest hair, cut it off, and put it carefully in his pocket-book, thus paying one hundred florins for a single hair. He took the poor girl's address in case he should want to buy another at the same rate. He is only designated as the chief of a great industrial enterprise within the city.

Cut this Out and Save Life.

Who does not value life? and who would not give all their wealth to *preserve health?* for this is life?

What is life without good health? a heavy, weary load of pain and sorrow.

BLOOD IS LIFE!

And the best blood purifier in the world is "David Clarke's Australian Liver Pills," there are no pills manufactured that surpass them in excellence, and are so certain a remedy for all evils that affect the liver or taint the blood—buy only DAVID CLARKE'S GREAT REMEDIALS.

COFFEE GROUNDS AS A FERTILIZER.—A lady of San Francisco received some plants from Mexico, and with the plants came the advice to fertilize them with waste coffee and coffee-grounds. This was done, and the results were so satisfactory that that the same treatment was tried on roses, and the result was "a healthy and vigorous growth and more and better flowers, and of richer colors."

GRAND TRIUMPH FOR EUCALYPTUS.

EUCALYPTUS WILL CONQUER DISEASE.

We publish the following strong TESTIMONIAL in favor of the GRAND REMEDIAL POWER of the Eucalpytus, prepared by DAVID CLARKE, CHEMIST, of Australia.

This Testimonial comes from a prominent Merchant of this City, whose name is with us for reference for all who suffer and would be relieved.

SAN FRANCISCO, April 7, 1879.

EDITOR CALIFORNIA FARMER—*Dear Sir*

Some time ago I had the misfortune to sustain a dislocation of the shoulder received from a fall, and while I was suffering the most acute pain as the effect of it, so much so as to be deprived of my sleep nights, I met my old friend, Col. Warren, who presented me with a bottle of "Eucalyptus Oil" saying as he did so, "try it." "bathe the shoulder and arm well, and on retiring saturate a cloth with the oil, and bind it to your shoulder, and you will have no more sleepless nights on account of pain from that." I followed the Colonel's directions, and must say that the Eucalyptus Oil will do all that is claimed for it as an alleviator of pain (rheumatic and otherwise) and more too.

A preparation made from the Eucalyptus Trees, by frequent ablutions of the eyes will restore weak eyes to strong ones and positively restore the sight as good as ever to people whose eyes are failing, if they will keep their body in good condition by the use of Eucalyptus Pills—while using the eye wash. Yours truly, G. H. B.

N. B.—There are many compounds made in this State, yet however good, the *genuine* Remedials are those prepared by David Clarke, Warwick, Australia, for sale by Warren & Co., Agents.

WEBER PIANOS

.... ARE ....

THE BEST.

What the Great Musicians and Singers say of them.

NEILLSON. I shall take every opportunity to recommend and praise your instruments.

KELLOGG. For the last six years your Pianos have been my choice for the Concert Room, and my own home.

PATTI. I have used the Pianos of every celebrated maker, but give yours the preference over all.

STRAUSS. Your Pianos astonish me; I assure you I have never yet seen any Pianos which equal yours.

WEHLI. Madame Parepa called your Pianos the finest in the United States. I "fully endorse," that opinion. They have no "rival anywhere."

MILLS. Amongst the many excellent Pianos made in the city, the Weber ranks foremost.

LUCCA. Your Uprights are extraordinary instruments and deserve great success.

MURSKA. Your instruments surpass my expectations and I rank you justly as the Foremost Manufacturers of the day.

GODDARD. Your Instruments have no "superior" anywhere. I certainly have not seen any Pianos in America which approach them even.

The Cottage Gem Piano,

Is 7 Octave. Serpentine Mouldings. Carved Legs, and is the BEST PIANO in the market for the price.

$350.00.

The Standard Organ

Has a Beautiful Case, full, rich tone, and for durability

Excels all Others!

Santa Clara College, S. J.

SANTA CLARA, CAL.

THE TWENTY-SEVENTH ANNUAL SESSION OF THIS Institution will be resumed Thursday, January 30.

This Institution was founded in 1851, and in 1855 was incorporated with the privileges of a University. It contains six large buildings with extensive shady playgrounds, covered gymnasiums, swimming pond, etc.

It possesses a most complete philosophical apparatus, and valuable collections of mineralogy and geology. It has also practical schools of Assaying, Surveying, Telegraphy, Photography, and Commercial business. For the latter a new building 150x40 has just been finished that leaves nothing to be desired.

Diplomas are given in two Departments, the Classical and the Scientific, and certificates in the Commercial course.

TERMS—(Payable semi-annually in advance) Matriculation fee, to be paid but once..... $ 10.00
Board, Lodging, Tuition in all branches, Washing and Mending of Linen, School Stationary, Medical attendance and Medicine, Baths, etc., per session of ten months..... 250.00

For further particulars apply to the President of Santa Clara College, or to St. Ignatius College, 841 Market Street, San Francisco

34-1 REV. A. BRUNENGO, S. J., President.

Gatherings along the way side,
Floating gems by every tide.

A LAND OF MAGNIFICENT DISTANCES

[R. M. ROBINSON, in *Harper's Magazine for June*, gives the following sketch of the immense territory owned by the Hudson Bay Company, this information will be new to many, and will surprise all.—ED. F.]

The enormous extent of the territory over which the Hudson Bay Company carries on its trade, and throughout which depots and posts are established, can scarcely be comprehended at a merely cursory glance. From Bembina, on the Red River, to Fort Anderson, on the Mackenzie, is as great a distance as from London to Mecca; the space between the Company's post at Sault Ste. Marie and Fort Simpson, on the Pacific, measure more than 2500 geographical miles; from the King's Posts to the Felly Banks is farther than from Paris to Samarcand. The area of country under its immediate influence is about 4,500,000 square miles, or more than one-third greater than the whole extent of Europe.

For purposes of trade the original chartered territories of the Company, and the vast outlying circuit of commercial relations, are divided into sections called the Northern, Southern, Montreal, and Western departments. Of these, the Northern Department is situated between Hudson Bay and the Rocky Mountains; the Southern between James Bay and Canada, including also East Main, on the eastern shore of Hudson Bay; the Montreal Department comprehends the extent of the business in the Canadas; while the Western comprises the regions west of the Rocky Mountains. These four departments are again divided into fifty-three smaller portions, called districts, each of which is under the direction of a superintending officer, and has a depot fort, to which all the supplies for the district are forwarded, and to which all furs and other produce are sent for shipment to England. These districts are again subdivided into numerous minor establishments, forts, posts, and outposts. Over each of these there is an officer and from two to forty men, mechanics, laborers, and servants. Besides, the Company employs multitudes of men as voyageurs, manning and working the boats and canoes in every part of the territory. The discipline and etiquette maintained are of the strictest kind, and an *esprit du corps* exists between the three thousand officers—commissioned and non-commissioned—voyageurs, and servants such as is only to be found in the army, or in an ancient and honorable service.

The forts and trading posts of the Company are scattered over its immense territories at distances apart varying from fifty to three hundred miles. A better idea may, perhaps, be obtained of their relative positions, and of the isolated lives of their garrisons, by imagining the broad State of Ohio planted in the middle of the fur country. In that event the Company would build one trading post in it.

Our Imports and Exports.

With all the general depression of business over the whole country, and the lessened imports and exports resulting from this depression, the exports of the country have been goin on steadily, though perhaps not as largely as if there was a prospect of a large business in view.

We gather from the United States Treasury reports from the Bureau of Statistics, which we receive regularly by the courtesy of the chief of the Bureau, the following data:

The total exports of domestic products from July 1, 1878, to Feb. 1, 1879, was	$428,003,630
The total imports for same period, seven months	264,928,200
Total gain over imports	$163,075,430
